A petition has been made for a winding-up order in the matter of the Star Mantle Mfg. Co., Limited, of Montreal. The company was organized in the summer of 1903 with an authorized capital of $10,000, which was subsequently increased to $25,000.——C. Dignard, a manufacturer of biscuits and confectionery in Montreal, has assigned. He only began business a year or so ago on moderate capital, but immediately loaded himself up with a heavy debt by the building of quite an extensive factory. His liabilities are said to reach close on to $50,000.——H. A. Dawson, stationer, Montreal, has made an assignment of his estate. Some six years ago he succeeded to a very old-established business, that of the late George Horne, with whom he had been employed, but he has been unable to compete with stronger houses. His main liabilities are in Toronto.

Mercantile Summary.

The Ontario Government has granted a charter to the Pure Color Company, Limited, Hamilton, capital $100,000, E. R. Clarkson and H. E. Ralston, of Hamilton, are among the charter members. The company propose to prepare, import and deal in dry and paste colors for paints, also lubricants and leather dressings.

The Wahnapitæ Power Company, Limited, Sudbury, Ont., has been incorporated with a capital of $250,000, for the purpose of generating and supplying electric current for lighting, heating, and power. F. Cochran and W. McVittie, of Sudbury, are named as provisional directors.

One of the worst failures St. Thomas has ever known occurred this week when J. B. Hill & Co., dry goods dealers of that place, assigned to Richard Lee, of Toronto. The business was commenced years ago by James B. Hill in partnership with one Brown, prior to which Hill had been traveller for a wholesale millinery house. They continued till 1887, when they dissolved and J. B. Hill became sole owner. In September his statement showed assets of $73,900, and liabilities of $48,000, leaving a surplus of $25,900. While the business has been going on until now it has been known that it was carried on under great strain. Among the Toronto creditors are Nisbet and Auld, S. F. McKinnon, and John Macdonald & Co., to the tune of $12,000 in all, while Greenshields, of Montreal, are said to be interested as creditors to the amount of $7,000. At the present a statement shows as follows, assets, $25,000, liabilities, $80,000.

EXPRESSIVE UTTERANCES BY CHAMBERLAIN.

The Edinburgh Castle Hall, at Limehouse, was crowded last night, when Mr. Joseph Chamberlain gave his long-promised address to the East End workers. The building has seating accommodation for only 3,500, but there were fully 6,000 persons present. So great was the press of ticket-holders that there were some ugly crushes at the narrow entrance doors. Mr. C. Arthur Pearson, of the Tariff Reform League, presided, and there were many M.P.'s present.

Here are some of the most striking phrases in the speech:

Is it fair to attack a man on personal grounds who gives time and trouble to preaching a gospel which he believes to be true?

I think I am justified in asking Sir Henry Campbell-Bannerman, if he cannot be a patriot, to try to be a gentleman.

These are not arguments, they are methods of vulgarity.

The greatest evil from which the peo-

1905

Foreword to our Clients.

Looking forward to the new page, 1905—the sixteenth of our united company—you will permit us to express our sincere good wishes to you for success and happiness.

We have also specially to thank you for your constant mindfulness of us during 1904. We have had from you more letters, more enquiries, more orders, more expression of satisfaction and good will than in any previous year.

We feel therefore justified in anticipating that your appreciation will bear the fruit of increased business in the new year, and we are providing accordingly.

Our preparation began early, and as one result the printing department has already placed in your hands "Catalogue 1905" representing as it does the **widest range of manufactures of any Varnish and Paint house in the world.** This is no vain boast, but simply a statement of fact, based on knowledge. In no other country does any one Company manufacture from start to finish all the goods represented by the several great sub-divisions of our trade.

The outcome has been that our Company being "first-hands" in all departments, has established a Standard of value which has **never** been and cannot be excelled in the Dominion.

In offering our goods to your consuming clients we support you to the letter in giving these assurances and you will find their endorsement, as you have done in the past, in a growing demand for our brands.

We have already provided material during the months preceding opening of navigation to an extent never before attempted, and in the interval until you begin to hasten your shipments we will work as busily in preparation as we will later in affecting shipment.

Do not hesitate to speak out when you think we come short of your expectations, this will help to bring us as near to perfection as we hope to get.

Meantime, be assured that we are before you, with you and behind you in our several relations, and we hope to be even more intimately associated than hitherto when page **1905** is written over.

The Canada Paint Company, Limited.

ple of England are suffering is the antiquated policy of our fiscal system.

A policy sixty years old, based upon promises which have never been fulfilled.

Is not a change the order of our being?

The most retrograde Tory in the most retrograde of times never committed himself to such an insane policy of stagnation.

Every civilized state, including every colony under the British flag, has rejected the doctrine of free imports. We, alone, adhere to the old superstition. Are all the rest of the world mad?

There cannot be free trade in goods and at the same time protection in labor.

In addition to unrestricted imports of cheap goods, you are suffering from unrestricted immigration of the people who made them.

The question is not whether this country is richer or poorer, but whether it provides sufficient employment at remunerative prices for all who seek it.

In Ireland agriculture has been destroyed by free trade, and its population has been reduced by one-half.

Is it better to have the loaf a farthing dearer and plenty of money to buy it with, or a loaf for 2d. or 3d. and no money to buy it with?

All this talk of going back to the "hungry forties" is a fraud and an imposture.

What are to be our future relations with our colonies? If we do not grasp this opportunity, and the sceptre of our dominions should pass from our hand, we shall be held responsible by our descendants.

Whether the Liberals are victorious or not at the next election, the question of tariff reform, once raised, will never die.—London Graphic, December 16th.

* * *

—When you hear a professional stockbroker talking of reforming Wall Street, the best thing you can do is to feel for your watch.—The Chicago Inter Ocean.

—"In the great bank of eternity I believe the greatest credit will be given to him who has contributed most to the sum of human joy, who has planted a flower in the fainting heart of despair and kissed it with the sunshine of hope; and who has painted the pallid cheek of care with the rose of health and happiness. Let us therefore, remember the poor with our substance."—Extract from Governor Vardaman's (Mississippi) Thanksgiving address, 1904.

SOLD BY ALL LEADING WHOLESALE HOUSES.

- Henry Disston & Sons, Limited, Philadelphia, saw manufacturers, have been granted an Ontario charter. The authorized capital is $100,000.

The Quebec Legislature has been called for February 9th. It is expected the session will be a short one, as the Government has not any important measure.

The Reading Mining Company, Limited, head office, Toronto, capital stock, $250,000, has received an Ontario charter. I. Hollenbach and H. Kramer, of Reading, Pa., are provisional directors.

Brooks-Smith Hardware, Limited, Toronto, is a company recently incorporated with the object of making grates, mantels, machinery and other hardware. E. J. Creeper, Toronto, is a prominent member.

NOTICE.

Bond Salesman Wanted — For highest class of investment securities only; state age and experience. Address, Box 1001, Monetary Times Office, Toronto, Ont.

News came a few days ago of the appointment of Mr. W. A. Clark, for some eighteen years representative of the Dominion Express Co., at Ottawa, to the position of Montreal manager of the company. On Tuesday last that gentleman was waited on by a number of representative business men and presented with an address and a superb gold repeater and chain. Mrs. Clark was presented with a diamond and emerald ring. The presentation took place in the Board of Trade rooms, Ottawa. The address, which was signed by the Mayor, members of Parliament, and about one hundred business men or firms, was read by Mr. P. D. Ross, chairman of the committee. The warmth of the language in the address, which is unusually well worded, indicates the esteem in which Mr. Clark is held by those who thus honor him. There can be no doubt, we believe, that the promotion is thoroughly deserved.

⁂

MONTREAL MARKETS.

Montreal, Jan. 4th, 1905.

Ashes.—Business in this line has been practically dead for the past fortnight, but the extreme slimness of receipts keeps values steady, and from $5.90 to $5.95 is still quoted for first quality of pots; seconds, about $5.40. Pearls nominally about $7.50.

Dairy Products.—For the last week of 1904 the shipments of cheese via St. John and America ports amounted to 24,865 boxes, and of butter, 134 packages. The butter market rules steady under fair local demand and light new supplies. Finest dairy is quoted at 21¼ to 21½c.; dairy is scarce, and firm at 16½ to 17½c. In cheese values there has been no recent variation. There have been reports of some big business done within the last few days with Britain, but these lack definite confirmation.

Dry Goods.—By the end of the week nearly all the travellers will be on their routes again, and anticipations are general that a favorable spring trade will be done, at the moment, however, the wholesale warehouses show little stir. City retailers report a rather better trade for the last two weeks of December, but taking it all round the holiday trade has not been as good as some years. City paper, however, was well provided for to-day, and applications for renewals from the country on 4th of January payments have not been numerous.

DELAYS ARE DANGEROUS.

The Accident and Sickness Policies

are by far the BEST, CHEAPEST and MOST COMPREHENSIVE in the market.

Full Information Freely Given.

A. C. C. DINNICK, Managing Director.

Furs.—Receipts thus far this season have been on the light side, and no really large lots have yet come to hand, not even of rats. Skunk is in demand, and some revision of prices in that line is probably within the next few weeks. The London January sales began on the 23rd, lasting for the week. We quote for prime pelts as follows: Black bear, large, $12; medium, $8; small, $5; badger, 50c. for No. 1 large; fisher, $5 for No. 1 dark; brown, $4; pale, $3; red fox, $2 to $3.25; silver fox, $75 to $150 for No. 1 as to size; cross fox, $5 to $10 for No. 1; wolverine, $2.50 to $5; lynx, $2.50 to $6, as to quality; marten, $4 to $7 for British Columbia; Eastern skins, $2.50 to $4 for No. 1; mink, $2 to $4 for No. 1; muskrat, 8 to 10c. for fall; 10 to 15c. for prime winter; otter, $8 to $12; fine Labrador pelts would bring $18; coon, $2.50 for fine, black, large pelts, with prices ranging down to 25c. for unprime, poor colored skins; skunk, No. 1, all black, $1.50; short stripe, $1.10; long stripe, 60c.; broad stripe, 20c.

Groceries.—The sugar market continues to show great strength, and further advances are reported in raw beet. Yesterday the local refining companies announced an advance of 5c. a cental on all lines, and judging from the nature of outside advices it is deemed not at all unlikely that a further similar advance may take place at any moment. The factory quotations as they stand at present are as follows: Standard granulated in barrels, $5.45; Phoenix, $5.40; bright coffee, $5.30, with ordinary yellows ranging down to $4.90; above grades in bags, 5c. less; extra ground in barrels, $5.85; powdered, $5.65; Paris lumps, $6. In other lines there is nothing specially new. Prices of dried fruits are held pretty steadily, stocks being in comparatively narrow compass owing to light importations last fall by wholesalers generally.

Hides.—The advance in beef hides as noted last week is steadily maintained, and dealers continue to pay 9½c. for No. 1, 8½c. for No. 2, and 7½c. for No. 3. For lambskins the figure is still $1.10 each.

Metals and Hardware.—Business has hardly yet begun to liven up, and many travellers are still at home. The new year has not developed any noteworthy changes in prices so far. Values in all lines of iron products are very steady, with the possibility of some advance. At the moment there is very little doing in pig iron, a good many foundries, etc.,

Managers and Underwriters.

being shut down for the annual clean-up and repairs. Domestic bars are quoted at $1.75 to $1.80; boiler plate, $2; iron pipe, $4.12 for inch. The market for sheets inclines to increased firmness, but as yet local prices are little altered. Coke tins are quoted at $3.85, and charcoals at $3.90, for standard brands; black sheets, $2.20 to $2.25; Canadas, $2.30; Ternes, $6.25 to $6.50; galvanized, $3.90 to $4. General metals are all about steady at late quotations.

Oils, Paints, and Glass.—Business still rules very quiet, but travellers are all getting out again this week, and a fairly active spring trade is looked for. Not a change is reported in prices. Turpentine remains at 78c. in single barrels; linseed oil, 43 and 46c. for raw and boiled respectively; white lead, $4.40 to $4.50 for strictly pure; glass, $3.25 for first break. Some moderate supplies of the last named article are coming to hand by rail.

* * *

TORONTO MARKETS.

Toronto, January 5th, 1905.

Chemicals, Drugs, etc. — Nothing special calls for comment in the condition of the drug trade. Local business is quite normal for the time of the year. Prices continue firm. Opium continues

Workman's Rights

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer. An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to explain our plan.

quiet, and in quinine, while it is still firm, there is not much movement.

Dry Goods.—The business being done by wholesalers is fairly active, though scarcely so much so of course as it was two or three weeks ago. There is still a somewhat unsettled feeling so far as cotton goods are concerned. Woolens on the other hand are very, strong—stronger than ever, in fact, and retailers are trying to get in hand as good supplies as they can to guard as much as possible against further advances. Payments have not been particularly good, but this is to be expected more or less around the holiday season.

Flour and Grain.—No large amount of trade is passing in the flour trade just now. Ninety per cent. patents sell at about $4.30, or slightly higher, in buyers' bags, with a little higher for extra choice brands. Millfeed is in about the same position as reported last week. Oatmeal inclines to dullness. Ontario wheat is up a cent, owing to a better demand from the millers. Corn has gone up a cent. Buckwheat is 1 to 2c. higher. No other changes are announced.

Groceries.—The situation in sugar is still very strong. A few days ago prices of all grades went up in New York 10c. per cwt., and this was followed on Wednesday in the local market by an advance of 5c. The cause is simply the shortage in most of the world's primary markets. Not very much business is passing at the high prices. General trade in groceries is fairly active, though since the holidays there has been something of a lull. In teas, which retain a certain amount of steadiness, there is comparatively but little actual movement. Coffees show a satisfactory trade, however. Canned goods are very firm, and there is a good enquiry.

Hides, Skins, and Leather. — The quality of the offerings of hides now coming in shows signs of determination, as is usual at this season, but so far, though trade is a little dull, there is no decline in price, similar to the one in Chicago. Calf and lambskins are steady.

(c) Liberal Policy Conditions,
(d) And Expanding Dividends.

Agencies in all principal Towns and Cities in Canada.

Leather men report conditions somewhat unsettled, though improvement is looked for at an early date. It is by no means unlikely that prices will advance from this time on.

Provisions.—There is a firmer feeling in butters, owing to the holiday trade having cleared out stocks, and receipts coming to hand being by no means heavy. Cheese is steady. New laid eggs continue very scarce, and prices are high. Hog products are quiet since the Christmas holidays.

Wool.—Prices remain nominally the same as quoted last week, with no business doing.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.,

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359	per day in number of Claims Paid.
6,297	per day in number of Policies Issued.
$1,303,559.06	per day in New Insurance Written.
$98,582.76	per day in Payments to Policy-holders and addition to Reserve.
$53,841.18	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1 800,000.00.

Another Milestone

Has been passed in the successful history of The Canada Life Assurance Company. Ten years ago the Company issued Policy Number 60,000. Now Policy Number 100,000 has been paid for. While 60,000 policies represented the growth of 47 years, the past ten years have alone produced two-thirds as many.

In assets too, there has been a proportionate growth.

For The Canada Life.

IMPORTANCE OF FORESTRY.

Last week there was held in Washington, D.C., an important congress of those interested in the live and growing question of forestry. Some four hundred delegates are present at this congress: they are from all over the United States and Canada. These are not only forestry educators and Government officials, but, some of them, heads of large lumber companies, heads of wool growers' and live stock associations, presidents of railroads. The presence of such men shows what an advance has been made in the public appreciation of this subject. In the annual report of the American Forestry Association great credit was given to the progress made by Canada in forestry and scientific lumbering. The statement that more than three million young trees had been planted on the western prairies was received with particular applause. Mr. Aubrey White, Assistant Commissioner of Crown Lands for Ontario, was introduced as a representative of "Our sister nation to the north," and gave an address on the methods of fire protection used in Ontario. Referring to the sale of timber limits, he showed how far Ontario was ahead of the United States, where the old "timber and stone law" was still in force. Under this law the Government sells the timber lands at a fixed rate of two dollars and a half per acre, and loses the title to the land. The Ontario method is better, for here licenses are granted for the cutting of timber off Crown lands. These licenses are obtained by competitive bidding at public auction. Furthermore, the Province gets a royalty of one or two dollars for every thousand feet cut. Fire rangers are placed on all licensed lands, half the expense paid by the licensee, and half by the Government. "Without being egotistical," he declared, "I may say that the United States have copied our system of fire ranging."

In the fifth annual report of the Canadian Forestry Association which was held in Toronto last March, we find some very suggestive thoughts on this subject. As the chairman, Mr. Hiram Robinson, said in the course of his remarks, there is nothing that the people of Canada should think more of than securing for themselves that great heritage of Canadians which consists in their forests. The great object of associations of this nature is not merely reforestry, but that perhaps greater matter, the taking care of the forests we already have, and assisting nature in her work; allowing the seedlings to come up and take the place of the older trees, and using every care possible in this respect.

Many of the papers read at the association's meeting are well worthy of being read and digested, not only by those having a direct interest in the subject, but by every Canadian citizen. For example, referring to the value of forestry from a merely dollars and cents point of view, we may cite the address of Dr. A. Harold Unwin, who spoke of conditions in Germany, where perhaps more progress has been made in scientific forestry than in any other country.

> Calling the growing trees in a forest the forest capital, what they take is only the interest or what actually grows each year in wood, and with increased care and better management that capital has been increased in recent years from 26,040 feet board measure to 31,800 feet board measure per acre, and the interest taken greater still in proportion as timber prices have risen. At the present time spruce pays at about 4 per cent. on the capital represented when grown pure under a rotation of 90 years. This is on medium mountain soil in the Bavarian Alps. Fifty years ago these forests had just begun to be used to their full capacity, and before that they had scarcely been touched, being comparatively inaccessible.

The following extract from a speech by the lamented John Bertram will be of interest, as reflecting the views of an unbiased expert upon one point of the present Ontario Government's policy:

> "The policy pursued by the Department of Crown Lands in selling only the white and red pine on licensed lands is

open to question. It is very desirable that on all berths the growth of pine, as the most valuable wood, should be facilitated and encouraged; this can hardly be done by cutting down all the merchantable pine and leaving its place to be taken up by balsam, hemlock, spruce or any other wood covering the ground. Good forestry requires that the merchantable trees of these varieties should also be cut down to allow the seed of the pine to germinate, which it will not do under the close shade of other trees. Hitherto it would not pay lumbermen in many places to cut either hemlock, spruce, or balsam, but now that the price has increased they should be cut down and not allowed to usurp the place of more valuable timber and the same may be said of localities where hardwood predominates. If the pine is cut down and the crown of the forest left intact, then pine will not come up again under its shade, or if it does, will be under stunted conditions."

Here is another good suggestion from the same source:

"It is manifest that a country of rock, interspersed with good agricultural land, which has a population of thrifty farmers, cannot be depopulated even if it could be shown that better financial results would accrue to the holder if it were all kept under forest; the conditions point rather to mixed holdings of greater extent than at present prevail. Instead of trying to make a living as a farmer only, the proprietor should be encouraged to acquire a larger acreage and become a forester as well as a farmer. An ideal condition for the district would be for the proprietor to own say, 1,000 or 1,200 acres; cultivate the really good part wherever found within his boundaries, and keep the rest of it in forest."

⁂

EXPORT TRADE OF MONTREAL.

Statistics of Montreal's export trade must always be interesting to Canadians, seeing that that city is the great entrepot of our out-going commerce for seven months out of twelve. We are pleased, thus early in the New Year to receive the ninth issue of the Gazette's pamphlet concerning the Export Trade of Montreal. This compilation gives comparative figures and other information about grain, flour, live-stock, dairy products, cured meats, dressed poultry, timber, apples, and hay, passing through the port; besides census figures and some account of shipping.

Speaking generally, the trade of Canada outward and inward in 1904 was the largest known in her history. Indeed the strides it has made in ten years are remarkable, as a tabulation will show. Taking merchandise imported and foreign as well as domestic produce exported, the totals for 1894 and for four latest years are as under:—

	Imports.	Exports.
1894	$113,093,983	$117,524,949
1901	181,237,988	196,487,632
1902	202,791,595	211,640,286
1903	233,787,325	225,849,724
1904	251,460,737	213,521,235

But it is important to notice that the gain in 1904 consists entirely of imports, for in that year the exports were twelve millions less than in 1903. During several years ended with 1902 our exports exceeded our imports, a desirable state of things. The two later years have, however, reversed this condition, which is not a matter on which we may properly congratulate ourselves.

Exports from Canada of foreign produce, consisting for the most part of United States grain and dairy products, form but a small share of the total export across the Atlantic, and that small share is declining in its proportion to the whole. In the years 1884 and 1894 respectively it was 11.8 and 11.4 per cent.; in 1901 and 1902 it was 9.62 per cent., and 7.12 per cent.; in 1903 and 1904 it was 5 per cent. and 6.37 per cent.

The commanding position occupied by Montreal in the outward and inward trade of Canada the pamphlet illustrates by the following table. It shows the valuation trade of the principal ports of Canada for the year 1904, on the basis of imports and exports:

	Imports.	Exports.
Montreal	$80,561,275	$67,844,729
Toronto	47,671,288	3,150
Winnipeg	13,242,027	1,044,556
Halifax	8,370,346	9,203,245
St. John	6,663,679	13,318,058
Quebec	8,121,339	5,095,034
Hamilton	9,328,014	....
Vancouver	6,015,540	4,346,635
Victoria	2,998,453	1,071,418

But it is necessary to explain, and this the editor does on page 23, that as all export entries are compiled at the port of exit, and not at the port of origin, the above figures do not fairly represent the relative importance of the several ports in the matter of exports.

Clearly, the figure given above as of Toronto's exports for a whole year is absurd, lacking four figures at least.

As to Montreal shipping, the harbor master's report this year shows a decrease in total tonnage over last year, which has not been the case for several years. Fewer steamers have come to the port, while the same number of sailing vessels as last year arrived. This year 774 sea-going vessels arrived as against 802 last season, showing a decrease of 28 vessels. But the total tonnage has grown steadily for a series of years with the exception of 1904, as follows: 1,393,886 tons in 1900; 1,453,048 tons in 1901; 1,539,404 tons in 1902; 1,890,904 tons in 1903; and 1,856,697 tons in 1904. The tonnage of sailing ships coming to the harbor from the ocean has been declining for years. In inland navigation—the Great Lakes and Gulf ports—10,027 vessels entered at the port last year for a total tonnage of 2,348,496.

It was a poor year for cheese, which is so large an item in Canadian exports; not that the quantity declined seriously but that the price was low, average $6.80 per box as compared with $8.50 and $9 respectively in the two preceding seasons. For nine years there has been an average of two million boxes cheese shipped from Montreal, bringing say fifteen million dollars. Since 1899 the price netted had been going up till in 1903, 2,396,000 boxes brought $21,563,000. But last year the 2,114,639 boxes shipped brought only $14,379,545, a shrinkage of almost one-third.

More satisfactory was butter, which for half a dozen years has been going abroad in larger quantity and bringing generally a better price. In 1897 the exports were only 200,000 packages, bringing $12 per package; in six years ended with 1904 the quantity averaged 414,000 packages, and the price $13.96 per package. In 1901 and 1902, $14.70 per package was realized; in 1904 only $12.90, but the quantity was 490,000 packages, which surpassed any year but 1902.

The exports of cattle, sheep, and horses by the port of Montreal in 1904, though not so large as in some previous seasons were fairly satisfactory in their results to shippers. There were shipped by 205 vessels 112,611 cattle, valued at $62.50 per head; 350 horses, valued at $250 each; 48,075 sheep, valued at $5.50 each;

making a total of $7,380,000. Of the cattle, 13,693 were from the United States.

Timber exports from Montreal were smaller than for any season since 1898, amounting to 153,989,000 feet board measurement, as compared with 231,228,000 feet in 1903, and 240,472,000 feet in 1902.

The grain season was a poor one, the export of United States corn being small, and there being but a small surplus of Manitoba wheat carried over from the 1903 crop. Montreal's total export of grain in 1904 was 13,460,000 bushels, where in five previous seasons it had averaged 26,310,000 bushels. The bulk of the grain exported went to Liverpool, London, Glasgow, and Bristol; other ports were Antwerp, Hamburg, Dublin, Belfast, Leith, and Manchester.

Fluctuating prices made the year a puzzling one in the flour trade, with the result that less was shipped than in the year preceding. The total exported was 1,093,811 sacks and 142,117 barrels as compared with 1,550,419 sacks and 126,205 barrels in 1903. All the flour in barrels went to Newfoundland; the sacks to generally the same European ports as grain, with the addition of 106,417 sacks to South Africa and 25,000 barrels to Rotterdam.

The apple trade showed a marked falling off from the 716,233 barrels and 106,842 cases of 1903 to 342,890 barrels and 31,903 cases in 1904. With the exception of small lots to South Africa and Antwerp they all went to ten British ports—the great bulk to Liverpool and Glasgow.

* * *

MR. WALKER'S ADDRESS.

At the annual meeting of the Canadian Bank of Commerce, held on Tuesday last, the general manager, Mr. B. E. Walker, reviewed the business aspects of the past year and stated the outstanding features at the present time in a masterly way. The first point he makes is that financial conditions in London have had the effect of improving the credit of Canada for securities of a high class. Furthermore, that the ease in money in the United States has created a market for the best class of our securities. "Many millions of bonds which otherwise might have had to await an improvement of conditions in England have lately been sold in the United States. In addition to this, large sales of Canadian securities have been made to international banking houses who have the command of all European money centres as well as of New York." These things indicate the growing ability of the Dominion to carry on great transportation and other enterprises, for it is recognized abroad, probably as never before, that Canada is advancing on no stinted scale, and that she has resources and a population which justify confidence in her future.

At the same time, the effect of our national economies in the five year period 1895 to 1899, shown in an excess of exports amounting to $44,500,000, is contrasted with the results of the similar period 1900 to 1904, which was an excess of imports of $53,300,000, (the latest year showing a concurrence of unusually small exports with very large imports). This marks a serious loss of purchasing power, at the same time that there has been an expansion in our scale of living. This seems to point the moral of the immortal Micawber as to the disparity between income and expenditure.

As to our commercial relations with Great Britain and the United States respectively, the speaker pointed out that while in five years, from 1900 to 1904, inclusive, we bought from Great Britain merchandise to the value of $259,000,000, and we sold to her $579,000,000, we bought from the United States in the same period merchandise to the value of $667,000,000, and sold them $357,000,000. "We therefore practically drew bills of exchange on Great Britain for $320,000,000, and paid $310,000,000 of it to the United States." While these conditions last, Mr. Walker urges, we must try to overcome such a one-sided state of affairs by making as far as possible at home everything that is now bought from the States, and by diverting to our better customer, Great Britain, by preference or otherwise, all the trade we can. The reciprocity of fair dealing is the only kind which Canada has any use for; but it is just the sort which the Americans are not likely to grant.

The minute analysis made in this address of natural and industrial products in the various provinces is extremely interesting. And there are throughout suggestions made of a shrewdly practical character as to actual wastes and possible economies in our management of such important departments of production as the fisheries, (the paragraph on Nova Scotia fisheries is very striking), the forest, fruits, and other sources of natural wealth, as well as in manufactures, in some departments of which we are making noteworthy progress. And a pregnant paragraph bearing upon Toronto and the conflagration of last April contains these words: "Does not the new high rate of insurance show us that it is this community which in the long run loses every dollar in value that was destroyed by the great fire? And if this is true as it clearly is, we should not hesitate to obtain every deterrent to fire that is reasonably possible, and every appliance for its extinguishment that could be made available in the hands of our firemen or ourselves."

Predicting with much confidence a great future for Manitoba and the North-West Territories of the Dominion, Mr. Walker nevertheless insists, with commendable foresight, upon the danger of over-cropping that rich prairie soil and the prevailing neglect of fertilizing, changing its crop, and otherwise resting the land. "Is the rich land of the North-West so rich," he asks, "that it can defy forever these principles of cultivation?" And a word in season is spoken to the farmers as to their increasing mania for owning quantities of land, more, perhaps, than they can either cultivate or easily hold.

There is so much that is instructive in this address—which, by the way, was admirably delivered—that one is almost impelled to say of its author what Doctor Johnson said in his epitaph on Goldsmith. Mr. Walker marshals his facts well, and his deductions from them are generally sane. But he possesses what many people with statesmanlike minds do not possess—the faculty of imagination; we do not mean the word in an artistic or even an ethical sense, but the constructive imagination which conceives remote effects from present causes in the material world, which can anticipate from her present inchoate condition the future greatness of Canada. And that he believes in his country, and is content to work for it is amply shown by the sedulous use of his abilities to discover wherein her growth and development may best be realized.

* * *

Messrs. Ussher, Playfair and Martens, members of the Toronto Stock Exchange, have just moved into new and more suitable offices at No. 3 Toronto Street, in Toronto.

THE BANK OF TORONTO.

Another good year has been experienced by the Bank of Toronto, the statement showing increased resources and very good profits. The capital is now three millions paid up; and the reserve, partly out of current profits and partly out of premium on new stock, is again increased, until it now exceeds the paid capital by three hundred thousand dollars. The vice-president, in moving the adoption of the report, made a brief resume of the statement and gave a condensed review of business conditions. After noting some of the less favorable features of the year attention was next drawn to the new and desirable immigration; the railway construction upon a large scale; the new industrial enterprises being set on foot; the influx of foreign capital; the revival in steel and iron. The aggregate of domestic and foreign trade, Mr. Beatty thinks, will show a very satisfactory increase, and as evidence of this he cited the increase of $63,000,000 in deposits with the banks during 1904, and the increase of current loans and discounts generally by $35,000,000; also the much larger clearings at different cities: in Hamilton, $48,000,000; Toronto, $35,000,000; Winnipeg, $48,000,000 over 1903. Speaking of the growth of Canadian cities, the speaker said: "This improvement in their condition is not being made at the expense of the country districts, but is rather a consequence of the prosperity to be found there. * * * The year has been one of growth and advancement, and this growth has been proceeding upon conservative lines." To replace two directors removed by death, Mr. J. J. Long and Mr. Henry Cawthra, and one who has resigned, Mr. Charles Stuart, there have been added to the board Mr. Robert Meighen, of Montreal, and Mr. William Stone, and Mr. John Macdonald, of Toronto. It is pleasing to notice a contribution by the bank of $7,500 to officers' pension fund.

* * *

THE YEAR IN NOVA SCOTIA.

The trade record of Nova Scotia for the past year has been a very satisfactory one, in spite of the fact that the mercantile failures have been the heaviest in five years. The unsatisfactory portion of the Province has been Cape Breton, where 46 out of the 133 failures in the Province occurred. The depression there was due to a variety of causes, all of which were perhaps, more misfortunes than faults. During the first portion of the year that part of the Province experienced an epidemic of smallpox, and the isolation and quarantining which followed retarded trade greatly. Following that came the strike at the steel works in Sydney, and before that had been settled a pretty large portion of the business time of the year had passed away. The recuperative powers of Sydney were remarkable, however; for the volume of trade during the last four months of the year was equal to any in the history of that city; and the customs collections at the port show an increase for 1904 of $20,000 over the year 1903. Shipments of coal were greater, and importations of ore and limestone were heavier. Very little building was done, apart from that connected with the steel works. The other dark spot on the map of the year's work was the partial failure of the Nova Scotia crops. In the eastern counties the hay crop was an almost complete failure: so much so that the Intercolonial Railway hauled hay free (or practically so) from Quebec to Pictou and Antigonish counties. This took a good deal of money out of the province. The western part of the province suffered in another respect. There the apple crop, though abundant, was of inferior quality. But on the other hand, the products of the province were in value very little behind those of last year, their aggregate being officially placed at ninety-two millions of dollars. Of this the largest items were manufactures, $41,000,000; coal, $13,000,000; fisheries, $8,000,000; lumber, $4,400,000; field crops, $8,000,000; fruits and vegetables, $3,000,000; iron and steel (apparently not included above under "manufactures"), about $6,000,000.

The West India trade, which is the oldest and most distinctively Nova Scotia branch, was very satisfactory in character. Imports from the Islands were considerably increased. The two items of most importance in the list are sugar and molasses, and in the former there was a gratifying increase, the quantity of sugar coming from the West Indies being nearly 5,000 tons greater than in 1903. This trade has been materially aided by the preferential tariff which since the abolition of bounties has helped the importation of sugar considerably.

Among wholesale dealers in dry goods, groceries, and hardware the note is, as a rule, one of cheerfulness. In hardware the volume of trade was slightly smaller than in 1903. The majority of dry goods importers describe 1904 as one of the best in the history of the trade in spite of the bad weather in the earlier part of the year. Word comes, too, of an improved atmosphere in the grocery trade consequent upon less jealousy on the part of wholesalers, and an agreement upon more sensible terms of sale, which latter has helped the profits of the year. On the whole, as our Halifax letter puts it, the conditions of business in Nova Scotia are fairly healthy, and her merchants and manufacturers are looking forward to the present year not only with hope but with confidence.

* * *

THE RUBBER SITUATION.

A good deal of talk has been going on lately among rubber men as to prices, and as to the prospects for their business. For months past the cost of crude rubber has been advancing, and now it stands at $1.17 per pound. This figure of course is absolutely unprecedented, but whether it is likely to show any noteworthy decline is very doubtful. Five years ago the price was 66 or 68c. per pound, and from this it has been gaining a few steps upwards each year. The cause is the amazing manner in which the consumption continues to increase, not only owing to the ordinary demands for rubber goods, but to the fact that new uses are being found for the material almost every month of the year. Then, too, the original sources of supply have become largely exhausted, or rather, with the advance of the "gatherers," the supply has receded further and further back from the accessible rivers along the banks of which it is that the rubber has mainly come. Persistent attempts have been and are being made to cultivate the tree in artificial plantations, and some degree of success appears quite likely to attend these enterprises; but it is hardly to be hoped that the result will make any great difference in the price for some time to come.

The United States Rubber Company came to the decision a few days ago not to increase the price of manufactured goods, notwithstanding the continued increase in the cost of raw rubber. Its lists show about the same quotations as those which went into effect last March. On some heavy goods prices are reduced 5 per cent.; but the extra 5 per cent. discount allowed on orders placed up till June will hereafter have no effect after April 1st. The reasons for this course of the big United States company are stated by its president as follows:—

> "It is to prevent the independent companies cutting into our business. When prices were put so far above the basis of raw material prices the large margin of profit enabled independent companies to offer lower prices. They thus gained our business, waxed fat; and had to be bought out." Now, the rubber company claims to have such excellent equipment and organization that the lower cost of producing the manufactured article gives them a slight advantage over their competitors. This they hope to maintain, and by keeping prices down they hope to increase the volume of their business. In this way their net profits will be, they anticipate, quite up to last year, notwithstanding the high price of the raw material, while at the same time they will strengthen their hold on the markets.

The Canadian manufacturers of rubber met together in Montreal the other day to discuss the situation, and of course the chief topic for discussion was this action of the American company. It is understood that the Montreal gathering arrived at a common ground for action, but that action with regard to the new price schedule was postponed for another meeting next month. One thing seems sure, that there will at least be no reduction in prices. We see by the papers that among those present at the conference were the gentlemen whose names follow: S. H. C. Miner, president of the Granby Rubber Company; D. Lorne McGibbon, general manager of the Canadian Rubber Company; H. D. Warren, president of the Gutta Percha Company, of Toronto; James Robinson, president of the Maple Leaf Rubber Company, of Toronto; Mr. Breithaupt, president of the Berlin Rubber Company, and Mr. Reiter, manager of the Merchants' Rubber Company, of Berlin. We are told that the control of the Boston Rubber Co., of St. Jerome, P.Q., has been taken over by Mr. J. J. Westgate, of the Hudson Bay Knitting Company, for a syndicate of Chicago and other capitalists, whose capital is said to be well on to a million. Probably the present plant will be greatly enlarged, so as to admit, in addition to rubber boots and shoes, of the manufacture of mechanical goods also, made of that material.

* * *

FIRE INSURANCE IN 1904.

That the year just closed was a disastrous one for fire underwriters on this continent is plain. The tabulated losses for the twelve months are put down at $248,000,000 in round figures. This, of course, includes the conflagrations in Baltimore in February, and Toronto in April, amounting to say $70,000,000. But even with this great sum deducted, the fire-waste would still amount to $178,000,000, which is enormously above the $149,000,000 of 1902, or the $156,000,000 of 1903; much more indeed than in any of half a dozen past years. These figures refer to the United States and Canada; what Canada's proportion of the loss is we cannot do more than guess at. But the swallowing up of such sums, year after year—increasing sums, for the fire loss of 1896 was only $115,000,000, and in the next year to that, $126,000,000—do not take place without having a weakening effect upon the prosperity of a people. How long will the people of the United States and Canada be satisfied to see their wealth dissipated at the rate of twelve to twenty millions of dollars per month by carelessness or unpreparedness for fire.

The fire underwriters as a body have without doubt lost money in the year. How many millions cannot yet be stated, but the estimates range from $5,000,000 to $12,000,000. And one thing brought about by the burnings of recent years has been the increasing of the rates of insurance. This is the right and indeed the duty of the companies, for there is neither reason nor right in their carrying on business at a loss. The merchants and manufacturers of the country naturally find the advanced rates onerous, and they are bringing pressure to bear upon municipal authorities to improve water supply and other means of combatting fire. Much is being done in this direction—we wish it could be added that the people generally are becoming more careful as to fire. With the growing congestion of the business centres of cities and towns, the taller buildings, the increased liability to fire caused by commercial pressure and industrial haste, there is greater need now-a-days than ever of increased vigilance in fire avoidance and in fire fighting. The water-pressure which was sufficient twenty or even ten years ago is no longer adequate. Fire appliances that were then good enough are to-day out of date.

* * *

REVISION OF THE INSURANCE ACT.

The Superintendent of Insurance for Canada has indicated in his last report the probability that the revision of the Insurance Act will be made at an early date. This may be taken to mean that the revision will take place at the present session of Parliament. It is timely to say that there are two or three features in connection with the Act which should not be overlooked when it is being revised. One of these is an alteration in the provisions of the present statute relative to the investment of life assurance funds. An agitation has been going on for two or three years by the life assurance companies for a modification of the present investment powers. It is understood that the Department of Finance is favorable to the main proposals of the life assurance companies in this direction. While the provisions should not be too broad, yet they should be sufficiently elastic to permit of a healthy selection of securities.

Another point that appears most desirable is that distinction should be drawn between the regular system of life assurance, and the assessment system of life assurance. In many States of the American Union there are two Acts dealing with life assurance—one dealing with the recognized system, and the other with the assessment and fraternal systems. In the interest of sound life assurance, legislation regarding assessment assurance ought not to be included in the general Insurance Act, because it is calculated to mislead the public by giving it the appearance of being based on the sound and scientific lines on which regular life assurance stands. A suggestion is made that the Minister of Finance and the Superintendent of Insurance will take the life insurance companies into their confidence when the revision is proposed to be made. If this were done, instead of there being any antagonism when the legislation is going through its various stages, there might be hearty co-operation.

THE PROVISION TRADE.

The receipts of dressed hogs since the holidays have been by no means large, but the number coming forward at present is somewhat larger than it was. Prices have advanced 15 to 20c. compared with what they were ten days ago, and select weights sell at $6.40 to $6.50. Heavy weights sell at 25c. less. Trade in hog products has been quiet. Prices, however, remain firm, with an upward tendency in sympathy with the feeling in live hogs. Lard is quiet. Some packers report an accumulation of stocks, and in some cases they are shading prices in order to secure business.

The egg market is very firm, and there is a tendency to advance prices. Stocks are reported light, and, with continued cold weather, dealers look for considerably higher prices. Poultry is quite scarce, probably owing to the fact that all available supplies were crowded upon the Christmas market.

In regard to butter, the continued lightness of receipts has brought about a thoroughly firmer market, especially for best dairies and creameries. Dealers do not look for any cessation in the demand, or recession in price for some time, as it is believed that receipts are more likely to decrease than to increase.

The cheese market is very strong, and the tendency is still upward. Not only does the demand for export to Britain continue to increase, but reports show that stocks are light as well in the United States. These conditions are affecting the market here.

* * *

BANK OF NEW BRUNSWICK.

This bank, incorporated 1820, head office in St. John, is able to make the proud announcement that it has uninterruptedly paid yearly dividends of twelve per cent. since 1886. Its transactions, though not very extensive even now, were in 1886 much smaller. The deposits at that date were $1,030,000, they are now $3,735,000; current loans then $1,733,000, now $3,333,000; the reserve then $300,000, now $800,000. In circulation there is not much difference at the two periods. The capital, which stood at $500,000 eighteen years ago, has never been enlarged, but it would seem that, with transactions so greatly increased a step towards its increase would be not unwarranted. The total assets, in 1886 $2,504,000, are now $5.560,684. The bank was at first intended to be a local institution only, but it has shown some expansion of late years, having taken over another bank, which gave it some agencies in Prince Edward Island. In fact, it has now six branches in New Brunswick and two on the Island. Mr. James Manchester is president, Mr. J. M. Robinson vice-president, and Mr. W. E. Stavert manager.

* * *

METROPOLITAN BANK.

A decided improvement is to be seen in the statement of this bank for the calendar year 1904. Greater activity in business is shown by the increased totals on both sides of the account; circulation is nearly doubled and profits are more than trebled. As compared with the $940,000 of a twelve-month ago, deposits are now upwards of $2,000,000; circulation has gone up from $526,000 to $892,777; the total liabilities are $5,195,817. Turning to assets, the current loans and discounts have grown to $2,834,352, while securities, call loans, balances and cash amount to $2,272,146, a very considerable percentage of readily available assets. We remark also what is probably a desirable feature in the reduction of bank premises and office furniture account from last year's figure of $233,032, to the present figure of $82,889. The net profits of the year were $84.815, a very fair showing. These are carried forward to the debit of profit and loss account.

* * *

CENTRAL CANADA LOAN AND SAVINGS COMPANY.

This company, which has now passed its twenty-first year, continues to show increased totals and to maintain its earning power. The deposits, currency debentures and sterling debentures are all larger than a year ago, and the aggregate of liabilities is now in excess of seven millions. Of the assets, rather more than a million consists of mortgages, about two millions are loans on the security of stocks, debentures and bonds, three and a half millions of bonds and stocks are owned by the company, and there is $390,000 in cash and real estate. The purchase and sale of Government, municipal and other bonds is, the president states, the most important branch of the business, and has contributed largely to the earnings.

These earnings were on a liberal scale in 1904. They amounted to $200,160, equal to more than ten per cent. on the capital and reserve combined; and they were applied in paying to shareholders six per cent. dividend and two per cent. bonus and in placing to reserve $100,000. The paid capital is $1,250,000 and the reserve $800,000. Manifestly, a very active business has been done, and we believe the present is the highest distribution of profits the company has ever made. Reference is made in the president's address to the death during the year of Mr. A. A. Cox, one of the directors. This reduces the number of the board to thirteen, for his place has not been filled.

* * *

IMPERIAL LIFE.

A very satisfactory year's business is disclosed by the condensed statement for 1904 issued this week by the Imperial Life Assurance Company of Canada. From its figures we gather that the company has found the year just past one of progress and prosperity. The new business of $4,205,600 shown is greater than that of any previous year; the cash income from premiums and interest aggregated $698,173, an increase of $120,528 for the twelve months; the assets now total $2,404,940, being an addition of $391,052, while the total assurances in force aggregate $17,672,050.

What is especially noteworthy is the increase in the items of reserves and surplus on policyholders' account. The former now stands at $1,768,706, while the latter amounts to $579,848. These items fully justify the motto of the company, "First and paramount, absolute security to policyholders." Looking over this company's eight years' record we observe a steady growth in premium and interest income, in total assets, and in total assurance in force. The item last mentioned now amounts to $17,672,000, a handsome figure.

* * *

PETROLEA BOARD OF TRADE.

At the annual meeting of the Board of Trade of the town of Petrolea, the following officers were elected: President, R. S. Ford; vice-president, F. W. Wilson; secretary, T. S. Chatterton; treasurer, W. F. Cooper. Council: the officers and mayor, J. D. Noble, J. E. Armstrong, M.P., J. L. Englehart, John Kerr, W. English, Chas. Jenkins, Dr. C. O. Fairbank, Wm. Lowery, Jas. McCort, G. G. Moncrieff, and J. W. McCutcheon. In addition to the present two railways it is expected to have connection with a large road giving greater facilities for factories which the town hopes to have established. Manufacturers looking for a location are invited to correspond with the secretary, Mr. T. S. Chatterton.

* * *

THE COMMERCIAL TRAVELLERS.

Editor of The Monetary Times:

Dear Sir,—A copy of your paper, dated January 6th, has just been handed me, in which I see an article headed, "Commercial Travellers' Association Meeting." The tone of your remarks seem to indicate that you are very much chagrined to find your advice in matters pertaining to our association disregarded.

Your remarks regarding the statements of some commercial traveller: "that expert advice in matters of mathematics is all poppy-cock." I do not know where you heard this remark, as I have never heard anyone make use of anything of the kind in discussing this matter. Next, I beg to say that the members of our association generally are quite prepared to say as much for the services rendered by Mr. J. C. Black in the past for our association as you or anyone else are.

As to your remarks about the person they have put in Mr. Black's place, I refer you to the vote I received. In reply to your insinuations, I would like to suggest to you that at some other time, before attempting to criticize the working of such an association as the Commercial Travellers, you would make some slight enquiry into the basis on which they operate, to avoid leaving yourself open to the statement that you are speaking on a matter that you know nothing whatever about.

I beg to say that our association is conducted on rules that are quite different to the ordinary life insurance; at the same time, we are quite prepared to recognize the principles that the ordinary tables of mortality experience show to be correct.

E. FIELDING.

Toronto, 11th Jan., 1905.

* * *

BANKING AND FINANCIAL.

We learn that Mr. D. M. Neeve, accountant of the Montreal branch of the Union Bank of Canada, has been appointed assistant manager of that bank at Montreal. Mr. C. C. Balfour, accountant at the Toronto office of the Union Bank of Canada, has been appointed accountant at Montreal.

Mr. Percy B. Fowler, manager of the clearing house at Victoria, B.C., kindly sends us a statement of the aggregate clearings at that city for a series of years. The totals were: $30,801,369 in 1901; $28,580,754 in 1902; $30,818,428 in 1903; and $33,070,009 in the year just closed. The year 1904, therefore, shows a marked advance in transactions at British Columbia's capital.

Commenting upon the inconvenience often caused on both sides of the line, markedly so by Canadian visitors to the St. Louis Exposition, in having their money discounted in that city, the Rochester Herald says that a Montreal statesman feels moved to introduce at the next session of the Dominion Parliament a bill "making it a criminal offence in Canada to pass or accept United States money." The Herald acknowledges that Americans are largely to blame for the friction that arises over the discounting or absolutely refusing United States money. As to bills, the American, who is not acquainted with Canadian banks, has some excuse; "but in the matter of Canadian coins, especially the small silver coins corresponding closely to the dime, quarter, and half-dollar of the United States, what difference does it make whether they were issued and are redeemable at Washington or Ottawa? 'You began it,' say the Canadians; and we believe they are correct. It is a phase and a silly manifestation of the too active American disposition to discourage all freedom of trade between Canada and the United States."

The gathering at the thirty-eighth annual meeting of the Bank of Commerce on Tuesday was quite unusual in the number present, and even also in the interest of the proceedings. In the first place, besides the local shareholders, who gather at the average bank meeting in Ontario to the number of twenty to forty, there were on this occasion, many from a distance. There must have been fully a hundred persons present. In part this throng was occasioned by the fact that Tuesday's was the first general meeting in the new board-room, which is the most handsome of all the chambers of the extensive building which growing business has compelled the bank to appropriate to its own use. Also because an extraordinary number of branch managers were present, apparently by invitation. We noticed Mr. Wallace from Halifax, Mr. Mathewson from Montreal, Mr. Stark from Brampton, Mr. Connolly from Dunnville, Mr. Gill from Ottawa, Mr. Charles from Peterboro, Mr. McGillivray from Walkerville, Mr. Fitton from Brantford, Mr. Duff of Guelph, Mr. McKee from Woodstock, Mr. Maynard from Stratford, Mr. Dampier from Strathroy, Mr. Cowdry of Simcoe, Mr. Grasett from Barrie, and Mr. Gray from New York. Very considerately, the general manager called upon two of the Western managers, Mr. Morris, of Vancouver, and Mr. Aird, of Winnipeg, to respond to the vote of thanks passed by the shareholders to the staff, and this these gentlemen did with a good grace. The luncheon given in the bank's dining-room to the shareholders was a crowded function; and we are told that the dinner in the evening at the Toronto Club, where the members of the staff above named were present, was made memorable by the jocose reminiscences of the portly and much-beloved manager of the Toronto branch.

INSURANCE ITEMS.

We are informed that Mr. J. W. Ryder, lately city ticket agent of the Grand Trunk Railway, has joined the forces of the Provident Savings Life Assurance Society of New York. Mr. Ryder's headquarters will be in Toronto.

A Winnipeg exchange notes that Mr. P. D. McKinnon, provincial manager of the Mutual Life, left Winnipeg last week, and will spend a month on a vacation trip. He will go to Ottawa for the opening of the House on the 9th, after which he will visit the leading cities of the east.

We learn from Montreal of a promotion of which sundry people in the far east of the Dominion will be glad to hear. Mr. A. McN. Shaw, provincial manager of the company for New Brunswick, for the Imperial Life, will become provincial manager of Quebec, of that company, with headquarters in Montreal. Those who know Mr. Shaw tell us that he has to his credit long, able service in this company, a long experience in life insurance, and a record of successful management.

In the most recent of the sequence of cases against the Mutual Reserve Life Co., says our Manchester letter, Mr. Justice Joyce ordered the usual rescission of the policy, return of moneys paid, with interest added, and costs in the action. He added that the documents called "literature" in the case were cunningly devised to create a false impression and mislead. He could not avoid the conclusion that Mr. Pedro Merino had been swindled. These hard words have been head-lined throughout the English press.

The R. A. Donald Agency is the name of a new enterprise, the office of which was recently opened at 80 King St. East, Toronto. This agency will, among other things represent the Manitoba Assurance Co., the policies of which company are now guaranteed by the Liverpool and London and Globe Insurance Co. The Manitoba will hereafter write identical lines with the older and larger institution. Associated with Mr. Donald in this part of the work is Mr. John McVittie, who was for years connected with the British-America Assurance Co.

We learn with interest that Col. the Hon. David Tisdale, P.C., K.C., M.P., has just been elected president of the Crown Life Insurance Company. Col. Tisdale was Minister of Militia in 1896, and has had an extensive experience in affairs of a general commercial character. It is stated that the Crown Life has had a satisfactory year's business for 1904, showing an increase in new business over 1903, of business in force of over 35 per cent., in assets of over 40 per cent., and in premium income of over 55 per cent. The death losses, on the other hand, have been 50 per cent. less than provided for.

A complaint about insurance office "mergers" is that while they are excellent for the high officials they are too often barren for policyholders. This cannot be urged against the amalgamating Hand-in-Hand, in England. Under the new scheme all classes of policyholders benefit by rebates on premiums or guaranteed large bonuses on the sums assured. The detail is a little intricate, but one class of assurers gets 25 per cent. off the premiums, another from £2 to £2 15s. added to the bonus annually, and surrender values are likely to be increased. Holders of fire policies also have benefits in store, so that the amalgamation projected is scarcely likely to meet with opposition.

It will be learned with lively satisfaction by the curlers of Toronto that the directors of the Canada Life Assurance Co. have offered to donate a trophy of the value of $700, the same to be known as the Canada Life Trophy, to be competed for in a single curling rink competition, commencing with next year, and to continue for a period of twelve years. The club whose representatives win it the greatest number of times during the twelve years is to become the absolute owner of the trophy. The same is to be handed over to a committee, in trust. This committee, composed of the presidents and secretaries of the city curling clubs, accepted the generous offer, and appointed Messrs. G. S. Pearcy, A. E. Trow and R. B. Rice, representing the Torontos, Granites, and Queen Citys, to be with Mr. Malone a committee of four to arrange details and act with the Canada Life people in the selection of a suitable trophy.

TRADE NOTES.

The annual meeting of the Montreal Horticultural Society and Fruit Growers' Association of the Province of Quebec was held in Montreal a few days ago, when the following officers were elected: Hon. president, Hon. Senator Mackay; hon. first vice-president, Hon. Senator L. J. Forget; hon. second vice-president, Wm. Miller Ramsay; president, R. Wilson-Smith; vice-president, James Morgan.

An influential deputation waited upon the Government at Ottawa last week with what the Premier styled a unique request. It was to reduce the duties on certain lines of woolen goods. Among the delegates were Mr. Garneau, of Garneau, Fils & Co., Quebec; G. B. Fraser, of Greenshields & Co., Montreal; Geo. Sumner, of Hodgson, Sons & Co., Montreal; A. Scott Robertson, of Caverhill, Kissock & Co., Montreal; William Agnew, of W. Agnew & Co., and R. A. Brock, of the W. A. Brock Company, Montreal; Mr. Woods, representing the Gordon, Mackay Company; Mr. Smallpiece, of the W. R. Brock Company, and Mr. Davidson, of the John Macdonald Company, Toronto, and J. W. Little, of Robertson, Little & Co., London. What they wanted was that certain lines of woolens, chiefly ladies' dress goods, be restored to the 23 1-3 per cent. rate under the British preferential tariff. Last session this tariff was amended by increasing from 23 1-3 to 30 per cent. the minimum duty on fabrics, manufactures (not including blankets, bed comforters, counterpanes, or flannels), wearing apparel, and ready-made clothing, composed wholly or in part of wool, worsted, alpaca, etc.; cloths, doeskins, cashmeres, tweeds, coatings, overcoatings, and felt cloth." They claimed that the goods they wished to have restored to the lower rate were of a class not made in this country, so that the reduction would not affect the Canadian woolen manufacturer.

⁂

—The Canadian Pacific Railway is having plans prepared for two new vessels for the Atlantic service. They are to average seventeen or eighteen knots per hour, and each will cost in the neighborhood of a million dollars. It is understood also that steps will shortly be taken to increase the number of vessels in the Pacific service, the business having increased by leaps and bounds, and being already beyond the capacity of the present facilities.

⁂

—Figures giving the output last year of the Dominion Coal Company's mines for the month of December, and for the year are now made public. They show that for last month the production was 199,466 tons, a decrease of 33,254 tons compared with November. The total output of the various mines for the year 1904 was 3,023,522 tons, of which 2,980,037 tons has been shipped already. Curtailment last month compared with November was of course due to the close of navigation on the St. Lawrence.

⁂

—The building record of Toronto in 1904 is one which is satisfactory to read. It surpasses the previous year in that 2,489 permits were given for $5,936,126, where in 1903 they were 2,023 for $4,356,437. A classification of the building permits issued last year shows that there were 1,111 brick dwellings erected, 409 rough-cast dwellings, 20 concrete dwellings, and 33 brick veneered dwellings, a total of 1,573. Besides this, there were forty summer cottages built. The amount of money which these buildings represent is $3,326,152. Twenty-five factories and 42 warehouses were built at a cost of $1,477,450.

⁂

—We learn with interest that Mr. George M. Furby, who has been manager of the Midland Loan and Savings Co. since 1st March, 1882, has resigned on account of ill-health, the resignation to take effect on the first day of January next. Mr. J. H. Helm, who has been a director of the company since 1891, and was, on the 1st August, 1902, appointed assistant manager of the company, has now resigned the directorship, and has been appointed manager as Mr. Furby's successor. Mr. Furby has been appointed director and consulting manager of the company, which will thus have the benefit of his advice and assistance. The resolution passed by the directors on the occasion of Mr. Furby's resignation, contains some complimentary references to his valuable services. "They wish to place on record their recognition of his many high qualifications which have contributed so largely to the success of the company, and especially to refer to his uniform courtesy and pleasant relations with the board."

⁂

—On Tuesday last, in Detroit, there appeared in Judge Fraser's court-room Frank C. Andrews, the unscrupulous speculator who wrecked the City Savings Bank. The Detroit National Bank is suing the Union Trust Co., receiver of the City Savings Bank, to recover on two of Andrews' certified cheques on that bank for $100,000 and $60,000, respectively. Says the News: "Andrews wore his fur-lined overcoat and appeared to be as debonair, but not so nervous, as he did in the days when he was rushing up and down Griswold street, hawking his mining, railroad and other securities at the various banks."

⁂

—The British board of trade has just issued a blue book which will no doubt be received with mingled feelings by the two great political parties in the Mother Land. It shows that the exports from Great Britain to protected countries between 1880 and 1902 increased from 97.8 millions sterling to 100.8, whereas in the same period Germany's exports increased from 90.5 to 129.1, and those of the United States from 52.7 to 88.7. To other than protected countries the exports have increased at a greater ratio from America and Germany than from England. These figures, however, do not necessarily indicate that British exports of manufactured goods are being beaten by American and German manufacturers in protected markets—for the figures relate to all exports, whether manufactures or raw material or food, and as Britain's exports are nearly altogether manufactures, and America's exports are nearly all food and raw materials, the comparison does not mean so much as would appear.

⁂

—The new ice-breaker "Montcalm" is keeping up to her good record, and the Marine Department, who are watching its performance with a keenly interested eye, are greatly pleased. The other day this steamer was confronted with the apparently hopeless task of breaking the jam at Cap Rouge, ten miles above Quebec, where the local ice was two feet thick, and ice-jams piled upon that to a height of fifteen feet, all frozen into a compact mass. The "Montcalm," however, went at it, and succeeded in breaking the key to the jam. This started the jam above, and heavy packed ice afterwards ran down freely. It is believed that this feat demonstrates the possibility of keeping this portion of the channel open. Such an eventuality would mean at least three weeks' earlier navigation of the St. Lawrence in the spring of each year, a boon of no small magnitude to all Western Canada, as well as to the shipping interests of Quebec and Montreal. In fact it would have a strong bearing upon the feasibility, which some eastern people have a strong belief in, of winter navigation of the River St. Lawrence.

⁂

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, January 12th, 1905, as compared with those of the previous week:

	Jan. 12.	Jan. 5.
Montreal	$23,525,040	$24,734,507
Toronto	22,046,357	19,475,551
Winnipeg	7,066,845	7,040,580
Halifax	2,128,630	1,739,749
Hamilton	1,319,507	1,350,571
St. John	1,178,205	1,052,049
Vancouver	1,473,284	1,501,424
Victoria	998,984	520,155
Quebec	1,398,676	1,722,424
Ottawa	1,965,348	2,164,502
London	1,175,326	1,177,955
Total	$64,276,202	$62,479,467

NORTH OF ENGLAND LETTER.

After Mr. J. B. Jackson, of Leeds, had lectured to a meeting in Yorkshire the other day, a woolen manufacturer spoke. He professed to explain why Canada is behindhand in woolens, and here are the words he is reported to have used:

> "We have better machinery. The oldest machinery I have seen was in Canada."

Mr. Whiteley Horsfall, of Halifax, (Eng.), was the speaker, and perhaps somebody in Canada knows to which woolen plants he particularly referred. It is within the writer's own province to know that certain Canadian woolen mills are equipped to admiration. So far as one can tell, it is because of the inferior adaptability of work people that such concerns lag; though it has to be confessed that certain of your woolen factories are close on abreast with many well-fitted, insular ones in the quality of their products.

Truth to tell, there is machinery alarmingly old and decrepit running in mills on this side of the Atlantic. It is not replaced, because with all its defects it can be persuaded by cunning craftsmen to do the work of the day and to put forth large quantities of manufactured material. The Yorkshire manufacturer and the Yorkshire operative perform miracles by sheer sleight of hand. But if Canada is behind in skill and in plant, there is an obvious necessity for drawing level in one or the other if not in both.

The pros and cons of the metric agitation tend to become somewhat of a bore. As your columns have been opened to the matter, I refer to an interview held with Mr. George Morris, of the British Weights and Measures Association, in London, not long ago. It was my business to see him on behalf of a United States newspaper. The gist of the matter is that resolutions, invariably unanimous, and almost always undiscussed, have been passed by all sorts of bodies in favor of a compulsory adoption of the decimal system in this country. The proposition was introduced actually into a Parliamentary bill, from whence it had hastily to be dropped. Now the British Weight Association is fundamentally opposed to the metre, the gram, the litre, and their hideously-named and unfamiliar multiples. It believes firmly in the virtue of the good old inch, ounce and pint, and would by no means have their reign disturbed. If there must be decimals, the Association would favor the decimalization of the standards we use now. But on all counts it declines to be a party to the coming of the metre. Indeed, it is not plain that any compensation for the chaos of a forced change would be forthcoming. Already those who wish to do so may employ metric measures, for their use is permissive under the law. The committee of the body comprises several of the first technical experts in the United Kingdom, and it represents with some fidelity a large half of public opinion in the Old Country.

"The Times" gives publicity to a well-meant letter from a Mr. A. H. Berry, of Winnipeg. The document is worded somewhat unfortunately. British manufacturers are twice commanded to "wake up;" they are told that Americans are capturing a trade beyond their "wildest dreams," and finally that, failing an awakening, they may "sleep forever, for it will be too late." This extravagance of language is lost on my countrymen. The artifice is worn out, and Mr. Berry's prescription for capturing Canadian trade from United States possession is hardly more practical than his appeal to the emotions. There are merchants quite willing to save the busy manufacturer in England the trouble of storing goods in bond in all parts of the Dominion, one does not doubt. Moreover, it is quite plain that only a few articles out of many are capable of being warehoused in the summary, slap-dash way Mr. Berry pre-supposes. To all those inclined to copy Mr. Berry's method in English papers, the writer would say: Be calm, be considerate, be convincing; reserve hullabaloo for consumption in the States.

It is perhaps to be regretted that the attempt to found a line of steamships between Canada and Continental ports has failed. Whether the attempt will be renewed remains to be seen. Meantime the company William Petersen, Limited, of Newcastle-on-Tyne, is in ocean-deep water. Its deficiency is about $820,000, of which $216,000 is not secured. Armstrong, Whitworth & Co., Limited, the great ship-builders, declined to go forward with some assistance they had been lending, and against them Mr. Petersen has issued a writ for damages. Presumably a larger subsidy from the Dominion Government will be asked modestly by the next contractor.

Among the philanthropic schemes promoted this Christmas is one for furnishing funds to would-be immigrants to Canada. Forty dollars, it is calculated, will carry one member of the unemployed to Winnipeg The proposal comes from private sources. A lady closely related to the Minister of War is its sponsor, and it is to be supposed that a few individuals will be shipped out on these terms.

Manchester, Dec. 23rd. NORTH COUNTRY.

⁂

OUR AUSTRALIAN LETTER.

The high prices paid for fine wool at the auction sales here is inducing pastoralists to ship promptly. From July 1st to November 30th, the oversea exports of Australia were 499,056 bales, an increase of 155,283 above the exports of last year during the same period. It is not anticipated that this increase will be maintained for the balance of the season, but it is believed that the excess of this year, as compared with the year 1903-04, will be at least 125,000 bales.

New Zealand, as was expected shows a decline in this respect. The shipments there for the first five months of the wool year being 58,689 bales, as against 67,498 bales a year ago. This is due to the lessened number of sheep in the colony, owing to heavy sales of lambs to the freezing works for the past two years. The prices paid for fine and strong wools are still high, though not quite up to the opening figures.

The central portion of the New South Wales and parts of Queensland are again suffering from lack of rain. The city of Sydney has scarcely had a shower for three months, and the water board of our city is complaining that the citizens are drawing too heavily on their supply.

The other States are in better condition, and are reaping good harvests. Mercantile business cannot be said to be improving much anywhere. It is marked everywhere by keen competition and reduction of prices and profits, and there is no sign visible that it is likely to stop until a business crisis clears the air and brings reason. I do not mean to intimate that anything like a general bankruptcy is likely to occur, but certainly twenty-five per cent. of the traders of both Melbourne and Sydney are superfluous, and that number must go before a healthy state of affairs can be brought about. If the conditions here were as in Canada, a large immigration of farmers with means to constitute them ready buyers, such a reduction would not be essential but the condition is not here and can't be brought about. It would require such a radical change in the policy of the country to secure even an approximation to such a condition that there is not a political leader in Australia who is ready to propose it.

The banks of the country are pursuing a cautious policy and aiding to bring about a national reduction by looking very carefully at securities and particularly industrial securities tendered. It is a question if their example is not bad, and whether they had not better pay less dividends and build up larger reserves? Against four banks this statement does not lie, for with a capital of £6,100,000 these four have a reserve of £4,455,000; but the other eighteen have a paid-up capital, aggregating nearly sixteen millions, and a total reserve of only £1,273,657.

Payment of high dividends is a relic of early times. At a recent meeting of the shareholders of the Bank of New South Wales a statement made by their manager fifty-five years before was recalled. It was that to that date the bank had paid 61 dividends absorbing £306,979 13s. 8d. The dividends were:

One at the rate of £51 7s. 9d. per cent. per annum.
One at the rate of £41 13s. 4d. per cent. per annum.
Two at the rate of £33 6s. 8d. per cent. per annum.
One at the rate of £25 per cent. per annum.
Nine at rates varying from 20 to 25 per cent. per annum.

Sixteen at rates varying from 15 to 20 per cent. per annum.

Twenty-five at rates varying from 10 to 15 per cent. per annum.

Six under 10 per cent., or 61 dividends in all.

The Bank does not now pay 51 per cent. dividends, or even 25 per cent., but it still is a good dividend-paying bank, and last year added two per cent. of its capital to the reserve fund. In 1852-53-54, the bank quadrupled its capital out of profits, and in the eighty-seven years of its existence has never missed paying a dividend, which payments have, from first to last, absorbed close upon ten millions sterling. The panic of 1903 brought up the banks with a round turn. In 1902 two banks paid 10, one 12½, two 15, two 17½, and one 25 per cent. dividends. To-day two pay 10, one 7½, one 4, one 3½, and three nothing for ten years. There was reckless management on the part of men who thought the old golden days would never cease. It is by no means certain that some managers are not yet hopeful that they will return. But they will not.

A good deal of the folly of former times was due to the fact that so much of the stock was owned abroad, and these non-resident stockholders were always demanding the highest possible dividends.

A small lot of British Columbia apples have arrived by the "Miowera." They were carried in cool storage and arrived in beautiful condition. They brought from fifteen to eighteen shillings a box, and first dealers are asking four and five shillings a dozen for them. The sale at these figures is not extensive, but I am not going to withdraw my figures in my previous letter.

The Arbitration Court affairs are in a muddle. That court has given a decision sometimes which a law court upsets, but last week a decision, which the State law courts upheld as good, was upset by the Federal High Court. What with the Unionists paying no attention to the Arbitration Court when its judgment does not please them, and the uncertainty whether some one will not carry the case through the law-courts, employers in New South Wales are on a grid-iron. It is no marvel that the banks look very shyly at industrial securities.

Sydney, New South Wales, F. W.
10th December, 1904.

* * *

TRUST AND LOAN COMPANY OF CANADA.

Editor Monetary Times:—

Sir,—I have read with a good deal of interest in your issue of 23rd ulto., the letter signed "Queen City," on the subject of certain remarks made by the president of the Trust and Loan Company at the last general meeting, and your editorial comments thereon.

As another shareholder of this company, and one who has the privilege of knowing well a good deal of Ontario I would like to point out the manifest unfairness of this letter and of your remarks.

"Queen City" speaks of "the display of ignorance" on the part of the chairman of the Trust & Loan Company, and bases his remark on the following sentence: "It may interest you to know that we have closed our Toronto office as we consider that we have practically exhausted the business in Ontario." But why does "Queen City" quote part of a sentence and omit the balance, which makes the true meaning of the speaker's words apparent?

The omitted part of the sentence shows clearly that the chairman was merely speaking as regards the remunerativeness of the business of the Trust and Loan Company; and that he was quite right in saying that this company had exhausted the business in Ontario from an English loan company's point of view is very easy to demonstrate.

Let us turn to the report of the Registrar of Loan Corporations for Ontario. I have only the copy before me of 1902, and you will find there reported that the average rate secured on mortgages of realty by all Ontario loan companies, (with a permanent stock), was for the years 1901 and 1902, 5.58 per cent. This is a rate which could never be attractive or remunerative to any company obliged to have its head office in England. The present rate of interest on debentures in England for loan companies with the highest credit will average not far short of 4 per cent. It is worth no company's while to come from England to Ontario with moneys borrowed at 4 per cent. to lend them at 5½ per cent., as working expenses cannot be less than 1 per cent., and with some companies are as high as 1½ per cent. The field therefore in Ontario is exhausted as far as companies that have their head offices in England are concerned; and as a shareholder of the Trust and Loan Company, and one who would like to get a good dividend, I rejoice to see the money being removed to more remunerative fields.

I understand the Trust and Loan Company of Canada acts under a Royal Charter, which practically prohibits alteration in its constitution, and is deprived of using the revenue from its reserve fund to pay dividends. As a mere dividend earner therefore it labors under comparative disadvantages with a company like that which you refer to in your article on this subject; but its long record of, I believe, over 50 years with a steady dividend while building up a very substantial reserve fund, speaks volumes for the solidity of this company.

The fact that, except at low rates of interest, the field for loaning money in Ontario is exhausted, ought to be a matter of congratulation as it proves Ontario's acknowledged position in the financial markets of the world. The courts of Ontario, however, have I understand had to authorize your leading trust company to seek investments for its Ontario trust funds in Manitoba. If the field is as extensive as you infer for investments—why does Ontario send its own trust moneys out of its own Province? The answer is given you in the sense of the words of the president of the Trust and Loan Company.

Though I cannot agree with what I regard as "Queen City's" careless and inaccurate interpretation of Sir Vincent Caillard's words, I quite agree with his desire that this gentleman and all English gentlemen who endeavor to direct the affairs of companies in Canada should visit this country and try to learn something of the "Brightest Jewel in the British Crown." The way to attract them, however, is not by perverting into offensive language a few words evidently spoken with no such intention.

"ANOTHER SHAREHOLDER."
3rd January, 1905.

OUR HALIFAX LETTER.

The lumber business in this province, as well as in New Brunswick, has been less extensive than usual owing to the low prices prevailing. Shipments of spruce fell off about six million feet, and of hardwood one million feet, as compared with 1903. It is expected that the cut this year will not be more than one-half of last year, but better prices are anticipated.

The imposition of the surtax, too, probably caused to come from the West Indies the four thousand and odd tons sugar which came from Germany in 1903. In molasses, on the other hand, there was a decrease in imports of nearly nine thousand packages (puncheons, tierces, or barrels), from the previous year. This, however, was not a falling below the average as imports in 1903 were unusually heavy.

The output of coal was about 4,650,000 tons, almost exactly the same as that of the previous year, and about three-quarters of a million tons less than estimated. The only company to show an increased output was the Nova Scotia Steel and Coal Co.; and this increase was small. There was, however, nothing to be secured by a greater output, as there was not a market for it. It is asserted that the Dominion Coal Company alone could increase their output to 5,000,000 tons if necessary. An authority reduces this estimate considerably, but gives the total possible output for all the Nova Scotia collieries at nearly 6,000,000 tons. The problem before the companies is to secure markets for this output.

Failures were heavy, as already stated, and the liabilities were large. The collapse of E. F. Smith, a Halifax stockbroker was of a somewhat extraordinary nature. He had been operating for only about two years, yet had liabilities of nearly $400,000, which constituted one-quarter of the total liabilities of failed traders for the year. Other large failures were those of a dry goods house, Kenny & Co., early in 1904; a lumbering concern, and a commission house, J. N. Creed & Co., in December.

In fishing the year was a good one, while the catch was comparatively small, prices were high. The catch in North Atlantic waters—a great part of which passes through this port—was between three and four hundred thousand quintals short of the average, the Nova Scotia bank fishery alone being about 75,000 quintals short. This shortage, following upon an almost equally bad condition the previous year, and coming on top of the small Norwegian catch, has made a record high price for fish. As high as $6.25 per quintal (or about six cents per pound) has recently been paid here for cargo lots of Newfoundland cure cod, ex-vessel. Notwithstanding the high prices which have prevailed for the past two or three years, it does not seem to have affected consumptive demand, exporters here having to refuse contracts for delivery before Lent, although fancy prices were offered, because they could not see where the fish were to come from to fill them. There has been no serious cutting of prices, and dealers and fishermen both stand to make a good thing out of the catch this year. Every year more of the Newfoundland catch is coming this way.

In dry goods, groceries and hardware, the note is one of cheerfulness also. In hardware few losses of much importance were reported; one of the largest firms in the Province putting down their total loss by bad debts at not more than three or four hundred dollars. Collections were not unsatisfactory. One old hardware firm, Black Bros., has retired from the field and a new one, Douglass and Prowse has entered it. Small failures were somewhat frequent in dry goods circles, but were looked after pretty sharply. The business during the early part of the year was adversely affected by bad weather, but the summer and autumn business was good. The same may be said of the grocery trade, and there has been less cutting and more unanimity (with, certain exceptions) than usual. Some months ago the grocers in the Province agreed upon new terms of selling, which will hereafter be practically 30 days net. The turnover has been nearly if not quite as large as in the previous year, and profits have been better, particularly in flour and sugar. A good spring business is looked for.

The conditions of business in this Province are mainly healthy, and our people look forward to the coming year with hope and confidence.

HALIFAX.

Halifax, N.S., 9th January, 1905.

CALGARY AND ITS PROSPECTS.

A tribute was paid to Calgary in the course of the address of the general manager of the Canadian Bank of Commerce this week. He referred to Calgary as being, next to Winnipeg, the place which showed most markedly the growth of the West. We note, among other evidences of the development around that place, that a citizen, Mr. Cook, an extensive rancher and cattleman, has gone East on his way to Great Britain. The special object of Mr. Cook's journey is said to be to float a company with a stock of $500,000 for the purpose of establishing a large chilled meat plant at Calgary. The activity of the town and neighborhood is very great. At no time, probably, has Alberta seen so much "hustle" and so great an influx of settlers as in 1904. At the meeting of the Western Immigration Association, at Winnipeg, a week ago, Mr. G. C. Porter, editor of the Herald, Calgary, one of Alberta's delegates, said that every line of business shows encouraging conditions. "We are making preparations to take care of the greatest influx of settlers since the West was opened. The reports to the C.P.R. and the Board of Trade from the Western States show that the movement will start unusually early in 1905. The district around Red Deer and High River seem to be favored by Americans."

Commenting on the excellent prospect for fall wheat, he said one man in Macleod has put in 10,000 acres, and a large number of men around High River have from one to five thousand. Farmers from Washington and Oregon, and other Western States, where this variety of hard winter wheat is produced, are coming into Southern Alberta for the purpose of cultivating this crop. The C.P.R. sold one block of land near Calgary containing 54,000 acres of land especially adapted to this line of agriculture. An American colonization company made this purchase under guarantee to put a large number of settlers on the land. J. S. Dennis, assistant to Vice-President Whyte of the Canadian Pacific, has, during the fall, sold 50,000 acres of the same block to individual farmers. This is not the land being opened for irrigation purposes, but is too high to be covered with the big irrigation canal which the company is developing.

* * *

NIAGARA POWER.

The new power-house of the Canadian Niagara Power Company, in Queen Victoria, Niagara Falls Park, was formally opened on the 2nd inst., and two 10,000 horsepower units of its first installation of 50,000 were put into actual operation. The company has a contract with the Ontario Government which calls for the construction by the 1st of this current year of a tunnel with a capacity for the discharge of water producing 100,000 horse-power; a canal or intake from the river with a capacity for 50,000 horse-power; a wheel-pit with a capacity of 50,000 horse-power, and 20,000 electrical horse-power ready for sale and transmission. The works, however, have been constructed on a larger scale than called for by these requirements, and the company has a canal, tunnel and wheel-pit complete for the development of 110,000 horse-power. The other three units will be ready for commercial use also by May 1st of this year, and there will be room in the completed wheel-pit for six additional units of the same size. At the inauguration ceremony there were present the chairman, Mr. J. W. Langmuir; park commissioners, Robert Jaffray, A. W. Campbell, James Bampfield, George H. Wilkes, superintendent James Wilson, William H. Beatty, president of the Canadian company; A. Monroe Grier, K.C., secretary and solicitor; W. H. Brouse, director; Messrs. D. Coulson and J. Henderson, of the Bank of Toronto, and Messrs. Edward D. Adams, Francis Lynde Stetson, Edward A. Wickes and William B. Rankin of the board of the Niagara Falls Power Company, and several others. A very enjoyable time was spent at luncheon, Messrs. Geo. Urban, jun., and Charles R. Huntley, of the Cataract Power & Conduit Company, of Buffalo, De Lancey Rankine, general manager of the Tonawanda Power Company, and the engineer of the company.

* * *

—The Canadian Trade and Commerce Department has received a report from the commercial agent of Canada, in Japan, Mr. Alf. McLean. He states that Japanese trade reports show that Japan's exports to Canada declined from $1,742,900, in 1902, to $1,461,770 in 1903, while imports of Canadian goods into that country decreased from $258,637 to $249,500. The total trade between the countries shows a net decline of $700,000.

—Looking over the 1905 calendar of the Guardian Assurance Company, we find some information in it that is perhaps unusual and may be of interest to Ontario readers. The statutory holidays are given, applicable to the whole Dominion, and the Province of Quebec holidays are given as well. For example, there are kept, as obligatory, in that Province, the Epiphany, or "Old Christmas," on 6th January; Ash Wednesday, 8th March; All Saints' Day, 1st November; Conception, 8th December. These fete days are in addition to the Dominion holidays, which are as under:

21st April, Good Friday; 24th April, Easter Monday; 24th May, Victoria Day; 1st July, Dominion Day; 4th September, Labor Day; 25th December, Christmas Day. Here is a list of ten holidays in all. Our Quebec friends do not appear to have any cause to complain of being "bound upon the wheel" of grinding labor.

Meetings

THE CANADIAN BANK OF COMMERCE.

The thirty-eighth annual meeting of the shareholders of The Canadian Bank of Commerce was held in the banking-house, Toronto, on Tuesday, 10th January, 1905, at 12 o'clock.

Among those present were:

William Cook, Carrville; Thomas Gilmour, Rev. Wesley Casson, Robert Kilgour, J. L. Blaikie, Hon. George A. Cox, P. Freyseng, William B. Hamilton, W. Cooke, Lt.-Colonel Mason, J. W. Flavelle, C. S. Gzowski, W. Prendergast, John Hoskin, K.C., LL.D.; H. D. Warren, William Glenney, Oshawa; J. Short McMaster, Hon. L. Melvin Jones, A. W. Anglin, R. Cassels, R. Harmer, A. Kingman, Montreal; J. O Thorn, W. W. Tamblyn, Bowmanville; Robert Gill, Ottawa; John Catto, A. V. Delaporte, E. P. Gower, Berlin; F. J. D. Smith, Newtonbrook; Mrs. F. J. D. Smith, Newtonbrook; J O. Ireland, E. Cowdry, Simcoe; John Pugsley, Charles Powell, H. H. Morris, of Vancouver; Wm. Davies, James Hedley, L. H. Dampier, Strathroy; Thomas Walmsley, John Taylor, N. Silverthorn, E. Cronyn, Cawthra Mulock, H. L. Watt, E. W. Cox, Charles Bonnick, William Garside, Douglas Mason, Alex. Bruce, Hamilton; W. T. White, Henry Beatty, Thomas West, John A. Bruce, Hamilton: R. Mulholland, Rev. Armstrong Black, D.D.; Frank Everist, W. Harland Smith, J. L. Watt, W. T. Boyd, Hon. Mr. Justice Maclaren, J. K. Macdonald, E. R. Wood, T. A. Staunton, G. A. Morrow, Guy R. Warwick, W. H. Lockhart Gordon, George F. Little, L. J. Cosgrave, William Craig, S. R. Wickett, H. P. Dwight, F. C. Malpas, Cranbrook; Henry Johnson, Hastings; William Ross, John A. Morton, F. H. Mathewson, Montreal; Rev. Dr. Warden, Lieut.-Col. H. M. Pellatt, S. J. Moore, John A. Walker; G. W. McKee, Woodstock; J. T. Parker, Richard Brown; C. M. Gripton, St. Catharines; George J. Foy; William Gray, New York; John Carrick, John Northway, F. Wyld, H. C. Hammond; R. G. W. Conolly, St. Catharines; Dr. Andrew Smith, George D. Scott, A. W. Smith, H. N. Wallace, Halifax; D. McGillivray, Windsor; D. Hughes Charles, Peterboro.

The president, Hon. George A. Cox, having taken the chair, Mr. F. G. Jemmett was appointed to act as secretary, and Messrs. R. H. Temple and E. Cronyn were appointed scrutineers.

The president called upon the secretary to read the annual report of the directors, as follows:

Report.

The directors beg to present to the shareholders the thirty-eighth annual report, covering the year ending 30th November, 1904, together with the usual statement of assets and liabilities:

The balance at credit of profit and loss account, brought forward from last year, was	$ 165,559 14
Net profits for the year ending 30th November, after providing for all bad and doubtful debts, amounted to	1,124,973 66
	$1,290,532 80

Which has been appropriated as follows:

Dividends Nos. 74 and 75, at seven per cent. per annum	$ 609,000 00
Written off bank premises	127,806 41
Transferred to pension fund (annual contribution)	25,000 00
Transferred to rest account	500,000 00
Balance carried forward	28,726 39
	$1,290,532 80

The entire assets of the bank have been, as usual, carefully re-valued, and all bad and doubtful debts amply provided for.

The earnings for the past year have been even more satisfactory than usual, and after writing off for bank premises $127,806.41, and making a contribution to the pension fund of $25,000, we have been able to add $500,000 to the rest.

During the year the bank has opened new branches as follows: In the city of Winnipeg, a branch on Ross Ave. and another on Portage Ave.; in the North-West Territories, at Lloydminster in Saskatchewan, Moosejaw in Assiniboia, and Nanton in Alberta. Since the close of the bank's year a branch has been opened at Claresholm in Alberta, and arrangements have been made to open in the near future at Melfort in Saskatchewan.

Your directors have concluded that the time has come when the balance of the unissued stock necessary to bring the paid-up capital of the bank to the authorized amount, namely, $10,000,000, should be issued, and a circular intimating this intention has recently been directed to the shareholders.

The various branches, agencies and departments of the bank have been inspected during the year.

The directors have again pleasure in recording their appreciation of the efficiency and zeal with which the officers of the bank have performed their respective duties.

Geo. A. Cox,
President.

Toronto, 10th January, 1905.

GENERAL STATEMENT, 30th NOVEMBER, 1904.

Liabilities.

Notes of the bank in circulation		$ 7,680,947 68
Deposits not bearing interest	$18,003,420 09	
Deposits bearing interest, including interest accrued to date	52,455,931 37	
		$70,459,351 46
Balances due to other banks in Canada		138,758 50
Balances due to other banks in foreign countries		242,631 86
Dividends unpaid		882 42
Dividend No. 75, payable 1st December		304,500 00
Capital paid up	$8,700,000 00	
Rest	3,500,000 00	
Balance of profit and loss account carried forward	28,726 39	
		$12,228,726 39
		$91,055,798 31

Assets.

Coin and Bullion	$2,800,326 19	
Dominion notes	5,301,692 00	
		$ 8,102,018 19
Deposit with Dominion Government for security of note circulation		400,000 00
Notes of and cheques on other banks		3,635,085 29
Balances due by other banks in Canada		10,692 50
Balances due by agents in Great Britain		5,894,865 42
Balances due by agents of the bank and other banks in foreign countries		2,103,565 34
Government bonds, municipal and other securities		7,313,648 34
Call and short loans		10,460,092 59
		$37,919,967 67
Other current loans and discounts		51,458,163 16
Overdue debts (loss fully provided for)		305,293 38
Real estate (other than bank premises)		63,237 15
Mortgages		220,626 86
Bank premises		1,000,000 00
Other assets		88,510 09
		$91,055,798 31

B. E. Walker,
General Manager.

In moving the adoption of the report, the president said:

President's Address.

Your directors are pleased to be able again to meet the shareholders with a statement exhibiting continued prosperity on the part of the bank. The profits are larger even than those of either 1902 or 1903, being $1,124,973, or nearly 13 per cent. on the capital. It is to be remembered, however, that in 1903 there had been a fall in the market prices of all high-class securities, which affected our profits for that year, while in 1904 there was a rise in bond values, and as we have sold a good many securities the profits for 1904 have to some extent gained at the expense of 1903.

We are still building bank premises on an extensive scale. Not only do the branches, which are being established in the newer parts of Canada, make heavy demands upon us, but in the older parts, in towns where ten or twenty years ago we would, for various reasons, not have felt warranted in owning our own premises, we now find it wise to erect buildings and to differentiate them in architecture as much as possible from other business structures. Apart from the pressure of these demands, we believe that in years of prosperity it is wise to turn back into the business in this shape some of the profits made, rather than to add them to the rest or to the dividends and to starve the bank in the matter of buildings.

The pension fund of the bank is now about ten years old, and, as was contemplated at its inception, we have had it actuarially examined. The examination, as we expected, makes it evident that the amount to be contributed by the bank must increase as the number of officers who contribute to the fund increases, and we shall ask the shareholders to approve of a present increase in the annual payment from $15,000 to $25,000, with power to add to this in future, if increases in the staff render this necessary.

Notwithstanding these heavy charges we have been able to add to the rest the sum of $500,000.

Our deposits have increased during the year by $7,675,000, bringing the total up to $70,000,000, and the funds at our disposal up to $91,000,000. It will be observed, however, that less than a million dollars of these additional resources have gone into our ordinary current loans and discounts, showing that the demands of our merchants and manufacturers are not increasing as rapidly as in other recent years. Most of the increase in funds at our disposal is represented by call loans, by increased balances at the disposal of our London and United States agencies, by securities and by cash.

We have opened during the year five new branches.

Your directors have, as you know, passed the resolution under which the balance of the increased capital stock authorized by you last year, viz., $1,300,000, is to be issued to the shareholders. This will make the paid-up capital $10,000,000, and the premium on the new shares will be sufficient to bring the rest up to $4,000,000. The shares are being issued at 140, our freedom of action in this respect being limited by the Bank Act, which fixes a maximum price dependent upon the proportion of the present rest to the present paid-up capital. It may seem strange that in a year when the demand from our ordinary borrowing customers is less than usual, we should conclude to issue the balance of our stock, but, in the first place, our power of circulating notes is being used as closely as is practicable in such a large bank, and, in the second, we believe that the demands in the West, and in the East, growing out of the development of the West, will be large enough in the early future amply to justify such a capital.

Vice-President's Remarks.

Mr. Robert Kilgour: In seconding the adoption of the report, I would call attention to the position of the bank in comparison with the statement published in 1894, ten years and six months ago.

The capital at that time was $6,000,000, and the rest $1,200,000. With the additional capital now being subscribed, it will be $10,000,000, and the rest $4,000,000, making the capital and the rest almost double what they were in 1894.

The assets at that time were $28,182,000. At present they are $91,055,798. We had at that time 43 branches, we now have 112. In 1894 the branches were all in Ontario—with the exception of those in New York, Winnipeg and Montreal. At present, they reach from the Atlantic to the Pacific Coast, and we are now doing the leading business on the Coast.

The staff in 1894 was 385, at present it is 840. The funds now controlled by the bank are over three times as large as they then were, and the branches almost three times as many, while the staff is over double the number they were at that time. These facts of themselves indicate the necessity for the increased capital of the bank.

For this most gratifying increase in assets and business, the shareholders are indebted not alone to the splendid services of the president, general manager, and assistant general manager, but also to the loyalty and most efficient work of the staff.

The general manager then spoke as follows:

Address of the General Manager.

The year began with the feeling that our prosperity had for the moment reached its maximum, and had been checked in some respects; and that while prosperity would doubtless continue, it might do so only on a somewhat lessened scale. At the end of the year, although many unfavorable features which could not have been foretold have appeared, we are more confident as to the immediate future than we were a year ago.

Conditions in Great Britain and the United States.

In Great Britain the conviction was growing that at last the cost of the South African War had been borne, so far as its strain on the London money market was concerned, and that reasonably soon the effect of Chinese labor in the Rand mines would cause the return to London of that stream of gold which reached it before the war. These we now see were sound views, but the money market early in the year was called upon to bear a new strain in the war between Russia and Japan. It is true that public opinion soon realized that Great Britain would probably not be drawn into the war, but the London bankers knew that Russia and Japan must obtain in some market a large part of its cost, whether in money or supplies, and as unusual amounts of foreign money have of late years been used in London because of the high rates, wherever Russia or Japan might borrow, London was likely to feel the effect. Money rates have therefore remained comparatively high, and each short period of ease has made plain the fact that there is no lack of securities waiting a favorable moment for flotation. Naturally the investor has become unusually exacting, and British municipalities which have been freely mortgaging the future to buy franchises, and Colonial and other Governments desirous of making ambitious public improvements, are discovering great difficulty in obtaining money. By comparison, this has had the effect of improving the credit of Canada for securities of a high class, but the price, owing to the higher interest expectation in London, is often less than the investors on this side are willing to pay.

In the United States, while at the beginning of the year there was scarcely a cloud upon the prosperity of the West, the East had been sharply punished in Wall Street, many speculative industrial bubbles had burst, many legitimate industries had experienced a falling off in orders, labor troubles presented a serious menace, and a Presidential election was close at hand. The business and political developments of the year in the United States, however, have been mainly of a character aiding recuperation, so that the present outlook is much clearer and better than a year ago. The stoppage of speculation caused money to accumulate rapidly, rates for call money falling at moments below one per cent. per annum. A great demand arose, the best in many years, for the best classes of bonds; the railroads, which in 1903 desired to make improvements on an unusually large scale, or had done so and owed the money in short-timed obligations, now found their financial course made much easier; large orders for steel, iron and other railroad supplies followed; crop conditions, especially in cotton and corn, were most favorable; labor troubles lessened; and the much dreaded Presidential election proved the tamest struggle for many years. One of the main reasons for the quiet Presidential election was the fact that both aspirants represented sound money. Indeed, it seems as if free-silver and all unsound currency views are at an end for the time, doubtless for an indefinite time, in the United States; and owing to her possessions and growing trade in the Asiatic East, the United States is becoming interested in the great question of unifying the currencies of China, and in the efforts of Mexico, a country by which so much of the silver used in the East is provided, to get upon a stable currency basis. This tendency throughout the world toward sound money is very gratifying, and it is to be hoped that the debts arising from the present war may not be too strong an influence in the other direction.

The great facts in transportation in the United States are the payment for and the preliminary steps towards the building of the Panama Canal and the beginning, on an important scale, of the electrifying of steam railroads. It is scarcely possible to measure what the canal will accomplish for Oregon, California and the Hawaiian Islands, in the trade movements of which this bank will doubtless continue to be largely interested.

Conditions in Canada.

Turning now to Canada, it may be well, before dealing more or less in detail with the various parts of the country, to refer to a few broader features. The check to speculation and to new enterprises would doubtless have made money much easier early in the year, but for the changed position of our foreign trade. The ease in money in the United States has created a market for the best class of our securities, and many millions of bonds which otherwise might have had to await an improvement of conditions in England have lately been sold in the United States. In addition to this, large sales of Canadian securities have been made to international banking houses who have the command of all European money centres as well as of New York. Not only are these facts of great significance to the general credit of Canada, but they are a sufficient warrant of our ability to press with unusual vigor the many important enterprises in transportation now being or about to be carried on. Our outlook was never before so large in scope or so hopeful; nevertheless, there are many minor features which are not in themselves favorable to rapid progress, and the effect of these may be partially seen in our exports and imports. I do not need to tell you that the amounts of the imports and exports of a country are not in themselves evidences of the presence or absence of prosperity. If this country, for many years to come, were to import more than it exports, the debts created to pay the balance might represent very wise investments. And where there is a large volume of capital, sometimes in the shape of money and sometimes of machinery or merchandise, coming into a country to represent investments by settlers or by foreign capitalists, it is not possible to state the real position with even reasonable accuracy. But to the extent that a decline in exports represents a real decline in purchasing power, and that an increase in imports represents expansion in the scale of living, our foreign trade figures are very significant indeed. In the five years from 1890 to 1894, inclusive, years mostly of expansion, the excess of imports was $76,500,000. In the next five years—1895 to 1899, inclusive—three of which were years of close economy, the excess of exports was $44,500,000, the last year showing a slight excess of imports. In the five years from 1900 to 1904, inclusive, all fiscal years ending in mid-summer, the excess om imports was $53,300,000, the first two years showing a small excess in exports. Of this $53,300,000, however, $45,600,000 is for 1904 alone, and it was apparently only by the concurrence of unusually large imports and unusually small exports that such a wide difference was possible. The difference of $45,600,000 was a little more than $30,000,000 more than for 1903, and this was caused by an increase in imports of nearly $18,000,000 and a decrease in exports of over $12,000,000.

There was a loss in exports of wheat of about $10,000,000; in dairy products and eggs of $3,000,000; and in cattle, bacon and other products, after some individual increases, the net decrease is about another $3,000,000; in fisheries $1,000,000; in lumber and kindred products $3,000,000. It is true these were partially offset by large gains in the net results from the products of mining, and by gains in many minor classes of agricultural products, but even after having regard to a largely increased consumption at home, there was clearly a serious loss of purchasing power as compared with the previous years. And, except in the very important article of wheat, the year 1905, ending at midsummer, is likely to be a repetition of 1904.

One might have expected to see this loss of purchasing power reflected in the imports, but we cannot trace it there. Of the $18,000,000 of increase in imports almost $5,000,000 is for coal, and while some of this may represent increase of business, much is doubtless part of the permanent loss arising from the unusual winter. Under about thirty headings, of which twenty-five are manufactured goods, we find large increases. Of these one of the most regrettable is nearly $2,000,000 for lumber, because of conditions in the United States referred to later. The decreases are represented by about twenty headings. Of these eight, representing $2,500,000, are for products of iron and steel and for agricultural implements, the reason for the decrease being both gratifying and obvious. Seven other headings represent raw material or foodstuffs.

The subject of reciprocal trade relations with Canada is now being discussed in the United States more widely than at any recent time. The Chamberlain proposals which, if put into action, seem to involve further preferences by Canada to Great Britain, are used freely as a reason against further delay. Many special and mainly selfish reasons are being urged, such as those advanced by the United States millers who, to save their grades, require our wheat, and would in any event like to be the manufacturers into flour of our raw material, wheat; while a few journals state plainly the disagreeable truth that several decades of unfairness to Canada are not a good basis for a treaty, now that the smaller country has markets for its products and desires to manufacture most of the articles which it now imports from the United States. Unusual emphasis is given to the sudden desire for reciprocity by the regulations we have been forced to make to prevent the dumping into this country, to the ruin of our own manufacturers, of goods sold here at prices much lower than in the country of manufacture.

A few figures will illustrate the peculiarities of our relations with Great Britain and the United States. In the five years from 1900 to 1904, inclusive, we bought from Great Britain merchandise to the value of $259,000,000, and we sold to her $579,000,000. We bought from the United States in the same period merchandise to the value of $667,000,000, and we sold them $357,000,000. We therefore practically drew bills of exchange on Great Britain for $320,000,000, and paid $310,000,000 of it to the United States.

Now this is a very pleasant state of affairs for the United States, and if it were likely to be permanent, reciprocity treaties might not be heard of. But it is so palpably unfair that we shall, of course, bear it only while we must. While it lasts we shall try hard to overcome such a one-sided state of affairs by making as far as possible at home everything that is now bought from them, and by diverting to our better customer, Great Britain, by preference or otherwise, all the trade we can. If, however, as seems probable, there is growing up in the United States a sentiment in favor of fairer dealing with us, this great disparity in figures may be lessened. Fair dealing, especially having regard to the permanent relations of the United States and Canada, suggests that we be allowed to pay as largely as possible for what we buy with what we have to sell, and if this were so the United States would take our coal, lumber, fish, cattle, and cereals free of duty. This would make the trade between the two countries reciprocal. But is this what our friends in the United States are striving for? It does not seem to us that any other kind of reciprocity would be of interest to Canada.

We may now devote some attention to the affairs of the various parts of Canada.

The Maritime Provinces.

In the Maritime Provinces the results either in yield or in price, from the farm, the fisheries, and the forest, were in almost all parts more or less unsatisfactory. We have not in many years had a record of disappointment so unvaried in these branches of industry. Farmers in these provinces are better off only in a few localities, and while there are but few relatively who have had to break into the savings of the past, the majority have had a year with no material advancement. The very extraordinary winter left its mark in many ways. The important article of hay did not yield more than half a crop, and the pastures have been in a poor condition. This involved the purchase of hay elsewhere in large quantities, and the sale of cattle where farmers could not or did not wish to buy hay. Cereals of all kinds did badly; the fruit crop was, on the whole, satisfactory in quantity, and fairly so in quality, but prices have been very unremunerative indeed. In fishing, an industry so important that the lack of intelligent interest in it by inland Canadians is deplorable, the results are somewhat better than last year, but not what they have been in the past. In cod-fishing there is an improvement over last year, but the catch was still quite unsatisfactory, this being attributed by some to lack of bait. The handling of the fish trade by the exporters shows quite a renewal of vigor. When we consider that the fisheries of Nova Scotia produced, in 1903, about two-thirds as much wealth as the coal of Nova Scotia, twice as much as iron and steel, two and a half times as much as the forest, only a trifle less than the field crops, and as much as the orchard, the dairy, live stock, wool and eggs combined, is it not desirable that we should recognize more fully the necessity of conserving and increasing by every means in our power this great source of national wealth? In lumber, prices for deals have fallen badly, while products suitable for the United States and South America have done well. In consequence of the drop in deals, large stocks will be held over, and an attempt is being made to lessen the new cut by about one-half. In coal mining, the large output of recent years has been maintained with a moderate increase, and prices have continued to be satisfactory. In most lines of manufacturing the volume is not lessened, and business continues to be satisfactory, especially with the large establishments which look to Canada as a whole for their market. In some of these the volume of business last year was the greatest ever attained.

In the important industries of iron and steel, great progress has been made in lessening the cost of production, and although labor troubles seriously affected a situation already difficult enough, the outlook for profitable results is more promising than at any previous time. Business in general, although curtailed by the unfavorable conditions of which we have been speaking, including the prolonged strikes, has been fairly good. Trade with the West Indies has been increased, aided by a reduction in inland transportation charges, especially in the proportion of such rates to our ports, as compared with Boston. Large shipments of flour and other products are now being made. The importance of this is obvious, and we are glad to know that the Halifax Board of Trade is carefully studying the needs of the West Indian islands with a view to further trade conquests. We have no sub-tropical area, while the United States has enormous advantages in such a national possession. How carefully then should we consider the possibilities both industrially and politically of these British Islands in subtropical seas, wanting so much that we can produce, and capable of producing so much that we want.

Ontario.

In Ontario the severe winter and cold spring destroyed much of the winter wheat, and the yield was so small that the higher prices did not compensate except in a few districts. Other grain crops, hay and pasturage, and roots, have done very well on the whole. These, however, are used mainly for cattle, and while prices for cattle were at one time satisfactory, later conditions in Great Britain caused the price here to drop, so that many farmers who were not in a position to feed over the winter have sold at unremunerative figures. The price for hogs has also been less favorable to the farmer than in recent years.

In the dairy we have had one of the worst years ever known for the dealers, and a bad year for the cheese makers. A large and expensive stock held over from last year was sold at a great sacrifice, and new cheese had in consequence to be marketed at a low range of prices. This being the case the quantity made fell off rapidly. In butter, the conditions were more favorable, and this to some extent mitigates the situation, but, taken as a whole, the money return is between five and six million dollars less than in 1903. Since 1896 the lowest money return for cheese in any one year was $12,065,000, the highest $21,563,000, and in 1904 $14,380,000. In butter the lowest return in the same period was $2,697,000, the highest $7,936,000, and in 1904, $6,325,000. These figures, of course, apply to all Eastern Canada and not to Ontario alone.

There was in Ontario, as elsewhere in Eastern Canada, a bountiful crop of apples, but the return to the grower has been unusually bad. We hear in every direction of apples left lying on the ground to rot or unpicked on the trees because it would not pay to pack them for the market. Still the best grade of apples will at almost any time bring a good price in Great Britain. Why do we not sort them and grade them so that the best qualities may be clearly separable in price from the poorer apples? If we did, it is probably not true that the good qualities would ever fail to be worth shipping. Do we not ruin the price ourselves by glutting the market with unassorted apples, good and bad, when it would always take the best of the crop at much better prices relatively than we now receive, and would generally take the balance, if honestly graded, at as good a price as such fruit should bring? The shipments to December were only 1,200,000 barrels, against 2,300,000 for the same period in 1903.

Thus far the record of those whose work is the foundation of the prosperity of the nation is distinctly less bright than usual. The total amount of money paid to farmers for their products in 1904 was many millions less than in 1903 and every dollar short represents a corresponding deficiency in purchasing power, debt-paying power or power to save. Except, however, in a few districts where there are low-lying lands and where for two or three years the results have been disappointing, there is no actual failure to make progress. In some towns sales have been smaller, but this is not the usual condition. The situation may be summed up by saying that as a rule the farmer has been able to pay his debts, but not to add to his savings bank account. He has not paid the merchant, and sometimes not the implement maker, quite as well as in recent years, but there are few requests for money on mortgage.

The lumber situation in Ontario and Quebec has shifted somewhat from the record during recent years of increasing prices and increasing cost of production. Great Britain seems unwilling at the moment to pay as much for thin boards, or as much relatively for deals, as the United States, where the demand is good at satisfactory prices. If this causes the quantity shipped as deals from Quebec to show a considerable decline, it may result in the trade of that province, once so largely in square timber, becoming in the main one of thin lumber. With the decreased British demand, the trade is not quite as good as last year, and it is hoped the cut this season may be curtailed and the cost somewhat lessened.

The reports from towns and cities in Ontario, with few exceptions, indicate a large and prosperous volume in trade and manufacturing—not markedly different, indeed, from that of the previous year. It is true that some admit loss of trade from the deterrent effects of the severe winter and the poor crops in the East, and while some have still further added to their plants and very many report still larger sales than in 1903 many more are well satisfied in having repeated the sales of that year. The maintenance of this high volume in the face of a reduced purchasing power in the East has doubtless several explanations, but the prominent reasons seem to be the increasing demand for all classes of goods from the West and the confidence in the immediate future of Canada in view of the immigration, the extensive railroad building, and the fact that the outside world begins to understand the opportunities we have to offer to energy. As in all recent years, labor has been scarce, skilled labor particularly so.

In Toronto the volume and profits of business, taken as a whole, were of course largely interfered with by the great fire, and in addition to the losses naturally following this, the business community is called upon to bear unusually high insurance rates because of the heavy losses borne by the insurers. The losses by the railroads from the unusual winter have caused an increase in freight rates. The rebuilding of the burnt area and of the numerous extensive establishments outside of this area, has brought about a perfectly natural rearrangement of warehouse and manufacturing premises, but no doubt in many cases the new rent charge will be heavier than the old. Taking the poor crops in the East also into account, there are several important elements of an unfavorable character in business here, but they are apparently outweighed by the rapidly increasing buying power of our great West.

Before passing from this reference to our great fire, it is well to consider what we are to learn from it. We seem to take great satisfaction in blaming the insurance companies for increased rates, and even some of our city aldermen have the hardihood to join in these harsh criticisms. It is the business of fire insurance companies to insure people for a rate which will yield them a profit, and if they make a profit they can be indifferent to the loss of ten or twelve millions of dollars by one fire, but can we? Does not the new high rate of insurance show us that it is this community which in the long run loses every dollar in value that was destroyed by the great fire? And if this is true, as it clearly is, we should not hesitate to obtain every deterrent to fire that is reasonably possible, and every appliance for its extinguishment that could be made available in the hands of our firemen or ourselves.

Manitoba and the North-West Territories.

Although the farmers in Western Canada were more prosperous in 1904 than their Eastern brothers, this is mainly due to the high prices for wheat. The winter, the worst in twenty years, marred the results of both farming and ranching in many districts. The late spring delayed seeding so that early prospects were not good for cereals. Fine weather following changed the outlook to one so good that the wheat crop was estimated as high as 75,000,000 bushels. Cool and damp weather in August developed rust, mainly in southern-central Manitoba, and in consequence of this estimates were made, sometimes by honest people unduly alarmed, but sometimes by speculators seeking to affect the price, as low as 35,000,000 bushels. We see no reason to alter the estimate made by our Winnipeg manager and given in October to the English press. He along with other good authorities placed the total of wheat at about 60,000,000 bushels, worth about $40,000,000. Other grains and hay have done as well, both in yield and price, as in 1903, and represent about another $10,000,000 in value to the farmer. While in a few districts, where the rust was most serious, the poor yield and low quality affected the result to the farmer, and collections by merchants and others have been unsatisfactory, yet the majority of farmers had crops of about the same quantity with a larger money value, and, the acreage being increased, the total result in money from wheat considerably exceeds the return either in 1902 or 1903. Many farmers did not, however, pay ordinary debts as well as in other recent years, because of the unusual load carried through new land purchases. When land values are rising and settlement is being made so rapidly it is very natural that the hitherto successful farmer should desire to increase his holdings, but, having regard to the ability of one farmer of ordinary capacity to deal satisfactorily with more than a certain number of acres, there seems to be no doubt that this is being done to an unwise extent. Many farmers are assuming in this way a load of debt which may trouble them seriously some day, and they are apparently repeating the experience in Ontario, by abnormally raising the market price of the land they buy, by their eagerness to acquire large holdings. The farmer, however, has more reason for his investments in land with the consequent load of debt, than the ordinary business man in town and city. But if we can judge by the evidence coming before us as bankers, the mania for owning land as a speculation instead of a permanent investment is widespread in the West. This must add to the legitimate advance in values a very unhealthy further advance, and punishment will inevitably come for all that is unsound. The West, in a word, is so prosperous that it has altogether too little fear of debt, and when more transactions are on a cash basis, values will be more certain, even if they are somewhat lower.

The acreage to be seeded next spring will be much larger than in any previous year, and the autumn work in preparation has been done under most favorable conditions. In view of the many contingencies possible, it is perhaps useless to estimate the yield, but if not better average results are obtained than those of 1902, 1903 and 1904, the total yield of wheat in Manitoba and the Territories for 1905 should not be less than 80,000,000 and with favorable conditions may reach 100,000,000 bushels. What with new land producing surprising yields per acre, and varied climatic conditions due to the enormous area of the country in parts of which wheat is being grown, we may reasonably expect that each year will produce at least such an average as will mean prosperity to the farmers as a whole. Having regard, however, to the steadily falling yield per acre and the decline in quality of the grain grown upon wheat lands in the United States, what are we to learn regarding the older wheat lands of Manitoba? The existence of rust to a serious extent in the most settled part of Manitoba may have no connection with its wide prevalence in the United States. Our best authorities say that the unusual quantity of rust in Manitoba and Eastern Assiniboia was due to the abnormal weather, and therefore is only likely to recur for that reason alone. But whether this be true or not, is it not true that some of the farmers in Manitoba, by over-cropping, are killing the goose which lays the golden egg? Have we not been taught that land must be fertilized, changed in crop from time to time, and rested otherwise occasionally, or else that it will fall in yield as some of the older parts of the United States have fallen? Is the rich land of the North-West so rich that it can defy forever these principles of cultivation? Surely it is not, and it is to be hoped that with our magnificent record for quality, and our otherwise splendid position as wheat growers, we are not destined to drop from our high level merely because we are unwilling to face the truth and do what it commands.

The conditions of wheat production in the United States, to which we have referred, accompanied by an unusually lean crop for 1904, have caused a further relaxation of the regulations under which Canadian wheat may be ground in bond in the United States for their European flour trade, and wheat has also, to a small extent, actually been imported from Canada, and the high duty paid, in order to produce satisfactory flour for home consumption. These are significant facts. Some day we shall help to feed the vast population of the United States, and a duty on our foodstuffs will be impossible of maintenance. In the meantime let us attend faithfully to our present satisfactory markets, which can be securely kept only, as in any other business creating merchandise, by producing the best article possible.

Little that is satisfactory can be said of the cattle trade, whether as it affects the ordinary farmer or grazier in Ontario and Manitoba, or as it affects the rancher in the Territories. The winter was one of the hardest on cattle for many years. Prairie fires in the previous autumn had destroyed large areas of grass in the ranching country, and the spring following the severe winter was most unfavorable. Owing to the large herds driven in from the United States many of the cattle on the ranges were in a strange country and ill prepared to take care of themselves in such unusual conditions. These exceptional disadvantages might, however, have been borne, but the low prices in England and the prolonged strike in the cattle trade in Chicago, combined with the other misfortunes to make a very bad year for both the producer and the middlemen. In the most southerly part of Alberta and in British Columbia, the unfavorable winter features were absent and the cattle had an excellent season.

So much has been written about Winnipeg that little need be said here. The population grows with astonishing rapidity, and all precise records, such as those of Clearing House totals, Inland Revenue and Customs, Post Office statistics and the value of buildings erected, make it clear that it is destined to be a commercial centre of commanding importance.

Calgary, Edmonton, and the towns lying between, are all growing rapidly, the growth of Calgary being the most noticeable, and comparing favorably with Winnipeg, having regard to its previous proportions. Mixed farming and dairying in this district are producing a good class of farmers and while the crops this year are not more than an average, prosperity is evident almost everywhere.

The new settlers in the North-West, as shown by the official records from 1st January to 30th November, were about 97,000, chiefly in the Territories.

British Columbia.

For many years to come one of the most important industries in British Columbia will be supplying the Territories with lumber. For the time being, although the demand from the Territories is very large, the supply is excessive. To a great extent, and perhaps altogether, this is due to the large over-production in adjacent parts of the United States, and to the lack of any protection to our manufacturers, who, on the other hand, cannot enter the United States without paying duty.

There has been a handsome increase in the quantity of coal mined, and this great business is in a prosperous condition. The mining and smelting of metalliferous ores is probably in a sounder position than ever before. High prices for copper, increased knowledge of the technical features of mining, a sufficient supply of coke, and the absence of share speculation in untested or worthless properties are the satisfactory features. The least favorable is the uncertainty as to the permanence of reasonable relations between the mine owners and labor.

As 1904 is the last year in the four-year period which so affects the Fraser River, only a small catch of salmon was expected. The actual catch of 458,000 cases is not more than a third of the great catch of 1901, and even this result is largely due to the fishing in the northern rivers being exceptionally good. The failure on the Fraser River is the more serious because the hatcheries were not able to obtain even approximately a sufficient supply of eggs. It is believed that the authorities are now aroused to the necessity of repairing the effects of the grave negligence of the past, but unless this is promptly done, both for the partially exhausted areas of the Fraser River and for the still excellent northern rivers, we may lose for many years to come one of the greatest possessions of our Pacific Coast. There are great possibilities in other fish besides salmon, and to some extent our United States neighbors are already alive to the fact.

The output of gold from the Yukon, and other northern fields in Canada, is about the same as last year, and this affords a valuable trade to British Columbia.

Business as a whole is prosperous in British Columbia, and while the population is small relatively to the enormous territory they have to develop, the province is so full of unusual resources that it cannot fail to make steady progress.

Pacific Coast States.

The three States on the Pacific Coast in which we are interested have all been prosperous, although the conditions are more variable than usual.

In Washington, as we have intimated, the lumber business—one of its most important industries—has been rendered unprofitable for the time being by over-production, and in salmon canning it has experienced the same very unsatisfactory results as in British Columbia. The high prices for wheat and hops, and the large crop of the former, are among the favorable features. The trade with the North has been well maintained, but the war between Russia and Japan has interfered considerably with trans-Pacific business. On the whole, business has not been as good as in 1903, and still less so than in 1902. The prospects as far as can be seen for 1905 promise a better return in lumber, owing to an improved Eastern market, and in salmon.

Oregon has been more prosperous even than usual. An excellent wheat crop with high prices, high prices for hops and wool, improvement in mining, and an unusually large pack in salmon are sufficient evidences. It is in Oregon that most intelligence has been shown in the propagation of salmon, and although this year some of the ordinary regulations were suspended, interfering seriously with the work of the hatcheries, still if we and the State of Washington, interested as we are together in Puget Sound, are willing to learn from Oregon, we may yet succeed in so caring for our salmon areas as to produce a catch year by year with at least no greater risk of variation than in wheat.

California has had continued prosperity, although, as in Washington, there have been some adverse features. Wheat and barley, uncertain crops at all times in this State, gave very low yields. The crops of grapes have been very large for the past three years, and the pack of canned fruits is steadily increasing. In lumber there has been large over-production in Douglas fir, the trade in which has suffered correspondingly, but the trade in redwood and sugar pine is increasing in volume and is satisfactory as to profits. The Hawaiian sugar trade, which is largely centered in San Francisco, has been unusually successful, and the prospects for next season are excellent. Coast-wise shipping has been profitable, but trans-ocean shipping is suffering from several causes, chief among them being that the high price in the Eastern United States for grain has caused wheat to go by rail in that direction instead of over sea to Europe, or in the shape of flour to Japan.

General Remarks.

I must apologize for the unusual length of my remarks regarding the various parts of North America in which we are interested. The features which are gratifying and those which are not so agreeable are both numerous, and the situation in detail is much more difficult of explanation than in most years. The fact, however, which outweighs all points of detail is that with an unusual number of natural products yielding less than normal returns, the total result is a year of decided progress. We have not hesitated to set out in detail many features unfavorable because of conditions peculiar to the season and beyond our control, and especially such results as with increased knowledge or industry might have been improved. The confidence of Canadians in the future of their country is so great that we need not fear by such criticism to lessen it materially. We are in far worse danger from a disposition to expect too early results from our energies, and to purchase rather in relation to what we think we shall shortly be able to afford, than to what we can afford at the moment. But it is hard to resist this hopefulness when we have regard to the progress of the last ten years. In that time the business of banking in Canada has increased as much as in the preceding eighty years. The deposits of the people have not merely grown enormously in the aggregate, but they have grown from $52.16 per head to about $99.50. The bank note circulation which, owing to the rapid multiplication of branches, must in the East at all events be shorter-lived than ten years ago, has nevertheless grown from $6.25 per head to about $11. In the same period our foreign trade has grown from $48.36 per head to abou $84.25. With the tide of the world's land-seekers set at last towards our North-West, with our national credit in the world's money markets at its highest, with plans for transportation adequate in scope at least for the immediate future, it is perhaps natural that we should need more of warning than encouragement.

The motion for the adoption of the report was then put and carried.

Moved by Dr. Hoskin:

That this meeting hereby confirms the action of the board of directors in increasing from $15,000 to $25 000 the bank's annual contribution to the pension fund for the employees of the bank, and authorizes such further increase in the annual contribution as may from time to time be rendered necessary by an increase in the number of employees who may be contributors to the fund.

In moving the resolution, Dr. Hoskin said:

The policy of the shareholders, as shown in this resolution, should commend itself to all concerned. The general manager will make some explanation which will render it unnecessary for me to say anything further.

This is one of the many plans adopted by the bank in the interests of the staff, and it has the effect of tending to create and foster loyalty and faithfulness on the part of the staff, the members of which will have the assurance that the shareholders and the management desire to look after and to care for those who loyally and faithfully serve them.

Mr. Flavelle:

"I have much pleasure in seconding the resolution."

The general manager then gave some explanation regarding the establishment and scope of the pension fund.

Moved by Mr. Justice Britton:

Seconded by Mr. N. Silverthorn:

That the thanks of the meeting are due and are hereby tendered to the president, vice-president, and other directors for their careful attention to the interests of the bank.

Mr. Justice Britton said:

"I beg to move a resolution that perhaps sometimes has the appearance of a formal resolution, but in this case, having heard the remarks of the general manager, I feel that it is more than this. When we consider the administering of over ninety-one millions of dollars and the extent of territory over which this money must be used—and used to profit—I am sure we will understand the vast responsibility that rests upon the president and his co-directors and upon every official of the bank."

It was then moved by Mr. J. L. Blaikie, seconded by Mr. J. A. Bruce:

That the thanks of the meeting be tendered to the general manager, the assistant general manager, and other officers of the bank for the satisfactory discharge of their respective duties during the past twelve months.

Mr. Blaikie: I also have a resolution entrusted to me which very fortunately for me and very fortunately for you, requires no argument to persuade everyone here present. and all the shareholders outside, if they were present, to vote for enthusiastically. The vote of thanks that has been just passed to the directors is well merited, but we all know that however able a body of directors may be, that, after all, we must mainly depend upon the executive officers of the bank, the general manager and his assistant and the staff.

We have all listened, sir, to-day, with a great deal of interest and pleasure to the whole proceedings, and certainly with very great interest to the admirable address of Mr. Walker, the general manager. Mr. Walker has travelled far afield; from the Atlantic to the Pacific; he has touched upon almost every conceivable branch of industry in the country with which this bank is interested; he has done so with a great deal of ability, and it has been a most edifying and instructive address. Only think, sir, of some 800 employees of the bank. The general manager and his assistants must be in touch with every manager; must know something about them all; must know how they are discharging their duties. It is a tremendous undertaking. The splendid result produced, the grand profit, the good dividend, the handsome surplus in addition to the reserve fund should make every shareholder thoroughly well satisfied that they are indebted to the general manager, his assistant, and the whole office staff. I therefore have much pleasure, sir, in moving this resolution and furthermore let me in the name, I believe of everyone present, wish you, Mr. General Manager, and your assistants, a really happy New Year, and it will be all the happier if the results at the end of the year turn out even a little better than they have been this year.

In replying, Mr. Walker, said: I have to thank you for myself and on behalf of Mr. Laird for this resolution. We have a number of our managers from different parts of the country with us, and it has occurred to me that on this occasion it would be desirable that the response should come from them. I will, therefore, ask Mr. John Aird, our manager at Winnipeg, and Mr. H. H. Morris, the inspector at Vancouver, to reply on behalf of the staff.

Mr. Aird: I am sure I appreciate very much the privilege which has been given me of replying to this resolution on behalf of the staff in Manitoba and the North-West Territories.

As you know the bank has been doing a good deal of pioneer work in the West in districts which are not and have not been settled, where the comforts of life are not as great as in the older and more thickly populated parts of the country. I can assure you that the duties which these men have discharged are quite onerous and they have been well and faithfully done. I do not think that in any part of the country there is a more loyal staff than in Manitoba and the Territories. I thank you again on behalf of the staff.

Mr. Morris said: I am very glad to have the opportunity to respond to this resolution on behalf of the staff in my district, which is that west of the Rocky Mountains, extending as far north as Dawson and down into the United States to San Francisco. I have been associated most closely with the staff in this district from the time of the amalgamation with the Bank of British Columbia, and I am glad to say that, as far as the staff is concerned, the amalgamation has been an unqualified success. The dividing line between the former staff of the Bank of British Columbia and that of the Canadian Bank of Commerce has entirely disappeared, and in considering transfers of officials from one point to another it is never considered whether or not an officer was originally a member of one staff or the other. I can say without reservation that there is certainly not a more loyal section of the staff than that to be found west of the Rocky Mountains.

Moved by Mr. Kilgour, seconded by Mr. Kingman:

That the meeting do now proceed to elect directors for the coming year, and that for this purpose the ballot-box be opened and remain open till 3 o'clock this day, the poll to be closed, however, whenever five minutes shall have elapsed without a vote being tendered, the result of the election to be reported by the scrutineers to the general manager.

The meeting then adjourned.

The scrutineers subsequently reported the following gentlemen to be elected as directors for the ensuing year: Hon. George A. Cox, Robert Kilgour, W. B. Hamilton, M. Leggat, James Crathern, John Hoskin, K.C., LL.D., J. W. Flavelle, A. Kingman, Hon. L. Melvin Jones, Frederic Nicholls.

At a meeting of the newly-elected board of directors, held subsequently, Hon. George A. Cox was re-elected president, and Robert Kilgour, vice-president.

⁂

THE BANK OF TORONTO.

The forty-ninth annual meeting of the stockholders of the Bank of Toronto was held at their banking house, corner of Church and Wellington streets, on the 11th January, 1905.

In the absence of the president, George Gooderham, Esq., the vice-president, William H. Beatty, Esq., was called to the chair.

The general manager, Mr. Coulson, was appointed secretary, and Messrs. E. M. Chadwick and George G. Mitchell were appointed scrutineers.

At the request of the chairman, the secretary read the following report:

Report.

The directors of the Bank of Toronto have pleasure in presenting the forty-ninth annual statement of the affairs of the bank:

STATEMENT, 30th NOVEMBER, 1904.

Profit and Loss Account.

The balance at credit of profit and loss, on 30th November, 1903, was		$103,193 64
The net profits for the year, after making full provision for all bad and doubtful debts, and deducting expenses, interest accrued on deposits and rebate on current discounts, amounted to the sum of	$445,425 91	
Premium received on new stock	45,570 00	
		$490,995 91
		$594,189 55

This sum has been appropriated as follows:

Dividend No. 96, five per cent	$148,443 70	
Dividend No. 97, five per cent	148,978 85	
		$297,422 55
Taxes paid to Provincial Governments		4,920 00
Transferred to Officers' Pension Fund		7,500 00
Written off bank premises		25,492 95
Transferred to rest account from profit and loss account	$100,000 00	
Transferred to rest account from premium on new stock	45,570 00	
		$145,570 00
Carried forward to next year		113,284 05
		$594,189 55

Rest Account.

Balance as on 30th November, 1903	$3,154,430 00
Transferred from profit and loss account	100,000 00
Premium on new stock	45,570 00
Amount at credit on 30th November, 1904	$3,300,000 00

The business conditions of the year have, on the whole, been of an encouraging character. The resources of the country are being steadily developed; immigration continues to add to its population, and the industry and enterprise of the community are being rewarded by increased wealth and prosperity. The bank has shared in the general welfare and its business has made satisfactory growth.

The balance of new stock has been paid up in full, and the paid-up capital now stands at $3,000,000. From the premium on this new stock, and from the profits of the bank, the directors have been able to transfer to the rest account $145,570, making the amount of that fund $3,300,000.

Since our last annual meeting branches of the bank have been opened at Oil Springs, Queen and Parliament streets, and Queen street and Bolton avenue, Toronto; Preston, Keene, a sub-branch at Allandale, and a branch is about to be opened at Galt.

The directors have to report with sincere regret the removal by death during the year of two valued members of the board: Mr. John J. Long, of Collingwood, who was appointed to the board in 1902, and Mr. Henry Cawthra, of Toronto, who had been a director for over twenty-eight years. The vacancies thus caused have been filled by the appointment of Mr. Robert Meighen, of Montreal, and Mr. William Stone, of Toronto.

The branches of the bank have all been inspected during the year.

All of which is respectfully submitted.

GEORGE GOODERHAM,
President.

D. Coulson, General Manager.

The report was adopted, and the thanks of the stockholders were tendered to the president, vice-president, and directors for their careful attention to the affairs of the bank.

The stockholders present learned with great regret that Mr. Charles Stuart, after more than ten years of faithful service on the directorate, was, in consequence of failing health, unable to allow his name to be submitted for re-election.

The following named gentlemen were elected directors: George Gooderham, William H. Beatty, Robert Reford, William G. Gooderham, John Waldie, Hon. C. S. Hyman, M.P.; Robert Meighen, William Stone, John Macdonald.

At a meeting of the new board, George Gooderham, Esq., was unanimously re-elected president and William H. Beatty, Esq., vice-president.

* * *

THE CENTRAL CANADA LOAN & SAVINGS COMPANY.

The twenty-first annual general meeting of the shareholders of the Central Canada Loan and Savings Company was held at the company's offices, in the city of Toronto, on Monday, the 9th day of January, 1905, at 12 o'clock noon.

The president, Hon. Geo. A. Cox, having taken the chair, Mr. E. R. Wood, managing director, was requested to act as secretary to the meeting.

After reading the notice convening the meeting, the secretary read the twenty-first annual report and the accompanying financial statement as follows:—

The directors beg to submit to the shareholders their twenty-first annual report for the year ending 31st December, 1904, as follows:—

Report.

The net earnings amount to $200,160.60, equal to 16.01 per cent. on the paid-up capital of $1,250,000.

They were disposed of in the following manner:

(*a*) By the payment of four quarterly dividends of 1½ per cent. each, being 6 per cent. for the year on the paid-up capital	$75,000 00
(*b*) By bonus 2 per cent. for year	25,000 00
(*c*) By addition to reserve fund	100,000 00
(*d*) Balance left in profit and loss account.	160 60
	$200,160 60

The above addition to reserve fund increases same to $800,000, equal to 64 per cent of the paid-up capital.

The balance in profit and loss account carried forward is $25,855.18..

The assets have been increased by $219,091.79, and now amount to $7,046,397.78.

A running monthly audit of the company's books has been made during the year, and the certificate of the auditors is attached to the balance sheet.

The inspection committee have made their regular investigation of all securities held against loans as well as securities owned by the company, and their report is also appended.

E. R. WOOD,
Managing Director.

GEO. A. COX,
President.

General Statement for the Year Ending 31st December, 1904.

Transferred from profits of year	100,000 00
Balance carried forward	$800,000 00

E. R. WOOD,
Managing Director.

The president in moving the adoption of the report said: The directors have pleasure in submitting to the shareholders their twenty-first annual statement.

The report is one of the best in the company's history, indicating as it does most satisfactory progress in every department of our business.

The net earnings of the company for the year 1904 are the largest, with the exception of those of 1902, since the company's organization, amounting to $200,160.60, or 16 per cent. of the paid-up capital. Out of this amount the regular dividend of 6 per cent. together with a bonus of 2 per cent., or a total dividend of 8 per cent., amounting to $100,000, has been paid, as compared with a dividend of 6 per cent. and a bonus of 1 per cent. for the years 1902 and 1903, leaving a balance of $100,000, or an additional 8 per cent. on the paid-up capital to transfer to the reserve fund. This addition

PROFIT AND LOSS ACCOUNT.

Dec. 31st, 1904. Balance carried forward	$103,047 79
	$103,047 79

Dec. 31st, 1903. Balance at credit of account	$18,232 31
" 31st, 1904. Profits for the year, after deducting charges of management, interest due depositors, rebate on unmatured bills, and after making full provision for all bad and doubtful debts	84,815 48
	$103,047 79

W. D. ROSS, General Manager.

brings the reserve fund up to $800,000, or 64 per cent. of the paid-up capital, and leaves the profit and loss account at $25,855.18, or a slight increase over the previous year.

Our liabilities have grown from $4,820,361.41 to $4,926,792.60, thus showing the continued confidence of the public in the security afforded by the company as a depository for savings. This is further exemplified by the fact that the company now has 2,598 depositors, representing an aggregate of $1,139,567.93, or an average of $438.63 each; 394 holders of currency debentures amounting to $1,617,531.12, or an average of $4,105.41 each, and 929 holders of sterling debentures aggregating $2,169,693.53, or an average of $2,335 each, making a grand total of 3,921 clients depositing money with the company.

The assets, consisting of loans secured by first mortgages on real estate; loans secured by bonds, stocks and debentures; bonds, stocks and debentures owned; and real estate; have increased by $219,091.79, and now amount to $7,046,397.78. None of the bonds or other securities owned by the company stand in our books at a higher value than the current market price, while on the other hand a number of them are held below their market values, so that our entire assets stand on a very sound basis.

As pointed out in my remarks at the last annual meeting, our business has been developed along three lines:—(1) Loans on real estate, chiefly in the Province of Ontario; (2) time and call loans on stocks, bonds and other approved collateral; (3) the purchase and sale of Government, Municipal, and high grade bonds of steam and electric railways, electric light, power, and other similar companies. This latter is the most important branch of our business and has contributed largely to the earnings of the company.

Messrs. Finlayson, Auld & Mackenzie, of Glasgow, still continue to act as the company's chief representatives in Great Britain for the sale of our sterling debentures, and their work during the year has been in every way most satisfactory.

The officers and staff have discharged the duties devolving upon them during the year in a highly creditable manner.

It is with regret we have to report the loss by death of one of our directors in the person of Mr. Aaron A. Cox. Mr. Cox has been a director of the company since its inception, and always took a keen interest in its affairs.

I now beg to move, seconded by Mr. E. R. Wood, the vice-president, the adoption of the report for the year ending 31st December, 1904.

The resolutions appointing the auditors and inspection committee were passed, after which the following gentlemen were elected directors for the ensuing year:—

President, Hon. Geo. A. Cox; vice-presidents, E. R. Wood, F. G. Cox; Chester D. Massey, E. W. Cox, J. J. Kenny, Rev. John Potts, D.D., F. C. Taylor, Wm. Mackenzie, Robert Jaffray, Sir Thomas W. Taylor, J. H. Housser, Richard Hall.

WINNIPEG

The STANDARD TRUSTS COMPANY

J. T. GORDON, Esq., M.P.P., President.
WM. WHYTE, Esq., WM. HARVEY, Esq.,

Mercantile Summary.

Mr. M. Petit, of St. Boniface, Man., is trying to establish a large co-operative machine shop in Winnipeg. His plan, which is somewhat of a novel one, is to get the machinists, electricians and other mechanics of Manitoba, especially those of French origin, to subscribe from $75 to $100 each to start, and then leave 20 per cent. of his salary or wages to increase the capital stock. By this means, if a sufficient number of members can be induced to join, he claims that a modern shop could be established for undertaking electrical and machinery work, of which he claims there is abundance at profitable rates.

Montreal advices tell of active scenes at Cote St. Paul, as the suburb of Montreal between the Grand Trunk tracks and the Lachine canal is called. It is here that the buildings in connection with the Canada Car Company's work are being constructed. This new organization intends to make wooden railway cars at first, and afterward those of steel and wood or all steel. When opened, which is expected to be in August, 1905, their capacity will probably be from sixteen to twenty freight cars and trucks per day and ten passenger cars a month. The foundations are mostly dug, and the steel work is begun to be put in place. Concrete walls will distinguish the shops, which are extensive. The main building, with the car shop proper, will be 1,000 ft. in length and 280 ft. wide. The height of all the shops will be about thirty-two feet. Various departments will require roomy premises; for example, the smith shop will be 301 feet by 70; the iron foundry (there is a brass foundry also), 215 by 70; the planing mill, 387 by 70; then there are the matching-room, freight car room, paint shops, and store-house. It will be a very large plant.

On the 10th inst. the hardware store of Gardner & Company at Woodstock, Ont., was completely consumed by fire at a loss to stock and building of $25,000. The insurance is $15,000. Considerable damage also ensued from smoke and water to the dry goods stores of John White Company, Limited, and Campbell Bros. The origin of the fire is unknown. On the same date fire broke out in the hardware establishment of Nelson Bros. at Windsor, Ont., and $75,000 damage was incurred before it could be extinguished. In response to a telephone appeal to Detroit, a fire-boat was sent across the river. Insurance, so far as reported, is about $25,000. The fire was caused by an overheated furnace. The Saugeen Mineral Water Company's premises at Southampton, Ont., have also been completely destroyed. Loss, $5,000; insurance, about $2,200. In Winnipeg, the factory of the Hoover Manufacturing Company, clothing manufacturers, has been burned at a loss of $70,000 to $80,000; insurance, $33,000.

* * *

—"There are other things to be considered besides money," said the multimillionaire. "Maybe I'll think so too, when I've got as much as you have," said the other man.—Cleveland Plain Dealer.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary

The Imperial War Office is understood to be making definite arrangements to obtain remounts in this country at the rate of 500 per year. This should help to stimulate horse-dealers.

At the annual meeting of the Grocers' Section of the Toronto Board of Trade Lieut.-Col. John I. Davidson was re-elected chairman; Hugh Blain, deputy chairman; Agnes C. Gray, secretary-treasurer; W. A. Warren, John Sloan, William Ince, jr., T. Kinnear and T. W. Humphrey, executive.

A Montreal dispatch tells us of the promotion of Mr. A. R. Sampson, accountant, of the Dominion Bank, to the assistant managership of the Winnipeg office. Mr. Morgan Jellett, of the Toronto office of the Dominion Bank, has been appointed accountant of the Montreal office. Before leaving for Winnipeg Mr. Sampson was made the recipient of valuable testimonials of confidence and esteem on the part of the manager and staff.

A Canadian Associated Press cable of Tuesday says that the proposed admission of Canadian store cattle into Great Britain is still a foremost topic with Irish cattle societies. At a meeting of the South Ireland Cattle Trade Association, letters from Mr. J. E. Redmond and Mr. William O'Brien were read. Mr. Redmond said the Irish party was quite alive to the importance of the affair, and would watch any attempt to introduce Canadian stores cattle. Mr. O'Brien said he fully recognized the ruinous consequences to Ireland in the rumored removal of restrictions on Canadian cattle. "It would be a corrupt bribe to Canada to enter into Chamberlain's schemes."

The Montreal Gazette of Wednesday understands that holders of seven-eighths of the shares of the Merchants, Montmorency and Colonial Companies and three-quarters of the Dominion Company have accepted the offer of the new cotton syndicate for the consolidation of the four companies: "The offer of the Royal Trust Company, on behalf of the new cotton syndicate addressed to the shareholders of the Dominion and Merchants Cotton Companies, the Montmorency Cotton Company and the Colonial Bleaching Company held good until three o'clock yesterday afternoon. The result assures the scheme, and the plan of organization will be proceeded with at once."

The board of arbitration which was appointed to settle the differences between the Government of Newfoundland and the Reid Company has opened its final deliberations in Toronto. The evidence has already been presented, and the adjudicators are now merely engaged in talking over a decision. An important point yet to be settled is as regards the profits from the expropriated telegraph system. "By the Government it had been run at a loss, and had proved so unprofitable a property that it had been sold to the syndicate. Now the Government wants it back again; and it is a moot point whether the system has been improved in any way by the company, and whether or not the corporation has made money out of it."

Do You Care for Your Personal Appearance?
The man with a good bag is shown consideration that is absolutely denied to the one that carries a cheap or shabby bag. — That is why you should use a bag made by JULIAN SALE. The longer you carry one the better it looks.

Nova Scotia Steel & Coal Company,
(LIMITED.)
DIVIDEND NOTICE.
A Dividend of Two per cent. on the Preference Shares of this Company, for the quarter ending December 31st, 1904, has been declared, payable on JANUARY 15th, 1905, to Shareholders of record of December 31st.
The Transfer Books of the Company will be closed from January 1st to January 5th, both days inclusive.
By order of Directors.
THOS. GREEN, Cashier.

INSURANCE MADE EASY.
An Endowment Policy in the Manufacturers Life Insurance Company will return all the premiums you pay, with good interest thereon, at the end of Endowment Period. Your insurance during the 10, 15, 20 or 25 years of the period will have cost you nothing.
The policy is so liberally arranged also, that it is almost impossible for a man to be compelled to drop his insurance, but even if that should happen at any time after three years, he will receive a liberal cash payment, or a life policy fully paid for a large amount, so that a man runs no risks.
Write for rates to the Manufacturers Life, Toronto, Canada.

—The deacon was hard to convince. "No," declared he, "I'll have no such contraption in my house. Pianners are things of evil." "Oh, but pa," protested his lovely daughter, "this is an upright piano." —The Pittsburg Post.

ENVELOPES made in great variety.

Mercantile Summary.

At the annual dinner given by Mr. T. H. Estabrooks to his travelling staff at St. John, N.B., Mr. Stephen Hustwitt, the firm's chief representative in the Canadian west, was present; also Mr. H. R. Arnold, of Winnipeg.

At a meeting of the Halifax Board of Trade held last Friday, new by-laws were adopted. Hereafter at the annual meeting a president, two vice-presidents and council of nine shall be elected. Afterwards these shall meet and select seven others, from lines of trade not represented in the original number, the whole to form the board's council of nineteen. This is designed to make the board more representative.

An important visitor reached Victoria, B.C., last Friday in the person of Mr. K. Nagai, manager of the Nippon Yusen Kaisha Company, of Japan, who arrived by the steamer "Kanagawa Maru" on his way to St. Paul to discuss traffic arrangements with President J. J. Hill, of the Great Northern Railway. The Japanese company has a traffic arrangement with the Great Northern, and it is with regard to an arrangement to join interests with the monster Hill liners, "Minnesota" and "Dakota," that the Japanese steamship official is to confer with Mr. Hill.

In our insurance column we have referred to the new arrangement made by Mr. R. A. Donald. Besides representing the company referred to, the R. A. Donald Agency is to be a common centre, which will direct a number of industrial concerns in which Mr. Donald and his associate, Mr. Geo. H. Campbell, are interested. The companies concerned are as follows: The Canada Wood Manufacturing Co., of Farnham, Que., makers of furniture; the Canada Process Co., of Toronto; the Smokeless Fuel Saving Co., and the Universal Spring Motor Co. Other enterprises may be added, but the four above named are now in working order. It is thought by those interested that it will prove more economical to have the policies of the various industries decided upon in the one office without in any way interfering with the successful working of each of the plants.

We understand that steps are being taken to combine the several large electrical and power companies doing business in and around Ottawa. Their combined capitalization at present stands at about $7,000,000. The scheme contemplates the pooling of interests of the Ottawa Electric Company, the Ottawa Electric Railway, the Consumers' Electric Company, the Hull Electric Company, including the street railway of that city, the Capital Power Company of Deschene, the Hull and Ottawa Power Company, and perhaps the Metropolitan Electric Company. Plans, so far as they have been divulged, involve the development of the water power of the Chaudière. Hydraulic engineers for months have been at work on the details of the proposal. There is an admirable power at Britannia, owned by the Metropolitan Company only partially developed. It is intended under the scheme outlined to develop this also when necessary.

Dominion

Mercantile Summary.

The stock of A. Tonnancour, merchant tailor, Montreal, was a few days ago destroyed by fire and water at a loss of $15,000.

Granger Bros.' book and stationery store in Montreal was badly damaged by fire on the 8th inst. The loss is estimated at $20,000.

Word has come from New York of the death of Henry V. Poor. He was for years widely known as a railroad authority and an expert on financial affairs. He was born in Andover, Maine, in 1813. For many years he lived in New York city, where he published Poor's railroad manual and wrote several books on financial subjects.

It is understood that the proposed new arrangement between the Dominion Coal Company and its employees promises to be successfully settled. It amounts to a three years' contract at practically the same wages which are paid to-day. The men are by this means assured steady employment at a fair price, while the company has the advantage of being able to figure on contracts with an approximate idea of what the important item of labor will cost, and without the fear of labor troubles constantly in its mind.

The White Pass and Yukon Railway people are preparing for the rush of people who, they believe, are likely to crowd into the Tanana country next season. It is pointed out that in spite of the efforts of the Seattle, Wash., steamship companies to direct travel by way of the Valdes route the easy access to Dawson City and other advantages of that route will draw a large number of the Argonauts, besides which, part of the way from there to Tanana, namely as far as Fairbanks, there is a good stage running. Many Dawson merchants now have opened business houses at the latter place. The White Pass and Yukon Route is now making arrangements to operate a line of through steamers from White Horse to Chena, the port of Fairbanks, on the opening of navigation in the north.

Mercantile Summary.

The Canadian General Electric Co. have secured a contract to install a turbine power plant at the works of the Canada Car Co., of Montreal. The plant will be the first of the kind to be erected in Canada, and is said to be similar to those in the new Allan steamers.

A winding-up order has been granted in the matter of the Dominion Packing Co., Limited, of Charlottetown, P.E.I., a concern which was incorporated in the fall of 1902 with a considerable flourish of trumpets, and in which some important Western capitalists were said to be interested.

The failure is noted of F. D. Fairfield, grocer, of Rockland, east of Ottawa. He was formerly a clerk in the general store run in connection with the lumbering business of the W. C. Edwards Co., and began business for himself in 1903. He shows liabilities of $1,970, with apparent assets of $1,450.

The failure is reported of F. Loranger, general dealer and baker, at Cap Magdeleine, Que., liabilities being shown at about $5,500. He has been in trade more than twenty years, but with a limited measure of success. In 1886 he compromised at 25 cents, and assigned in 1899.—J. A. Carle, of Shawinigan Falls, Que., dealing in confectionery, groceries, etc., in a small way for a year past, is making an offer of 25 cents on the dollar.

During the present year the Montreal Street Railway has arranged to spend $500,000 in securing additional power and making other improvements to their system. The plans call for the erection of three sub-power stations at different terminals of the system. Each sub-station will have 1,000 horse-power, thus enabling the company to put any number of cars on all parts of the system any time during the day. The central station will then be used only for the lines in the centre of the city. The sub-power stations in the west and north ends of the city are to be supplied by a direct line from the Shawinigan power station at Hochelaga. The company has concluded arrangements for the purchase of twenty acres of land north of the car sheds on St. Denis Street. This land would enable the company to extend its system of sheds should the requirements demand it.

Longfellow's beautiful poem, "Evangeline," is to be banished from British Columbia schools, and will be replaced by Scott's "Lay of the Last Minstrel." The teachers in that Province give as reasons for abolishing their old stand-by that it is tainted with anti-British spirit, and that it is becoming "stale." Charles Lamb's "Tales from Shakespeare" are also to be left out of the curriculum, on the plea that they are of no use to children as an encouragement to the reading of Shakespeare. It is possible, of course, to have such a thing as too much imagination in either teacher or scholar, but it is not easy to get too much literary good taste in a school teacher. And in the present case it appears to us that the utilitarian idea has got possession of the British Columbia authorities to the diminution of both imagination and taste.

IN HER PUBLIC LANDS
many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.
Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.
For maps, reports, Mines Act, etc., apply to Hon. E J. Davis, Commissioner of Crown Lands, or Thos. W. Gibson, Director Bureau of Mines, Toronto.

Mercantile Summary.

The affairs of J. E. M. Frederick, jobber of shoes, harness, trunks, etc., in Quebec, are reported to be in bad shape, and he himself an absentee. He was formerly bookkeeper for the old-established leather house of O. L. Richardson & Son, and began business for himself last spring. He is said to have been living extravagantly, and to have been not altogether regular in all his business dealings. His liabilities will probably reach to about $25,000.—O. Plante & Fils, a plumbing concern of the same city, have assigned, owing $2,770.

A feature of the recent fiftieth anniversary edition of the Ottawa Free Press was the full-page advertisement of "Sweet Caporal" cigarettes. It was the only tobacco advertisement in the whole of the forty pages, and consisted of an immense cut of the cigarette package which is so well known everywhere. The advertisement has caused much comment amongst tobacco dealers, who are favorably impressed with the fact that their trade is stimulated through such lavish expenditure by the manufacturers.

The tinsmith at Ste. Flore, Que., already reported insolvent, J. O. Godin, has arranged to pay 25 per cent. on liabilities of $2,600.—Napoleon Henrichon, of Lake Megantic, Que., is a harness-maker by trade, but has many other occupations, selling confectionery, running a pool-room, buying furs, etc. In spite of the numerous strings to his bow he has not apparently been successful, and has been trying to arrange a compromise, but now a demand of assignment has been made upon him by a Montreal firm.—J. W. Leduc, of Valleyfield, Que., who has been engaged in the liquor business for just about a year, has assigned to the court.

An assignment has been made by Moise Cote, of Ste. Agathe, Que. He has been engaged in lumbering and saw-milling for some years, in which line he did fairly well, but unfortunately for himself he bought out a leading dry goods shop in the town two years ago, and, having no experience of the trade, has bought goods lavishly, with the consequence that his affairs have become much involved, numerous suits having been entered against him during the past ten months, and the amount of cash he has had to pay has been very considerable. He is still interested in a lumber business carried on at Belisle's Mills, under the style of M. Cote & Fils, who have not as yet assigned.

Three small grocery failures in Montreal are noted. On demand an assignment has been made by Dame Florianne Chagnon, doing business under the style of N. Martel & Co. Her husband, N. Martel, was formerly unsuccessful in a tea and crockery business in St. Hyacinthe, and the present business was begun last spring.—Another brief business record is that of D. Brault, a machinist by trade, who also started as a retail grocer last spring, and has now assigned.—Philippe St. Arnaud has been dealing in groceries and provisions for the past eight years, and previously clerked in the same line in North Dakota, U.S. He has been found very slow pay of late, and has assigned on demand.

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

MONTREAL MARKETS.

Montreal, Jan. 11th, 1905.

Ashes.—The good snow roads now general throughout the country have apparently brought out some fair lots—considering the present extent of the trade — and prices are consequently easier. For No. 1 pots dealers are now paying $5.75 to $5.85, with seconds ranging about $5.30. Pearls would readily bring $7.50 to $7.75.

Dairy Products.—Values in cheese have been showing a steadily firmer tendency since the closing of navigation, and quotations at the moment are a full cent above the level of two months ago, even though the demand from Britain is not specially lively. Holders are indifferent sellers of best Westerns at 11c., and 11⅛c. has been realized, it is claimed. A good jobbing demand for butter readily absorbs current offerings, and the market is a very steady one. Fine creameries are quoted at 21¼ to 21¾c., and under grades at 20 to 21c.; good dairy makes bring 17 to 17¼c. Shipments of cheese last week amounted to 21,619 boxes of cheese, and 250 packages of butter.

Dry Goods.—Payments on the 4th were better provided for than generally expected, and one leading house reports that 86 per cent. of its customers' paper was taken up, certainly a gratifying showing. There has thus far been an absence of any undue proportion of insolvencies, though the 4th of February and March, sometimes trying periods, have yet to be passed. Travellers are fairly at work, and a moderate volume of orders is shown. In values no special changes are reported.

Furs.—The week has been without any special feature. Some rather larger lots have come to hand the last few days, for which prices according to quotations, as below, have been paid. We quote for prime pelts as follows: Black bear, large, $12; medium, $8; small, $5; badger, 50c. for No. 1 large; fisher, $5 for No. 1 dark; brown, $4; pale, $3; red fox, $2 to $3.25; silver fox, $75 to $150 for No. 1 as to size; cross fox, $5 to $10 for No. 1; wolverine, $2.50 to $5; lynx, $2.50 to $6, as to quality; marten, $4 to $7 for British Columbia; Eastern skins, $2.50 to $4 for No. 1; mink, $2 to $4 for No. 1; muskrat, 8 to 10c. for fall; 10 to 15c. for prime winter; otter, $8 to $12; fine Labrador pelts would bring $18; coon, $2.50 for fine, black, large pelts, with prices ranging down to 25c. for unprime, poor colored skins; skunk, No. 1, all black, $1.50; short stripe, $1.10; long stripe, 60c.; broad stripe, 20c.

Groceries.—Further steady advance in the markets for raw cane and beet sugars has led to still another revision of prices for refined goods, and the local refiners put up prices a full ten cents on all grades on Tuesday. They claim that raw sugar would now cost laid down as much as their low grade yellows are being sold at, and a further advance is deemed momentarily probable. The present factory quotation for standard granulated is $5.50 in barrels, bags 5c. less, the highest figure that has ruled for 15 years; Phoenix, $5.50, with yellows ranging down to $5. In teas the demand has not in any way picked up since the opening of the year, and importers still report but a "hand-to-mouth" business. Ceylon blacks are cabled a farthing easier, and for Japans low prices still prevail, a good medium quality being obtainable at about 12½c. Valencia raisins and currants maintain their value pretty steadily, fine off-stalk being quoted at 5 to 5¼c. in a jobbing way; selected, 6c., and layers, 7c. California 3-crown muscatels sell at 7c. Fine Filiatra currants are quoted at 4¾c. in cases, ditto, cleaned, 5c. Sultanas, however, are remarkably cheap, nice bright goods being obtainable at 6c. Canned tomatoes are very firm, the Association price for standard goods being $1.30; corn, $1.20.

Hides.—The market is without change. For No. 1 beef hides dealers are still freely paying 9½c., and there is as yet no falling off in quality from the grub. There are as yet no offering of calfskins. Lambskins are still quoted at $1.10.

Metals and Hardware.—No big business is yet reported in these lines, but a moderate volume of small orders is noted. Pig iron is not in demand, and most of the large foundries will not start up till next week. The American pig iron market is rather firmer; Scotch warrants are cabled at 55s. Bars are steady at $1.75 to $1.80; iron pipe, $4.20 for inch, but the situation is rather stronger, and in the United States large

sizes have been subjected to some advance. The British market is again firmer in sheets, and there is a probability of some large local houses revising quotations, but at the moment Canada plates are still quoted at $2.30; black sheets, $2.15; tinplates, $3.65 and $3.90 for cokes and charcoals respectively; galvanized sheets, $4.15; galvanized Canadas, $3.90 for fifty-two's. Copper has undergone some fluctuation, but is steady at the moment at 16 to 16¼c.; tin, 32 to 32½c.; lead, $3.45 to $3.50; antimony is very firm at 9¼ to 9½; spelter, 6½c. In general hardware prices there have been no recent changes.

Oils, Paints and Glass.—Some little revival of business is reported, travellers now sending in some fair proportion of orders, but no active shipping will be done till April. Linseed oil continues easy at 42 to 43c for raw, and 45 to 46c. for boiled. Turpentine is unchanged at 78c. A very firm feeling prevails in glass, and stocks are not large or very fully assorted.

* * *

TORONTO MARKETS.

Toronto, Jan. 12, 1905.

Chemicals, Drugs, etc.—Little change is to be noted in the local drug market. Trade is a little on the dull side, but dealers attribute no importance to what is probably a merely temporary condition. Opium is a little firmer, in sympathy with reports from the primary markets. Quinine is moving well. New York advices state that trade since the New Year has been slow in opening up. Carnauba wax is in better demand, and may advance. The British chemical market, according to reports lately received from Manchester, is somewhat brisker than it was, both in the home and export branches, but requirements are mostly of a hand-to-mouth character.

Dry Goods.—The trade in dry goods circles is very fair. No change in prices of moment has taken place lately, but the situation in woolen goods is very strong. Cottons are still somewhat unsettled, for, in spite of the considerable reduction in raw material, no one knows how things will turn out, and there is a disposition to be exceedingly careful.

Flour and Grain.—Wheat is firmer in sympathy with Winnipeg and Chicago, and there has been an advance of 2 to 3c., both in Ontario and Manitoba grains. Barley, corn, oats and the rest remain unchanged. Flour is experiencing a rather dull market. Ninety per cent. patents sell at $4.20 to $4.35. Millfeed is easier. Oatmeal is easy at $4.

Hides and Skins.—Cured hides are firmer, and have advanced about ½c. Calf and lambskins are steady. Chicago conditions are firm, though the quality of offerings begins to show signs of deterioration.

Groceries.—Trade throughout Ontario and the West is very good this week. In sugars the movement is not large, but prices are exceedingly firm, and a 10 cent advance is recorded since our last quotations. Teas are easy, with little business doing, while in coffees there is some briskness. Canned goods show no falling off in strength. Payments have been fair, but hardly so good as they might have been from the West.

Hardware.—No special feature presents itself for comment, but trade is a good average. Skates have sold well, as well as other seasonable articles, and sorting orders have come in with satisfactory frequency. In metals the feeling is quite optimistic owing to the improved demand for pig iron and other lines. The movement in all these is fair to good.

Live Stock.—Trade has been a little more active than it was, but the larger number of receipts has served to counteract any tendency towards higher prices. Sheep and lambs are higher, as also are hogs. Choice export cattle meet with a good enquiry, and the same may be said of butchers'. For stockers and feeders little demand exists.

Leather.—While a general rise in prices is looked for by many, it has not yet materialized. In fact, the activity in trade has fallen off perceptibly during the last few days, though improvement is looked for at any time.

* * *

EDMONTON.

A dispatch of Tuesday last from Edmonton, Sask., announces an agreement, signed by the first vice-president and general manager of the Grand Trunk Pacific, Frank W. Morse, to the following effect:

"The main line of the Grand Trunk Pacific is to pass through Edmonton, which place is to be made the chief divisional point for the G.T.P.'s western system.

"The repair shops and necessary terminal works of the company are to be located within the boundaries of the city, in the neighborhood of Rat Creek.

"Edmonton is to be given wholesale status as regards freight rates.

"The G.T.P. is agreeable to a union station with the C.N.R. on First Street, or east thereof.

"A strip of land south of Mackenzie avenue is to be expropriated by the railway for freight and passenger business.

"Tax exemptions similar to those granted the Canadian Northern will be granted the G.T.P.

"The city is to bonus the G. T. Pacific to the amount of $100,000, to be paid as the company buy the land they require, in cash or debentures at 4½ per cent."

HABITS OF CELEBRITIES IN THE "THROES OF COMPOSITION."

. . . . One type of writer—if we may believe the evidence of the personal notes in the columns of "Chat About Books and Authors"—has gone out of existence. We mean the writer who is independent of time, place and circumstance in the production of his work.

In the Cornhill Magazine Michael MacDonough has collected a mass of entertaining anecdote about the habits of celebrities "in the throes of composition." Many of them sound surprisingly like those which are now sent out weekly, with the stamp of truth upon them, from every progressive publishing house. It is interesting to know that Byron lived principally on biscuits and soda water "to attenuate and keep up the ethereal part of me"; but he was far behind the young man who a few years ago conceived a tale of such surpassing horror that during its production he could eat nothing but lettuce and little neck clams. Southey's system of having six separate tables in his library, at which he wrote, respectively, poetry, history, criticism and miscellaneous subjects, is also that of a popular writer of humorous verse who maintains and uses a different desk for every metrical form—one

AGENTS WANTED in every unrepresented District in Canada.

The British Canadian Loan & Investment Company, (Limited.)

Notice is hereby given that the Annual General Meeting of the Shareholders will be held at the Company's Office, Equity Chambers, 24 Adelaide Street East, Toronto, on **Wednesday, the First Day of February** next at noon.

By order of the Directors,
ERNEST S. BALL, Manager.

City of
St. Thomas.

Debentures for Sale.

The City of St. Thomas, Ont., having decided by a vote of the ratepayers to purchase the existing Gas and Electric Light Works, will receive tenders addressed to the undersigned up to noon of Wednesday, February 15th, 1905, for $200,000 of Debentures of the said City of St. Thomas.

Debentures are to be issued in twenty series or blocks of $10,000 each, and the said debentures shall be payable in annual instalments within 30 years from the date of the issue thereof, at the office of the City Treasurer, St. Thomas, and shall have attached thereto coupons for interest at the rate of 4½ per cent. per annum, payable annually at the Treasurer's Office, St. Thomas.

Debentures will be dated March 1st, 1905, and will be ready for delivery on or about March 1st, 1905.

Tenders must state an amount on the dollar for the whole issue, or any series of $10,000, and accrued interest to date of delivery, and the Corporation reserve the right to reject any or all of said tenders.

For any further information and for printed copies of the By-law under which the debentures are issued, application may be made to the undersigned.

S. C. PERRY,
City Treasurer.

Managers and Underwriters.

for trioletes, a second for ballades, a third for limericks, and so on. And the annals of all the centuries cannot show a parallel to the young writer of romances to whom inspiration comes only when he has a tame duckling asleep between his feet. Putting such tales one side, therefore, the modern reader ought to turn to the really valuable part of Mr. MacDonough's compilation—the stories he tells about those dodos and great auks of literature, the writers whose output was not dependent on the clothes they wore the desks they sat at, the rooms they lived in, or what they had for dinner.

Here is a picture of Sir Walter Scott, for instance, turning out one of his most celebrated chapters in the midst of a raging toothache, writing in a room with a smoking chimney, interrupted every few moments by a dog, which kept coming in and out and insisted on having the door opened. Here is another of Anthony Trollope composing, with his watch on the table, at the uniform rate of 250 words to every quarter of an hour, and turning out his regular quota of pages on a tempestuous trip from Marseilles to Alexandria, when he was terribly seasick. Jane Austen wrote in the common family sitting-room, as did Mrs. Oliphant. Charlotte Bronte, as we all know, could transfer her faculties from literature to the peeling of potatoes and back again, without the slightest loss of energy. Such performances are never heard of to-day. The nearest approach we can call to mind is the case of Dr. Conan

THE HUGH C. MACLEAN CO., LIMITED,
Publishers, Winnipeg.

Doyle, who wrote the Sherlock Holmes stories in his office while waiting for patients.

In the matter of food and drink there is perhaps less difference between the old and new. As Calverley wrote:

Coffee is good, and so, no doubt, is cocoa.
Tea did for Johnson and the Chinamen;
When "dulce est desipere in loco"
Was written, real Falerian winged the pen.

Shelley had his dry bread and raisins, which he carried about in his waistcoat pocket. Dryden once asked his host beforehand to provide "a chine of honest bacon" for dinner. Thackeray's favorite dish was boiled beans and bacon. Tennyson had his boiled salt beef and new potatoes. Pope rose from his bed at Lord Bolingbroke's only on the promise of a dish of stewed lampreys. Milton laid down the rule that "he who would write an epic for the nation must subsist on vegetables and water." On the face of the evidence it might be said that board has had considerably more effect on the world's masterpieces than lodgings. Thackeray, for instance, who could do his writings anywhere on odd scraps of paper, was so influenced by his victuals and drink that, as he told Tennyson, "When I have dined, sometimes I believe myself to be equal to the greatest painters and poets."

* * *

At the request of Mr. J. T. Wilson, who has been the representative of tht oil, paint, soap, chemical and allied trades on the Council of the Montreal Board of Trade, a meeting of the trade was called to choose another man to take his place upon the council. There was a good representation present, and Mr. Alex. Ramsay, of A. Ramsay & Son, was unanimously selected.

A Winnipeg letter informs us that the Winnipeg real estate business of the Haslam Land and Investment Company has been acquired by and will be carried on in future under the firm name of Waugh & Beattie. The partners are Messrs. R. D. Waugh and Thomson Beattie, who will act as agents for the Haslam and Investment Company in connection with their other land holdings and interests.

* * *

The C. H. Mortimer Publishing Co., of Toronto, has just issued a twenty-fifth anniversary number of the Canada Lumberman. Typographically and from a reading view-point the number is most creditable, and should be highly prized by all who are interested in the lumber industry. It contains about ninety-two pages, and the contents include portraits and biographical sketches of pioneer lumbermen. Among other articles we notice the following: "The Lumber Industry of the Canadian North-West," by J. L. Campbell; "Saw-mill Equipment of the Earlier Days," by Wm. Cooke; "Canada in Relation to the World's Future Timber Supply," by E. Stewart, Dominion Superintendent of Forestry; "Ontario's Forest Reserves," by Thomas Southworth, Director of Forestry, and a number of other valuable contributions, which cannot fail to be of interest. The half-tone portraits and illustrations of modern sawmills is a valuable feature, and the Mortimer Company is to be congratulated upon this twenty-fifth anniversary number.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their weekly circular under date of January 7th, 1905, say: The new year begins with a hopeful financial outlook. In both of the great divisions of industry, manufacturing and agriculture, the conditions which prevail are conducive to continued prosperity, chiefly because production has not yet overtaken consumption; the only exception of consequence being the enormous crop of cotton resulting from last year's excessively high prices. Our principal basis of prosperity, however, is still in the soil, and the whole country is now experiencing the stimulus of a profitable harvest. Trade, too, is exceptionally sound, and merchants in nearly all sections of the country are doing a large and satisfactory business; in fact, it is many months since the general business situation was so healthy and promising as at present. While these conditions last it is useless to expect any very serious decline in the stock market. Prices are certainly high, and possibly even above intrinsic merit; but it will be difficult to induce any prolonged selling movement when the dominating spirit in business circles is one of well-grounded hopefulness. As soon as unfavorable developments of an important nature occur we may expect a downward movement in stocks. The financial situation has many elements of strength. The investment demand for bonds is still good in spite of the heavy amounts absorbed during the last two months. Here is a basis of confidence which naturally affects the entire market, and is the healthiest symptom from the bankers' standpoint. January disbursements will be larger than usual, and this means a further demand of the same character. Money is easy and abundant, and this also is a bullish factor, and will remain so as long as stocks command returns so much better than money, as they now do. Again, the railroads are once more making excellent earnings.

Conditions favor a good trading market. Now that the holidays are over and the situation is becoming clearer, a resumption of activity would not be surprising, especially among the cliques who have been awaiting a suitable opportunity to infuse more life into their favorites. In this direction more frequent fluctuations are quite probable, but this may temporarily have to be at the expense of values.

THE SITUATION IN WOOL.

Nobody cares to stake his reputation on a prophecy as to what prices will be reached for wool. Already they are 30 per cent. higher than a year ago, that is to say, referring to the coarser and medium grades which are those we in this country have more particular interest in. To understand this condition of things, it is necessary to take a glance over the woolen markets of the whole world. The general tendency then in the United States has been upward for the past three years, but this up-grade movement has been punctuated by severe fluctuations, due more than to anything else to over-speculation and to consequent sudden collapses owing to the excess of supply over demand. It would be perhaps better to say, not that the supply was excessive, but that the demand was suddenly lessened through artificial conditions, such as strikes leading to lower consumptive power. This was particularly the case in the early part of last year, when business in the United States was severely depressed; in spite of the depression, however, the price of food remained high, and this was another reason for the curtailment of the demand for clothing.

The improvement in labor conditions, during the past year has been very marked. The unionist leaders seem to have come to the conclusion that to continue their old tactics is simply to cut their own throats. And in no branch of trade has the improvement had greater effect than in the woolen. It is calculated that the demand for wool has increased at least one-third since the apparent settlement was reached in regard to the right of non-unionists to labor for their livelihood. Other conditions, too, are equally favorable, and the general prosperity may be said to be very marked.

This situation in the United States naturally affects the Canadian market very materially, especially as more or less similar conditions with regard to the demand for wool exist in Europe as well. All the indications seem to point to a still larger consumptive demand this year than ever; so long, that is, as values are not placed so high as to restrict the purchasing capabilities of the people altogether. Very small wool stocks now remain in the hands of first dealers.

All recent wool sales in London have showed a very strong tendency upward in prices, but it seems not altogether unlikely that these sales will in the future occupy a less all-important point in relation to the world's market than they have done in the past. We refer to the direct purchase by Boston concerns of Australian wool through agents stationed in the Island Continent, a thing which, we believe, has never happened before.

One feature which has helped to bring about the present extreme prices for coarse wools is, of course, their demand for the armies in the Far East. Should the Russo-Japanese war come to a speedy end, it is possible that there would be a cessation to the constant upward trend in values, but of this contingency there does not appear to be any great likelihood. The Yorkshire manufacturers have felt the full force of the acute demand from the above source, and this has, of course, strongly affected the prices of their goods, both for home use and export.

It seems strange, under all the existing circumstances, that Canadian farmers especially in the western ranching districts, do not pay more attention to sheep-rearing, an admittedly paying branch of farming. In several parts of the United States, we understand, many contracts are being made for wool "on sheep's back." This, considering the possibilities of deterioration through climatic influences, is a somewhat dangerous proceeding, but it shows the extraordinary activity of the demand for wool at the present time.

EXPORTS FROM CANADIAN CITIES.

"Toronto Merchant" asks us for an explanation of the extraordinary figures we quoted last week from a pamphlet on Montreal's Export Trade. The table on page 21 gives the value of Montreal's exports in 1904 as $67,844,729, and those of Toronto $3,130, and the letter asks, "should Toronto not be nearer $30,000-000."

We have already explained that the figure given cannot possibly represent the value of merchandise exported from Toronto. But there it stands, in the Blue Book for 1904, pages 18 and 19, and until explained cannot but give to strangers who happen to peruse the trade and navigation returns, a very wrong impression of Toronto's trade. The Government in its wisdom has ordered that in compiling statistics of exports the products of any inland place shall be credited to the port at which they were last entered outward. Thus Bridgeburg, an insignificant place with no large factories, near Fort Erie on the Niagara River, is credited with exports of $4,234,218, while Hamilton is credited with only $586 of exports. Now Hamilton, every one knows, is an important manufacturing city, and it must be that her products, amounting to millions in value, are cleared at Bridgeburg. Similarly, Niagara Falls, Ontario, however otherwise celebrated is not known as a place where $18,071,625 worth of merchandise could originate. It appears to be the case that Toronto's products are credited to Niagara Falls, as the last port of entry outwards. These instances may represent a convenience to the Government statisticians, but they are hard upon the reputation of Hamilton and Toronto. Desiring an explanation of the figures of $3,150 for twelve months' exports quoted by the Montreal Gazette pamphlet, the Monetary Times made application at the Toronto Custom House for the true export figures at that port, and was informed that no totals were allowed to be given out here—but that Ottawa was the place whence all such information must emanate. Accordingly we wrote to the Department of Trade and Commerce, on Monday, 9th January, and were told that the Department of Customs was the custodian of all such information, that our letter has been handed thither and that it would be replied to direct. This reply received on 19th January, we subjoin. It is unsatisfactory to a commercial writer and cannot but be humiliating to the Department of Customs, to confess that there are no export statistics of such cities and towns as we name below.

Editor Monetary Times:—

Sir,—I have the honor to acknowledge the receipt of your letter of the 9th inst., addressed to the Deputy Minister of Trade and Commerce and transferred to this Department, enclosing a statement of the trade of the principal ports of Canada for the year 1904, on the basis of imports and exports as taken from the Montreal Gazette Pamphlet, from which it would appear that the exports from Toronto are of very small amount, and Hamilton "nil," and also requesting the proper figures of exports at Toronto and Hamilton.

In reply I beg to state, that by Order-in-Council dated 26th May, 1900, the system of taking export entries was changed, so that from the 1st July, 1900, the entries are required to be delivered by the carrier of the goods to the Collector of Customs at the "Port of Exit" from Canada, and are in the statistical records credited to that port, the effect being that when merchandise is shipped from the vicinity of Toronto or Hamilton by rail, and leaving Canada by a frontier port, the merchandise so shipped is credited to the frontier port of exit by which it leaves Canada, and only such goods as are exported by vessels clearing from these ports are taken into account and credited to them as ports of exit.

This practice has been carried out since the 1st July, 1900, and this Department having no record as to the value of goods shipped from these or other inland points of export, I am unable to give you the figures of the amount of exported goods originating at Toronto and Hamilton. Statement returned.

I have the honor to be, sir,
Your obedient servant,
JOHN MCDOUGALD,
Commissioner of Customs.

The anomaly of places of the importance of Hamilton and Toronto, importing respectively $9,-328,014 and $47,671,288 worth of merchandise in one year, and yet exporting only $586 and $3,150 worth, is explainable by the facts above mentioned. But we submit respectfully to the Minister of Customs, who is a sensible business man, that it would be well to point out in the Blue Book how Bridgeburg and Niagara Falls are credited with the $22,305,843 which should go to the credit of these two cities.

London, Brantford, Berlin, Galt, Guelph, Peterboro, Woodstock, are all Ontario manufacturing towns which do more or less foreign export trade, but not one of them gets credit in the Government table for a dollar's worth, and even Ottawa, the great lumber centre, gets credit for only $64,235 of all her lumber which goes to the States. Instead, their manufactures or farm products are entered outward at towns along the frontier such as Sarnia, which gets credit for $2,-002,004 exported; Windsor,, $3,268,505; Prescott, $4,-233,014; Bridgeburg, Niagara Falls. The $31,809,000 worth of goods put down in the list as exported from these five places represent merchandise from all over Southern Ontario.

It has long been known to those who have to do with statistics of our outward and inward foreign trade that Montreal, as our greatest port for trans-Atlantic merchandise, gets credit for many millions or dollars worth of exports which originate in Ontario or elsewhere in the West, just as she used to get credit for many millions of imports from Europe which are now entered at ports from Kingston to London. And so the Province of Quebec gets credit on page 21 for exports valued at $102,816,197, while Ontario's exports are put down at only $41,941,605.

* * *

DANGER FROM EXPLOSIVES.

The danger of a careless use of explosives is a matter which should be brought home to our people. Caution and restriction have for years been imposed upon our people with respect to the storing and handling of naphtha, petroleum, etc., and the law has made severe regulations concerning them. It is strange, however, that people will defy the reasonable limitations imposed by the law and run the risk of explosion and fire. Messrs. Scott and Walmsley, the well-known Toronto underwriters, have forwarded to us a copy of a letter they received a day or two ago from Mr. R. W. Elliot, who as a practical chemist has a thorough knowledge of explosives, and as an observer of current events is disposed to treat the subject as one of great moment to business men as well as underwriters. Says Mr. Elliot's letter:—

Gentlemen,—The loss of life and destruction of the ship, "Marpesia," naptha laden, through explosion, with the losses of a similar character in the past, bring into prominence the danger of storing and handling naphtha, even in small quantities.

I do not know whether two recent hardware losses at Woodstock and Sarnia were due to naphtha, but there seems to be an increasing danger to hardware stocks from their supplying automobiles, which machines are rapidly spreading and multiplying with this fuel.

It is a far more hazardous substance than gun powder, dynamite or nitroglycerine, which will do no damage if left undisturbed, but naphtha, benzine, petroleum spirit—as it is variously called—gives off highly inflammable gas, which, being slightly heavier than air, travels along a room or shop until it is ignited by the furnace or lamp, and then a most difficult fire ensues, for water thrown upon it merely spreads the flame.

You will remember the particulars of the old Gooderham & Worts' distillery fire, in Toronto thirty years ago, which is an apt illustration of what has taken place in thousands of cases since.

The inspector should go carefully over all hardware stocks where naphtha is kept for sale, and make a special report of the quantities kept, and the method of storing and handling. The latter will likely be found to be done by men and boys entirely ignorant of the difference between a gallon of naphtha and one of coal oil, spirits turpentine, or linseed oil.

Yours truly,
R. W. Elliot.

In enclosing the letter just quoted, Messrs. Scott and Walmsley say: "The prevailing manner of storing and handling the articles referred to cannot be too strongly stated, or its danger too much emphasized. We have been advocating care in this regard for years; but a reminder from a merchant and manufacturer conversant with the danger will, we think, be of great benefit to the public at large as well as the insurance companies."

* * *

CANADIAN WOOD PRODUCTS.

Volume II. of the Census of Canada for 1901 gives, among other statistics, some very interesting information about the revenue accruing to the Dominion from its rough forest products. It points to a somewhat startling falling off in their value during the last two decades. For example, the quantity produced in 1901 of square, waney and flat timber was 11,726,914 cubic feet, whereas in 1891 it was 44,711,868 cubic feet, and in 1881 it was 111,633,862 cubic feet. The production of logs for lumber was 4,834,999,100 square feet in 1881, and 4,862,901,300 square feet in 1891, but declined in 1901 to 3,656,963,000. Among miscellaneous products, bark for tanning declined from 329,797 cords in 1891 to 100,712 cords in 1901; firewood, from 10,547,161 cords in 1891, to 8,846,026 in 1901; fence posts from 28,302,255 in 1891, to 16,678,855 in 1901; masts and spars from 323,040 in 1891, to 31,388 in 1901; railroad ties from 10,664,907 in 1891, to 8,151,790 in 1901. The only exception to this general falling off was in the item for wood for pulp which increased 261,110 cords in 1891, to 668,034 in 1901. The figures, taken as a whole, would appear to show not only the value, but the absolute necessity for a speedy recognition of the need for forestry, and for forestry schools throughout the Dominion on an extended scale. And indeed, a serious decline in the value of one of Canada's basic interests seems to be already under way. Of course, the very fact that the country is settling up with agriculturists, is apt to account for a diminution of the forest assets in our national resources, but that this need not go on to any such extent as that indicated, is shown by Germany's experience, which has been quoted before in these columns.

In 1901, the total value of the timber products of Canada was $59,082,689, divided by provinces as follows:—

Ontario	$21,351,898
Quebec	18,969,716
Nova Scotia	3,409,528
New Brunswick	2,998,038
British Columbia	2,634,157
Manitoba	950,051
The Territories	484,263
Prince Edward Island	285,038

It may be stated that a certain proportion of the decline in exports of rough lumber may be attributed to causes having their origin in Great Britain, such for example as the practical extension of the wooden ship. It has become more profitable, too, to ship sawn timber, rather than the raw material. Another point, too, which should be given due weight is the increase in the lumber industry of British Columbia, though this has been altogether insufficient to offset the decline in other parts. At any rate, it should yet be in time to insist that the province's resources in this line must be better taken care of than has been the case in the past with regard to the others.

* * *

BANK OF NOVA SCOTIA.

The character of this bank's business during the year 1904 does not appear to have undergone any marked change as compared with the former year. The totals of assets and liabilities are somewhat larger, reaching now $30,523,000. There is an increase in deposits, and a corresponding increase among the assets, mainly in cash items, bonds and secured call loans. Circulation is larger; current loans and discounts have gone up from $12,680,000 to $13,409,000. A marked feature is that readily available assets are in large proportion, but this feature has long characterized the Bank of Nova Scotia.

Net profits were nearly the same as in the preceding year. They amounted to $401,560, and there had been $41,638 brought forward. Out of this aggregate the usual dividend of ten per cent. was paid; $12,000 contributed to officers' pension fund; $91,260 written off bank premises account, and $100,000 added to the rest. This fund is now swelled to $3,200,000, representing 160 per cent. of the paid capital. The whole statement has an air of solidity and comfort. The bank's business is widely distributed. It has fifty-five branches in all; 37 of them in the Maritime Provinces; 8 in Quebec and Ontario; 7 in the prairie country and British Columbia; 5 beyond the boundaries of the Dominion—viz.: in Chicago, Boston, Newfoundland and the West Indies.

* * *

BANK OF HAMILTON.

The annual meeting of the Bank of Hamilton is held this year in January instead of June, and consequently the report is for a half-year only. But in the half-year the net earnings have been $182,824, a remarkably good rate, especially in the part of the year which is characterized by the president as the lean half-year. During that period the assets of the bank increased by $1,840,000, and are now swelled to a total of $26,500,000. Deposits are increased by a million and a half—but the increase, we observe, is not in the non-interest bearing department—and circulation is higher. The readily available assets are in very large proportion.

In Mr. Gibson's address, reference was made to the expanding business of the country, and to the efforts made by the bank to keep pace with it by branches in the North-West, and by purchases of property in Niagara Falls and Toronto for agencies to be erected. The president referred sympathetically to the death of a former director, Mr. Arthur B. Lee, and to the recent bereavement of one of his Hamilton directors. He also spoke of the appointment of Mr. C. C. Dalton, a successful merchant of Toronto, to fill the place on the board vacant through the death of Mr. Lee.

* * *

CANADIAN LIFE COMPANIES ABROAD.

The representative life insurance companies of Canada are beginning to seek actively for business in other countries outside of the Dominion. Besides Canadian business:

The Canada Life carries on business in: The States of Illinois, Michigan, Minnesota, New York, Ohio, Pennsylvania and Washington in the United States of America; the Bahamas, Great Britain and Newfoundland.

The Confederation Life—Newfoundland, Mexico and West Indies.

The Imperial Life—Newfoundland and West Indies.

Manufacturers Life—Newfoundland, Bermuda, British Honduras, British West Indies, Costa Rica, Egypt, India, Japan, China (Treaty Ports), Porto Rico, Philippine Islands, Straits Settlements, Michigan and Siam.

Mutual Life Assurance Company of Canada—Newfoundland.

North American Life—The States of Illinois, Maryland, Michigan, New York, New Jersey, Pennsylvania, and Washington in the United States of America, the Bahamas and Bermuda.

The Sun Life—Belgium, Bermudas, British Honduras, Open Ports of China, Chili, Costa Rica, Egypt, Turkey, France, Great Britain and Ireland, British and Dutch Guiana, Venezuela, Hawaiian Islands, Holland, India, Japan, Java, Newfoundland, Philippines, Straits Settlements, several States of the United States of America (District of Columbia, Georgia, Maryland, Michigan, New Jersey, North Carolina, Pennsylvania, South Carolina and Virginia), Mexico, and the West India Islands.

We have been told that the larger proportion of the total business transacted by the Canada Life and the Sun Life is now obtained beyond the borders of the Dominion.

* * *

OUR ST. JOHN LETTER.

Announcement was made recently of the incorporation of the New Brunswick Iron Company, with a capital stock of $1,000,000. The directors are Messrs. John S. McLennan, Sydney; C. W. Young, St. Stephens; A. D. Wetmore, Truro; L. B. Knight, St. John; and C. V. Wetmore, Sydney. The company claims to have discovered very extensive deposits of magnetic ore at Lepreaux in St. John county, and say they will mine it on a large scale. They expect to find a ready market in Sydney and the United States, and it may be that in time the manufacture of iron will be undertaken in New Brunswick. The managers of the new company say none of the stock will be put on the market.

Mr. Eben Perkins, manager of the Maritime Nail Works has been granted a patent in the United States for a nail making machine. Mr. Perkins is an energetic citizen, who recently gained considerable notoriety by taking the liquor license commissioners into court and charging them with neglect to carry out the law. He gained his point for the commissioners promised to do the things he complained they were not doing. Since then a very vigorous crusade against the liquor dealers has been going on. Some time ago ex-Governor H. W. Ladds, of Rhode Island, secured mining rights to some property in Westmoreland County supposed to contain gypsum. He has never operated the property, and recently David Taylor, of Westmoreland, applied to have the license cancelled, so that he can work the claim. The result of this was the appearance on the scene of ex-Governor Ladds, who has given guarantees to begin work during the coming summer.

Lumber operators of St. John and vicinity are considerably exercised over the erection of piers in the Upper St. John, by a marine company. The river is the boundary between Maine and New Brunswick, and the lumber for Maine operators and for St. John men has to come down the river. The present complaint is that piers built by the Americans will interfere with the free movement of the logs of the St. John millmen, both American and Canadian. The matter is likely to become the subject of international negotiations.

The town council of Chatham has decided to ask the Legislature for authority to lend $20,000 to a company to build a boot and shoe factory. The money is to be returned in twenty annual payments.

The Canada Permanent Mortgage Corporation, we are told, has just purchased a large building on the corner of Market Square and Prince William Streets, St. John. It was formerly the property of the Imperial Fire Insurance Company. The probability is that the present building will be torn down, and a large and modern office building erected in its stead. St. John is in need of such buildings, and the move of the Canada Permanent will probably prove a very profitable one.

Leading citizens and business men of St. John are urging Dr. W. W. White to offer for mayor for a fourth term. Dr. White is a particularly good mayor, and the fact that the city now has large expenditures on hand in connection with the water extension is the reason for desiring him to run again.

The city of St. John has just purchased a chemical engine, and a combination chemical engine. They have arrived from the makers, but have not yet been tested or accepted. When these are in commission the underwriters are under promise to reduce the insurance 15 per cent., and a still further reduction is to come when the new water supply is secured.

The Maine and New Brunswick Power Company has recently acquired control of the falls on the Aroostook River, and in the spring will instal five pairs of water wheels of 800 horse-power each. With these it is expected to develop power sufficient to light the New Brunswick towns of Perth and Andover, and to supply light to adjoining towns in Maine.

The Board of Trade Council has lately been considering the subsidies paid to steamship companies running out of St. John. The chief objection offered was to the West India line, which runs steamers from St. John and Halifax to the West Indies. A new call for tenders has been issued, but St. John is not satisfied. It wants Halifax cut out, and St. John made the last point of call.

Capt. James A. Calder is conducting a boneless herring industry at Campobello Island, and has thirty-five hands at work. He has a large contract to supply fish ready for packing to the Seacoast Canning Company, of Eastport.

St. John, January 17th, 1905. * * *

* * *

TRAFFIC THROUGH THE SOO.

The east-bound freight of the Canadian and American Canals at the Sault Ste. Marie amounted last year to 24,213,902 tons, compared with 26,932,238 tons in 1903, and 30,275,980 in 1902. The west-bound freight of the two canals was 7,332,204 tons in 1904, 7,742,199 in 1903, and 5,685,157 in 1902. This is a net reduction altogether for the year 1904 compared with 1902, of 4,415,040 tons. Through the Canadian canal, the total decrease last year compared with 1903 was 473,995 tons. Some of this decrease is due to the shorter season of 1904, it being shorter by 26 days for the United States Soo, and by 16 days for the Canadian Soo. There is, however, no doubt that a smaller business was done last year. In 1904 the United States canal carried 12,153 vessels, and the Canadian 3,967, in 1903 the passages through the canals were 14,243 and 4,353 respectively. In 1903 the daily average was: United States canal 57 passages, Canadian 17, and in 1904 it was 54.5 and 16.5 respectively. It is interesting to enquire, in the case of the Canadian canal, into the details of the falling off of traffic. The figures show that the east-bound carriage of copper fell over 7,932 tons in 1904, compared with 1903; that grain carried fell off 955,282 bushels; that flour carried was 738,119 bushels less; that wheat was 2,522,174 bushels less; that iron ore carried was 247,936 tons less; that pig-iron was 5,137 tons less; that general merchandise carried was 5,104 tons less, and that the lumber carried was 16,386 million feet less. Thus in a general reduction of 11.4 per cent., every article participating excepting building stone. Grain, flour and wheat showed a decrease of 15 per cent. The amount of western wheat of this year's growth brought to the seaboard in the months of October, November, and December was 16,250,000 bushels, compared with 14,476,000 bushels in 1903. This indicates that about 27 per cent. of the wheat crop of the west, which is estimated to be 60,000,000 bushels, came out by the canal in the year of growth, and confirms the general statement that about one-third of the wheat crop of this year has found its way east.

* * *

A SYMPATHETIC OBSERVER.

No greater service can be done to a community than the giving warning of evils that beset or threaten it. Too often we disregard or passively endure mischievous elements in our midst until aroused to their menace by the admonitions of an observer from the outside. Good service has been rendered to Canadians by Dr. William Osler, in some words spoken recently at a gathering in his honor for which we are indebted to the Canadian Club of this city. Proud of his native Canada as Dr. Osler is, he yet perceives some blemishes in our body politic. One he mentions thus: "There is far too much evil-speaking, lying and slandering in connection with our political life. That does seem to me to be an entirely unnecessary and superfluous thing, and it does not seem right that our young men should be brought up in this atmosphere, where there is constantly a feeling of hostility and a slandering attitude in the press towards political opponents. It does no good, and it does a great deal of harm. Now, it is a difficult matter to correct. If the people would only set their hearts honestly against it and frown it down as a positive vice and as a very serious vice—I regard it as a much worse vice than drunkenness, infinitely worse, taking a man's character away, taking it away as it is done often in the newspapers, without any actual warrant, without any knowledge of the facts—it is worse than if a person was actually a drunkard.

"Now, there is only one way to mend this—a very simple way indeed. That is, to deal with our political opponents in an ordinary, everyday Christian spirit."

The speaker exhibited a warm feeling towards the United States; and we can hardly wonder at it, seeing that he has lived there for twenty years, becoming a prosperous as well as a celebrated man—by his own efforts and deserts, undoubtedly. Whether, however, we agree with his estimate of the Americans or not, (and we yield to none in our admiration for the individual American while asserting that the Government at Washington is distinctly unfair to Canada), we cannot doubt the reasons he gives for the general success of Canadians in that country. There are probably a million of people from Canada resident in the United States, and many of them have made their mark in various walks of life. "Industry and thoroughness," he tells us, "are qualities which account for the success of our countrymen, and for the estimation in which they are held over there." Taking female nurses as a class, he had made enquiry as to their number and standing in six of the leading hospitals of the Atlantic Coast. There are 631 such nurses, and of this number 196 are Canadians—31 per cent.,—a testimony to their quality that needs not be dwelt upon. In the matter of school education he had something to say which should fix itself in the minds of our people. "No greater problem confronts the residents of Canada and the United States to-day than the obtaining of sound and sensible *male* teachers." The too great preponderance of female school teachers he regards as a misfortune, tending to laxity. "Get qualified male teachers for your schools, and pay them better salaries."

* * *

MANUFACTURERS' FIRE INSURANCE SCHEME.

The following is from the last issue of Industrial Canada:—

The C.M.A. Insurance Committee will appoint at once the best man obtainable to the position of insurance manager, and the work of the department will begin without delay. The different features of insurance to be dealt with will be outlined at an early date. It is, however, understood that the manager will be available at all times to consult with the members of the association, and advise them regarding their policies and their rates. A system of inspection will be organized and suggestions offered for improving risks that will bring in return a reduction in premiums. The department will eventually undertake to handle all the insurance the members entrust to it, and to secure policies at the best possible rates of premium. Responsible companies have made offers to accept insurance from the association at a percentage of discount off the present rates. This discount will be disbursed to maintain the department and to benefit the members of the association by reducing their premiums.

This intended programme differs very materially from what was first proposed by the committee of the Canadian Manufacturers' Association. It is a much more sensible, and we think more feasible proposition than to form a mutual company which should undertake to carry so many millions or hundreds of millions of insurance risks for manufacturers. Evidently some persons of experience and prudence have been able to restrain the temper of some, and the impetuosity of others of the committee who seemed determined upon nothing short of a quarrel with the associated fire underwriters. To do insurance brokerage for the members of the association—which is what the scheme seems now to resolve itself into—is a more practical occupation for the C.M.A. insurance manager than to embark upon the difficult and thankless task of protecting, by means of the association's capital, the huge aggregate of risks represented by the business of the Manufacturers' Association from one end to the other of the Dominion.

* * *

TORONTO HARBOR.

According to the report for 1904 of Mr. Postlethwaite, the Harbor Master, the number of vessels arriving at the port of Toronto during the season was 3,398, or 234 more than for 1903, while their registered tonnage shows an increase of 247,170, the tonnage for 1904 being 1,412,459, as compared with 1,165,289 in 1903. The year was commenced with a deficit of $2,098.36, owing to heavy repairs at the Queen's Wharf during the previous summer. The total cash receipts from all sources for 1904 amounted to $12,799.89. The total expenditure for same period was $9,918.96, leaving a cash balance of $2,860.93. Coal receipts for the year were as follows, namely, anthracite coal, 133,423 tons; bituminous coal, 38,080 tons, in all 171,503 tons, being 284 tons less than for 1903. The total quantity of coal imported into Toronto for the year by rail and vessel, as per returns from the Government, was as follows, namely, anthracite, 565,136 tons; bituminous, 695,323 tons; in all 1,260,459 tons, being 162,808 tons more than in 1903. High water in the lake caused a saving in the amount of dredging required, the cost of which was $4,239.90, or $2,212.84 less than for 1903. The fruit crop was a disappointment; the number of packages was 380,250, being 75,259 less than for 1903; the harbor dues thereon showing a corresponding decrease of $70.81.

There are 72 vessels wintering in the harbor, namely, 10 passenger steamers, 7 freight propellers, 13 schooners, 9 steam launches, 9 steam ferries, 4 steam tugs, 16 pleasure yachts, and 4 dredges, in all, representing about 11,919 tons register. The harbor master recommends that steps be taken to divert the River Don, which continues industriously to deposit material in the waters of the Bay.

The harbor was clear of ice on April 22nd, having been frozen for 130 days. The first vessel to arrive was the schooner Madeline, on April 22nd, and the last to arrive was the schooner H. M. Ballou, on December 8th. The harbor dues for 1904 amounted to $6,756.69, as compared with $6,791.42 in 1903, and $5,868.72 in 1902.

ACKNOWLEDGMENTS.

Calendars have been received from the following since last notice: Confederation Life, Union Assurance Society, Sovereign Life Insurance Co., Continental Life Insurance Co., Eastmure & Lightbourn, The Courier Co., Buffalo; the Brantford Carriage Co., Dominion of Canada Guarantee and Accident Insurance Co., the Equitable Life Assurance Society, Palmerston Carriage Co. The large calendar of the Howell Lithographing Co., of Hamilton, is a fine piece of work. The maiden with the yellow hair, pure oval face, and great expanse of "neck and shoulders," is a demure but attractive creature. The desk calendar from the Montreal staff of the Canadian Bank of Commerce is exceedingly neat, giving a view of the Canada Life building, in which are the bank's Montreal offices.

NEW YORK LIFE INSURANCE CO.

The figures of the New York Life's business always attract attention, from their magnitude. It is proper to say that they deserve to attract attention also because of the character of the statement. With a total of admitted assets of 390 millions of dollars for 1904 against liabilities of 343 millions, its reserves amount to upward of 47 millions. Turning to a list of the company's investments that has been sent us we find the following Canadian securities:—$840,000 of Quebec city securities; $102,000 of Montreal securities; $615,950 of Toronto securities; $101,000 of Ottawa securities. Also $2,482,000 in Can. 1st g. Manitoba bonds. We notice in the long list of holdings a million pounds in British Consols, and some half-million dollars in French rentes. It is of interest to learn that where the company's new business in Canada amounted for 1903 to $7,903,000, it was in 1904, $8,745,000, an increase of ten per cent., which speaks well for the efforts of the agency director in Canada, and of those under him.

BOOKS AND PAMPHLETS RECEIVED.

The Oregon Country; and its Exposition of 1905.—It must be now several months since a correspondent on the Pacific Coast forwarded us a copy of the Portland "Oregonian," containing some thirty-six pages, three-fourths of it pertaining to *another* Centennial Exposition, to be held in 1905. But, being remote, it did not attract much attention. This week we receive a pamphlet, circular, and map, descriptive of the coming Oriental Fair, designed to celebrate the hundredth anniversary of the exploration of the Oregon country by the Lewis & Clark expedition of 1803 to 1805, to be held in Portland, Oregon, "the Rose City of the Pacific North-West," from June 1st to October 15th of the present year. The bird's-eye view given of this promising event is exceedingly inviting. From the corner of the experimental gardens one looks abroad upon mountain and harbor and the expanse of the Williamette river, flowing on to join the Columbia. Mount Hood, Mount Ranier, and Mount Adams raise their mighty heads afar. and great ocean-going ships make the river picturesque with their sails or smoke. The Fair, as it is to be, includes among the usual buildings deemed appropriate to such events, a forestry building, a Philippine village, a mining building, a building for European and another for Oriental exhibits. a bridge of nations. "This," says the pamphlet. "is the West's Exposition," for "it is as much the Exposition of Washington, Montana, Idaho, and Wyoming as it is of Oregon." And indeed these States are all part of the Oregon country of former days. And what a country it is! Having two millions of the most adventurous and enterprising, as they are, of the kindest and most hospitable people in the whole United States; rich in forests and fisheries, in minerals and grains; having a balmy climate and an outlook towards a great future ocean commerce, these States have undoubted attractions. And if one would see the capital city of this Western country at its best, he should go to Portland next summer.

Burns' Souvenir.—Some one in Ayrshire sent to the Editor, a week ago, a lengthy description of an illuminated souvenir of the great Scottish poet, Robert Burns. And this week we receive from the Toronto News Company a specimen of the work. It is a dainty piece of printing and illustration, published by the Burns' Press, at Mauchline, Ayrshire; retail price, 35 cents at the book stores. It is appropriate that this should emanate from Mauchline, which is the parish next to the farm of Mossgiel, which Gilbert and Robert Burns leased, and the place in which the poet found Jean Armour and the five other "proper young belles." The front cover, somewhat too much ornamented —since the one quotation crowds the other—bears a portrait of the bard and a reduced half-tone of Sam Bough's delightful picture of Burns' cottage at Ayr. The illustrations inside, of scenes connected with the poet's life and work, and the brief tributes paid him in verse are well chosen and interesting; the Brigs; Mauchline Church; Mossgiel Farm; Poosie Nausie's House; the scene of the "Jolly Beggars;" Ballochmyle Bridge and Mansion; Ellisland; the Burns' Memorial and Cottage Homes, at Mauchline, all find place in addition to much else that is more accustomed to be illustrated. But what seems most touching of all the selections, bringing one close to the poet's heart as we look at it, is the picture reproduced from a daisy grown at Mossgiel. delicately colored and embossed, of the "wee, modest crimson-tipped flow'r" that he immortalized. It is a pity that this pretty brochure had not appeared at the Christmas season, when thousands might have been sold. But they ought to sell at any time.

INSURANCE MATTERS.

To the fellow who writes big policies and has the best in the land in the way of good eating and drinking, the "Umbrella and other Stories," issued by the Insurance Press, of New York, will be a welcome visitor. But to the fellow who only writes small policies and works hard to do it how much more welcome must the "Umbrella" be. This man's occupation means hard and persistent work with financial recompense small; his pleasures are of a post mortem nature, and his deeds live after him. Through his efforts many a wife and mother who has known the pinch of hard times all through her married life will have cause to bless the day and the man who induced her husband to insure his life. To such an agent if he happily represents a company that does things for its agent, and may have sent him a copy of this little book, with what pleasure does he read the clever stories in it, each bristling with a pungent moral. And he must become more impressed with the nature of his occupation. Also while to the ordinary reader of this pocket volume, the man who delays getting insured, the warning comes, garnished with apt and clever stories; "Put not off until to-morrow that which should be done to-day."

In "Agency Notes," for January, the monthly publication of the Confederation Life Association, are some suggestive bits. For example: Death is a thing to be referred to with a "when" never with an "if."

"Can a Christian man rightfully seek life insurance?" asked Henry Ward Beecher. Then he answered it by saying—"Can a Christian man justify himself in neglect of such a duty?"

Tact gets two minutes of the man's time who hasn't a second to spare, and leaves him feeling under obligations for the disturbance.

From time to time in England insurance managers awake to a new conviction that the company must have more agents, says our Manchester correspondent. A member of the staff is sent round the country to find agents and to confer on them all the responsibilities of the profession. At all costs the emissary has to send in new names daily, and it goes without saying that not a few of the named are entirely worthless for business purposes. To show the extremity in which these unfortunate agency-makers find themselves, an incident in an estate agent's experience may be cited. He declined sevenfold to touch insurance business on any terms. But the poor wretch of an inspector before him had met with too many refusals that day to brook another. So the exact bearings of the case were disclosed, and the estate agent, as a man of feeling, consented to the use of his name in order to save the inspector from rebukes. It was perfectly understood between the pair that business would never be done, and the the estate agent would simply throw-away the valuable assortment of advertising devices to be furnished to him. However, the company got an "agent," and the dealer in hand had an informative half-hour of conversation on the woes of insurance men.

The city council of Montreal will be petitioned by the board of governors of Royal Victoria Hospital, and a number of residents of the neighborhood to establish a well equipped fire station in the upper portion of the city, as a result of the exhibition on Saturday last on the occasion of the fire in that hospital, of the difficulty to be met with in bringing fire apparatus rapidly from the lower portion of Montreal.

* * *

FINANCIAL MATTERS.

It will be welcome news to many that in view of the successful results of last year's business by the Royal Bank of Canada, the directors of that bank have allotted a bonus to each member of its staff in addition to the regular increase.

In his annual report, the chief of the secret service division of the United States Treasury Department, says that more than 5,000 circulars were sent out to the National Banks of the country embodying a number of questions relating to counterfeits, both of currency and coin. Twenty-two hundred and sixty-nine banks reported that they had seen no counterfeit money during the calendar year January 1st to 31st December, 1903. The total amount of counterfeits reported as having been handled during that period was slightly over $21,000. This consisted of $11,800 in coin, and $9,400 in notes. About 1,500 banks reported a decrease as compared with preceding years, and 100 an increase. This seems to us an extraordinarily small amount when we consider the vast circulation of money in so great a country as the United States. The report of the Treasury Department says that it is considered a liberal assumption that the figures returned by the National banks represent fully one-half of the amount of spurious money in circulation. On this basis the total would approximate $23,000 for coin, and $18,000 for notes. With a total circulation of $793,000,000 in coin, and $1,700,000,000 in notes, these figures would indicate a trifle over $3 in counterfeits for each $100,000 of coin circulated, and a little less than $1 in counterfeit for each $100,000 of paper circulated. These figures are undoubtedly over rather than under the facts.

* * *

MONTREAL INSURANCE INSTITUTE.

A regular monthly meeting of the Insurance Institute of Montreal was held on Tuesday night, 17th January. The chair was taken by vice-president, H. M. Lambert, in the absence of the president, Mr. T. L. Morrissey. Two papers on practical subjects were read. The first by Mr. P. Clinch, secretary of the New Brunswick Board of Fire Underwriters, who dealt with "The Sawmill Hazard." He told his hearers of the sawmills of twenty-five years ago, and their lack of fire protection, except a small pump fed from the engine-room, and said that such mills usually caught fire from the boiler-room, and occasionally from the torches and lamps that were carried by the employees. He mentioned reasons for building first-class mills, and the proprietors being given a low rate of insurance, and was of the opinion that the modern mill was in every way a better risk than that of twenty-five years ago. Too little attention, however, was paid to whitewashing, which washed down the dust and the cobwebs, and covered some of the oily boards.

Some features of interest characterized the talk given by Mr. T. B. Macaulay on the "Specialized Mortality Experience of Thirty-four Canadian and American Life Companies." He mentioned some of the peculiarities that this experience has shown. Army officers, it was found, even in times of peace, were not desirable lives, and the mortality among officers in the navy was very heavy. Civil officers—marshals, sheriffs, policemen, etc.—showed also a decidedly heavy mortality. Persons of various weights, heights and ages were touched upon, and he said the whole experience had taught the companies to look more favorably on lightweights, except those of tender ages, and with suspicion upon persons with a tendency to obesity.

* * *

Nominations for officers for the Montreal Produce Merchants' Association resulted in the election by acclamation of the following: H. A. Hodgson, president; Mr. W. H. Meldrum, vice-president; Mr. A. C. H. Froemcke, treasurer.

* * *

—Word comes from London that Lord Strathcona was on Tuesday unanimously re-elected president of the City of London International Commercial Association. It is also cabled that the Glasgow Chamber of Commerce has passed a resolution, supporting Chamberlain's preference plans unanimously.

* * *

The annual meeting of the Wholesale Booksellers' and Stationers' Section of the Toronto Board of Trade on Tuesday noon, resulted in the election of these officers: Chairman, Richard Brown; vice-chairman, George R. Warwick; secretary-treasurer, F. G. Morley; executive committee, Rev. Wm. Briggs, George N. Morang, Thomas A. Weldon, W. P. Gundy and S. R. Hart.

* * *

A deputation of cotton men, including Messrs. D. Morrice, sen., D. Morrice, jun., Canadian Colored Cotton Company; B. Tooke, of Tooke Bros.; A. B. Mole, Dominion Cotton Mills; and Charles B. Gordon, Standard Shirt Company, Montreal; last week waited upon the Dominion Government at Ottawa, with a request for an increase of duties on cottons and manufactured goods be made. Sir Wilfrid Laurier replied that counter-representations had been made, but that the Government would give serious attention to the views of the petitioners.

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, January 19th, 1905, as compared with those of the previous week:

	Jan. 19.	Jan. 12.
Montreal	$22,244,848	$23,525,040
Toronto	19,573,508	22,046,357
Winnipeg	6,018,193	7,066,845
Halifax	1,710,806	2,128,630
Hamilton	1,171,192	1,310,507

NORTH OF ENGLAND LETTER.

The trade reviewers have nothing very positive to say about the course of 1904. In the words of one of the most respectworthy writers, "He would be a bold man who would venture to say that 1904 leaves the industrial, commercial, and financial position of this country better than it found it; or that the outlook presents any very tangible assurance of improvement." There is room for improvement in profit margins no less than in volumes. Dear raw materials are conflicting in some lines with cheap manufactured goods. As credit is good despite misfortune, it would need only a little additional impetus to restore a fairly general satisfaction. It is for this addition that all eyes are straining. Canada is looked to for a little, South Africa and Australia are looked to for more. But greater than these is the huge home market which is too little considered by writers because no statistics are tabulated telling of its progress, or retrogression. It seems odd in a way that our internal business should be the one of which fewest concrete data are obtainable. A matter on which manufacturers on this side are growing uneasy is the inequitable incidence of patent law and the registration of industrial designs. English firms get no valid and lasting protection in foreign countries, and some colonies without manufacturing in these places. Whereas persons domiciled abroad are free to enjoy all the protection available to British firms without any stipulation as to manufacturing in this country. In many ways this has been a hardship of real moment. Witness the coal-tar dye industry hampered by foreign-owned patent letters, and the lace trade whose designs are filched as soon as invented and put upon the markets by Germans. Feeling is strong enough on the points to justify an opinion that some official steps will be taken within measurable time. Even from authorities wont to frown on any legislative interference with trading matters there are no arguments forthcoming to show what advantages—if any—the United Kingdom reaps from the present state of affairs.

Wool values are the cause of some distrust among handlers of woolen goods. As usual there is a section which protests that wool must go down. Those with wool to sell insist that wool must go up further, and there is much to be said in favor of the latter theory. If merino wools were to advance and put a normal distance between their prices and those of crossbreds, there could scarcely be a doubt of a continuation of present levels. But merinos are obstinate, and they are perhaps not so short in supply, relatively, as coarser grades. The present proximity of prices constitutes a temptation to consumers to select fine rather than coarse wools where fashion allows. Bulls repose faith in the statistical position and the alleged contraction of flocks everywhere. Bears point to the paucity of home demand for goods, and the difficulty of recouping the cost of wool out of the available prices for cloths. But wool is governed by no one set of local conditions, and English consumers are ready to admit that their conservatism and scepticism during the two past years have brought them the worst of the market. Yet in Bradford men are asking whether the frantic buying of good parcels for the United States is entirely sane.

Mention of Bradford provokes a note as to certain electrical dangers recently revealed there. Nobody was hurt, happily, but some sensation was caused by an upheaval of its busiest roadway, accompanied by a roar of flames. The street was honeycombed by cables, drains, and mains, and for a time the cause could not be deciphered. At length it was made out that a powerful cable laid some years ago had fused at every box, and had ignited a leaky gas main. It is apparent now that gas has a disintegrating effect upon some insulating materials, and that the near presence of the very high-pressure wires used for driving trolley-tramcars may also be prejudicial to cables in the vicinity. Electrolysis is a technical subject that the rapid onmarch of electrification is soon to make us painfully familiar with. To report all damage and provide a new system of transmission secure against accidents is likely to cost the city of Bradford some $250,000, or, say, one dollar per head of population.

A word has been published on this side concerning the projected establishment of tin-plate and pressed-steel works at Morrisburg, (Ont.). As one recently paid a visit to a factory of the same kind in South Wales it is perhaps opportune to indicate roughly how the business is done on this side. Of course, at Llanelly the Welsh company has immense natural advantages, being on the sea, and immediately above the minerals used in manufacture. The machinery employed for drawing or stamping is English, American, and German, each being used according to its special adaptability. Local workpeople are adepts in the arts of tinning and galvanizing and japanning, but for certain parts of the enamelling processes, German and Italian workmen are engaged. The export market for seamless hollow-ware is very large and wide-spread, and about four-fifths of the Welsh company's production is sold over sea. Perfection of finish is an important item, and it must be related to cheapness.

NORTH COUNTRY.

Halifax, Yorks, January 7th, 1905.

* * *

TRUST AND LOAN COMPANY OF CANADA.

Editor, Monetary Times,—

Sir,—In your issue of 13th inst. appears a letter from "Another Shareholder,' referring to what he calls the "manifest unfairness" of my criticism of that unfortunate remark made by the chairman of the company named, some weeks ago in London, owing to my having omitted part of the sentence in which the remark occurred. As, however, the remainder of the sentence simply stated that the Trust and Loan Company was loaning elsewhere the money withdrawn from Ontario, and as no one had suggested that the company was going out of business entirely, and therefore withdrawing their funds from circulation, for the sake of brevity I did not quote the rest of the sentence, knowing that any one with ordinary intelligence would understand the sequence of it.

With regard to the relative remunerativeness of loaning money in Ontario and in the newer provinces of our Dominion of Canada, those who understand how to conduct properly the business of a mortgage loan company know well that it is the *net* return or profit which is the all-important consideration, secondary only to the security of the capital invested. Therefore the bald statement that 7 per cent. in the North-West is far better than 5½ per cent. in Ontario is most misleading, when one considers the great expense of procuring and retaining business there, and of frequently inspecting the properties under mortgage in that region of great distances, which is the only safe way to do business, and is the rule, I hope, with the Trust and Loan Company.

"Another Shareholder" should bear in mind also, and I hope the Winnipeg commissioner of the company has not forgotten, the wise old adage about the higher the rate the greater the risk, as well as the indubitable fact that no newly settled district has or can have that stability of value, which a long settled district possesses; and that to pursue business in the outlying parts of this vast country for the sake of a nominal one or two per cent. higher rate of interest is simply borrowing trouble for any corporation or individual that does so. Another truism occurs to me as appropriate in this connection, namely, that it is a mistake to put all your eggs in one basket, and as a shareholder I commend it to the careful consideration of the chairman of the Trust and Loan Company.

As one who is financially interested in several Canadian mortgage companies, I can assure "Another Shareholder" that it is the exception rather than the rule for the working expenses of a loan company to exceed 1 per cent., and if those of the Trust and Loan Company do so, then their eagerness to secure the highest rates of interest is easily explained, though the prudence and discretion of their directors are not so apparent.

"Another Shareholder" concludes his letter by saying that the "offensive language" employed in your issue of 13th

inst. is not "the way to attract" Englishmen, such as Sir Vincent Caillard, to visit this country. I have read my former letter over carefully, and fail to see anything that can be stimatized as offensive in it, but would point out that it was for the Trust and Loan Company's good, and not specially for Canada's, that I expressed the hope that their chairman would be induced to pay us a long visit this year.

Yours, etc.,

QUEEN CITY.

17th January, 1905.

* * *

A PHILOSOPHIC CORRESPONDENT.

A letter, not for publication but as a suggestion for an editorial, comes to us from the East. It is much to be wished, dear "Mayflower," that you had not marked your letter private, because it would make interesting reading for many bank men among our subscribers. You seem to be an Old Countryman, perhaps prematurely old, who has not yet got used to his surroundings. What you say about discipline, the dignity of a bank man's position, the need of study and observation to make a junior bank clerk worthy of promotion, is quite to the point. But, dear "Mayflower," it is given to only few bank clerks to reach the angelic stage. For the most part they are very, very human. The Monetary Times knows some juniors who show respect for their employ and a desire to get on; and therefore they will study and even work overtime; but most of them are looking for recreation. It is natural for us to regard mostly with curiosity prematurely old young men, who leave the wholesome sports of youth to grind in the office or to burn the midnight oil, for the average man admires the boyish boy, rather than the mannish young man. But it cannot be denied that you are correct in your assumption that in order to get on it is necessary to study. You do not, however, leave room in your scheme of life for the free play of natural impulse. You appear to forget, if indeed you have ever learned, that boys will be boys." It is fifteen centuries or more since Juvenal told us of the importance of a sound mind in a sound body. And, Mr. Mayflower, you rarely get a sound mind without the sound body. If, as Dr. John Brown puts it, you aim to be, in your chosen line of life, "capax and efficax," you may not dare to neglect out-door exercise and recreation, and thus build up a body to its proper strength. To sacrifice your early years of youth or young manhood to study, neglecting what goes to make thews and sinews, may result in your becoming an immature Gradgrind, the unnatural swelled-headed creature of facts and figures which Dickens has painted in Hard Times.

From the name on your card, and from some of the sentiments you express, it is to be inferred that you are of a nationality noted for taking life very seriously, and this is not to be scorned altogether. There is a stage of adolescence when one is very clever, prematurely sapient, in fact very intolerant, when in fact we ought to be spanked rather than flattered. We have most of us been through this stage—I have a strong notion that you are in it just now. If you have any sense of humor, respected "Mayflower," it may do you good to listen to an ideal of the bank employee, by a clever satirist, which is just about as far from the real thing as your ideal. Perhaps a year ago, H. F. Gadsby, in the Toronto Star, dealing with banking matters, after telling of the Doric fane of the Bank of Montreal office on Yonge street, and the Corinthian facade of the Bank of Nova Scotia building on King street, suggests that the front of the Bank of Commerce should possess a frieze, something like the Elgin marbles, the figures in high relief, portraying the seven stages of a banker from junior clerk to general manager:

"First the junior, with his shining morning face, punctuated with a cigarette, on his daily round of collections; next, the discount clerk, off duty, trousers turned up, briar pipe, followed by a terrier pup so thoroughbred that he's almost an idiot; then the teller, peering through his cage, but something in his face to indicate that he is a dancing man and a favorite with the ladies; then the accountant, trying out his balance; then the branch manager with bland manners and an easy corpulence, a golf stick in the background to hint at gentlemanly pastimes; then the inspector, keen of scent, on the trail of certain desperate sports who play poker for a cent ante; last of all, the general manager, haughty and enthroned, corporation magnates and finance ministers grovelling in the dust before him."

To quote one of your much-labored philosophic sentences, a very Bradley Headstone-like sentence, indeed: "You will agree I am perfectly sure in the statement that in the existing era the superficial prevails, and there is a serious want of steady application, by night and by day, if such were necessary, on the part of subordinates to inform themselves in the principles of banking as inculcated by the masters of the profession. . . Only by steady effort and by constant study can a young banker hope to earn advancement," which stated simply, means that it is the hard-working boy who gets on. Well, we are advocates of hard work; it will do much. But it will not make an able banker out of a dilettante or a dude. Nor will it produce a broad-minded financier out of a shallow-pated kerb-stone operator. There must be a foundation of brain, and a sufficient amount of brawn, out of which to evolve the future master of finance. One thing we welcome in your communication, and it is this: you seem to admit the need of patience as well as industry in the career of a young man in business life. There was never a time when it more needed to be known that promotion cannot be hurried or forced by fretting and impatience. Too many young men spoil their chances from a lack of patient endurance. They seek to run before they have learned to walk, not knowing that they need to learn how to walk, and to walk well and warily.

* * *

THE PELICAN LIFE IN THE WEST.

People in the eastern part of Canada have long been familiar with the British Empire Life Assurance Company, which not so many months ago became merged with the Pelican and British Empire Life office, but we are not so sure that this old and strong concern is equally well known or has made so many friends in the western part of Canada. However, we hear from Winnipeg this week that the company is making, through the agency of those energetic people, Nares, Robinson & Black, of Winnipeg, and their subordinates, a strong push for business in Manitoba and the North-West. And, as these are good people to work for it, so the office should be a good one to work for; it is long-established, well-officered and strong, having assets of twenty-five millions of dollars, and a surplus of six millions of resources over liabilities; besides all of which it offers reasonable rates of premium and pays good bonuses. We learn that the company has done an excellent business in Canada in 1904.

* * *

—We hear from Montreal that Mr. W. I. Gear, first vice-president of the Board of Trade of that city has been nominated for the presidency by Mr. George E. Drummond, the retiring president, and Mr. Peter Lyall was nominated for a seat on the council of the board by Mr. Arthur J. Hodgson. Nominations close on January 20th at 6 p.m., and the annual meeting will be held January 31st. The nomination of Mr. Norman Wight for president of the Corn Exchange Association was posted on 'Change at the Board of Trade. The nomination was made by Mr. A. P. Stuart. Nominations closed last night, and the annual meeting will take place January 25th.

Meetings

BANK OF HAMILTON.

The thirty-third annual general meeting of the Bank of Hamilton was held at noon, on Monday, January 16th, at the head office of the bank, at Hamilton. Hon. William Gibson, the president, was voted chairman, and the general manager, J. Turnbull, secretary.

The president, Hon. Mr. Gibson, submitted the annual statement, explaining that it was for six months only. It was as follows:

BANKERS

MONTREAL—Molsons Bank; Imperial Bank of Canada.
NEW YORK—The Importers and Traders National Bank
LONDON ENGLAND—The National Bank of Scotland.

Report of the Directors.

The directors beg to submit their annual report to the shareholders for the six months ended November 30th, 1904:

The balance at credit of profit and loss account, May 31st, 1904, was			$ 67,080 95
The profits for the six months ended November 30th, 1904, after deducting charges of management and making provision for bad and doubtful debts are			182,824 09
Premium received on new stock			4,505 00
			$254,410 04
From which has been declared:			
Dividend, 5 per cent., payable Dec. 1st, 1904		$111,733 76	
Carried to reserve fund from profits	$95,495 00		
Carried to reserve fund from premium on new stock, as above	4,505 00		
		$100,000 00	
Allowance to ex-president, authorized by shareholders (for six months)		2,500 00	
			$214,233 76
Balance of profit and loss carried forward			$ 40,176 28

The directors desire to remind the shareholders that, by resolution passed at the last annual meeting, the date of future annual general meetings was changed to the third Monday in January.

The accounts herewith submitted, therefore, embrace a period of six months only, being from May 31st to November 30th.

The directors believe that the results will commend themselves favorably to the shareholders.

The directors report, with sorrow, the death of their late colleague, Arthur B. Lee, of Toronto.

Wm. Gibson, President.

Hamilton, December 12th, 1904.

		$20,553,846 57

J. Turnbull,
General Manager.

Bank of Hamilton, Hamilton, Nov. 30th, 1904.

Senator Gibson, in moving the adoption of the report, said: It is very gratifying to the board of directors, and I am sure it will be to the shareholders, that in six months the assets of the bank have increased nearly two million dollars, or, to be more exact, $1,840,000. It must, indeed, be gratifying to those gentlemen who have been connected with the institution since its inception and who are with us to-day, to see that our total assets have reached over $26,500,000 by this increase of $1,800,000. As you know, this has been what is called the lean half-year, yet, notwithstanding that, we have been able to report a profit at the rate of 16 1-3 per cent. per annum on the capital stock of the bank in that time. If you look at the first page of the report you will see that we have carried to reserve over $95,000, which, together with the $5,000 premium on new stock, makes a total of $100,000 added to the rest. This addition to our reserve leaves us, in round figures, only $135,000 more to carry to that account to make our reserve equal to our total capital. While this bank is not much given to prophesying, I think I can safely say that by the next annual meeting we will see our reserve and our capital the same. That will indeed be a proud position to have attained. (Applause.)

It cannot be denied that in the general prosperity of the country we, as a bank, must also expand, and, while we are not rushing into every new field, the directors are carefully considering every point and selecting such as they consider will prove sound and permanent. We have had under consideration, and have purchased a new site in Toronto. We have invested in good property there, and I am sure that the shareholders will approve. In the property at the corner of Spadina Ave. and King St. we have an excellent investment and a good class of tenants. We also purchased property in the electrical city of Niagara Falls, to meet the increasing demands of our business there, which realizes handsomely on the investment.

In the new districts of the North-West we are pursuing the same careful policy in making extensions from time to time, and our investments in bank premises there have resulted entirely satisfactory to the board.

Since our last meeting, indeed, shortly after we last met here, we lost one of our directors, A. B. Lee, Toronto, and our board felt that the importance of having a representative in that important city should not be overlooked. The members of the board and the shareholders are to be congratulated upon the man whose services we were able to secure, Mr. C. C. Dalton, a gentleman who has made a success of his own business, and who, I am sure, will be approved of at this annual meeting.

I regret also that our friend and fellow-director, Cyrus Birge, met with a serious loss in the death of his wife, and it is due to him that the cause of his absence should be mentioned at this meeting and our sympathy extended to him.

I need not speak of the loyalty of the staff and General Manager, for the General Manager is as loyal to them as they are to him, and both are at all times loyal to the bank. I can assure you with great satisfaction that the greatest harmony exists between the board, the General Manager and the staff.

For the six months since our last meeting the bank has paid a dividend at the rate of ten per cent. per annum, and I am sure that everyone will be satisfied with the half-year's results.

Mr. Gibson concluded by moving, seconded by Mr. John Proctor, the adoption of the report, which was carried.

Moved by Mr. Hendrie, seconded by Mr. F. W. Gates: "That the thanks of this meeting be given to the president and directors for their services during the past half-year."

Both mover and seconder spoke in congratulatory terms in presenting the resolution, and the chairman called upon Colonel J. S. Hendrie to reply on behalf of the Board. As the youngest member of the Board, he was much pleased to reply to the resolution, particularly as it was moved and seconded by two of the oldest gentlemen present, and two of the original stockholders. He could not add much to what had been said, except a few words in regard to securities. He had submitted the American securities to a very high authority, and the report which he had received upon them was most satisfactory. It was to the effect that better securities could not be held.

Mr. Adam Brown moved, seconded by Mr. John A. Bruce: "That the thanks of this meeting be given to the general manager, inspectors, agents, and other officers of the bank for the efficient performance of their respective duties."

The resolution was unanimously adopted, and Mr. Turnbull replied.

On motion of Mr. Wm. Hendrie, seconded by Mr. F. W. Gates, and carried, the president was asked to cast one ballot for the board of directors, and the following were declared elected: Messrs. Hon. William Gibson, John Proctor, John S. Hendrie, M.L.A.; George Rutherford, J. Turnbull, C. A. Birge and C. C. Dalton.

At a subsequent meeting of the directors, Hon. Wm. Gibson was re-elected president, and Mr. J. Turnbull, vice-president.

ENVELOPES made in great variety.

Mercantile Summary.

A company has just received a charter of incorporation from the Manitoba Government under the title of The House Furnishings Company, Limited. Its capital is $400,000, and among the charter members are Wm. and C. F. H. Grundy, of Winnipeg.

The Bonanza Creek Gold Mining Company, Limited, Toronto, capital $1,750,000, has been given a charter by the Ontario Government. John Payne, R. Credicott and others of Toronto are named among the directors. The company is authorized to carry on, either as principal or agent, the business of mining and exploration in all branches.

It is stated that the capitalists who propose building a $3,000,000 hotel in Montreal have succeeded in obtaining the promise of sufficient financial backing in England to warrant going on with the enterprise. The plan is to build a ten-storey building at the corner of St. Catherine and Peel streets, and to have the hotel thoroughly up to date, and on a much larger scale than anything hitherto attempted in Canada.

The Fording Valley Railway Company is applying to the British Columbia Legislature for a charter. It is proposed to build a line to connect with the British Columbia southern branch of the C.P.R. at the point where Michel Creek joins Elk River. Thence it would go to Henretta Creek, and follow that stream to the Alberta boundary. It would greatly help in the development of the coal lands now being worked by the Imperial Coal Co., and the C.P.R. also have large coal holdings in the Fording Valley.

We note that the Ontario Wind Engine and Pump Co., of Toronto, were favored the other day with an order for two complete air-motor outfits for the Imperial Government in one of the Crown colonies of West Africa. This order came entirely unsolicited, and is the result of eight years' trade with the Imperial Government in another colony in the Mediterranean, which has been entirely satisfactory to the authorities. No greater compliment needs to be paid to a company than such orders in the fact of world-wide competition.

A few years ago the quantity of foreign goods going into the Yukon was about double that of the domestic, but now a very different state of things prevails. Last year the total entries of goods into the Yukon district amounted to 35,468 tons, of which only 12,602 tons were foreign. For the past three fiscal years there has been a large and increasing balance of trade in Canada's favor. This in the case of goods entering northern British Columbia and Yukon, via the White Pass and Yukon route, amounted in 1901-2 to $1,916,850: in 1902-3, $1,994,539. and in 1903-4, $2,645.622. In the case of importations entering via Alaska, there was a balance of trade in Canada's favor of $49.578 in 1902, and of $26,805 in 1903. The total imports for the last fiscal year by this route were: Domestic, $432,294: foreign, $405.489. A considerable portion of the foreign goods were re-exported to points in Alaska.

CORRESPONDENCE INVITED.

Mercantile Summary.

—The annual meeting of the St. John, N.B., Railway and Bridge Company was held last week. The old board of directors was re-elected, as follows: Mr. Justice Barker, president; W. H. Thorne, J. Murray Kay, Thos. Williams, F. A. Jones, Robt. Meighan. T. B. Robinson was re-appointed treasurer.

The value of the buildings erected in Vancouver during the year 1904 was $1,968,891, an increase of $542,000 odd over the one previous. In the report of the building inspector upon the subject, great commendation is given to the character of the business blocks and the residences erected. Altogether the report is a very encouraging one to those having the interests of the Pacific city at heart.

—The annual meeting of the Ottawa River Navigation Company was held last week. The season's business compared well with that of 1903, considering that the country had been seriously affected by the flooded state of the Ottawa river, no less than five wharves being submerged during May and June. The following board was elected: H. W. Shepherd, president; Herbert Walsh, vice-president; R. W. Shepherd, managing director; Richard Bolton and A. F. Riddell, directors.

—The London, Ont., Street Railway Company held its annual meeting last week. The reports submitted were satisfactory, and showed that the gross earnings for 1904 were $180,017, compared with $172,084 for the previous year. The number of passengers carried also increased from 4,305,975 to 4,531,776. The election of officers resulted in the re-election of the old directorate. Mr. H. A. Everett is president, Mr. T. H. Smallman, vice-president, and Mr. C. E. A. Carr, secretary-treasurer and general manager.

The impression the Toronto Industrial Exhibition makes upon visitors must be very gratifying to the management, as well as to Canadians generally. An association has just been formed in Liverpool, England, to advertise that city, and to hold an exhibition, and, knowing how successful the Toronto Fair has been, its treasurer has written to Manager Orr for full particulars and pointers. We note that the plans for a fire-proof art gallery for the Toronto Industrial, prepared by Mr. Gouinlock, the Toronto architect, have been approved by the directorate, and have been handed on to the City Council.

Advance sheets of the city directory for Toronto for 1905 show Toronto is still growing rapidly. The number of individual names in the volume, by actual count, is 106,691, exclusive of firms, corporations, etc., an increase of 5,045 over 1904 issue. Multiplying the number of individual names, 106,691, by 2¾ gives an estimate of the population of Toronto at the end of 1904 to be 293,395. The number of buildings of all kinds in Toronto, as shown by the street directory, is 47,523. Of these, there are shown 57 vacant stores and 759 vacant houses, including those in course of erection, being less than 1¾ per cent. of the buildings in Toronto. The above 816 vacant buildings include buildings in course of erection.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary

—The Toronto Pressed Steel Company, Limited, Toronto Junction, has been granted an Ontario charter for the purpose of making and dealing in railway and contractors' supplies, wheel and drag scrapers and other implements. The capital is placed at $100,000. J. R. L. Starr and J. H. Spence are among the provisional directors.

Said Mr. Forbes Robertson to the Canadian Club last week: "We cannot do without painting, sculpture, music and the drama. They are as it were the wine, the joyousness of our lives, and the cultivation and the fostering of the fine arts in all their delicate blends ought to be a great principle in any man who has the interest of the community at large at heart."

—The Canadian Shredded Wheat Company, Limited, Niagara Falls, Ont., has been incorporated with a capital of $100,000. One of its powers is to "instruct the public in the knowledge and proper use of proper foods"; and it will manufacture, or cause to be manufactured, machinery, mills and appliances for manufacturing foods. Joseph Henderson, of Toronto, is a prominent member.

The Hamilton Cataract Power, Light and Traction Company have recently started tht two 5,000-kilowatt Westinghouse generators in their De Cew Falls, Ont., power station. Power is supplied from Welland Canal feeders, tapped in about fourteen miles above the power station, and at the station the water has a head of 267 feet. The Westinghouse generators are of the two-bearing type, direct connected to Escher-Wyss water-wheels, and run at a speed of 286 revolutions per minute. They generate three-phase current at a frequency of 66 cycles and a pressure of 2,400 volts. The power is transmitted to the city of Hamilton, Ont., where it is used for lighting, street railway and manufacturing purposes. A reserve steam-driven station is located at Hamilton, which contains two 1,000-kilowatt Westinghouse generators.

Mr. William Whyte, of the C.P.R., says that the Canadian Pacific is now laid with the standard 80-lb. steel rails from Montreal to Winnipeg, and he expects the entire main line will be completed to Vancouver by the end of the present year. Mr. Whyte has been in Montreal conferring with the president and officials of the road respecting the vast amount of new work which is to be done by the company this year from Port Arthur to the Pacific. He says that the company's new station will probably be completed in March, and that the steel work of the hotel is being pushed ahead quite rapidly. Mr. Whyte thinks the Winnipeg C.P.R. terminals, when fully completed, will be the most extensive and complete in the world. There will be no less than 110 miles of track, and he says that the new subway, so long waited for by company and city alike, has proved a great convenience to all concerned. Traffic keeps up, he said, and, referring to the grain, he remarked it was supposed that some 6,000,000 bushels of wheat still remained in the elevators along the line west of Winnipeg, while there were most likely 7,000,000 additional bushels in the hands of the farmers. The road will shortly be double-tracked from Winnipeg to Lake Superior.

The Western Oil and Coal Company, Vancouver, has just finished the boring of two wells in its Alberta oil fields. One of them is said to show very good results, but the other proved dry. The company has some 16,000 acres of oil lands in Alberta and south-east Kootenay, and is making preparations to begin boring more wells. It has appliances for drilling to a depth of 3,000 feet, and this depth could be increased in case of necessity.

PROVIDING FOR OLD AGE.

While money is not the most important thing in this world, yet there is an evident satisfaction for any man in the fact that he has an assured provision made for his old age. There is no investment in the world which offers the same advantages for providing for old age as does an Endowment Policy with a good Life Insurance Company, like the Manufacturers Life. It has the best features of a savings bank and combines with them an incentive to saving which the savings bank could never give. It, moreover, increases the value of a man's estate by the full face of the policy from the date of the first premium, so that even if he does not need protection for his own old age, those dependent on him are provided for.

Mercantile Summary.

The retail druggists of Montreal are making arrangements to affiliate with the Dominion Retail Merchants' Association.

The Montreal Telegraph Company held their annual meeting in Montreal on Friday last. The report was deemed satisfactory and adopted, and the old board of directors was re-elected.

Insolvencies of recent occurrence are reported in Montreal as follows: T. C. Grothé, jeweller, has assigned. He formerly worked for his father, T. A. Grothé, an old-established jeweller on St. Lawrence Main Street, and began for himself in 1900, but is not credited with having shown very good management. He is said to owe some $15,000 to $20,000, a considerable proportion being for goods comparatively lately bought.—Jules Breney, who came from France in 1902, and started a fancy goods and notion business in the East End, has not made a success of it. He was recently sued for rent, and has now assigned, owing about $4,000.——Mrs. Louis Fontaine, carrying on a small grocery business under the style of N. G. Bedard & Co., for the benefit of a son-in-law of that name, has assigned after a year's experience.—A boot and shoe business, carried on under the style of E. Reeves & Co., is to be wound up by the assignee. The late E. Reeves failed in 1897, and the business was continued by his widow, who subsequently became Mrs. E. Dion, but she has still carried on the business as her personal venture under the management of a clerk. There was a falling behind in payments last fall, which has led to a demand of assignment being made. Liabilities are $5,055.—L. Perrault, who has been doing business in a small tailoring way for five or six years, is reported insolvent, with an indebtedness of $1,800.—J. G. Paquette, in the dry goods line for about a year, at first as Paquette & Forest, has made an assignment.—Joseph Simard, general dealer, Causapscal, Que., recently reported as insolvent, is trying to settle for 50 cents on liabilities of about $3,000.—E. Nicolle, of Montmagny, Que., long in business as a custom shoemaker, and of late years also keeping a stock of ready-made goods, is offering his creditors 40 per cent. on liabilities of $2,745.—An assignment has been made by E. E. Legendre, general store, Lambton Station, Que., as the result of several suits recently instituted against him on past due accounts. He owes about $3,000—An offer of compromise has been made by J. N. Creed & Co., of Halifax, N.S., the fish and general commission firm reported as having suspended several weeks ago. They propose to pay 31 cents on liabilities of about $22,000.

Mercantile Summary.

The King's College of Engineering, now located in Windsor, N.S., is to be practically removed to Sydney, C.B.

Wm. Loeb & Co., manufacturers of jewelry, Providence, R.I., are thinking of establishing a branch factory at Hamilton, Ont.

The Kingston, Ont., Locomotive Works have, we understand, received a contract from the Temiskaming and Northern Ontario Railway for four more large engines.

The Opera House Block at Neepawa, Man., has been destroyed by fire. The chief losses were $12,000 on the building; Kerr & Graham, general merchants, $25,000; Geo. Dinwoody, store, $5,000.

Prices have already been issued for next season's output of binder twine. They are as follows: Blue Ribbon, 12½c.; Red Cap, 11½c.; Tiger, 10½c, and Standard, 9½c.; single shingle yarn, 10c.

The proposal is taking definite shape for the building of an electric railway from the terminus of the Q.R.L. & P. Company's road, at St. Joachim, near Quebec, to Murray Bay, and perhaps as far as Saguenay River.

The Fredericton, N.B., Boom Co. elected the following officers at their annual meeting, held last week: H. F. Randolph, president; C. L. Jewett, secretary; Managing Committee, W. H. Murray, A. H. F. Randolph, Parker Glasier, E. L. Jewett.

Another Toronto public school was on Friday last destroyed by fire—the one on Phœbe Street. Seven hundred children were in the building, but all were removed in fire-drill order without injury. The origin of the fire is attributed by some to an overheated furnace. Loss, $12,000, covered by insurance.

Messrs. R. Robertson and J. A. MacMillan, of Nelson, B.C., and C. J. Clayton, of Victoria, who recently made a discovery of specular hematite iron in the vicinity of Gray Creek, talk of erecting an electric smelting plant at Nelson for the reduction of the ore, which is believed to be rather extra high grade. An abundance of water power is at hand for the development of electricity, while the Crow's Nest Pass coal fields are only 150 miles away.

The Canadian Pacific Railway is preparing plans for important improvements to its Vancouver harbor facilities. It is stated that a sum probably of $250,000 will be spent on the jetty wharf and $120,000 or so upon additional tracks and trestles along the wharf front. The idea is to accommodate not only C.P.R. steamers, but vessels of other lines as well, for which greater facilities are needed on account of the rapidly increasing business. The company also intends to devote considerable attention to mountain resorts. Among the most notable improvements will be the making of new trails through the mountains from several resorts at Banff, Mt. Stephen, Glacier and Laggan, opening up pretty scenes in the Rockies, hitherto inaccessible to tourists.

Victoria, B.C., capitalists are ready with big things for Esquimalt, should the Imperial navy station be abandoned there, as is the present intention. A company is being formed to build a large wharf, to accommodate ships of the heaviest tonnage, also a sawmill for the supplying of foreign markets. Iron works, too, are proposed to be built in close proximity to Esquimalt, in which proposition both Victoria and English capital is interested.

Mercantile Summary.

The Canadian Northern Railway Co. has decided to strike out for Hudson's Bay from the Prince Albert branch—probably from some point between Melfort and Tisdale. The line would run north-easterly for about 500 miles. The company will start the building of new terminals next spring.

The Canadian Pacific Railway is now selling lands at over the $7 mark. The average in Manitoba was $7.21 per acre as compared with $4.80 last year. The sales in the province totalled 1,239 acres for $8,930, last year, against 4,718 acres for $17,837 in the year previous. In Alberta the sales last year were 19,114 acres for $73,795, against 10,553 acres for $48,072 in 1903. In Assiniboia, the sales last year were 11,806 acres for $56,874, compared with 16,995 acres for $67,047 in 1903. In Saskatchewan they were 2,268 acres for $11,675 last year, against 2,880 acres for $12,280 in 1903.

Hon. Mr. Congdon, ex-governor of the Yukon Territory, speaks in confident terms of the mining industry of the Yukon. The gold output of the district for the year ending June 30th next, he says will total ten million dollars. "In a few years the output will be larger. It is only a question of getting in machinery for the purpose of decreasing the cost of mining. That is now being introduced, and its effect will soon be apparent. There is no doubt," he concluded, "that the country continues to be as rich as ever in its gold-bearing properties."

The Twin City Rapid Transit Company have recently made extensive additions to their lines. They are now extending the line to South St. Paul, necessitating the construction of about five miles of track. This company has recently completed its line to White Bear Village, and also its extension to South Stillwater, and in the spring will commence double tracking its branch lines. Another double track line is also under consideration between St. Paul and Minneapolis, entering that city over the Marshall Avenue bridge four miles south of its other lines between the two cities.

A news-item from Ogdensburg, N.Y., says that Canadian capitalists have begun suit in the Supreme Court against the village of Waddington, St. Lawrence County, for $25,000 for breach of contract. The village recently voted to sell the water power which supplies the place with light and water for $4,000. Before the property was transferred the Remington Paper Company, of Watertown, obtained an option on it at $15,000, intending to build a railway from Waddington to connect with a road at Norfolk, to carry Canadian pulp-wood to the mills at Racquette. The village electors then decided to control their own light and water service, and unanimously rescinded their previous action.

H. C. McLEOD, General Manager.

On Saturday morning, the Royal Victoria Hospital on the side of the Mountain, Montreal, took fire, and $30,000 damage was done, mainly to the administration section, before it could be extinguished.

There was a serious fire last Sunday morning at the Fensom Elevator Works, which completely destroyed the woodworking department, and rendered some valuable patterns useless. The loss is estimated at over $20,000, covered by insurance.

The Ross block at Sydney, C.B., has been burned down at a loss of $30,000, insurance $19,000; and a few days later, A. W. Rodden & Co.'s shoe store was burned, with a damage of $10,000, insurance $5,000.

The new Commercial Club building in Belleville, was on the 16th inst., damaged by fire to the extent of $20,000. On the same day in London, Ont., T. E. Mara's dry goods store was burned, stock being destroyed to the value of $40,000.

—The Locomotive and Machine Company, Ltd., Montreal, have elected directors for the ensuing year as follows: Messrs. A. J. Pitkin, Pliny Fisk, G. R. Sheldon, W. M. Barnum, K. W. Blackwell, J. Reid Wilson, and D. W. Morrow. At a subsequent meeting of the board of directors, the following officials were elected: Messrs. A. J. Pitkin, president; J. E. Sague, vice-president; R. J. Gross, second vice-president; Leigh Best, secretary; C. B. Denny, treasurer; C. E. Patterson, comptroller.

Rumors as to a possible consummation of the talk of establishing a large shipbuilding plant at Halifax, are again making themselves heard. A New York capitalist is said to be trying to get up a scheme for such an enterprise; and it is whispered that something between $5,000,000 and $25,000,000 is in mind for the probable amount of investment. In the meanwhile the Board of Trade and the city council of Halifax have appointed a joint committee to collect information on the general subject, and to float a preliminary company to qualify for $300,000 in bonuses which have been offered by municipalities along the harbor, and by the Provincial Government. There is also a subsidy offered by the Dominion on tonnage turned out.

* * *

TORONTO MARKETS.

Toronto, January 18th, 1905.

Drugs, Chemicals, etc.—A quiet side has been done since the holidays, but prices are firm. Opium is more active, as is also quinine. Bromides have an upward tendency. Codliver oil is easier. Blue vitriol is firm. Cream tartar on the other hand is easier. Camphor continues to advance, stocks being light. Carbolic acid continues in good request, but supplies are scanty, owing to war requirements.

Dry Goods.—No very great activity has distinguished the wholesale dry

goods market lately, and this is partly to be accounted for by the severity of winter which caused stocks to be held over. However, this condition is beginning to pass away, and country merchants are coming again into the market. Prices are quite firm and, in fact, in some lines are advancing. Silk especially is very firm, and in some lines of ribbons prices have advanced. The extraordinarily high position of wool is still continuing; indeed, it seems to be becoming more intensified, and cotton, while in the ordinary way, prices would be easier, is becoming stronger as a result of the strong wool situation.

Flour and Grain.—Continued dullness reigns in the flour market; ninety per cent. patents are quoted at $4.20 to $4.35. Millfeed is dull. Wheat continues steady, and oats is quite firm. Peas and buckwheat present no feature.

Groceries.—Sugars, while they continue quite firm, have made no further change. The movement is fairly good considering the high prices. In general groceries the trade is fairly active, but it is without special feature.

Hides and Skins.—Not so very much actual business has been done this week. Deerskins are now out of the market. Calf and lambskins are steady. In tallow no change is announced.

Live Stock.—Offerings have been rather heavy this week, but in the majority of cases animals were of poor or only medium quality, and these dragged somewhat. Those that were of anything like good quality went fairly quickly. This applies particularly to export animals; butchers' went slowly. Stockers and feeders are quiet. Milch cows are only in fair request. Export sheep are firm, but not many are in the market.

Provisions. — Comparative quietness has been the rule in the dairy produce trade since the holidays, though prices have continued firm. Cheese is quite steady. Little is coming into the market, and prices are unchanged. Eggs are firm still, with active demand and small receipts. Poultry is high price, as offerings are on the small side. Hogs are firm at 32 to 35c.

Wool.—Business is quiet or rather nil, Values, however, remain as firm as ever, though quotations are from the nature of the case purely nominal.

⁂

MONTREAL MARKETS.

Montreal, Jan. 18th, 1905.

Ashes.—The British market for ashes is reported as practically dead, and there being no present enquiry from that quarter, values have still further declined, $5.50 being now about the figure offered by local buyers for No. 1 pots; seconds, $5 to $5.10. Pearls would realize $7.50 to $7.75.

Dairy Products.—There is no special change in the cheese market. Shipments to Britain are pretty liberal for the season, and the situation favors holders, who are not apparently too disposed to entertain offers of less than 11c. for finest Westerns. Butter rules firm, with good local demand for choicest creamery, which is quoted at 21½ to 21¾c.; under grades run from 20 to 21¼c.; dairy makes, 16½ to 17½c.

Dry Goods.—No special activity is noted in this line as yet, and country orders are not very free at the moment, while city retailers are busy with their January clearing sales. Collections are barely as good as they were a fortnight ago. The cotton companies have made no revision in prices since the New Year, nor is there anything of special interest reported in general values.

Flour.—There has been some recent advance in the flour market, and there is a decidedly firm tone prevailing. We quote Manitoba spring patents, $5.80; strong bakers, $5.50; winter wheat, patents, $5.70 to $5.80; straight rollers, $5.30 to $5.40; ditto, in bags, $2.50 to $2.60.

Groceries.—Since last writing, the local refineries have established another advance of 10c. a cental on all grades of sugars, making the present factory price of standard granulated, in barrels, $5.65, with yellows ranging from $5.15 upwards; bags, 5c. less. The general conditions existing in outside markets point to the probability of still further advance at any moment, and as a consequence refiners report quite liberal buying on the part of jobbers. In molasses the jobbing figure is very firm at 30c., but stocks are extremely light, and some houses are practically sold out. Values in other lines are as last reported.

Hides.—The market has shown no recent variation. For No. 1 beef hides dealers are still paying 9½c., and selling to tanners at the usual advance. For lambskins the price is $1.10 each.

Leather.—All the boot and shoe factories are again in full operation, and most of them report very fair spring orders in hand. They are not, however, buying leather in any very large lots at the moment, though there is more doing in this line than a fortnight ago. Values are generally firmer all around. For No. 2 manufacturers' sole from 24 to 24½c. is now asked, being an advance of half a cent, and all other grades are proportionately dearer. In black leathers glove grain is advanced to 11½c., and grain and waxed upper are also dearer by half a cent, the former being now quoted at 14½c., and the latter at 15½c. Western splits are quoted at 20 to 21c., and harness is firmer at 31c. Russet and colored sheepskins are advanced from ¼ to ½c. per foot.

Metals and Hardware.—In the hardware line business is still quiet, as some of the larger houses are not fully through stocktaking, but in general metals and plumbers' supplies there is an increased movement. Pig iron is dull. Canada plates have been put up in price, as was anticipated by us last week, and from $2.40 to $2.45 is now quoted for fifty-two's. Terne plates have also been advanced to $6.75, but other lines of sheets as yet remain at figures quoted last week. Domestic bar iron continues firm at $1.75 to $1.80; iron pipe, $4.12½ for inch. Boiler plate is steady at $2. Bar steel is quoted at $1.90; cast steel, 7¾c.; machinery and toe calk, $2.50. Nails, both cut and wire, are unchanged at $2.25. Barb wire $2.50, in car lots, Cleveland; from local stock, $2.62½.

Oils, Paints and Glass.—The only change noted in these lines is a slight advance in turpentine of a cent a gallon, owing to a firmer market South, and the present figure for barrel lots is 79c. per gallon. Linseed oil is unchanged. Fish oils are dull and neglected. The glass situation in Belgium is still further complicated, the operatives having decided to stay out till May, and as local stocks are in narrow compass, prices are very firm. There has been some effort to advance white leads, but the general quotation for pure is still $4.40 to $4.50.

SHIPBUILDING ON THE GREAT LAKES.

The Glasgow Herald which devotes careful attention to the condition of the shipbuilding industry, points out that practically the only work being done in United States yards is on Government vessels. As to shipbuilding on the Great Lakes, the only section of it which seems to be profitable, it is developing more and more in the direction of large grain and ore carriers. The last annual report of the American Shipbuilding Company, which controls all the large shipyards of any importance, showed a decrease in earnings of more than 50 per cent. This was the effect on Great Lake shipbuilding of the depression which brought so many other yards into the bankruptcy court. The Herald gives the tonnage built in the United States last year at 324,175 tons, sailing, 48 vessels, 55,497 tons; steam, 106 vessels, 268,678 tons. The total in 1903 was 493,144 tons, sailing, 41 vessels, 57,797 tons; steam, 147 vessels, 435,347 tons. Of the outlook for 1905, The Herald says:—On the Great Lakes the prospects are better, having been greatly improved by a large number of orders for big freight steamers which have been placed since the fall of the year. In October alone twenty-one of these vessels were contracted for. The most important order now being executed in lake shipyards is one for four very large freighters which the United States Steel Corporation have placed with the American Shipbuilding Company. These vessels will each carry 10,000 tons of ore. One freighter now being built at the Lorain yard is 580 feet in length, and is intended to carry 304,000 bushels of wheat. She will be the largest inland cargo steamer in the world. Altogether the yards belonging to the American Shipbuilding Company send particulars of twelve vessels of 79,480 tons as being on hand at their works. Apart from the lakes there seems to be little hope for American shipbuilding except in special legislation. Not one order for an ocean-going steamer, either Atlantic or Pacific, has been placed in United States yards since June, 1901, and for the first time in American history the building of ocean steamers has entirely ceased. This is hardly surprising when prices are remembered. The Newport News Company recently tendered for a merchant steamer for American owners. Their tender was $260,000, but the owners got a tender of $125,000 from a British firm for the same ship. The lake shipbuilders are getting £8 15s. per ton deadweight for the large steamers they are at present building, a price which they would not have the slightest chance of obtaining if they had to compete for the work with European yards.

NEW YORK STREET RAILWAYS.

Many people will be surprised to know that during July 1st, last, there were still as many as 4,000 horses odd used on street railways in New York. This, however, was 600 less than a year previously, and electricity is fast taking the horse's place. The number of passengers carried in the year was 1,341,706,931, and 193 persons were killed and 878 injured. The net earnings of the surface railways were $20,567,122, in 1904, compared with $20,715,127, in 1903. In New York City

City of St. Thomas.

Debentures for Sale.

The City of St. Thomas, Ont., having decided by a vote of the ratepayers to purchase the existing Gas and Electric Light Works, will receive tenders addressed to the undersigned up to noon of Wednesday, February 15th, 1905, for $200,000 of Debentures of the said City of St. Thomas.

Debentures are to be issued in twenty series or blocks of $10,000 each, and the said debentures shall be payable in annual instalments within 30 years from the date of the issue thereof, at the office of the City Treasurer, St. Thomas, and shall have attached thereto coupons for interest at the rate of 4½ per cent. per annum, payable annually at the Treasurer's Office, St. Thomas.

Debentures will be dated March 1st, 1905, and will be ready for delivery on or about March 1st, 1905.

Tenders must state an amount on the dollar for the whole issue, or any series of $10,000, and accrued interest to date of delivery, and the Corporation reserve the right to reject any or all of said tenders.

For any further information and for printed copies of the By-law under which the debentures are issued, application may be made to the undersigned.

S. C. PERRY,
City Treasurer.

Office of the City Treasurer,
St. Thomas, Ont., Jan. 4th, 1905.

Managers and Underwriters.

an interesting matter in this connection is now attracting attention. The city spent $40,000,000 in building a subway in order that better provision should be made for the comfort of its people in moving from one part of the city to another. At certain hours of the day both the surface cars and the elevated railway trains failed to provide suitable accommodation. The subway, with a carrying capacity of 350,000 persons a day, was, therefore, built. But the corporation leased the subway to the company which operated the other lines, and the public are now no better off, for the company has cut down the number of trains on the surface and elevated lines.

⁂

DIVIDENDS LAST YEAR.

The period of trade depression, which reached its culmination about the end of the calendar year 1903, says the New York Commercial, was powerfully reflected in the record of dividend disbursements of the twelve months just closed, where it caused a falling off of approximately $35,000,000. It is worthy of note that while the knife was so freely applied to the rate at which the large industrial corporations distributed their surplus earnings, there were two other fields of investment which the wave of reaction left untouched, so far

THE HUGH C. MacLEAN CO., Limited,
Publishers, Winnipeg.

as income to investors is concerned. These were dividends on standard railroad stocks and interest on bonds of all classes. It goes without saying that interest payments showed no decrease; such a thing could only be accomplished through default, bankruptcy and reorganization on a large scale. Such has, indeed, been the course of a number of corporations, but their number is comparatively small, and it is more than probable that the most prominent instances attracted an amount of attention out of proprtion to their economic importance. But it is significant that while the country was passing through a sharp trade reaction, the increase in bonded debt among corporations in general was only checked, not stopped. It is significant, also, of the rather superficial character of the reaction that no important railroad was compelled to pass or even to reduce a dividend, while one or two of the important systems began the payment of dividends on their capital stock for the first time since the "period of reorganization." A calculation of the dividend and interest disbursements of the year gives a total of $848,620,000, as compared with $882,622,000 in 1903, a decrease of $34,000,000. Of the difference, approximately $17,700,000 is chargeable to the United States Steel Corporation alone. The Standard Oil Company reduced its distributed profits by $11,640,000, and the dividend reductions of other corporations brings the total reduction up to a sum considerably in excess of the difference between this year's and last year's totals.

The loss has been partly made up by the commencement of dividend payments by corporations not previously paying, by increases of paying stocks, and by a few increases in rates paid.

⁂

The Kingston and Dominion Central Railway Company want power to construct an extension of their line from some point between Brockville and Montreal, to pass through the Counties of Leeds, Grenville, Dundas, Glengarry, Soulanges, Vaudreuil, Jacques Cartier, and Hochelaga; also an extension from a point near Newboro or Westport, to pass through the Counties of Lanark, Leeds and Carleton. The company also wants power to change its name to the Montreal, Ottawa, Kingston and Georgian Bay Railway Company.

⁂

—On Tuesday last the Edwardsburg Starch Company held its thirty-ninth annual meeting, when the officers of the latter part of the year 1904 were re-elected, as follows: George F. Benson, president; William Strachan, vice-president; R. Cunningham, secretary. The remaining directors are: Hon. Robert McKay, Charles R. Hosmer, D. R. Miller, George Hyde, and A. P. Murray.

⁂

—The first monthly meeting of the newly-elected board of management of the Dominion Commercial Travellers' Mutual Benefit Society was held in Montreal last Saturday evening. Mr. A. McA. Murphy, the president, was in the chair. The largest number of new applications for membership ever presented was considered, and passed, seventy-five being added. Mr. R. E. Matthews, who represents Messrs. J. Eveleigh & Co., was elected to the board to fill the vacancy caused by the death of Mr. John Hardy.

The Altar Of Friendship

Do not hazard your all on the altar of friendship. Thousands of men have been ruined by going surety for friends. Better far for you to pay a strong surety company the premium on the bond. It will pay you to enquire about our policies.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.,

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359	per day in number of Claims Paid.
6,297	per day in number of Policies Issued.
$1,303,559.06	per day in New Insurance Written.
$98,582.76	per day in Payments to Policy-holders and addition to Reserve.
$53,841.18	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government, for the protection of Policy-holders in Canada, **$1 800,000.00.**

Another Milestone

Has been passed in the successful history of The Canada Life Assurance Company. Ten years ago the Company issued Policy Number 60,000. Now Policy Number 100,000 has been paid for. While 60,000 policies represented the growth of 47 years, the past ten years have alone produced two-thirds as many.

In assets too, there has been a proportionate growth.

For The Canada Life.

You will make no Mistake if you Take out a Policy in THE NORTHERN LIFE.

HEAD OFFICE, LONDON, ONT.

JOHN MILNE, MANAGING-DIRECTOR

The Northern Life has some Good Districts Open for Live, Energetic Agents.

NOTICE

Is hereby given that the Annual General Meeting of the Policy-holders and Guarantors of the

North American Life Assurance Co.

will be held at the Head Office of the Company, North American Life Building, 112-118 King St. West, Toronto, Ont., on **Thursday, 26th January, 1905,** at 11 o'clock in the forenoon, for the reception of the Annual Report, a Statement of the Affairs of the Company, the Election of Directors, and the transaction of all such business as may be done at a General Meeting of the Company.

Participating Policy-holders have one vote for each $1,000 of insurance held by them.

L. GOLDMAN,
January 10th, 1905. Managing-Director.

The Royal-Victoria
LIFE INSURANCE COMPANY

is prepared to **make contracts** that will be **specially remunerative,** with **several good men for 1905.** Communicate with

DAVID BURKE,
General Manager.

Head Office, Montreal.
January 1st, 1904.

PROTECTION

is what every business man is looking for. We are thoroughly in accord with these views, and to this end have deposited with the Dominion Government **$1,015,180 in Gilt Edge Canadian Securities** for the exclusive protection of Canadian policyholders.

The UNION MUTUAL LIFE INS. CO. of Portland, Maine, protects its Canadian policyholders not only by having more than the reserve called for by the Dominion Government, but also through the operation of the Maine Non-Forfeiture Law only applicable to UNION MUTUAL policies.

UNION MUTUAL Life Insurance Co. of Portland, Maine.

FRED E. RICHARDS, President.
ARTHUR L. BATES, Vice-President.

HENRI E. MORIN, Chief Agent for Canada,

FIRE RISK AND BUILDING CONSTRUCTION.

A good building, that is, one properly constructed with regard to fire risk, is a better investment for a merchant or manufacturer than a poor building, for two reasons. First, he runs a lesser chance of being burned out; and second, he pays a lower rate of fire insurance. For a long while, by reason of the apathy, sometimes the ignorance, of fire underwriters there was little or no encouragement given by insurance rates towards the improvement in the construction of mercantile buildings. But to-day this is not the case. Events within the last eleven months have shown what a conflagration hazard means, and builders of houses have learned that the fire insurance companies are willing to discriminate in favor of the owner who builds in accordance with recognized rules of fire-resisting construction.

On Tuesday last a paper was submitted to the Insurance Institute of Toronto which dealt with building construction in connection with the fire risk. This paper was by the president of the Ontario Architects' Association, Mr. Edmund Burke. The author went fully into the practical bearing of the present building by-laws and the underwriters' requirements with respect to building construction. He urged on fire insurance managers a rigid adherence to the schedule rates and regulations as a policy which would result in a gradual improvement in the construction of ordinary buildings. He indicated, too, where architects had often in days gone by urged the construction of buildings with especial reference to fire hazard in the hope—not always fulfilled—that underwriters would distinguish by a lower rate in favor of such buildings.

Mr. Burke's paragraph upon the antiquated code of building by-laws in Toronto, and the efforts of the associated architects to get them remodelled, is a pungent one. That body spent much time in preparing new and modern by-laws, and got them before the Property Committee of the Council. "After two or three meetings the committee quietly pigeon-holed the papers, and the Chapter heard nothing more of the matter." Two years ago the project was revived, and a member "was engaged in conjunction with the City Commissioner to prepare draft by-laws. This draft was prepared and submitted to the committee, but again pigeon-holed." Then came the big fire of April 19th which goaded the committee into action. In respect of building construction, Mr. Burke believed the class of buildings should be largely governed by circumstances.

> "The small, low, roughcast workman's house, so common a few years ago, was probably as safe a risk as the underwriters ever handled," he said. "Seldom has one been destroyed by fire, and it seems absolutely necessary to permit and encourage their erection in certain districts if the workingman earning a small wage is to have a house at a rent commensurate with his income. A brick house can scarcely be built at the present time at a cost low enough to meet these requirements and give the investor a reasonable return. It is a question if the ordinary cheap brick house is much safer than a good roughcast erection."

But in congested districts, with higher buildings, on the other hand, a much better type of construction should be required "in fact, the standard can scarcely be placed too high. It should always be borne in mind that 'any number of buildings more than one, if exposed to each other, form a conflagration district.' Judging by the experiences of the late conflagration no building of greater height than four stories should be built of anything but fire-resisting materials. It is an augury of better building construction when the underwriters have wakened up to the necessity of establishing a very high standard of construction, with low minimum rates and a graded system of increases or fines for the degree of departure from such standard."

The speaker dealt exhaustively with the details of fire-proof buildings, expressing the opinion that concrete and burnt clay were the nearest approach to fire-resisting materials, so far commercially practicable. It is pointed out that concrete enters largely into the construction of a considerable number of the new warehouse buildings in Toronto, reinforced concrete being adopted for columns, girders and floors. Great care and supervision are necessary—greater than with other materials, because so much depends on the qualities of the cement and sand, proper mixing and moulding, and sufficient steel reinforcement to take care of all tensile stresses. There is no doubt in his mind that this system of building is preferable to mill construction in congested districts, and so far, it seems to take a middle ground between steel and mill construction as to expense.

* * *

ROYAL BANK OF CANADA.

Increases are general among the main items of this bank's last annual report, but the obligations to shareholders are not much changed during the twelvemonth. Capital and reserve remain where they were, at three millions each; the dividend has been the same, but the balance of profits carried forward is a hundred thousand greater—a good anchor to have to windward in case any stress should develop. The transfer of a round sum to Officers' Pension Fund is one upon which any bank should be congratulated; and the writing seventy-five thousand off Bank Premises, Furniture, and Real Estate is business-like. The amount at which safes and office furniture is placed is surely very low; at any rate it is unusually so.

The total figures of assets and obligations, increased as they are from $25,106,000 a year ago to $31,798,000 now, practically six millions greater, indicate a much increased business. Deposits have come in very freely, the most of them non-interest bearing. Besides, the interest accrued is much reduced. An enlargement is seen in current loans and discounts, but a much greater one in immediately available assets, the prominent increase among them being in Government and municipal securities. The small amounts visible last year under the headings of real estate and mortgages thereon have now disappeared. It only remains to be noticed that there is a pronounced increase of circulation. The statement ought to prove satisfactory to shareholders.

* * *

THE DOMINION BANK.

Owing to a change, then recent, in the date of the annual gathering of shareholders, the meeting held a year ago listened to the statement of the Dominion Bank directors for a period of eight months only. The report submitted to shareholders on Tuesday last however was for a full year—the thirty-fourth year of the bank's existence. It showed an increased business, inasmuch as deposits are $3,300,000 larger, two millions of which went to swell current discounts, the remainder into Government notes and balances abroad, for bonds and stocks as well as loans on call have gone down a million and a half.

The very comfortable sum of $474,902 had been carried forward from 1903, and when to this the net profits of 1904 were added, the directors had $934,572 to deal with. Dividend at ten per cent. absorbed only $300,000 of this, so half a million was put to reserve, and $134,000 carried forward. This addition to reserve makes that fund $3.500,000, which is half a million more than the capital. The totals of assets and liabilities of this important bank now reach large dimensions, greater probably than its founders dreamt of, and the earning power is shown to be well maintained.

* * *

BANK STATEMENT.

We present below a condensation of the monthly statement of Canadian Banks for December, 1904. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities, averaging holdings of specie and Dominion notes, etc.:

Canadian Bank Statement.

LIABILITIES.	Dec. 1904.	Nov. 1904.
Capital authorized	$100,546,666	$100,546,666
Capital paid up	80,055,596	79,851,310
Reserve Funds	54,071,656	53.426 775
Notes in circulation	$64,507,394	$69,426,931
Dominion and Provincial Government deposits	12,656,888	8,030,479
Public deposits on demand in Canada	134,280,104	133,138,746
Public deposits at notice	319,132,078	317,914.322
Deposits outside of Canada	38,814,613	40,038,126
Bank loans or deposits from other banks secured	811,954	1,000,923
Due to other banks in Canada	5,684.483	5,248,949
Due to other banks in Great Britain	2,452,651	3,881,800
Due to other banks in foreign countries	1,224,203	1,302,038
Other liabilities	8,353,622	8,663,105
Total liabilities	$587,918,063	$588,645,497
ASSETS.		
Specie	$17,617,529	$17.849,746
Dominion notes	38,436,983	37,193,912
Deposits to secure note circulation	3,328.771	3,328,771
Notes and cheques on other banks	23,784,768	23,986,585
Loans to other banks, secured	811,954	1,001,269
Deposits with other banks in Canada	8,183,400	8,179,734
Due from banks in Great Britain	9,041,191	14.514,627
Due from other banks in foreign countries	20,849,499	21,988,618
Dominion or provincial Govt. debentures or stock	9,561,422	11,780,594
Other securities	55,986,308	55,657,287
Call loans on bonds and stocks in Canada	38,950,978	36,279,761
Call loans elsewhere	48,782,441	44,213,180
	$275,335,244	$275,974,084
Current Loans in Canada	413,779,520	415,297,503
Current Loans elsewhere	17,344,724	17,911,048
Loans to Dominion and Provincial Governments	2,934,306	2,361,926
Overdue debts	2,149,162	2,044,015
Real estate	691,582	738,440
Mortgages on real estate sold	805,101	830,844
Bank premises	10,165,341	10,445,893
Other assets	6,710,804	6,559.941
Total assets	$729,915,962	$732.163 884
Average amount of specie held during the month	17,190,701	16,992,675
Average Dominion notes held during the month	36,677,105	35,615,596
Greatest amount notes in circulation during month	70,239,598	74,216,072
Loans to directors or their firms	9,688,611	9,836,685

* * *

—We are informed that Mr. S. S. de Forest, of St. John, N.B., has been appointed manager for the Province of New Brunswick of the Provident Savings Life Assurance Society, by Mr. C. T. Gillespie, general manager of that company for Canada. The appointment is to take effect from February 1st.

PRICES OF COMMODITIES.

The London Economist's index number at the end of December last stood at 2,136, compared with 2,181 a month previously, and with 2,197 at the end of December, 1903. In other words, there has been a net decline for the year of 61 points. The average, however for the year was higher than ever before recorded. The variations throughout the year were of a very diverse nature. To particularize, there was a somewhat sharp rise in several commodities during the first half of the year, the highest average being reached towards the end of April. This change was quite marked in cotton. During the summer, the general tendency of several commodities was downward, though wool and sugar, and two or three materials continued to advance. About this time there was a somewhat marked depression in trade. Towards the end of the year, however, a strong revival set in, and most of the metals, and some other raw materials stiffened up appreciably. Cotton was an exception, the decline which set in in September having continued, with a few breaks, for the rest of the year. This is to be accounted for, however, not by bad trade, but by the great crop in the Southern States. A satisfactory feature in the general situation is the improvement in the iron and steel industries. The lowest point for pig-iron was reached about the end of June, then after a slight improvement in July, prices kept steady until November, since which time there has been a steady upward movement. The shipbuilding industry, in spite of the reiterated reports of depression in it, does not show much falling off as regards new tonnage. Last month there was an advancing tendency in the value of steel plates owing to the increased enquiry from the ship-yards. Rail mills in the Old Country are becoming more fully employed. Coal is cheaper. During the latter part of the year there was a general advance in the range of foodstuff materials. Particularly was this the case with wheat, owing to short crops in Europe and the United States, which have not been balanced by increased supplies from India, Argentina, and Australia.

* * *

THE WOOD TRADE IN BRITAIN.

A review of the timber trade for the year 1904 appears in Farnworth & Jardine's circular of January 2nd. Stocks, imports and consumption are indicated by comparative tables. General inactivity characterized the trade throughout the year, which, it is stated, has been difficult and rather unsatisfactory. "Early in the year values generally ruled high, but later there was a serious decline in prices of some of the leading articles, and buyers, losing confidence, acted with caution. . . Towards the close of the season some improvement was established, and values now appear firmer with a slightly better all-round tone in the business. On the whole, deliveries have been satisfactory, and present stocks, although adequate, are not too large for the time of year should arrivals continue moderate. The building trade has not been good. Freights have been all in favor of the importers, having ruled low throughout the year."

From one of the tables of this compilation we learn that ships having a total tonnage of 696,400 tons brought wood to the Mersey during 1904. Of this total 216,000 tons represented shipments other than those from British America and the Baltic Sea and pitch pine ports; that is to say, mahogany, wood from other countries, and cargoes per steamer from the United States. The receipts from Baltic ports were 202,200 tons; from pitch pine ports, 60,186 tons; from Canada, 218,005 tons. This is the smallest import from Canada since 1891, after which year the receipts from the Dominion ran up to as high as 320,000 tons in 1897 and 297,240 tons in 1900. It should be added that the imports at Liverpool and the Manchester Canal from all countries amounted to 727,400 tons in 1902 and to 797,390 tons in 1903, declining a hundred thousand tons, or about 13 per cent., to 696,400 tons in the year just closed.

British imports of Quebec yellow pine were in 1904 the smallest on record, and yet stocks of that wood, especially of waney, are larger than for some years; the import of red pine, too, continues to decline, while square pine is in small supply at steady values.

There was an average import of Quebec pine deals, with a dull demand all through the season. Red pine deals were in larger supply, but values low and the demand dull. The stocks of both deals and boards at the end of the year were too large, although reduced at the close of last December to 27,980 standards from an average of 33,500 standards for the preceding four years. The import of spruce deals declined somewhat, the cheaper Maritime ports article declined sharply during the summer because of persistent overstocking. Birch logs and planks met with fair enquiry and values ruled steady: stocks of planks are about exhausted, and there is an opening for a moderate supply. There was never so small an import of Canadian oak; scantling and planks are superseding the hewn timber, values are high, but stocks moderate. Rock-elm, first-class, has been in strong demand at high prices, but for grey or soft there is little enquiry. United States ash in the round log appears to have almost entirely replaced Canadian ash. The import in 1904 of British Columbia and Oregon pine consists of one cargo from Chemainus, B.C., containing about 50 per cent. timber, 50 per cent. lumber. The season opened with excessive stocks, but largely owing to the scarcity of prime large hewn pitch pine, this wood has been in better request, and the consumption has been more satisfactory, but stocks are still too heavy.

* * *

"THE WARDEN OF THE NORTH."

It is very natural that the citizens of Halifax should feel something more than ordinary disappointment at the removal of the British Naval Depot, which for so many years has been the city's pride, and indeed one of its main dependences, and at the further prospect of the removal of the garrison of the citadel. They have material as well as sentimental reasons for regret at this determination of the British Government: for while there are many all over Canada who feel a patriotic sorrow at the removal of the forces from that time-honored out-post of the British Empire, her citizens have in addition the feeling that they are losing a large annual income by their going, as our Halifax correspondent's interesting letter makes clear.

It is a little curious to recall, just here, what Kipling says, in "The Seven Seas," about Halifax:

> Into the mists my guardian prows put forth,
> Behind the mist my virgin rampart lies,
> The Warden of the Honor of the North,
> Fleetless and veiled am I!

Was Kipling a seer that he should, years ago, have predicted that Halifax would soon be without the North Atlantic Squadron—fleetless? However, the thing for the city to do now is to recognize the change and to make dispositions accordingly. It may be a blessing in disguise if her citizens should be impelled by the withdrawal of an accustomed source of easy income to look for other and wider sources which may result in permanent benefit.

It is quite possible that the presence of the troops has not been always a good thing for Halifax. The influence of the land and naval forces socially has not been of the best. As a rule, they have set a pace for society which is unbecoming to a country such as ours; and have fostered ambitions among our young people to climb the social rather than the business or professional ladder. They have been responsible for a good deal of extravagance among our people which must have had its effect on our commercial progress; they have, to a certain extent, caused legitimate business—stigmatized as "trade"—to be regarded with a feeling quite out of place in a democratic country. This has never spread so far in Halifax as it might have in some countries or cities; there has been too large a leaven of hard-headed, common-sense and thrift in that city, particularly among the Scotch and Irish element; but that it has existed is undeniable. On the whole, as a Halifax man expressed it not long ago, "our life without the troops will probably be saner, more wholesome and more successful."

* * *

THE SALMON CANNING INDUSTRY.

The British Columbia salmon packers are face to face with a serious problem. They have already come to an agreement, should it be necessary, to close down the canneries during "off" years, and only pack when there is a heavy run of fish. While, however, the packers, as a body, see that some such course as this is necessary, individually, they are afraid of the results of such an action upon the laborers. And the consequences to this class would indeed be very serious. There are some eight thousand employed and to throw these out of employment and stop the circulation of three or four millions of money is no light matter. Not only this, but it is believed possible that even if the canners in the combine were to close down, as suggested, the independent men would fix up factories of a temporary character and carry on business in a spasmodic fashion. Whatever plan be adopted, it is likely that business will be seriously affected.

Last week a deputation, representing the British Columbia canners, waited on the Dominion Government to discuss the advisability of adopting a close season for salmon. For a number of years the canners of Puget Sound refused absolutely to take any measures to protect the fish. They themselves used fish traps and every other contrivance for catching fish cheaply in large quantities, but they enforced practically no regulations, and no close season. Last year, however, the Dominion Government granted permission to use trap nets. Since then the Puget Sound canners have been negotiating with those of British Columbia for the purpose of coming to some agreement for their mutual benefit. The upshot was that the United States canners undertook to secure from the Washington State Legislature the necessary legislation to close down fishing entirely during the sockeye run, which is practically six weeks in the months of July and August during the years 1906 and 1908, such legislation to be conditional upon the Dominion Government passing an order-in-council to cease fishing on the Canadian side for similar periods. The necessity of such a drastic measure is evidenced by the fact that for the last three years the catch on the Fraser River was insufficient to supply the forty-nine canneries, and this is notably true of last year, when the total pack was not equal to the capacity of one cannery. This year, however, a good season is due. The business men in British Columbia are in many cases protesting against the proposals.

OUR HALIFAX LETTER.

Trade in general is a little quiet here, as is customary during the stocktaking season. The chief business is being done, it would seem, by His Britannic Majesty at his Imperial dockyards. The naval squadron of Great Britain, so long the pride of the coast, has been withdrawn, and Halifax is to be abandoned, for the present at least, as a British naval base. The entire movable contents of the dockyards—with the exception of some stores in bulk returned to England—as well as the residence of the Admiral, Chief Engineer, Surgeon's quarters, and so forth to the extent of ten or twelve houses, are being disposed of at auction. And as the sale includes pretty nearly everything from a needle to an anchor, it attracts crowds of purchasers, not only from this city, but from a great part of the country, purchasers coming even from the United States to attend. The official residences were, of course, furnished in an exceedingly handsome and substantial fashion; and much of the furniture was of antique mahogany of considerable value. The prices paid were astonishing. In very few cases was anything sold at a loss to the Admiralty, notwithstanding the years during which the articles had been in use, even the commonest of household ware bringing prices beyond their local market value. When it is remembered that all this stuff has been brought into Canada duty-free, it will be seen that the Admiralty made a good thing out of the sales. No doubt a great deal of the competition and high prices realized was due to associations connected with the articles, but it all has a more or less injurious effect on business.

Probably the most discussed topic here at present is this withdrawal of the forces. It is generally understood that the garrison of Halifax Citadel, with the exception of a few engineers and others, whose work is of a particularly technical character, will soon follow the navy. It means, of course, a heavy direct decrease in the income of the city. The two forces probably disburse between them, in one way or another, a good many hundreds of thousands of dollars a year. The supplies for the troops—about two thousand men—are bought here nearly altogether. The force of the dockyard consists of about three hundred men, largely mechanics, their wages amounting to about $125,000 a year. The fleet when in port disbursed a large amount of money among our citizens. The loss of income, therefore, to Haligonians cannot be much less than three-quarters of a million per year. This loss is variously regarded. Its direct effect will certainly be harmful, as the withdrawal of such a large sum from the regular income of any small city must be; but there is no general feeling of dismay. Whether the idea be a correct one or not, there is certainly a feeling that the presence of the forces here has not been a useful or valuable factor in the life and progress of the city. A very large part of the best portions of the city is owned by the Imperial Government and used or reserved for purposes of their own. The dockyards cover a large and important part of the water-front—that contiguous to the railway terminals. Much good residential property is lying unused except as commons for drilling or other of their purposes. This has doubtless helped to give land and house property a fictitious value here, the result being that building is more expensive and rents higher in comparison to values than in any other part of Canada.

The coal companies operating in Nova Scotia have arrived at an agreement to maintain present prices during this year. This agreement was reached at a meeting held in Halifax last week. There are rumors of a reduction in wages, but this is very questionable. The Dominion Coal Company and its operatives have entered into a hard-and-fast agreement to maintain present wages for three years. Some of the other collieries may make a reduction, but it is hardly likely. The general attitude of the trade seems very hopeful, and there is every likelihood that the production of coal for the coming year will exceed that of 1904. Operators say this will be done, and the whole product will be marketed in Canada.

The first regular passenger train on the Halifax and Southwestern Railroad began running last week, establishing rail connection between this city and Liverpool, more than seventy-five miles distant, and opening up the valuable south shore of the Province. The roadbed is very good; the rolling stock new and of the most modern type. It is a Mackenzie & Mann road. The part now in operation to Liverpool is 105 miles in length, but the road will eventually run to Shelburne.

John Wood, manager and secretary of the Provincial Exhibition, has resigned the office, after a tenure of eight years. The Commission is now advertising for a successor, and as it is hoped we shall have the Dominion Exhibition here in 1906, an efficient man will be necessary. Mr. Wood enters the banking and broking firm of his father-in-law, J. C. McIntosh.

Halifax, 23rd Jan., 1905.

* * *

HALIFAX BOARD OF TRADE.

As we stated in these columns some two months ago, a change is being made in the housing of the Halifax Board of Trade. This body will move into new and commodious quarters on Hollis street, over the Intercolonial Railway ticket office, about the middle of February. The rooms are well appointed and splendidly situated. The Board will shortly issue a new code of by-laws, so that at the annual meeting the procedure will be novel. The main change is in the method of selecting the council. Hereafter at the annual meeting, the president, two vice-presidents, and nine members of council will be elected. These will select seven other members from different lines of trade in the city not represented in the original number. The office of treasurer is abolished, being united with that of secretary. The council will hold weekly meetings on Tuesdays. The annual meeting is appointed to be held on Tuesday, January 24th, for the selection of officers, but up to Thursday evening we have not received the list elected. The Board has been requested by the fruit dealers of the city to use its influence with the Government to have a warm storage for fruit at the piers here. The Board has approved the request, and will act. Numerous letters have been addressed to the Board complimenting it on its action in respect to goods paying the preferential duty. In 1901 they moved and adopted a resolution asking that the benefit of the preferential duty on goods from Great Britain be applied only to goods imported through Canadian ports.

* * *

HOME INSURANCE COMPANY.

Among the first features to strike a person in the statement of the Home Insurance Company of New York for January is the fact that of the invested assets the market value so much exceeds the par value. For example, the company had bought $4,114,000 in state and city bonds; these are worth this month $4,356,960. Again, of railroad stocks on the company's books worth $4,865,000, the present market value is $7,198,750. Indeed, out of half a dozen classes of stocks and bonds the value of which at par is $12,370,000, the market value at 1st January was $18,231,660, or 32 per cent. above the par value. Such things mark shrewd investment. The total assets of the company reach $19,417,329, of which not one-tenth is not readily realizable. The reserve premium fund amounts to $7,210,000, and the policyholders surplus exceeds ten millions of dollars.

For more than a hundred years the Home Fire Insurance Company has been doing business and paying a hundred cents in the dollar until its finances have grown to the great dimensions the above figures demonstrate. It is an honest and fair-dealing company and deserves its high reputation. Its essential stability is shown by a comparison of prominent items in 1903 and 1904, the Baltimore fire having occurred in the latter year. There is at the close of 1904 a gain in the company's assets of $1,376,000; in re-insurance reserve of $622,000; in surplus to policyholders of $801,000. Such results show unquestionably that the company is well managed and merits the confidence of insurants.

FINANCIAL ITEMS.

The Sovereign Bank of Canada has opened a branch at Tweed, Ont.

We learn that Mr. Shirley Stewart, of Toronto, has been appointed manager of the Imperial Trusts Company of Canada.

The annual meeting of the Canada Landed and National Investment Company has been held. The company has had another successful year. Next week we hope to give our readers the figures of the statement and the president's address to stockholders.

The Canada Company held its half-yearly general meeting in London, England, on the 29th ult. A dividend of 22s. per share for the half-year was declared. During the year, it was stated, 8,406 acres of land had been disposed of by the company at good prices, and much of it at a substantial advance, compared with previous years. The company owns large tracts of land in Western Ontario, much of which is being drained, and on some of which oil has been found.

Word comes from Lindsay that bogus five-dollar bills of the Bank of Montreal and also of the Dominion Bank are in circulation. The bill of the Bank of Montreal is a good imitation of the genuine, and its appearance has all the more local interest because it is an imitation of a bill issued from the local branch of the bank last fall and signed by Accountant S. J. Plunkett. This fact has led the officials to suspect that the counterfeiter lives in this vicinity. The bogus Dominion Bank bill is not so good an imitation as the other.

We learn that the past year's transactions of the Canada Permanent Mortgage Corporation have resulted so favorably as to permit the addition of a quarter-million dollars to reserve, making that fund now equal to one-third of the paid capital. The present is the jubilee year of the company, for it was established in 1855. It is an interesting circumstance, and one which will deservedly bring many congratulations to the gentleman concerned, that the managing director, Mr. J. Herbert Mason, has been at the helm all these years, and is to-day at his post as vigilant and clear-headed as he was fifty years ago.

Not a single decrease in amount of transactions is announced by any clearing house in seven of the biggest cities in the United States for the week of 19th January, compared with the same week last year. In New York there is an increase of 50 per cent.; in Pittsburg, 25; in Boston, Philadelphia, and Chicago, the increases were respectively 15, 12, and 10 per cent.; in San Francisco, 7, and St. Louis, 4. Turning to Canadian records, we find that no city in the Dominion exhibits a decrease in clearings—all are increases for that week over the corresponding week of 1904. The largest relative increase is shown by Victoria, namely, 37.3 per cent.; next, Toronto, 24½ per cent.; Winnipeg shows 22.6 and Montreal, 21.7; St. John, 17.9; London, 17.3; Quebec, 16.2; Halifax, 13.4; Hamilton, 10.6; Vancouver, 6.3, and Ottawa, 0.6 per cent. The figures illustrate the general activity of trade and manufacture on this continent.

The January number of the Banker's Magazine of New York contains the first of a series of papers by Mr. George Hague, former general manager of the Merchants Bank of Canada, under the title of "A Practical Treatise on Banking and Commerce." It will evidently be an exhaustive work, for among the twenty-five headings given are: Development of Private Banking in England, Internal Economy of a Joint-Stock Bank, the Successful Merchant, Manufacturing—Fundamental Conditions of Success, Different Classes of Loans, Sterling Bills of Banks and Finance Houses, Reserves and Overdrafts, the National Banks of the United States and American Banking, Bank Act of Canada, Bankruptcy Law, a Banker's Reminiscences and Experiences. Mr. Hague is well qualified to write such a book; his experience has been great, and he has a plain, direct style of writing, as readers of the Monetary Times have had a chance of knowing for many years. So that this will doubtless be an important series of papers. Mr. Hague's portrait and a sketch of his life appear in the last Banker's Magazine.

A branch of the Imperial Bank of Canada has been opened at the northwest corner of West Market and Front streets, Toronto, under the management of Mr. F. J. Peterson, formerly accountant of the Yonge St. branch of the bank.

On Tuesday last, 24th inst., the annual meeting of the Metropolitan Bank was held at Toronto. The report for the calendar year 1904 was adopted, and the gentlemen whose names follow were elected directors: R. H. Warden, D.D.; S. J. Moore, D. E. Thomson, K.C.; His Honor W. Mortimer Clark, Thomas Bradshaw, and John Firstbrook. Dr. Warden is president, and Mr. Moore, vice-president.

* * *

TORONTO INSURANCE INSTITUTE.

At a meeting of the Toronto Insurance Institute, held in this city on the 24th inst., a discussion took place on the paper read at the previous meeting by Mr. Papps, of the Manufacturers Life, on the subject of "The Analysis of Life Offices' Accounts." Mr. Papps had referred to the several comparisons generally instituted to determine the relative merits of life companies, and pointed out that practically all of these comparisons were faulty. The only comparison which could very well be instituted with absolute fairness to all companies was the average rate of interest earned on the invested funds. It was indicated that it was only by actuarially calculating the expected death strain from complete data in respect to each life under exposure during the year, and comparing the expected death strain with the actual claims, less the reserves that apply to them, that the favorableness of a company's mortality experience for any year could be ascertained, and further, that the ordinary comparisons of death rates, which are so frequently instituted by life agents, are misleading and erroneous.

It was also shown that in determining the expense rate of life companies, it is practically impossible to do this in fairness to all the offices, from the limited data which is available in the Government returns, and that, therefore, such comparisons should be accepted with reservation.

The object of Mr. Papps' paper is valuable in that it shows that comparisons made between companies for competitive purposes, are almost invariably unfair and misleading. In many cases, probably unintentionally or through the ignorance of the party making the comparison.

* * *

INDEPENDENT ORDER OF FORESTERS.

The last British Board of Trade returns reveal a startling state of affairs in connection with this Order. These returns are made by the company's own actuary, Mr. Rea, and, therefore, can be accepted as presenting the most favorable aspect of the position of the Order. The date up to which the valuation of the Order's certificates is made is 31st December, 1902; the Table of Mortality employed is the Institute of Actuaries' Hm. Table, and the rate of interest 4 per cent. The result of the valuation shows that there should be on hand funds amounting to $53,410,000, whereas the total funds on hand at the time of the valuation amounted to but $5,906,207, or $47,503,793 less than there should have been. When the previous valuation was made by Mr. Rea, on the 31st of December, 1897, it showed that the deficit then amounted to but $32,273,563; thus, during the short period of five years, the deficit of this Order of Foresters has increased by over $15,000,000. This most certainly is an alarming condition, and one which should make the officers and members of the I.O.F. stop to consider what the final outcome must be if the present condition of affairs be continued.

* * *

—The Niagara, St. Catharines and Toronto Railway has been taken over by a syndicate, allied, we understand, with the Toronto companies, who are developing Niagara power. A large interest in the Niagara, St. Catharines and Toronto Navigation Company has also been acquired. The directorate of the new company comprises: Messrs. J. L. Nicholls, president; E. R. Wood, vice-president; D. D. Mann, and H. G. Nicholls.

INSURANCE MATTERS.

The Independent Order of Foresters of Canada seems to be in a pretty bad way, says the London, England, Review. It has a temple built which brings revenue on the investment of 1¼ per cent. The colossal expenses will soon eat up the funds of the I.O.F., and the Great Mohawk will pass out of existence like every other bubble of the earth as of the water.

There is common sense as well as good law behind the decision of the Minnesota Supreme Court, that the rule holding the local agent responsible for losses on insurance placed in unauthorized companies does not apply when the insured knows what sort of companies he is getting. That will tend to still further impair the activity of the wildcats, for it imposes a share of the responsibility upon the property owner. There is little excuse for any intelligent man not knowing about fake fire insurance nowadays, in view of the publicity the wildcats have received, especially as many stingy fellows experiment with such "insurance" because it is cheap. —The Investigator.

A resident of Woodstock, enclosing a clipping from a local newspaper respecting a recent fire in that place, writes to us: "At different times the writer has noticed that you have taken a deep interest in private fire protection, that is, you advocated manufacturers and large dealers in any line putting in all convenient devices for the protection of property against fire. Enclosed clipping will give you an idea of how much a private fire department in our city is appreciated here. The concern named herein has one of the best protected factories, and also one of the best private fire departments in this country." The newspaper extract referred to the Bain Wagon Company Fire Department. So well did this body assist the Woodstock Fire Department in confining the fire to the Gardner store during a recent fire that business men close by made voluntarily the following contributions to the department's funds: T. W. Gray and George Robinson, $10 each; Campbell Bros., $20; The John White Company, Limited, $40. This is the sort of appreciation that tells.

Said Mr. E. C. Irvine the other day, in an eminently sensible address before the Fire Association of New York: "As a matter of fact, the insurance companies for many years have made little or no trade profit at all, taking the business as a whole, and all talk of lower premium rates at present is therefore entirely without reason. If there is a business man present who has made money enough by careful investments to make him financially independent, is it to be expected that because he has prospered in the past he will now sell his goods below cost? For ten years prior to 1904 the fire insurance companies doing business in the United States made an aggregate underwriting profit of $27,000,000, but in 1904 the same companies paid out a greater sum than that in Baltimore and Rochester alone. I therefore ask the business men around this board whether it would be wise under such circumstances to reduce rates now, and whether it would not weaken the security behind the outstanding fire insurance policies to do so? There is a mutuality in the business that prohibits the companies from paying to the few more than they receive from the many, while it is needless to say that they must be always prepared for large conflagrations."

* * *

FOR GROCERS AND PROVISION DEALERS.

The Wallaceburg, Ont., sugar factory will begin next month to refine raw cane sugar.

Since our last Prices Current went to press, Canadian refiners have made another advance of 10c. per cwt. on all grades of sugar.

The Maple Leaf Flour Mills Co., of Ottawa, with capital stock of $1,000,000, is applying for incorporation. The provisional directors are: D. C. Cameron, of Winnipeg; A. Carmichael, of Rat Portage; H. S. Dowd, of Quyon, Que.; J. A. Cameron, of Dominionville, and J. D. Flavelle, of Lindsay.

The 1904 pack of salmon on Puget Sound is figured at 286,630 cases, of which 123,419 were sockeye, and 106,856 cohoes. In 1903 the total pack was 464,014 cases.

Raisin growers in the region around Fresno, California, are organizing a syndicate with a capital of $2,000,000 to act as agent or factor for the sale and distribution of the entire crop, and to deal in raisins on its own account.

Professor James W. Robertson, who lately retired from the position of Commissioner of Agriculture and Dairying, in order to undertake the erection and management of a magnificent new structural college at Ste. Anne de Bellevue, Que., was waited upon at his home recently by the members of his late staff and presented with a beautiful mahogany hall clock.

The New York Board of General Customs Appraisers has just made an interesting decision of interest to vegetable raisers and dealers. Onion importers have contended that sixty pounds constituted a bushel, but the authorities have used a fifty-seven pound bushel, and in 1891 decided that duty was properly assessed on a fifty-seven pound basis. The board decided that 57 pounds constitute a bushel.

Some of the bakers are complaining that much of the wheat which has come forward of late has been of an inferior quality, so far as bread-making is concerned. As a consequence a good deal of mixing has had to be resorted to in order to get a fair grade of flour, and in some cases some ingenuity has been exercised by mills with orders ahead at low prices to get out whole. Complaints are coming in from bakers as to the character of a good deal of the new flour which evidences a lack in gluten, quality and appearance when baked.

A trial shipment of some twenty-five cases of British Columbia fresh herrings—in 1-lb. round flat cans—to Melbourne, Australia, has not been a success. British Columbia packers have apparently a lot to learn before they can produce an article to equal the Scotch herrings—put up in oval cans—which command a very extensive sale throughout the Commonwealth. The Vancouver herrings appeared to be "over-cooked," as the fish was considerably broken and mushy, while the liquid contents was much inferior to the bright oily liquid in the Scotch cans. It is estimated that Australia imports yearly, about 15,000 cases—each containing four dozen 1-lb. oval cans of fresh herrings.

* * *

DRY GOODS.

In the New York dry goods stores, among the chief new novelties are moiré ribbons of the finest quality. Warp prints are great favorites also, and so are surface prints. A large business is reported as being done in these lines.

Satisfactory reports come from the woolen mills in Nova Scotia. The Oxford mills, at Oxford, and the Hewson mills, at Amherst, which manufacture a high grade of tweeds, are doing a prosperous business, and the Hewson mills are to be enlarged with a view to export business. Scarcity is looked for in blankets, owing to the great demand. Already some mills have withdrawn quotations, while others have advanced their prices.

The offerings at the wool auction sales, in London, on 25th inst., numbered 12,657. This large quantity was well absorbed by continental and home buyers. Weaknesses were noted occasionally in fine greasy, owing to a slackening demand from Americans. Scoureds as a rule were firm, well-grown crossbreds selling readily. Coarse grades were 5 per cent. easier. Cape of Good Hope and Natal scoureds sold briskly, but greasy was occasionally withdrawn.

E. C. Tripp, of Atikokan, Northern Ontario, is operating a novel form of farm. It is devoted to the raising of silver, grey and black foxes. His farm comprises sixteen acres, which is fenced with wire netting, ten feet high, sunk to bed rock and water level. Inside this enclosure are the breeding pens. Mr. Tripp assumes that his enterprise will shortly be worth a gold mine, on account of the fact that black and silver grey fox skins are getting scarcer each year and he will reap the benefit of a rising market. Another strange ranch, at Banning, is that of Louis Selberry, who is raising skunks. He secured six of these little animals, and as they are very prolific he had 48 the next year. Last year he killed 400 of the skunks, and is said to have realized $4 a piece on the skins, and this winter he expects to kill nearly a thousand. Occasionally he has found one entirely black, which he has kept separate, and now has quite a number of the little black animals.

The season in Belfast, from a dry goods and linen point of view, has not been a bad one. The American market in the early part of the year showed a hesitancy that was rather discouraging, but latterly buyers have been operating with more freedom, and during the past fortnight or three weeks quite a respectable amount of business has been done. Prices continue very steady, and the opinion expressed from time to time that there would be no break in values has proved correct. As to the future, no particular change is looked for. Flax may stiffen a little, which would mean a fractional advance all round, but so far as can be judged current figures will rule for some time.

The Dry Goods Economist says, referring to raw silk, that an indifferent attitude on the part of buyers has continued, and it is evident that no general interest will be displayed in the near future. This condition was predicted and more or less discounted, so that there is little disappointment among handlers of raw silk. But the most important effect of the continued sluggishness of trade is the weakness which has developed in Yokohama. It has been admitted that the market has been out of proportion to certain of the other producing centres, and the slight reduction of prices is not a matter of surprise, as this market does not seem to be able to stand any long-continued period of dullness. It is perhaps more mercurial than any other centre from which raw silk is obtained and the new prices which have been established are not regarded as stable, any increase in demand causing reelers to advance their limits again. But the majority of domestic manufacturers at least are supplied for current wants, and although it is generally believed no large quantity of raw material is owned by manufacturers, the latter are not likely to come into the market until they receive duplicate orders. Whether this delay will be of sufficient length to prevent any recovery of prices is a question which few are willing to answer.

The demand for linen damasks is said of late to have fallen off, but the statement is not confirmed on careful enquiry, says a Manchester report. Linen damasks have been much improved in design and weave of late years, while the medium-priced goods cannot be regarded as dear, in view of the wearing qualities of the material. Belfast makes of linen damasks, in the lower and medium grades, may have been cheapened too much by the introduction of cotton warps, but it is scarcely true to say that the linen damask has receded into the background. By organization it is even thought likely that the sales of damasks and other linens might be increased, notwithstanding the competition of cotton goods.

A report from Bradford, Yorkshire, says that the demand for coarser-fibred crossbred colonial sorts of wool continues very large. As the supply of the home grown article of similar character is now nearly finished, every confidence is expressed here that the present unusually high rates will be sustained. The great fall in the price of American cotton would, under ordinary circumstances, have the effect of decreasing the use of these low crossbred colonial wools; but the unusually large demand for America, and for the purpose of making various kinds of cloth for the war in the East, appears likely to counteract any tendency towards lower values at present. The values of both alpaca hair and mohair are very firm at the recent advance. There can be no doubt that, in addition to the great demand for bright dress fabrics for the United States and Paris, there are indications of an increased demand in the home trade. Several of the buyers of leading West End dress houses have recently given it as their opinion that bright dress goods will be more generally worn in fashionable circles in the coming summer.

—The Ontario Commissioner of Public Works has approved of the plans of Backus & Co. for building the dam and developing water-power on the Rainy River, at Fort Frances. Contracts for the undertaking are to be let out at once. The plans provide for the development of 20,000-h.p., half of which is to be used on the Canadian side of the river. It is believed there will be considerable demand for the power for use in grain and lumber mills.

⁂

At a meeting in Montreal a few days ago of paper and wood pulp manufacturers, it was decided to ask the government to prohibit the export of logs and pulp-wood.

⁂

—Geo. Compere, an Australian entomologist, is said to have discovered in Spain a wasp which is a parasite for the codlin moth, the insect which does so much damage to the apple.

⁂

—D. Martin & Co., a Philadelphia firm, has purchased the Eastern abattoir in Montreal and leased the Eastern cattle market adjoining, belonging to the Canada Pacific Railway.

⁂

—A report from Montreal says that the Newfoundland Government has no intention at present of placing an export duty on iron, copper or other ores from that country. From an official announcement made by the Attorney-General of the colony we understand such a report should not have gained currency, when as a matter of fact the very opposite has been the policy of all Newfoundland Governments. They have a new country in point of development, rich in minerals, especially iron and copper. Their desire is to make the work of development as attractive as possible to the capitalists. They want them to feel that once their capital is lodged in the country in machinery and development work, no advantage will be taken of their position.

⁂

—The strike of the cotton mill operatives at Fall River, which has affected about 25,000 persons for the last six months, to the great hardship and suffering of Fall River's people, was settled to-day through the mediation of Wm. L. Douglas, the Governor of the State of Massachusetts. Under the terms of an agreement accepted by both manufacturers and operatives at a conference held at the State House last week, the strikers will return to work at once under the 12¾ per cent. reduction, against which they struck last July, and with no discrimination because of the strike. No rate of wages was established, but it is agreed that Governor Douglas shall investigate the matter of margins between the cost of cotton to the mill owners and the selling price of the cloth and submit his conclusions as to an average margin upon which the manufacturers are to pay a dividend of five per cent. on wages earned from the present time to April 1st. Both sides regard the outcome of the deliberations as a victory.

⁂

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, January 26th, 1905, as compared with those of the previous week:

	Jan. 26.	Jan. 10.
Montreal	$19,516,363	$22,244,848
Toronto	20,391,287	19.573.508
Winnipeg	5,220,488	6,018,193
Halifax	1,458,034	1,710,806
Hamilton	1,196,640	1,171,192
St. John	895,818	972,079
Vancouver	1,389,625	1,348,170
Victoria	508,634	856,033
Quebec	1,398,909	1,556,730
Ottawa	2,045,231	2,526,901
London	856,032	933,113
Total	$54,877,061	$58,911,573

THE METRIC FALLACY.

Editor, Monetary Times:—

Sir,—I beg to call your attention to an error in your editorial on the Metric System in your issue of December 16th. The Congress International pour l'Unification du Numerotage des Fils, to which you refer, was held in Paris in 1900. It was organized for the sole purpose of promoting the adoption of the Metric System for textile work. The two British delegates, Austin Lee, C.B., secretary of the British Embassy, and Mr. H. M. Brigstock, were expressly instructed not to take any action that would commit Great Britain to the adoption of the Metric System, but simply to attend the sessions, take observations and report to their Government. Mr. Brigstock in his address before the Congress said: "The international unification of yarn numbering on the basis of the Metric System, in the opinion of the Government of Her Majesty, the Queen, is not at present acceptable in the British Empire, and I may add that this opinion is approved almost unanimously by the British spinners themselves."

In the light of these facts, you will recognize how wide of the mark is your statement that "at the last Paris Exhibition, a meeting of British and Continental woolen manufacturers approved unanimously of metric measurements as a necessity of their trade." On the contrary, the report of the proceedings of that Congress are filled from beginning to end with the most emphatic statements by the Continental delegates that the English system is a necessity to their trade, and that they cannot abandon the English standards without ruin to their business. A few brief extracts from the proceedings of this Congress will illustrate:

M. le Baron Cantoni, Italy: "An importing country may oblige the foreign exporters to conform to its regulations. But with an exporting nation the affair is more difficult. We export about sixty million (sic) of cotton yarn and cloth to foreign countries, and we compete directly with England, and until England changes we cannot hope to introduce a new system in the Orient or in other markets. . .

"It is necessary to remember that nearly all the exports of cotton yarn are from England, and we do nothing if that country does not adopt the system we favor. . . The difficulty will always be in exporting to uncivilized lands where the people have been accustomed for a hundred years to English measures and numbers, and where articles of cotton are often used as currency."

M. Ferdinand Roy, France: "In certain of our French colonies the Metric System has not been introduced. It is necessary to proceed gradually and at first to mark the number of metres beside the yards, and the metric beside the English numbers."

Baron Esnault-Pelterie, France: "This difficulty (in foreign trade), has been solved in France, since we export to the Far East our cloths folded by the yard, although the metric is the legal system in France."

M. de Pacher, Austria: "To begin with, I must say that it is my belief that uniform numbering can be obtained in all countries only by a law made compulsory after a certain date. The spinners, who should begin to number their yarn according to the resolutions of Congress before the old numbers were prohibited by law, would be under the necessity of keeping their product until forced to sell it at the best price and at an incalculable loss."

M. Louis Guerin, France: "It is practically impossible for us (the French), to sell linen by any other than the English standard. . . If the law of 1810, providing for the metric standard, is enforced, we shall be the first to complain of that which we have asked for."

M. Boucher-Feyerick, Belgium: "We Belgians export enormous quantities of linen yarn to England, Asia and Egypt, and we cannot adopt the Metric System without risking the loss of this trade. Our customers in the countries named are familiar with the English system of numbering, and if we do not give it to them our competitors will, and we will lose the market. I speak not alone for myself but for all Belgian spinners. We cannot change."

It is much to be regretted that the proceedings of this Congress have not been published in English. The delegates pictured without reserve the chaos of ancient and metric standards of weights and measures on the Continent. The only relief from this chronic state of Continental chaos is found in the general use of the English system for cotton yarn.

In your statement that "the Metric System has been approved in forty-four countries of the world, and this is a stamp of appreciation which no amount of local aversion or theoretical disapproval can get over," it seems to me you give too much weight to numbers and too little to the size of the countries. This phase of the metric fallacy is referred to in the manifesto of the recently organized British Weights and Measures Association:

"When the metric advocates are beaten on all other points they invariably fall back to the sentimental idea of having one language for weights and measures throughout the world. They point out that thirty-six out of thirty-nine civilized nations have already adopted the Metric System, and it is only common justice that the minority—British Empire, United States, and Russian Empire—should give way to the majority. That looks very plausible, but what of the relative importance of those countries? Taking those thirty-six nations in order of population, none of the first four have the population of Liverpool. Lancashire has more inhabitants than any of the first eighteen. The total of the first twenty-four is only equal to the population of the United States. There is a larger population within fifty miles of the Manchester Town Hall than in any one of the first twenty-five of those nations. The Russian Empire has a population equal to the whole of the first twenty-eight, and the British Empire alone has 4,000,000 more people than the first thirty-four added together. Counting the three against the thirty-six, we have 567,000,000, against 445,296,000, and the measures of those 567,000,000 are all based on the English inch. Looking at the question from the point of view of trade and commerce, the Anglo-Saxon race alone has a preeminence which makes the vaunted position of the metre users ridiculous."

The contrast between English and metric countries is even more striking than as shown above. In not one of the 36 metric countries is the Metric System the single standard, and in most of them it is merely the official standard, the people continuing to use the old system.

Some one has well said that prophecy is the most gratuitous form of error, but if we must prophesy would it not be safer to predict the final triumph of the English language, weights and measures?

SAMUEL S. DALE.

Boston, Mass., December 20th, 1904.

THE LUMBER CUT.

We gather from reports coming to hand from various parts of Northern Ontario, that the work of log cutting is well advanced, and in many cases the logs are being now hauled to the streams. The continued fine weather in the fall enabled the lumbering gangs to get ready large stocks. Some lumbermen practically completed the work of cutting a month ago, while while others will continue it for some time. So far as we can learn, the cut in the southern part of the Temiskaming country will be fairly large, while in the Georgian Bay section it will not be more than two-thirds of that of last season.

There has been a marked falling off in the production of square and waney timber this season, due to the slump in the British market. The Ottawa Citizen says that practically all that is being manufactured is being taken off the limits in the Nipissing country, sold by the Ontario Government towards the close of 1903. "Thomas Mackie, M.P., of Pembroke, is producing considerable square timber this year, and Mr. J. R. Booth is making a fair lot. However, the big end of the reduced cut is being secured on the Nipissing limits by the North Bay firms." That journal estimates that this year's cut of square and waney lumber will amount to about one and one-half million cubic feet, as compared with two and one-half million cubic feet last year. Of the latter amount about half a million feet had to be left

on the limits on account of the slump in the British market, so that in all about two million feet will be available this season. It is thought that the cost of log production will show a slight reduction this season. While it is true that the men are being paid lower wages, they are doing better work and more of it. The cost of horse hire is also below that of previous years, while provisions and fodder on the whole show a slight decline. The manufactured end of the lumber market is looking brighter, and a good spring trade is expected, particularly in the United States market. Stocks across the line are very low and early enquiries will have to be made for Canadian white pine. The British market, which has been poor for the past year, also shows better prospects. Prices, however, have held firm, and none of the manufacturers give any indication of weakening.

OTTAWA BOARD OF TRADE.

The annual meeting of the Ottawa Board of Trade was held on the 17th inst. The retiring president, Mr. John R. Reid, made some rather pointed remarks upon the great work which the board might do for Ottawa, and upon the lukewarm interest with which so many business men regarded that body. He also spoke on the good work of the Canada Central Fair, but pointed disparagingly to the difference which existed between the way in which it was regarded and encouraged, compared with the case of the Toronto Industrial Exhibition. The report of the cheese and butter committee of the Board was an able summary of what had been accomplished in that industry in the Ottawa district during the last two years. Officers of the Board for the current year were elected, as follows: President, Denis Murphy; first vice-president, James W. Woods; second vice-president, Peter Whelen; treasurer, C. A. Douglas; council, W. H. Dwyer, A. W. Fleck, James Ballantyne, G. S. May, W. P. Hinton, Stuart McClenaghan, D. M. Finnie, A. W. Ault, Jackson Booth, J. R. Reid, P. D. Ross, John McKinley; board of arbitration, N. A. Belcourt, J. R. Booth, T. C. Bate, Fred. Cook, Thomas Askwith, Wm. Northwood, R. M. McMorran, D. MacLaren, G. H. Perley, P. D. Ross, Hiram Robinson, C. C. Ray.

ANSWERS TO ENQUIRERS.

J. F., Berlin.—The figures and facts you partially recall were in the Monetary Times of 22nd July. The Toronto conflagration of April last devastated fifteen acres of land and burned 98 buildings. The total insurance loss was $8,735,000, and the total destruction was probably between eleven and twelve millions of dollars. The underwriters' committee estimated that 20 per cent. of the loss was on buildings and 80 per cent. on contents.

Woodstock.—Have replied by letter.

R. G. B., St. John.—(1) W. Fitzgerald, Ottawa. (2) You will find on pages 612 and 613 of the Year Book of Canada, for 1903, a table of policy valuations of Canadian life companies in that year. This will give you most of what your letter asks for.

* * *

THE OTTAWA FAIR.

The Central Canada Exhibition Association, Ottawa, held its annual meeting a few days ago, and decided to hold this year's Exhibition between September 8th and 16th. Mr. Wm. Hutchison was re-elected president and all the old directors were re-elected. Mr. Hutchison gave a humorous account of how difficult it was to please everybody in the management of a Fair, and in a selection of features. As he put the matter: "People have said, when we had a good agricultural implement display: 'The same old thing, nothing new, the same machine, only painted in many colors.' Few they were who looked for the new inventions brought out every year; to them it was a matter of novelties, but since the agricultural machinery people have decided not to exhibit, we find the cry going up: 'Try and get them back, it was one of the great features of the show and very novel.'" Others than Mr. Hutchison, occupying a like position, have heard remarks and complaints very like these. The annual report of the directors was adopted.

* * *

DIGBY BOARD OF TRADE.

The annual meeting of the Digby Board of Trade was held on the 17th inst., the reports presented at which proved the year just closed to have been a prosperous one for Digby and the surrounding districts of Nova Scotia. A number of local improvements, decided upon twelve months ago, were shown to have been effected during the year, and a progressive programme was outlined for 1905. The new officers of the board are: President, H. L. Dennison; vice-president, Orbin Sproule; secretary-treasurer (re-elected), Clarence Jameson. The council is composed of: E. F. L. Jenner, J. E. Jones, David Sproule, F. M. Steadman, J. A. Irving, G. A. Vye, W. Fairweather, F. W. Nicholl and C. F. Lewis.

* * *

EASTERN TOWNSHIPS BANK.

The pamphlet just issued containing the forty-sixth annual report of the Eastern Townships Bank gives in addition some interesting particulars of the growth of this institution and the enlargement of its field of activity. It has 29 branches and seven agencies in Quebec Province, extending from St. Joseph Beauce in the east to Huntingdon in the west, and St. Gabriel de Brandon on the north shore. And there are two branches in British Columbia and one in Winnipeg. The map, which illustrates the location of these, may be found at the back of the pamphlet and is an instructive study. As to the growth of the bank, the condensed table on page 12 shows it well. In 1860, which was about the beginning of things, for the bank was incorporated in 1859, the whole paid-up capital was $133,415. By 1875 it was a million; the circulation was $467,000; and it had only $791,000 deposits, but it paid ten per cent. dividend that year. This must have been considered a lavish distribution, however, for only seven per cent. was paid for a dozen years thereafter. The years from 1890 onward exhibited great growth; deposits ran up to $3.870,000 in 1897; the capital was made $1,500,000 in that year, the rest $785,000, and eight per cent. was divided. In the latest five years, ended with 1904, the most remarkable expansion is shown. The bank had enlarged its radius beyond the Eastern Townships of Quebec. To-day the paid capital is $2,472,000; reserve, $1,500.000; deposits, $9.821,000; loans, $11,423.000; circulation, $2.237,000. And the dividend seems to be established at eight per cent. Such growth in forty-five years is creditable to the bank, and a testimony of the growth of Canada. Perhaps the most interesting leaf in the book—at least we have found it so—is that containing the illustrations of the head office (a pretty piece of lithography), and nine of the branch offices. Some of these are unusually neat buildings, the one at the top of the second page especially temple-like.

UNITED STATES FIDELITY AND GUARANTY CO.

We have received a financial statement of the United States Fidelity and Guaranty Company at December 31st, 1904. It shows the total assets of the company to be $3.304,804.87. Against this is capital stock paid in cash, $1,700,000; reserve for unadjusted and resisted claims, $223,389.62; legal premium reserve, $1,079.840.84; leaving surplus and undivided profits, $301,574.41. The very large sum of $2,135.339 in premiums was written in cash for the year 1904, and the earnings over expenses for 1904 were $1,024,806.72; net losses paid for 1904, $575.718.97. The growth of the business in eight years compares thus: First year, premiums written, $109,961.25; surplus and reserves, $53,012. Fifth year, 1901, premiums written, $1,227,423.85; surplus and reserves, $932,-

BANKERS

MONTREAL—Molsons Bank; Imperial Bank of Canada.
NEW YORK—The Importers and Traders National Bank
LONDON ENGLAND—The National Bank of Scotland.

617.01. Eighth year, 1904, premiums written, $2,102,-102,589.24; surplus and reserves, $1,604,804.87. The claim is made that this company has outstripped all other surety companies in the United States, having written during 1904 $700,000 more in premiums than any other company. All the capital, resources and surplus, aggregating $3,304,804 are at risk for the benefit of the holders of its bonds. It has paid its policyholders, we are told, since the commencement of business in 1897, the sum of $2,308,633. The shareholders get a dividend of seven per cent.

* * *

—The old question of postage rates on newspapers and magazines in the United Kingdom is once more to the fore, Mr. Henniker Heaton, M.P., has addressed a long letter to the Postmaster-General on the subject. He points out that the charge for conveying the "Nineteenth Century," weighing about 10 oz., is 4½d., while the charge for conveying the "Drapers' Record," weighing two pounds and a half, is half a penny. The effect of these existing regulations is to tax literature of the educational, scientific, religious, and generally more valuable type more heavily than ephemeral publications of inferior or less permanent value—an inversion of true policy which obtains in no other country. His concluding paragraph to Lord Stanley, the Postmaster-General, runs thus: "It may strike you as a novel sensation to be appealed to as one charged with some duties of the Minister of Education. There can be no doubt, however, of the powerful influence a postmaster-general may exercise for or against what we may call higher literary education Whether you accept such a responsibility or no, it is certain that a British Minister will always listen to an appeal for fair play, and that, in a word, is all I ask."

* * *

THE DOMINION BANK.

The thirty-fourth annual general meeting of the Dominion Bank, was held at the banking house of the institution, Toronto, on Wednesday, January 25th, 1905.

Among those present were noticed:

Lieut.-Col. Mason, Lieut.-Col. Pellatt, Messrs. William Ince, William Spry, E. B. Osler, M.P.; W. D. Matthews, Thomas Walmsley, W. G. Cassels, David Smith, A. R. Boswell, P. Leadley, G. N. Reynolds, A. Foulds, A. A. Jones, H. Gordon MacKenzie, J. Gordon Jones, W. Crocker, J. F. Kavanagh, J. G. Ramsay, W. C. Lee, W. C. Crowther, F. J. Phillips, F. D. Brown, H. B. Hodgins, W. C. Harvey, R. Mulholland, S. Samuel, F. D. Benjamin, J. F. Risley, John Stewart, F. J. Harris, William Davies, A. W. Austin, W. R. Brock, E. S. Ball, William Booth, J. Bruce Macdonald, R. A. Stapells, William Mulock, R. T. Gooderham, Dr. Andrew Smith, John J. Dixon, Charles Cockshutt, A. E. Webb, T. G. Brough, and others.

It was moved by Mr. W. D. Matthews, seconded by Mr. Wm. Ince, that Mr. E. B. Osler do take the chair, and that Mr. T. G. Brough do act as secretary.

Messrs. A. R. Boswell and W. G. Cassels were appointed scrutineers.

The secretary read the report of the directors to the shareholders, and submitted the annual statement of the affairs of the bank, which is as follows:

Report.

The directors beg to present the following statement of the result of the business of the bank for the year ending 31st December, 1904:

Balance of profit and loss account, 31st Dec., 1903		$ 474,902 63
Profit for the year ending 31st December, 1904, after deducting charges of management, etc., and making provision for bad and doubtful debts		459,670 01
		$934,572 64
Dividend 2½ per cent., paid 2nd April, 1904	$75,000 00	
Dividend 2½ per cent., paid 2nd July, 1904	75,000 00	
Dividend 2½ per cent., paid 1st October, 1904	75,000 00	
Dividend 2½ per cent., payable 3rd January, 1905	75,000 00	
		$ 300,000 00
		$634,572 64
Transferred to reserve fund		500,000 00
Balance of profit and loss carried forward		$134,572 64

Reserve Fund.

Balance at credit of account, 31st Dec., 1903	$3,000,000 00
Transferred from profit and loss account	500,000 00
	$3,500,000 00

Property has been purchased at the corner of Bloor St. and Dovercourt Road, where an office will shortly be opened.

The Stanstead branch was closed in July last.

All branches of the bank have been inspected during the past year.

E. B. Osler, President.

Toronto, 25th January, 1905.

The report was adopted, and the thanks of the shareholders were tendered to the president, vice-president and directors for their services, and to the general manager and other officers of the bank for the efficient performance of their respective duties.

The following gentlemen were elected directors for the ensuing year: Messrs. A. W. Austin, W. R. Brock, T. Eaton, J. J. Foy, K.C., M.P.P.; William Ince, Wilmot W. Mathews, and E. B. Osler, M.P.

At a subsequent meeting of the directors, Mr. E. B. Osler, M.P., was elected president, and Mr. W. D. Matthews vice-president, for the ensuing term.

Mercantile Summary.

Mr. W. G. Blackgrove has been appointed to the position recently held by Mr. Alexander Wales, as travelling agent and collector for this company, and is duly authorized to receive and receipt for subscriptions to the Monetary Times.

EDGAR A. WILLS,
Managing Director.

The Numismatic and Antiquarian Society of Montreal have decided to make an effort to secure from the Quebec Government the long promised $10,000 to form an endowment out of which to help pay the expenses of keeping up the Chateau de Ramezay as a national museum. The money is part of the price received by the Government from the sale of part of the Ramezay property to the city for an extension of the Bonsecours market.

The annual meeting of the Montreal Transportation Company took place on the 20th inst. The same officers and board of directors were elected as last year, and the reports of the directors received and adopted. The officers are as follows: Mr. B. McLennan, president; Mr. G. M. Kinghorn, secretary; board of directors, Messrs. G. M. Kinghorn, T. A. Crane, A. Kingman, D. McLennan, S. Robertson, A. E. Ogilvie, and J. A. Cuttle, managing director.

A winding-up order has been granted in the matter of the Canada Hardware Company, Limited, Montreal. The company was chartered in 1899, with an authorized capital of $50,000. Last fall the premises were burned out, the stock being a total loss. They had $75,000 insurance, which, it is claimed, did not cover the amount of goods destroyed by a considerable margin; and apart from that they have not yet been able to bring about an adjustment with the companies interested.

Birch & Clark, in the tailoring line for the past two years at Lunenburg, N.S., have made an assignment of their estate, as the result of several recent law-suits. They owe from $2,000 to $3,000, and show very little in the way of assets.——Max Nathanson, formerly in the clothing trade at Sydney, N.S., and at present of Louisburg, is reported insolvent.——I. Vineberg & Sons, also in the clothing business at North Sydney, N.S., have assigned. The senior is said to have previously been unsuccessful in Montreal.

The following is a list of the United States patents granted to Canadians last week: 780,098, apparatus for building submerged concrete works above the surface of water, Frederick J. Gilman; 780,134, acetylene gas generator, F. L. H. Sims; 780,197, cattle guard, Chas. J. Kelly; 780,217, cultivator, William McCloskey; 780,218, cultivator, William McCloskey; 780,280, sheave block, Herbert Gilley; 780,324, boiler patch plate, William Cross; 780,445, adjustable lid for boxes, Charles F. Ramsay; 780,465, cigar cap, Alexander Woods.

BEFORE the practice of guaranteeing was placed on a business footing a person had to ask a favor of a moneyed friend when he required a bond. Such a request was not always favorably considered even when the friend understood perfectly well that the bond was required as a measure of good business and not on account of any suspicion entertained against the party to be guaranteed.

The guaranteed is no longer under a favor to the guarantor for going security to his bond. "The London Guarantee" is a well established and strong financial insurance company which is empowered to assume all the liabilities of a guarantor for those requiring bonds either for themselves or for their employees. It is a business proceeding but the rate of premium for a guarantee bond is low.

Full Particulars Upon Application.

CORRESPONDENCE INVITED.

Mercantile Summary.

George Whitehead's sawmill, at the village of Cultus, Ont., near Woodstock, was on the 19th inst. destroyed by a boiler explosion, and four men were killed.

The Canadian Northern Railroad have arranged, it is said, to construct a pig iron smelter at Port Arthur, Ont., with a capacity of from 150 to 200 tons of iron ore per day. It is to be completed by October 1st next. Its purpose is for the development of the iron properties near Atikokan and Mattawan.

A group of small grocery failures is noted in Montreal, as follows: P. Dubuc, owing about $2,200, has arranged to pay his creditors 40 per cent. of their claims.——F. Gaudreau, who assigned last week, shows liabilities of about $1,500, and has been but a short time in business.——Joseph Paiement has made a voluntary assignment. He formerly worked in a biscuit factory and started in business three or four years ago. His liabilities are about $1,300.

M. M. Perault, M.P.P.; Dr. Girouard, and others, of Montreal, will present a bill in the Quebec Legislature for the incorporation of the Longueuil Street Railway Company. The object of the company will be the construction of a street railway in Longueuil, to be extended later to Montreal South, St. Lambert, Boucherville, Chambly, St. Hubert, Beloeil, Varennes, and the other adjacent villages on the south shore. One of the principal objects of the company is to provide quick transit to Montreal, and the first extension will be to St. Lambert Station, where passengers would be transferred to the G.T.R. suburban trains until an arrangement could be made with the Grand Trunk to run the street cars through the Victoria bridge.

The New York Central Railway has now taken control of the Rutland and St. Lawrence and Adirondack Railways. The bulk of the capital stock of the two companies has been purchased in both cases by the first-named road. At a meeting of the directors of the Rutland Railway Company, the following were elected directors to represent the new controlling interests: W. K. Vanderbilt, F. W. Vanderbilt, H. McK. Twombly, J. P. Morgan, William Rockefeller, Jas. Stillman, and W. H. Newman. The following directors will remain on the board: W. Seward Webb, Chauncey M. Depew, and Messrs. Merrill, Clement, Proctor and Paine, and practically the same board was elected for the St. Lawrence and Adirondack Co. W. H. Newman, president of the New York Central has been elected president of both the Rutland Railroad and the St. Lawrence and Adirondack. By gaining possession of these two roads, the New York Central adds about 500 miles to its system. An interesting point is that the New York Central is likely to become a more active competitor of the Delaware and Hudson in the Montreal business.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary

To go abroad with a cultivated man who has many times visited Rome and Paris, is an attractive trip for any one going abroad for the first time. The Rev. Dr. Withrow's Programme of Travel, for 1905, has come to hand. It is a handsomely illustrated pamphlet, which we are told will be sent free on application. Its scope includes England, Scotland, France, Belgium, Italy, and Switzerland.

H. B. Niemson, of Montreal, who has been only a comparatively short time in this country, but managed to get credit enough to open a clothing store, is trying to settle at 40 cents on the dollar. He was for a few months in business at Mattawa, Ont., with poor results, before opening in Montreal a year ago.—A demand of assignment has been made upon Louis Glauberson, of Montreal, doing a sort of peddlers' supply business under the style of the European Importing Co. He was in trouble as lately as July last, when he arranged to pay 50 cents on liabilities of about $20,000.——J. H. Lacerte, started a suburban dry goods business at Montreal last spring. He had a fire last month, and now has assigned owing about $4,000.

The annual meeting of the British-American Development Company, Limited was held last week in Toronto. Reports from the Queensboro', Hastings County, iron pyrites mines, under development by the company for its subsidiary company, the B. A. Pyrites Company, showed encouraging prospects. The Queensboro' mine is expected to be a regular shipper within a few months, and several other pyrites areas under control by the company may be developed at an early date. The board of directors was re-elected as follows: J. Ewart Brown, M.D., president; John W. Cheeseworth, general manager; J. E. Haines, Brampton, secretary-treasurer; E. E. Stoner, Vancouver, B.C.; Adam Linton, Guelph; O. Kenzie, Berlin; James E. Elliott, Brampton; A. R. Moore, Toronto, and J. W. Green-Armytage, Fergus.

A man named J. N. Verrette, formerly a clerk in Three Rivers, Que., started general storekeeping at St. Maurice, in 1900, being then assisted by his father. The latter has now served a demand of assignment upon him, and files a claim for $4,390. His total indebtedness is reported at $6,800, with assets of only about $1,500.——An assignment has been made by M. Ryan, in a small general store way, at Ste. Julie Station, Que. His habits have been the subject of unfavorable comment, and his wife recently entered a suit for alimony.——S. Mendelovitch, clothier, at Sorel, Que., has been asked to assign. Two years ago he succeeded his brother, L. Mendelovitch, who had become insolvent.

R. Brassard, of Ste. Anne de Prescott, Ont., who has carried on general store business in a limited way for some 25 years, is reported to be asking his creditors for an extension of time.

A meeting of the paper and wood pulp manufacturers of Canada was held in Montreal last week. It was unanimously resolved that in the interests of the Dominion, and especially of the Province of Quebec every effort should be made to enact legislation to prohibit the export of logs and pulpwood. A special committee was appointed for the purpose of preparing a petition to lay before Parliament, now in session, at Ottawa. Following are the companies represented at the meeting: The James MacLaren Company, the Chicoutimi Pulp Company, Laurentide Paper Company, The E. B. Eddy Company, Jonquieres Pulp Company, Lake Megantic Pulp Company, Canada Paper Company, Chatham Pulp and Paper Company, Montmagny Pulp Company, R. J. Booth Ouiatchouan Falls Pulp Company, Jacques Cartier Pulp and Paper Company, Jos. Ford & Co., Price-Porritt Pulp and Paper Company, Belge Pulp and Paper Company, Northern Mills Company, Rolland Paper Company, St. Raymond Pulp and Paper Company.

—It is Germany's turn to deal with a great coal strike. In the Westphalian mining district, some 270,000 men are preparing to leave their work, though so far only 20,000 have actually gone out. The employers, under the law fixing the relations of employer and employee, are notifying the miners to return to work or be discharged, with the loss of six days' wages. They affirm that they are unable to agree to the demands of the men to include the time of going into, and returning from the shafts in the wage period, nor can they make expensive alterations in draining the mines, because the owners claim Germany would thereby lose her position both in coal itself and in manufactures by the use of coal. Some proprietors aver that the economic equilibrium is so delicate that the whole industrial fabric of Germany can be disarranged by charging more for coal than heretofore, while others contend that Germany could not in the face of a change in price compete with the Belgium and French producers. Only a week's supply of coal, it is further asserted, is in stock. It is claimed by those who side with the men that they are obliged to work in water all day for 96c. per day.

OPPORTUNITIES IN AUSTRALIA.

Mr. D. H. Ross, Canadian Commercial Agent in Australia, writing of the openings for Canadian trade in Australia, mentions that he has been repeatedly requested to obtain samples and prices of Canadian unrefined cod and fish oils upon the basis of "f.o.b., steamer, New York." These enquiries should be well worth the attention of Nova Scotian producers, and he regrets that the required samples and quotations have not yet been forwarded to this commercial agency. If necessary, cash can be paid against shipping documents either at New York or London. A Melbourne agency firm, of undoubted financial position, with branches throughout Australia—capable of selling cod and fish oils—is anxious to secure samples and prices for large quantities. The address of this reliable and energetic concern can be obtained on application to the Department of Trade and Commerce, Ottawa, and any special information required will be cheerfully forwarded on application to Mr. Ross. In Western Australia enquiries have been made for Canadian canoes and light rowing boats. "Catalogues were advised as having been mailed to this office, but they have evidently been lost in transit. A sample Canadian canoe arrived in Melbourne two days ago, and I have the permission of the owner to submit it to the inspection of the proprietors of the principal sporting goods depot in this city. If economical freight rates can be obtained there is no question that—given good representation in various states—there is a trade to be done in this class of pleasure craft. It is the usual custom to pack canoes in tapered crates, but, as marine freights are calculated upon the square of the extreme measurements, no saving in charges is accomplished in doing so, while the contents of the crate are much more liable to injury. It is therefore prudent to pack in strong square crates, thus reducing the liability of injury to a minimum. It is advisable for Canadian canoe and boat builders to make an effort to introduce their specialties into this country. Special export prices are necessary upon the basis of f.o.b., steamer, New York. The Commonwealth customs duty on boats and canoes is 15 per cent. Quite recently an energetic Melbourne agency firm received a fine sample collection of Canadian trunks and travelling bags, and a determined effort is being made to secure orders for these goods. It is to be regretted that the manufacturers had not the ordinary foresight to send catalogues, or photographs, and complete specifications of their entire line of goods, as the agents are compelled to confine themselves to the samples which do not cover the requirements of the local trade."

PICKFORD & BLACK,
HALIFAX.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their report, dated January 21st, 1905, say: The stock market has been active and feverish ; conspicuously strong in spots, but lacking the universal buoyancy which characterizes a thoroughly healthy bull market. Excessive manipulation took place in some stocks, especially in Reading, which, however, its business has increased and whatever plans may be in contemplation, has hardly undergone a change warranting a rise of 10 points within a week. Reading stock is so plentiful and so freely scattered that the theory that shorts have been squeezed is scarcely probable; especially considering the property is more prosperous than at any time within its history and short sales correspondingly dangerous. If the sudden rise had any justification at all, it was most likely attributable to pure manipulation, based perhaps on the supposition that the various anthracite coal companies are to be brought in still closer permanent relations of some sort. The demand for coal has been unprecedented; and since prices are high and profitable it follows that Reading, which through the Gowen purchases back in the "seventies" monopolizes remaining anthracite fields, would naturally reap large profits from present conditions. Such violent movements, however, unsettle the market and expose it to equally sudden reactions which simply disturb and discourage confidence. Another and more legitimate set of influences that affected speculation were divided rumors concerning several important railroad properties.

General trade continues active for the season, and the country is now distinctly feeling the benefit of a profitable harvest. Even the cotton planters are doing well, having sold more than half of their cotton at 9c., and being quite capable of holding the balance of the crop for better prices if they choose. Pig iron production is going along at a record-breaking rate; and, while the top notch has probably been reached, this great industry is certainly enjoying a revival of prosperity not dreamed of a year ago. Building operations are also progressing at a rate unusual for this season of the year, and are likely to continue unless interrupted by a fresh outbreak of labor agitation. Money is plentiful at easy rates, and though the demands from business channels are increasing there is little prospect of any advance in rates until the April settlements approach.

* * *

TORONTO MARKETS.

Toronto, Jan. 26th, 1905.

Chemicals, Drugs, Etc.—Trade is quite fair, but nothing of an extraordinary character is being done, so far as we can learn. Opium is moving a little more freely. Quinine is also more active. Camphor and carbolic acid are firmer with a tendency to advance.

Dry Goods.—No new feature has developed in the dry goods trade, which

Balance carried forward	302,743 72	
		$627,743 72

EDSON L. PEASE, General Manager.

is fairly active. Prices of all lines are quite firm. Travellers now on the road report prospects for a good spring trade very satisfactory. There is already a demand for dress goods, mantles, etc., for the spring delivery.

Flour and Grain.—Dullness still prevails in the flour trade. Ninety per cent. patents sell for $4.20 to $4.35, in buyers' bags. Millfeed is quiet without appreciable change in price. Oatmeal is $3.90 and easier than last week. Wheat, both Ontario and Manitoba, is firm. Oats is also strong. In other grains there is not much to be said. They remain very much as quoted last week.

Hides, Skins and Leather.—A quiet business is being done at old prices, and it is expected that some improvement will set in before long, especially if leather prices rise as they are expected to do. Already the latter, in several grades, has advanced 1c., and the general tone is noticeably firmer. Calfskins are also advancing. Sheepskins keep steady.

Groceries.—Sugar continues very firm with a fair movement throughout this country, and reports of scarcity from abroad. The general trade is reported brisk by some merchants, and only fair by others. Canned goods are still very strong indeed, and no change can be expected. In dried fruits a normal trade is being carried on.

Live Stock.—A duller feeling prevails at the cattle market again. The demand for export cattle is light, while butchers' animals are even quoted lower, that is to say for those of medium and low-class; for really good grade cattle retained their old prices. Hogs are quoted 20c. higher. Stockers and feeders are quiet. In milch cows a fair trade is going on though prices are somewhat affected by the easier feeling prevailing for cattle generally. The good, brisk demand for sheep and lambs, which has been prevailing for some two or three weeks past, has fallen off.

Provisions.—Prices for country produce remain about the same, but the receipts seem to be affected by the elections. Cheese is quite steady. Eggs are scarcely so firm as they were, though prices keep up. Poultry continues high.

Wool.—No change is reported under this heading, with prices keeping very firm. Little or no business is being done for export.

* * *

—"Have you provided against the rainy day?" asked a neighbor. "Yes, I have an umbrella checked at the club and have put the check in my safety deposit vault."

—The shareholders of the Rolland Paper Company elected officers and directors at their semi-annual meeting on Monday evening in Montreal. They are as under: Hon. J. D. Rolland, president; O. Rolland, vice-president; R. Bedard, secretary-treasurer; directors, Hon. R. Prefontaine, J. L. Archambault, S. B. Rolland, B. D. Rolland, and A. Foucher.

MONTREAL MARKETS.

Montreal, Jan. 25th, 1905.

Ashes.—Prices have taken a further quite pronounced tumble, receipts for the month having been much larger than usual, while there is practically no English demand. Dealers are now only quoting $5.25 for first pots, as against $5.90 to $6 a few weeks ago; seconds would now only realize about $4.75 to $4.80.

Dairy Products.—The present demand for cheese is very light, and a dull market is reported, with sellers and buyers somewhat apart in their ideas, but the former are apparently not disposed to quote below 10⅞ to 11c. for fine fall Westerns. The shipments last week were 20,182 boxes, and total shipments since close of navigation are 184,630 boxes. In butter there is a decidedly firm undertone, supplies being hardly up to the demand. Finest grades of creamery are quoted at 21½ to 21¾c., while good dairy makes are quoted at 17 to 17½c.

Dry Goods.—Travellers are now sending in orders rather more freely, but city retailers are not buying largely, and are still busy with their clearing sales. General collections may be called fair. Representatives of French manufacturers of dress goods, now in the city soliciting orders, are quoting figures from 10 to 15 per cent. ahead of last year.

Furs.—At the moment of writing, only partial and incomplete telegraphic returns are to hand with regard to the London sales, which began Monday, and no very definite idea can as yet be formed with regard to the variations in values. By next week full advices will be to hand.

Groceries.—The further advance in refined sugars, anticipated by us when writing last Wednesday, took effect the following day, standard granulated in barrels being advanced to $5.75, at which figure the market has since remained steady, and no change is apparently looked for in the way of a decline, in the near future at least, the outside markets for raw sugars being still reported very strong. Local refiners have been scouring the market for further lots of molasses, which were supposed to be pretty well bought up, and purchases amounting to about 400 puncheons are reported within the last few days, at high figures, said to approximate close on to 30c. As a result of this and the strong situation with regard to the new crop in Barbados, jobbers have advanced quotations to 33c. for single puncheons, and 35½c. for barrels. The last cabled quotation from the island is 18c., which means 30c. laid down cost. Teas are still in comparatively light request, with easy values prevailing.

Hides.—Beef hides now offering are beginning to show some evidence of the grub, but prices are maintained at 9½c. for No. 1, this being the price paid by dealers. Some few calfskins are coming in, realizing 13c. for No. 1, and 11c. for No. 2. Lambskins are up to $1.15.

Metals and Hardware.—Hardware travellers are all now fairly at work again, and orders are coming in satisfactorily. In heavy metals, plumbers' supplies, there is a good seasonable demand. Some enquiry is being made for pig iron, quotations for which are advanced materially over fall prices. Ordinary lots of No. 1 Summerlee are quoted at $21; No. 2, $20; while for Midland and Londonderry domestic brands from $20 to $20.50 is asked on spot. Bars are firm at $1.75 to $1.80. Canada plates are steady at the advance noted last week, but other lines of sheets are not altered in price. Ingot copper is stiff at 16¼c. in a jobbing way; tin, 32½ to 33c.; lead, $3.55. Other lines remain as they were.

Oils, Paints and Glass.—Orders are reported as coming in very fairly for spring, and prospects are apparently considered better than last year. It is also considered that values in most lines are about as low as they can well go, and that the chances for speculative profits are better. Turpentine is showing considerable fluctuation, and is now

quoted at 78c., though it was up to 80c. a few days ago. Linseed oil remains low at former figures. Leads are firmer, and some houses decline to entertain business at figures below $4.40 for pure. Putty in bulk is quoted at $1.45, and in bladders at $1.65. Glass is very firmly held at $3.25. Fish oils are little asked for.

SMITHS TO THE RESCUE.

The appearance of Telamon Cuyler Smith to have his name changed to Cuyler is opposed by plain John Smith, better known as "Jack" in Georgia, who has employed counsel to fight the change. "Jack" Smith calls upon Hoke Smith, Alex. Smith, Victor Smith, and others by name to aid him in the movement. But why should the opposition be thus narrowed? Why not seek also the help of every Smithe, Smyth, Smythe, Smit, Smet, Smid, Smed, Smidt, Smeed, Smedes, Smitz, Smitt, Schmid, Schmidt, Schmith, Schmitt, Schmedes and Schmitz? Why bar the derivative Smithsons, Smitherses, Smeatons, Smithleins, Smedburgs, Smedleys, Smitzers, Schmitzlers, Schmittmanne and Echmetzlers from the patriotic protest?

In the name of nomenclature and in deprecation of the clogging of court calendars, it is hoped that the attempt to tamper with the good old name of Smith will be effectually squelched.—New York World.

HOW TO SAVE MONEY.

You can have a thousand dollars laid by for yourself in 20 years by an investment of a few cents a day. In the meantime if you should die, your estate will be worth the full amount whether you have completed the investment or not.

Write to the Manufacturers Life, Toronto, for their leaflet, "How to Save Money."

The British Canadian Loan & Investment Company, (Limited.)

Notice is hereby given that the Annual General Meeting of the Shareholders will be held at the Company's Office, Equity Chambers, 24 Adelaide Street East, Toronto, on **Wednesday, the First Day of February** next at noon.

By order of the Directors,
ERNEST S. BALL, Manager.

IN HER PUBLIC LANDS

many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.

Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.

For maps, reports, Mines Act, etc., apply to Hon. E J. Davis, Commissioner of Crown Lands, or Thos. W. Gibson, Director Bureau of Mines, Toronto.

LONDON FIRES IN 1904.

The London Times says that the number of fires which occurred in that city last year was 3,280. The most disastrous fire of the year was that of April 25th, in the Minories. Other serious fires were those of January 7th, in Piccadilly; of February 20th, at Eastlane Wharf, Bermondsey; of February 28th, in Featherstone street, Finsbury, and of July 18th at Bonny street, Camden town, while the most disastrous waterside fire of the year broke out at Cotton's Wharf, Tooley street, on the night of August 10th, resulting in the partial destruction of "G" warehouse. A great timber fire, which occurred on October 18th, at Lot's Road, Chelsea, caused the only fatal accident to a fireman during the year. The greatest loss of life from fire during the year occurred at Judd street, Camden town, where six persons lost their lives, and in Duke's Head passage, Ludgate Hill, where seven persons perished.

RAILWAY MILEAGE IN CANADA.

A report issued from Ottawa a few days ago in Ottawa stated that during the year ending June 30th, 1904, the steam railway lines built in Canada amounted to 534 miles, bringing the total mileage of the country on the date mentioned up to 19,611 miles. The capital paid amounted to $1,186,546,918, an increase of $39,996,149. This amount includes Dominion and Provincial subsidies, and loans and municipal aid. The miles of railway in operation numbered 19,431, an increase of 443 miles, compared with the previous year. The gross earnings of all the steam railways aggregated $100,219,436, a gain, of $4,154,909. The working expenses amounted to $74,563,162, an increase of $7,081.63, but the net earnings show a falling off of $2,927,729, the total for the year being $25,656,274. The steam railroads of Canada carried 23,640,765 passengers, an increase of 1,492,023 and 48,097,519 tons of freight, a gain of 724,102 tons. The number of passengers killed was 25, much fewer than in the year previous.

The returns of electric railways show that there are 767 miles of line, as against 759 in 1903. The capital, including Dominion and Provincial subsidies and municipal aid, was $80,453,609, an increase of $1,219,932. Working expenses were represented by the sum of $5,326,517, an increase of $853,659, when contrasted with the year previous. Net earnings totalled $3,125,092, or an increase of $366,273. There were 181,689,998 passengers carried, as against 155,662,812 for the preceding year. Of freight 400,161 tons were carried, 28,876 more than in 1902-03. Ten passengers were killed, the same number as in the previous year.

City of St. Thomas.

Debentures for Sale.

The City of St. Thomas, Ont., having decided by a vote of the ratepayers to purchase the existing Gas and Electric Light Works, will receive tenders addressed to the undersigned up to noon of Wednesday, February 15th, 1905, for $200,000 of Debentures of the said City of St. Thomas.

Debentures are to be issued in twenty series or blocks of $10,000 each, and the said debentures shall be payable in annual instalments within 30 years from the date of the issue thereof, at the office of the City Treasurer, St. Thomas, and shall have attached thereto coupons for interest at the rate of 4½ per cent. per annum, payable annually at the Treasurer's Office, St. Thomas.

Debentures will be dated March 1st, 1905, and will be ready for delivery on or about March 1st, 1905.

Tenders must state an amount on the dollar for the whole issue, or any series of $10,000, and accrued interest to date of delivery, and the Corporation reserve the right to reject any or all of said tenders.

For any further information and for printed copies of the By-law under which the debentures are issued, application may be made to the undersigned.

S. C. PERRY,
City Treasurer.

"TRADERS' WEEK."

Various cities have tried the effect of having a "Traders' Week" set apart during which, by means of special transportation rates for passengers by rail and water, country dealers shall be induced to visit the city warehouses and select their stocks. New York merchants managed this with much success, and the wholesale trade of Canadian cities have also found it a good thing. During the last few days Messrs. J. D. Ivey and F. G. Morley, of the Board of Trade, and S. F. McKinnon, Charles Mack and J. F. M. Stewart, of the Manufacturers' Association, have visited Montreal, where they waited on railway officials and endeavored to secure special rates for a projected "Traders' Week," to be held in Toronto spring and fall. No definite arrangements have yet been made, but there is hope of a successful arrangement. The idea is to permit retail dealers from all over Canada to visit Toronto and make purchases from the wholesale houses.

⁂

IRON AND STEEL MARKETS.

The metal trades are waiting the outcome of the race between production and consumption, says the Iron and Machinery World. Both are progressing at

what is believed to be record-breaking proportions and there is in the developments of the week little to denote which of the two is the stronger. As the month progresses the output of pig iron is believed to be still further increasing from the quite notable pace of January 1st, a pace that has only twice been surpassed and therefore it would not be surprising if the rate of pig iron production February 1st were to prove the largest ever attained, though possible disaster to furnaces might modify this expectation. In respect to consumption there are not the same evidences of record-breaking qualities. In fact, some of the consumers of iron and steel incline to the view that their trade is only moderate. But when comparisons are to be made, based upon views of that sort, it must be kept in mind that the standard of the users has changed within the past two or three years. Their present business might have been considered three years ago as remarkably large, but because they may since have doubled the capacities of their consuming plants the same business looks moderate. The consumptive capacities of the country have greatly expanded, whether comparisons are made with one, two or three years ago. The purchase of 25,000 tons of pig iron by the steel corporation about a week ago has been magnified into an event of strategic importance. It seems to be one of the incidents of the present market that the large producers are faring or have fared well in the distribution of orders and there is strong evidence that at some of the mills of the corporation billets and other material are so scarce that the uninterrupted operation of the finishing mills is problematical. There is need for a larger tonnage of the crude material.

The outlook for business is almost universally viewed as most encouraging.

* * *

BUILDING SOCIETIES IN GREAT BRITAIN.

The report of the Chief Registrar of Friendly Societies has been published. It shows that in the United Kingdom there are 2,124 building societies of which 2,062 are incorporated under the Building Societies Act of 1874, while 62, generally of less importance, are not incorporated, but retain their position through an act of 1836. The incorporated societies show up as follows in comparison with previous years:

	1903.	1897.	1891.
Number of societies	2,062	2,514	2,382
Number of members	547,000	579,000	588,000
	£	£	£
Receipts during year	19,399,000	17,608,000	19,464,000
Amount advanced on mortgage during year	9,328,000	Not stated.	Not stated.
Liabilities—			
To shareholders	34.728.000	20.619.000	34.730,000
To depositors.	13,628,000	10,802,000	14.912,000
Assets—			
Balance due on mortgages	48,106,000	38,400 000	47.703,000
Other assets..	3.144.000	3,847,000	3,843,000
Excess of assets over liabilities	2,894.000	1,826,000	1,904,000

It will be seen that the building society form of investment has not been increasing in popularity of recent years, probably owing to the shaking of public confidence by the failure of the Liberator and other well known companies a few years ago. It should be noted also that the Birkbeck Society is not included in the above summary, and that it has increased its business considerably. It is pointed out by the London Economist from whose columns we take these figures, that it is a matter of considerable difficulty to compare the exact standing of the societies one year with another, owing to severable rearrangements of the points which are scheduled for comment. It suggests, too, that the figures of former years, for example, further back than 1893, were of such a nature as to be scarcely reliable. Experience seems to show that the societies which fail most disastrously are usually those which have the largest amount of properties in possession, and of mortgages on which the repayments are in arrears.

The "Economist," looking at the figures for the past several years, comes to the conclusion that there has been not only a marked renewal of public confidence during the last six years, but also that there is a real justification for this confidence. It is true that within the last six years some important societies have reduced the interest payable by borrowers to 4 per cent., and their increase of business may have been due in part to this cause. The facts may well afford satisfaction to all who are interested in questions of this nature, says the Chief Registrar, who has thrift among the people very close to his heart. "Although," adds our contemporary, "the building society may not be an ideal method of saving—though it may, inter alia, tend to the acquisition of cheap property by people who have not the means to maintain it, and thus indirectly lead to the creation of the slum—though it may tend also to immobility of labor, by chaining the workman to the spot in which he has the stake of proprietorship, yet, on the other hand, it must tend towards much that is best in English domestic life."

* * *

Wm. Blackley, Limited, importers, and Kemp & Keith, printers, Toronto, were the sufferers in a fire on Colborne St. this week, which did some $8,000 damage; insured.

Dr. Carroll and a syndicate of British Columbia capitalists are building a flume for the handling of lumber in the Capilano Valley. It will be eight miles in length. The timber consists chiefly of cedar.

A well known commercial man was buried in St. James' Cemetery on Wednesday. This was William Lewis Hunter, who was known to hundreds of friends as a commercial traveller. He had represented various firms—Davidson & Hay, Eby & Blain, J. W. Long & Co., of Toronto, and latterly Chaput, Fils. & Cie, of Montreal. He was a veteran of 1866, and a member of the Sons of England.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359	per day in number of Claims Paid.
6,297	per day in number of Policies Issued.
$1,303,559.06	per day in New Insurance Written.
$98,582.76	per day in Payments to Policy-holders and addition to Reserve.
$53,841.18	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

TRADING IN FUTURES.

The president of the New Orleans Cotton Exchange delivered an address the other day in which he made some interesting references to trading in futures and the usefulness and the abuses of the system. Speaking of the tremendous advance in prices for cotton last season, which stimulated the great production and consequent fall in prices this season, he gave as his opinion that it was due to the fact that there was more short selling for future delivery than in any previous year on record. In spite of the liability of the "future contract" system to abuse, he said it was indispensable to the modern cotton trade and, he thought, it had, generally speaking, an uplifting influence on values.

Of course as to the latter part of this contention, there are undoubtedly two sides to the question. The "future" system may raise prices too much, while at other times and in wider circumstances, it may depress them. The system is worked by bears as well as bulls, and one kind of operator is just as likely to abuse it as another.

The chief liability to create trouble lies chiefly in efforts to corner a short supply. There is little chance to increase the supply that can be let into the market to depress the price. Depression is the result of the actual supply that may be had for delivery, and the only defence against it is withholding some part of the supply which can be controlled. But when the supply is short it can be made more so by a comparatively easy control of all or a large part of that available for delivery. Then short selling for future delivery may run into abuse and become pernicious, not only to manufacturers and consumers who are forced to pay a higher than the normal price for what they must have, but to producers as well. It seems to us that a very large proportion of the excessive price last season went to speculators, but its effect was to stimulate planting and lead to this season's over-production. Thus to the speculators chiefly comes the benefit, while to the growers there is left the reaction.

* * *

BOOTS, SHOES, AND LEATHER.

The chief subject for discussion in both the tanning and the boot and shoe trades is the question of prices. The price of hides, and—to some extent—the difficulty of obtaining those of good quality, has for some time past been a cause of anxiety to leather men, and they have at last, after considerable delay, succeeded in raising the level of values of leather. The tendency, however, is still upward, and the probabilities are that further advances will take place in the near future. Across the line, very material price increases have been made, ranging from 5 to 7½ per cent. or even more on some lines, and even yet the manufacturers are not satisfied that they are receiving a fair share of profits, comparing it with the cost of raw material. The same may be said of Canada.

Present quotations for leather in the Toronto market are as follows: Sole, slaughter, medium heavy, per pound, 29 to 31c.; No. 2, 28 to 29c.; No. 3, 27 to 28c.; calfskins, French, $1.15 to $1.50; French kip, 85 to 95c.; Canadian kip, 60 to 70c.; upper light, medium, 40 to 45c.; pebbles, 15 to 16c.; harness, union oak tanned, No. 1, 33 to 34c.; No. 2, 30 to 32c.; light, 29 to 31c.; cod oil, gallon, 45 to 48c.; degras, per pound, 3c.; japonica, or gambia, 6c.; lampblack, 20 to 25c.; sumach, per ton, $50 to $60.

Something very similar is the point of view of the boot and shoe manufacturer, although at the present time several of the Quebec and Montreal factories report a comparative paucity of orders coming in, and this of course offsets any immediate chance for a general lift in values, though everyone agrees that such is needed. During the last two years or so everything he has had to buy, leather, tacks, trimmings, and labor, has gone up in price; yet his products have remained largely as before, so far as selling value was concerned. It is true that some lines of boots were advanced a little by some manufacturers a few months ago; but there has been no general advance, such as the cost of production would seem to have justified. It looks now, however, as though this state of things is likely to be altered. A few days ago a meeting of the Western Ontario shoe manufacturers was held, to prepare a schedule of prices on staple lines of leather boots. Several changes were made, and some of them tended to place prices on a higher basis, but as a rule, they were brought about mainly for the sake of uniformity. In several instances, for example, some manufacturers would show price lists averaging in some lines 10 or even 15 per cent. lower than those of others, and in these cases, the former were levelled up. The fact, however, that for some time past an appreciable paucity of orders has been felt by some of the manufacturers, particularly in Montreal and Quebec, is apt to prevent the movement for higher prices from becoming very vigorous.

Boot and shoe merchants in Montreal are still agitated over the trading stamp question. They have now decided to appoint a committee to canvass every dealer individually, and to engage him not to give any cash receipts from any stamp company from this date. After this, the intention is to endeavor to obtain Dominion legislation for the suppression of all trading stamps.

So far as new styles for the current year's shoes are concerned, we hear of none that are strikingly original. Probably one feature will be, however, the great diversity of patterns which will be held in stock. In some parts of the United States, the same thing is reported. One paper says that it looks as if all the popular lasts and patterns of the past decade, together with all possible ramifications of them were being offered retailers, while another report says that last factories have been "rushed" for months turning out new models. The general tendency, of course, of this multiplicity of styles is to increase the field for profits, but it should not be carried too far.

⁂

FIRE RISK AND BUILDING CONSTRUCTION.

Second Article.

Much has been said and written since the conflagrations of 1904 upon the importance of sensible municipal fire by-laws, of improved construction of buildings, and of caution on the part of individuals as to fire conditions generally. And it should do some good in arousing citizens to the daily and nightly risks of fire, and the necessity of examining with regularity our premises, our fire appliances, and our water supply. The fire-underwriters are naturally interested in the spread of intelligence respecting the omnipresent causes of fire; and might be relied upon, one would think, to keep their customers up to the mark with regard to circumstances in dwellings or stores which may vitiate a fire policy.

But it is unhappily true that in Canada we find instance after instance where the very persons who should maintain the standard of proper house-building and who should be the most particular about the observance of statutory conditions—the underwriters or their agents—"let things slide" in both building and maintenance, because they have not back-bone enough to insist upon their customers doing their duty and observing contracts.

That the same state of affairs exists in the United States is clear from some remarks made by Mr. Mayers at a recent annual meeting of the Fire Underwriters' Association of the North-West. Thus: "Individually, and in detached bodies, the underwriter does everything he can for fireproof construction. He urges legislatures to pass better building laws, and calls upon courts and officers and people to enforce them. He invites his confreres to unite with him and pull all together for fireproof construction. He makes boards and commissions, and he attends meetings, and he dines and wines and 'resolutes.' In no case does fireproof construction fail to get all kinds of endorsement and encouragement from the underwriter. But when it comes to underwriting—acting unitedly for results—the existing difference in rates on real fireproof and other kinds of construction is not enough of a reward for the sound builder, whether it be considered in the light of a conflagration or an initial blaze." And the president of that association, premising that something must be wrong with fire insurance, said, on the same occasion: "We have cast the blame on the bucolic or the burglarious legislator; on the iniquity of the incendiary policyholder; on the times, because they are too good; on the agent because he is too greedy or too indifferent; on electricity; on gasoline; on the tramp and on the rat! They have all had a hand in the precious business, but I am veering slowly around to the conclusion that in the last analysis the trouble with the business is the ignorance of the manager and his staff."

In the paper read some days ago before the Insurance Institute of Toronto, by Mr. Burke, that gentleman reminds us that few business men are prepared to spend more money on buildings than self-interest compels, and unless they can be convinced that it is cheaper to build well and safely they will prefer the smallest possible outlay on their buildings and equipment. "Insurance rates in the past tended to foster this false economy, and the hands of the architects were, in a measure, tied, no amount of argument being available against the logic of circumstances." Indeed, this architect is bold enough to say that permanent good results will lie largely in the hands of the underwriters. If they relax, the character of buildings will decline. One thing he insists upon, as a deduction from experiences in the late Toronto conflagration that no building exceeding say 55 feet in height, should be permitted in any part of the city which is not entirely constructed of fire-resisting materials. "No stream of water at any practicable pressure is of much use in a gale of wind upon a building of a greater height, and this is the time when the conflagration risk is greatest."

⁂

FIRE UNDERWRITING, LICENSED AND UNLICENSED.

A correspondent in to-day's issue takes strong exception to the anomalous state of things in fire underwriting in Canada to-day, and notes, what was no secret, that much of the fire insurance business of merchants and manufacturers in this and other cities has of late been placed in American companies which have no legal status in Canada. True, many of the risks so placed were what are known as "sprinklered risks," and there was some excuse for our manufacturers or merchants going outside for insurance since our own underwriters were not until recently in a position to handle it on the best terms, not having the needed arrangements for adequate inspection. But now, the C.F.U.A. have, we understand, framed an inspection bureau for this description of risk. As to the repressive measures which our correspondent suggests, while it does seem irrational that there should be laws on the statute book which are not enforced, it must be somebody's fault that they are inoperative. When we have repeatedly suggested to insurance agents that they should make complaint to the proper authorities of underground fire insurance coming to their knowledge, the reply has been: "It should not be our business to be spies and informers. We are not custodians of the law." The letter makes a very fair hit at the manufacturers who go abroad for their insurance while loudly asking for all the protection they can get at home in their own special business of production. And there is something very like an aphorism in the claim that "the insurance companies pay for protection which they do not get, and the manufacturers get protection for which they do not pay."

* * *

TROUBLE IN THE A.O.U.W.

The Canadian branch of the Ancient Order of United Workmen seceded, some twenty years ago, from the parent body, whose headquarters are at Meadville, Penn., on account of the Relief Calls coming along too fast to suit them. For some years the Canadian organization prospered apace, because of a circumstance peculiar to all insurance societies, namely, the few deaths that occur within five or six years after passing a favorable medical examination. But to-day, new members being few and the healthiest of the old ones dropping out under extra assessments, there is trouble brewing. Instead of getting the benefit of a Relief Call assessed upon a half million of members, as formerly, the whole money needed to pay the extra death losses has to come from a small number of members. The past year has been somewhat disastrous to the Ontario jurisdiction.

In Grand Lodge, about two years ago, the representatives decided upon a moderate increase of the wretchedly low rates formerly used. The main object of this was to accumulate a Reserve Fund of $500,000; the interest thereon to be applied in paying the death losses which those increased rates might not cover. But instead of the increased rates meeting all the deaths and leaving a surplus to go into Reserve Fund, it was soon found that that fund itself would have been largely eaten up by the heavy claims of the past year, if some heroic action was not quickly taken. Hence, the executive felt compelled to "take the bull by the horns," and order two extra assessments during 1904. And these two additional calls, it must be kept in mind, were at the increased rates that came into force January 1st, 1904, and which were intended, of themselves, to make extra assessments unnecessary. The old rates, (originally 50 cents per month per $1,000, without reference to age), were graded a few years ago, so as to run from 60 cents on the youngest up to 90 cents at age 44 and over. But, a year ago this was changed to a step-up rate for each year of age at entry, so that at 40 to 45, instead of only 90 cents, those elderly people now pay $1.13, $1.16, $1.19, $1.22, and $1.25 at age 44, and $1.30 at 45 and over. Upon the old people this was a rise of about one-half more than formerly.

The two extra assessments made in March and in June last, produced almost a round $150,000, so that instead of the Reserve Fund being depleted by about $100,000, as it threatened to be, it stands now at some $50,000 larger than it was twelve months ago. From $377,609 on December 31st, 1903, it has grown to $428,514. It now amounts, through the falling off in membership, to about $10 per member, or almost $5 per $1,000 of certificate carried.

But there is no note of rejoicing among the rank and file over the year's increase of $50,000 in the funds. It was a costly affair, this addition of about $1.25 per head to the capital stock. The reason is that despite all the hurrah and whooping-up, and prizes given for propagation work, the number of the brethren willing to pay assessments continues to decline seriously. One year ago the contributors were 43,976. At present only 41,451 are responding to the monthly assessment—a decrease of 2,525. Suppose each of these, and an equal number more of new entrants who also disappeared—5,000 in all—had remained, (and paid 14 assessments, averaging $2 for their $2,000 certificates), it is easy to see that $28 short during 1904, upon 5,000 members, means a loss in contributions equal to $140,000. Let this state of things continue for about seven years, and it would take a round million dollars to barely cover this loss of cash to the society. And what then would be its condition numerically? A decrease of only 2,500 per annum for seven years would take 17,500 out of the 41,451 of present members, and leave only 24,000 odd. And when 17,500 healthy people have dropped out, or say 40 out of each 100, what name will fitly describe those who remain? Would not the clinging sixty per cent. be largely composed of people too old or too impaired in health to get insurance elsewhere?

And so, something has got to be done, and done quickly, or there will be nothing in the A.O.U.W., of Ontario, worth an effort to save. In that case the sooner all the healthy members look elsewhere for "insurance that insures," the better for their families. But it is evident that the officers are going to try to get the membership to consider another general increase of rates. They called a meeting of the Advisory Committee in September last, and decided to submit two questions to the lodges. One was, whether they favored an increase in the rates; and the other, whether the Ontario Government's minimum scale—called Hunter's rates—should be adopted at next Grand Lodge meeting. These questions have evoked great interest, and two or three other scales are being advocated instead of Hunter's. The old men in the Order want the rates put higher on the younger men, and the young men contend that it is only the ages above 40 which are causing all the trouble, through getting their insurance, in some cases, at less than half the cost price.

In his 1897 report, J. Howard Hunter, the able Inspector of Insurance for Ontario, published a minimum table of rates, deduced from the Canada Life's long mortality experience. This table, he maintained, gave the lowest figures for each age on which any new society, desiring to operate in Ontario, could be allowed to open up for business. It did not include expenses. These must be provided for in such other manner as the society should choose. It was not made compulsory upon existing societies, but it had a most beneficial effect in keeping out of this Province, concerns of the vampire class, operating in other lands, and desirous of opening branches here. Not a single new assessment society has been formed or opened up in Canada since the adoption, by the governments of this and other provinces, of this minimum scale of rates. The plan provides for a small legal reserve to be accumulated at not less than 4 per cent. interest, with which to meet the increasing death losses as the society grows older. The A.O.U.W. are likely to adopt this scale at the next meeting of the Grand Lodge in March, but will probably not put it in force until 1906. It should be applied at once. And it should apply to the present ages of the members, and not to the ages at which they entered, some of them many years ago. The difference is very great. To a young man who entered at 25 and is now 45, the difference is as between 74 cents per $1,000 and $1.30 per $1,000, at each assessment.

To show how far short the present rates of the United Workmen come, from producing the amount the Hunter rates show; suppose that, in both cases, the members are taken at their present advanced ages—some of them already 60, 65 and 70—we have prepared the following table. It is all embraced in ten lines, applying to ten persons of 25 up to 70 years of age, per $1,000, and showing what each scale of rates produces at the end of expectancy. Nothing is added for interest upon any little surplus over the death-rate, accumulated under the Hunter scale, and which is supposed to bring the "total product" up to the round $1,000:—

The A.O.U.W. Rates.

Age at Entry.	Expectancy. Years.	Monthly Rate.	Per Year.	Total Product.
25	38	.74	$ 8.88	$377.44
30	34	.84	10.08	342.72
35	31	.98	11.76	344.56
40	27	1.13	13.56	366.12
45	24	1.30	15.60	374.40
50	20	1.30	15.60	312.00
55	17	1.30	15.60	265.20
60	14	1.30	15.60	218.40
65	11	1.30	15.60	171.60
70	9	1.30	15.60	140.40

Hunter's Rates.

Age at Entry.	Expectancy. Years.	Monthly Rate.	Per Year.	Total Product.
25	38	$1.05	$12.60	$478.80
30	34	1.21	14.52	493.68
35	31	1.43	17.16	532.00
40	27	1.71	20.52	554.04
45	24	2.09	25.08	601.92
50	20	2.61	31.32	626.40
55	17	3.30	39.60	673.20
60	14	4.30	51.60	722.40
65	11	5.75	69.00	759.00
70	9	7.50	90.00	810.00

The crude unfairness to the young men, of their present rates, is shown in this table by the smallness of the total product upon all above 45 years of age. Double the assessments (for $2,000) and age 40 contributes $732.24, while age 70 produces only $280.80. Then make double assessments, on the same scale, and $1,464.48 is paid by the younger man, and only $561.60 by the older one, towards each $2,000 which has to be made up. The $1,464.48 might easily be made up to the $2,000 from interest income during the 27 years of "expectancy," but how is the above $561.60 to grow to $2,000 in the case of the member who has already attained the age of 70, and is supposed to die at 79 or 80?

Verily, the officers and members of the Grand Lodge of the A.O.U.W. will need all the wisdom they are capable of to do justice between man and man of their decreasing membership.

* * *

ORIENTAL TRADE GROWING.

We are indebted to Hon. T. Nossé, of Ottawa, Japanese Consul-General in Canada, for a copy of a monthly magazine, now in its fifth volume, entitled "American Asiatic Commerce." It is printed in three languages, Chinese, Japanese, and English. Among its leading articles we note one on the Railways in China, written by a Chinese Patriot, which concludes with this remarkable paragraph:—

> "May God open our eyes and direct us to the right path! China's hope of existence lies in the few years before the completion of the various railways. If our people still distrust our Government and vice versa, if the Government is not sincerely pursuing some real reforms to save China, farewell to the Chinese Empire; let the foreign powers quickly see their ends accomplished. For sooner or later China must be one of those upon whose ruins are inscribed: 'She was, but she is not.' But if our Government and our people do realize the great danger, we may take heart, construct the new lines with our own capital, and redeem those lines mortgaged in foreigners' hands. Then the blessing is likewise of a twofold magnitude. Not only do we prevent the loss of wealth, but also uphold our own power and dignity as an independent and strong nation. May our country speedily avail herself of this invaluable opportunity!!!"

Another deals with the Agricultural System of Japan, from which we gather that the value of cultivated land in that country is estimated at more than 7,000 million yen, equal to about half that number of million dollars. Buildings, tools, and implements represent $187,000,000. As to cattle and horses, these are much fewer in Japan than in Western countries, but "the farmers," we are told, "have become convinced of the necessity of utilizing the labor of beasts." "The Prospects of the Orient" is the title of a lengthy article. It is therein shown that the total foreign trade of Japan, imports and exports, was for the last fiscal year 320 million yen in value, an increase of 28 million yen over the preceding year, represented by an increase of 11 million yen in exports and 17 million yen in imports. "Throughout this war the real conditions of Japan's industry must be prosperous, as returns show the exportation of manufactured goods is increased over last year by the sum of 9,800,000 yen. As to imports their notable increase may directly be attributed to the war materials and those which are necessary for the shipping industry."

As to Japan's finances, the current amount of the Bank of Japan notes in circulation is something over 230 million yen, which is an excess of about 20 million yen on the corresponding period of last year. "In this amount of inflation of money that which circulates in Manchuria and Korea is included which must be calculated at over 15 million yen, the inflation caused by the war of currency in circulation in Japan must be imagined to be remarkably small. The inflation of currency by about 5 millions against a total of 23 millions is an insignificantly small one and has not shown the slightest sign of the depreciation of paper, and the rise in the price of goods which are the worst evils always attending the great wars of the world. Such a favorable financial state of things is due to the skill and the most prudent financiering of the Treasury authorities as well as the well-guided spirit of patriotism which economically takes the form of curtailment of all unnecessary expenditure and the giving up of luxurious and wasteful habits."

Tables are given which show the volume of foreign capital engaged in various kinds of business in Japan. Communication and transportation bulk largely with 130 million yen; the oil industry with 24 million; various industries, 17 million; insurance, 5 million; the silk industry, 1,850,000; and banking, 23,750,000 yen. The total foreign capital engaged is placed at 212 million yen, which is equal to say $106,000,000. The article naively declares that "after the glorious war with Russia the foreign capital will be introduced more easily and in still greater quantities than it has been during the last ten years." Formerly the condition of the trade between Japan and China showed as a rule an excess of imports over exports in the case of Japan, but in recent years this condition has been completely changed. Exports from Japan went up from 43 million yen in 1901 to 65 million yen in 1903, while the imports from China rose from 27 million yen in 1901 to 45 million in 1903. The exports were largely manufactured goods, especially cotton thread, likewise 8 million yen worth of coal; while the imports consisted of beans, rice, wheat, beaned cake, ginned cotton, etc.

Referring to the United States this article states that the Oriental market deserves more than it receives of the attention of American business men, but trade with the States is growing. And it is considered that "by the benefit of the new treaty [put in force in August last], the direct exchange of parcel post between Japan and the United States, including Hawaii and Porto Rico in it, was opened which will effect a still closer union of these countries."

* * *

OUR ST. JOHN LETTER.

Not in many years has there been such a snowfall in the Maritime Provinces as during the present winter. The storms have been many and severe, and to remove snow from the city streets and from the tracks of the steam and street railroads has meant the expenditure of many thousands of dollars. The very heavy snowfall should mean a good freshet in the spring, with the chances good for getting out all the lumber cut.

Messrs. W. W. White, John E. Moore and Jarvis Wilson, of St. John, and H. W. Lightburne, of Liverpool, Eng., have just secured incorporation of a company that intends engaging extensively in the shipment of deals and other manufactured lumber to the English market. A connection has been established with Messrs. Alfred Dobell & Co., at Liverpool. The new company will doubtless be an important factor in the St. John lumber trade.

The Royal Hotel proprietors are asking tenders for the erection of a large building on Germain St., in this city, not far from the hotel. The new building is to be used exclusively for sample rooms and is intended for travellers stopping at the Royal.

Fred. C. Jones, of Messrs. Simeon Jones & Co., brewers, returned a few days ago from a trip to Philadelphia, and it has leaked out that while away he purchased plant for a box factory that the company will build in connection with the brewery, purposing to make all the boxes and crates necessary for the carriage of their goods. It is also intended to greatly increase the output of the brewery.

The St. John Street Railway Company announce that further extensions of the service will be made during the coming year. The line to Carleton will be completed, a number of cars secured from the Ottawa Car Company, and new power machinery from the Canadian General Electric Company. The extensions made last year were so popular that the company were unable to provide cars to accommodate the traffic offering.

The R. A. Estey sawmill at Fredericton was destroyed by fire a few days ago. The property was owned by Senator Thompson, and was operated by the trustees of Estey. There is doubt about it being rebuilt. Another Fredericton firm, Messrs. John Gibson & Son, have just given a contract for a large brick building on Queen street, the main business thoroughfare, to replace the wooden building in which they are now located.

A number of citizens of Fredericton have formed a company and propose to purchase two large automobiles which will be used throughout the summer in conveying tourists to points of interest in that picturesque neighborhood. Fredericton is without a street railway, but has a large tourist patronage, and it is believed this venture will prove profitable.

In a recent letter announcement was made of the purchase by the Canada Permanent and Western Canada Mortgage Corporation of a large building on Prince William St. and the Market Square, owned by the Alliance Insurance Company. An adjoining building has since been secured, and the two are to be connected and converted into offices for the company and other tenants. It is said that the business of the Canada Permanent St. John agency has now passed the million-dollar mark.

The St. John Ice Company has sold its large ice houses on Leinster St. to R. G. Crosby, a West India merchant. The ice company built a new ice house last year nearer the source of supply. It is understood that Mr. Crosby will use his new purchase for the storage of molasses, and other West India products.

A St. John commercial traveller, Mr. D. A. Morrison, has just purchased the wholesale grocery business of Messrs. Fillmore & Morris, at Amherst.

Messrs. J. & A. McMillan, booksellers, stationers, printers, and binders, who were burned out some time ago, have given a contract to rebuild their old premises, and the new building will be a very much better one than that they lost.

Consequent on the action of the Liquor License Commissioners in declaring that hereafter only 75 retail licenses can be granted in St. John, five dealers, who were selling on "extensions" will go out of business to-morrow.

St. John N.B., 31st January, 1905. * * *

* * *

THE FIRE INSURANCE SITUATION.

Editor, Monetary Times:—

Sir,—The aggressive competition on the part of American Underwriters for the new buildings of improved construction in Toronto and other places is attracting the attention of company managers. Not only have many of the best sprinklered risks gone to the outside mutuals, but much of the best class of business, consisting of both manufacturing and warehouse risks, is being actively canvassed for on behalf of unlicensed companies.

It is not alone the loss of revenue directly involved which is to be seriously considered, but the interests of the companies are being very prejudicially affected in an indirect way by the misrepresentations of the parties referred to. A large number of risks in Toronto could be specified which have actually been placed outside the country, and there are many others throughout the province which have shared the same fate.

There is a strong feeling that more restrictive legislation should be obtained, similar to that in operation in New York and many other States in the Union. Manitoba has a law which forbids insurers going outside the country without notifying the Government and paying into the treasury a sum equal to 50 per cent. of the premiums. As matters stand here, not only are the companies suffering from this unfair competition, but the Government is being deprived of a very considerable revenue.

Under the Ontario Insurance Act canvassers, on behalf of unlicensed companies, are subject to arrest, and the penalty in such cases is fine and imprisonment, but this seems to be an insufficient deterrent so far as certain of these individuals are concerned.

It is perhaps superfluous to point out in this connection that companies operating under license have as a preliminary to doing business been required to make substantial deposits for the protection of insurers; and as they are also assessed considerable amounts in the way of license fees and taxes, it does not seem unreasonable that a demand should be put forward in favor of the obligation being requited. The laws of the Dominion, which are rigidly enforced in respect to licensed companies, are supposed by virtue of the various enactments to protect them against unfair and unauthorized competition, and they are no doubt framed with that end in view, though it is well known that they fail of their effect in the respect mentioned.

The manufacturer, who is loud in his declarations these days, would do well to bear in mind that what is "sauce for the goose is sauce for the gander." A proper examination of the situation reveals the fact that the average rate of fire insurance in Canada is less than in the United States—a fact which should be made known to those gentlemen at present so actively engaged on behalf of the Manufacturers' Association in devising ways and means which shall make it possible for their members to place business outside of the country. It is noteworthy, if indeed it is not a conspicuous feature of the situation, that the personnel of the Insurance Committee recently appointed by the Canadian Manufacturers' Association is composed largely of individuals who, notwithstanding the Association's battle-cry of "Canada for the Canadians," and the fact that their own several businesses have been fostered under a highly protective system of tariffs, have placed all their business in unlicensed companies.

To contrast the situation fairly, as between the insurance companies and the manufacturers, the difference lies principally in the fact that the companies pay for protection which they do not get, and the manufacturers get protection for which they do not pay.

If it is necessary to further emphasize this difference, a brief reference to the "Dumping Clause" in the manufacturers' tariff, the conditions and penalties attaching to which are generally known, should suffice.

A "Dumping Clause" is what the insurance companies now need.

Toronto, 1st Feb., 1905. "MADE IN CANADA."

NORTH AMERICAN LIFE COMPANY.

This company has long adhered to the system of bookkeeping and statement-making which gives, at the top of its exposition of income and outgo, from year to year, the total of net ledger assets. For instance, this total was $4,773,000 at the close of 1902; $5,376,210 at the close of 1903; and it is $5,945,362 at the close of last year. We confess to a liking for this method, because the growth of assets is thus shown clearly. Examining the nature of these assets, we find a decrease in the amount of real estate and mortgages, as compared with a year ago; an increase in loans on bonds and stocks, mainly on call; and an increase in stocks, bonds, and debentures owned, the market value of which last group shows a good margin over the cost price at which they stand in the books of the company. Premium receipts for 1904 were $1,237,250, against $1,132,616 in 1903, and the cash income from investments is $269,779, as compared with $248,746. The new insurance of the year, the largest in the company's history, shows an increase of $645,935, and the net insurance in force is swelled by three millions to $35,416,000. The North American's report is of a tenor to recommend it as one of the most desirable life companies.

This company has for years made good returns, under its matured investment policies. The amount paid to policyholders and annuitants last year reaches $561,136, more than half of which being in the shape of matured endowments, profits and surrenders. Indeed the consulting actuary states that the profits it pays on its matured investment policies compare quite favorably with the results paid under similar forms of policy on this continent. He also points out, however, as a matter of general experience among companies, that it is unlikely that future conditions will permit the same rate of dividend return to be realized as past years have brought. And he declares that the company's surplus of $501,263 is very large in proportion to its liabilities. An important point is made in the president's address where, speaking of certain companies which represent their surplus as being entirely available for profits to policyholders, he says: This is not true, because "the figures they put forward include their paid-up capital, which is of no benefit to the policyholder, so far as profits to be earned on the policy are concerned. In order to get at the true position of any company's available surplus, the paid-up capital must be deducted from the so-called surplus."

BRITISH MORTGAGE LOAN COMPANY.

This is one of the steady-going loan companies of Western Ontario. In spite of the constantly-falling rate of interest on mortgages for the last two decades, a fall which means the difference between say seven per cent. average interest in 1886 and 5¼ per cent. now, it has been able, mainly by economy of management and the avoidance of bad debts, to pay its dividend and to add, for a long period, $10,000 a year to its reserve. The company has no real estate on hand undisposed of, a circumstance creditable to the management. The company's assets are increased during the year from $137,951 to $1,431,604. There is an increase in debentures from $193,255 (which included accrued interest), to $222,683, and an apparent decrease in deposits and accrued interest, more than made up, however, by a special loan of some $36,000. The paid capital amounts now to $437,808, and the reserve fund to $170,000, equal to 38.83 per cent. of the capital.

BANKING AND FINANCIAL.

On Monday, 6th March, the annual meeting of shareholders in the Hamilton Provident and Loan Society is to be held.

Montreal advices tell us of the completion of a pretty building on the corner of St. Catherine street and Greene avenue, Westmount, to be occupied as a branch of the Royal Bank of Canada. Its interior is finished in marble and bronze, and it has a special room for lady customers.

The Canadian Bank of Commerce has recently purchased property in Toronto with a view of opening three new branches of the bank. The situations chosen for these are Queen Street West, Parkdale; the corner of College Street and Dovercourt Road; and the corner of Bloor Street and Lansdowne Avenue. It is expected that building operations will be commenced in the spring of the present year.

Mr. G. H. Wood and Mr. J. H. Gundy, who have been manager and secretary respectively of the Dominion Securities Corporation, Limited, announce their retirement on 1st February, from that corporation, to enter into partnership for the purpose of dealing in municipal government and corporation bonds under the firm name of Wood, Gundy & Co., in Toronto.

In discussing the present financial outlook, the Bankers' Magazine, of London, Eng., expresses the opinion that the depression which has existed for several years is now passing away. The shortness of ready money, which is now so keenly felt, it ascribes, in the main, to three causes: (1) The destruction of capital occasioned by the Transvaal War; (2) the diminution of banking deposits throughout the country; and (3) the fact that more work than formerly is now expended upon industries that are not directly productive—that is, industries which produce luxuries as distinguished from those which add to the country's wealth.

The Canada Atlantic Railway Company wants to increase its bonding powers and to issue bonds, debentures or other securities to the extent of $16,000,000, or its equivalent in sterling, £3,292,200, and to secure such bonds or debentures upon the property of the company.

In the Manitoba Legislature, bills are being introduced to guarantee the bonds of the Canadian Northern Railway for a further sum of $2,890,000. One million of this is for the Winnipeg terminals and a line to Oak Point, on Lake Manitoba, also a bridge over the Assiniboine River. The second bill is to guarantee payment and interest by the Government of Manitoba of the Canadian Northern bonds for 189 miles of new branches at $10,000 per mile. The proposed lines include a branch 100 miles from Carberry to Brandon and westward, a branch 25 miles east from Winnipeg, and a 50-mile branch from Emerson.

INSURANCE MATTERS.

The Boiler Inspection and Insurance Company of Canada have issued a neat, leather-covered memorandum book with calendar.

Now, honestly, says T.I.P., if you thought or knew you were not a good healthy risk for life insurance, would you not try to get insured? You would. And you would be trying under false pretences. If you are now a good healthy risk get the insurance while you can do it honestly.

His Grace the Duke of Richmond and Gordon, announces the Journal of Commerce and Commercial Bulletin, has accepted the position of joint-trustee of the Central Insurance Company, Limited, of London, in succession to the late Herbert Chamberlain, the other trustees being: Hon. Justice Granthem and Sir Peter Walker, Bart.

It is significant of what careful examination of the city reveals as to the needs of Baltimore in the way of protection against fire that the fire committee of the council in that city have, after long consideration of the matter, recommended that $2,000,000 (aside from the regular yearly appropriation for salaries), be allowed in order to bring the city's fire department up to a thoroughly efficient standard.

St. John insurance men are to-day, says our letter of Tuesday last, sending out cheques to customers who recently had the rates of premium raised. The insurance men promised a rebate of part of the raise, when the city should have provided two chemical fire engines. These are now in operation, and the refund will amount to considerably more than the taxpayers had to pay out to get the machines.

We learn that Mr. E. P. Heaton, former manager of the Guardian Assurance Company, has been appointed insurance expert and manager of the newly formed insurance department of the Canadian Manufacturers' Association. It is stated that, at first, Mr. Heaton will confine his efforts to the reduction of fire premiums by the amount of the agents' commission, if not with the board companies in Canada, then with the non-tariff companies, and English or United States corporations.

The first of February is the date appointed, we understand, for the commencement of a vigorous battle by Fire Marshal Davis, of Ohio, against many existing causes of fires. He will appoint deputies to visit the cities and principal towns throughout the State, and to make personal inspection of the places of business, with a view to securing the removal of whatever inflammable material, rubbish and dirt may be found on the premises to offer an easy mark for fire. The authority vested in the fire marshal enables him to carry out this plan with effect, as those who refuse to comply with his regulations are liable to be prosecuted.

It is a matter of general satisfaction that the Chief of the New York Fire Department, Mr. Croker, is doing much to suppress what has long been a source of uneasiness to the Fire Department, of actual danger and of accident and injury to children and grown people, namely, Fourth of July firework celebrations. He has recommended to Commissioner Hayes, of the Fire Department, that steps be taken to prohibit the use of all fireworks on that day, except firecrackers. Chief Croker says that during the week of July 4th last, of the 305 fires in Greater New York, 128 were traceable to fireworks, and 846 persons were injured in using these explosives.

In its third year's business, the Standard Mutual Fire Insurance Company, of Markham, assumed $7,993,000 of fresh risks, making its total at risk at the close of last year $9,288,852, the total premium income being $114,681. The losses of the year 1904 were $88,018, equal to 76.75 of the premiums. But for the Toronto conflagration, which absorbed $37,374 net, they would have been 44.16 per cent. If we add to these losses the expenses of management the outgo of the year was $117,894, exceeding income by $3,213. And yet the directors pay a dividend of $472.80, which represents 4 per cent. on the capital stock paid up. This does not seem consistent, especially when the company has bills payable of $9,000 outstanding, and owed the bank $1,235 at the end of the year.

"Why not clean house?" is the suggestive heading of an item in the North-Western Miller, of recent date. That journal gave some illustrations showing the untidy conditions of the Minneapolis mill platform. "Evidently, familiarity with untidiness has bred contempt of it in the minds of Minneapolis millowners and superintendents, or such accumulations of old junk, as discarded iron work, old timbers and conveyors would not be allowed to sully the milling district. The North-Western Miller hopes by these illustrations to bring home to the mind of every miller, not only in Minneapolis, but elsewhere, the importance of cleaning house and of keeping the surroundings of the mill scrupulously neat and tidy. Nothing can be done that will have a better effect on the morale of every man employed in and about the mill." All which has an important bearing on cost of insurance.

MONTREAL BOARD OF TRADE.

On Tuesday last was held the annual meeting of the Montreal Board of Trade. After the formal opening of the meeting, Messrs. John Baird, J. R. Binning, Harry Bragg, and W. A. Coates were appointed scrutineers for the election of officers. The retiring president, Mr. George E. Drummond, who was accompanied on the platform by Mr. W. J. Gear, first vice-president, and Mr. Robert Munro, second vice-president, then delivered his address. Owing to the late hour on Thursday at which we received the full text of Mr. Drummond's address, we cannot do it justice by any full comment. He referred to a number of important matters—transportation—fire protection—the Montreal harbor board, and so on. Mr. Crathern moved, in warm terms, and the meeting unanimously passed, a resolution appreciative of Mr. Drummond's very valuable services to the board and to Canada during his term of office. Mr. Robert Meighen, in seconding the resolution, expatiated at some length on an export duty on wheat. At noon on Wednesday the result of the election of officers was announced. We receive it by wire, as under: President, W. J. Gear; first vice-president, R. M. Ballantyne; treasurer, James Thom; members of council, Andrew A. Allan for shipping; F. W. Thompson, flour milling; Andrew Hebert, groceries; George Caverhill, hardware; E. C. Pratt, banking; Leslie H. Gault, dry goods; Alex. Ramsay, paints; C. B. Esdaile, grain; G. F. C. Smith, insurance; Harry A. Hodgson, dairy produce; Donald Munro, live stock; and J. J. McGill for manufacturing.

TRUSTS AND GUARANTEE COMPANY.

The eighth annual meeting of this company has been held. From the brief account made public of its proceedings, we gather that the volume of its business is increased and corresponding earnings for the year are claimed. A profit balance of $61,924 is shown after paying five per cent. dividend, and the balance of profit and loss account is swelled to $100,313. The paid-up capital of the company is increased to $1,004,165. The directors think there is a prospect of continuance of the prosperity which the country has enjoyed for the past few years.

DRY GOODS ITEMS.

The new cotton merger came into operation on the 1st inst. So far no announcement of price revisions has been made.

A feature of the dry goods trade has been the keen demand for mohairs, and prices in all the chief markets have advanced. It is worth noting that United States buyers have made direct purchases of mohair from Constantinople and Cape Colony, instead of, as formerly, relying upon Bradford, the world's great emporium for this class of goods.

The first series of 1905 wool auctions in London closed on the 1st inst. Despatches say that during the sales 208,000 bales were catalogued, of which 143,000 were bought by the home trade, 61,000 by the Continent, and 4,000 by America. The opening showed prices unchanged to 5 per cent. higher for merinos, which sold quickly throughout, especially fine sorts. Wasty descriptions closed at a loss of five per cent. Fine crossbreds from unchanged prices at the opening improved slightly on American support, but eased off and closed unchanged. Coarse and medium crossbreds were bought freely at the November level. Later they declined and closed 10 per cent. lower. The decline was due to the withdrawals of American support and the arrival at trade centres of large quantities bought cheaply in the colonies recently. Cape sold evenly and closed unchanged.

—The officers for the newly organized Dominion Textile Company have been appointed as follows: President, David Yuille; vice-presidents, Hon. J. Forget and C. B. Gordon; secretary, C. E. Hanna; directors, Hon. Robert Mackay, H. V. Meredith, H. S. Holt, J. P. Black, Colonel F. C. Henshaw, J. David Morrice, G. A. Grier, David Williamson, S. Carsley, C. B. Whitehead, and A. J. Brown. Mr. A. J. Mole has been appointed acting manager. In the meantime, a certain section of the shareholders, headed by Mr. George E. Amyot, corset manufacturer of Quebec, are doing their utmost to prevent the amalgamation being carried through, as, they claim, the new arrangements were made by means of misrepresentation, and they are urging the Dominion Government to refuse a charter.

⁂

The Great Northern salmon cannery on English Bay, B.C., has been purchased by Wm. McPherson and M. B. Wilkinson, the whole price, including cans, can-making, etc., being, it is said in the neighborhood of $20,000. We hear that the Godman cannery on Skeena River has also changed hands recently, the purchaser being J. Wallace.

⁂

—Out of fifty applicants for the position of secretary of the Montreal branch of the Canadian Manufacturers' Association, Mr. Dakers Cameron has been chosen to succeed Mr. E. H. Cooper, resigned, to become manager of the Hemming Manufacturing Company. Mr. Cameron is a graduate of McGill University, and has been on the staff of the Montreal Herald.

⁂

—A Detroit news item says that as a result of the unification of the New York Central, Lake Shore, Michigan Central and Big Four systems, a tunnel will be immediately constructed under the Detroit River to facilitate the transportation of cars and avoid the delays that are caused by the ice every winter. The tunnel is to be built by the Vanderbilt interests, independent of other roads.

⁂

—Toronto and Montreal wholesale dry goods houses are now paying attention to the spring mantle and millinery trade, and stocks are being received. The lateness of Easter this year will no doubt have some effect on the trade, but ought to make fine weather, a desirable factor, more probable. Reports from the millinery houses seem to show that this will be quite a heavy year for ribbons, especially those in the neutral or wood shades. It seems likely that spring mantles will mostly be of the somewhat tight-fitting variety, with the shoulders loose and the sleeves tighter than in the past season or two.

—According to a report of the American Iron and Steel Association, the total production of all kinds of pig-iron in the United States last year was 16,497,033 gross tons, against 18,009,252 in 1903, and 17,821,307 tons in 1902. The whole number of furnaces in blast on December 31st, 1904, was 261, against 216 on June 30th, 1904, and 182 on December 31st, 1903.

⁂

—The Grocers' Association of Montreal, at a meeting on Monday night, received circulars signed by over 500 grocers agreeing to discontinue the use of trading stamps on February 1st. As far as the special committee was able to find out there were only twelve grocers who refused to sign any agreement, and the meeting considered that the number was not large enough to injure the movement. Notices were sent to all grocers advising them of their agreement to cease using stamps after to-day.

⁂

A controversy is raging with regard to the quality of Canadian canned goods sent to the British markets. Some of the dealers over there say that neither the meat nor fruit products can be relied on as being equal to sample. On the other hand, it should be pointed out that the Canadian canners have been pushing trade direct with the retailers, thus eliminating the wholesalers' profits and incurring the latter's hostility. They have also devoted special attention to the working up of trade in American canned goods. It is by no means improbable, therefore, that Canadian goods have been subjected to unjust criticism.

⁂

—Our St. John correspondent tells us that Mr. J. Fraser Gregory, of the lumber firm of Murray & Gregory, has been in Ottawa for some days interviewing the Dominion Government on the construction in the St. John river, where it forms the boundary between Maine and New Brunswick, of boom piers and other obstructions by American operators. Those who want their logs to come further down river complain that their passage will be interfered with by these piers. The matter is one of international interest, and the Canadian Government intends to take it up with the authorities at Washington.

⁂

The British Columbia Fruit Growers' Association held their annual meeting a few days ago at Duncans, Vancouver Island. Resolutions were adopted asking the Dominion Government to arrange for the establishment at an early date of experimental orchards in the dry belt and on Vancouver Island, and to fix the grade No. 2 and No. 3 fruit. Resolutions were also passed expressing the approval of the fruit growers of the province with the action of the provincial inspector of fruit pests in deporting nursery stock affected with the San Jose scale. Officers for the ensuing year were elected as follows: President, T. W. Stirling, Kelowna; first vice-president, Thomas A. Brydon, Victoria; second vice-president, J. C. Metcalfe, Port Hammond; third vice-president James Johnstone, Nelson; secretary-treasurer, William J. Brandrith, Ladner.

⁂

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, February 2nd, 1905, as compared with those of the previous week:

	Feb. 2.	Jan. 26.
Montreal	$21,657,301	$19,516,363
Toronto	18,709,779	20,391,287
Winnipeg	5,180 170	5,220,488
Halifax	1,304,021	1,458,034
Hamilton	1,069,082	1,196,640
St. John	757,870	895,818
Vancouver	1,497,045	1,389,625
Victoria	746,895	508,634
Quebec	1,245,903	1,398,909
Ottawa	2,131,353	2,045,231
London	819,318	856,032
Total	$55.118,737	$54,877,061

INSTITUTE OF ACTUARIES.

The council of the Institute of Actuaries of Great Britain offer two prizes, of the value of 50 guineas and 25 guineas respectively, for the two best essays on the following subjects:—

"The Methods of ascertaining the Rates of Mortality amongst the General Population of a Country, District or Town, or amongst different classes of such population, by means of Returns of Population, Births, Deaths and Migration."

The essays are to be sent to the Institute not later than September 30th, 1906, the adjudicators being the president and vice-president of the Institute. The successful essays will become the property of the Institute, while the unsuccessful essays will be returned on application. No prize is to be awarded except to an essay which the adjudicators consider to be worthy of the distinction. The competition is open to all members of the Institute.

MONTREAL CHAMBRE DE COMMERCE.

On Thursday, 26th January, la Chambre de Commerce of Montreal held a meeting. The following officers were elected by acclamation: President, H. A. A. Brault; first vice-president, C. H. Catelli; second vice-president, U. Garand; treasurer, L. J. A. Surveyer; secretary, Jos. Haynes. For members of council twenty-six gentlemen were nominated, of whom twenty are to be chosen at the general meeting of members to be held on February 8th.

* * *

WATERLOO MUTUAL FIRE.

The latest report of this company shows that it continues to do its share of cash and mutual fire underwriting with encouraging results. The new insurance taken last year was $14,405,000, and the total at risk is $31,392,000. Losses amounted to $166,000, of which $18,422 was reinsured. It is to be remarked that $50,328, or a third of the total losses, were sustained at the Toronto conflagration. Nevertheless the company came out about even on the year's business. It has assets of $211,637; a reinsurance fund of $111,882; and shows a cash balance of $94,770 over all liabilities besides $249,000 of unassessed premium notes. After forty-two years this company can boast of a very good place in the confidence of insurers, not alone in the County of Waterloo but in South-west Ontario generally. We observe that it intends to build an addition to its office premises, which will be a convenience to the company itself as well as to its tenants.

* * *

LETHBRIDGE AND THEREABOUT.

A gentleman lately returned from Lethbridge, in southeastern Alberta, is high in his praise of that place and its surroundings. He has great faith in the future of the town, and declares that next in importance after Edmonton and Calgary comes Lethbridge. The Great Northern Railroad runs into the town, and brings in a desirable class of immigrants from south of the United States boundary, many of whom are Canadians who have made money in the States, and are now making first class settlers in Alberta. A system of irrigation, controlled by the Galt Company, said to have cost nearly a million dollars, keeps the town well supplied with water, and the country round about plentifully supplies the district with every class of produce. The price of land in the vicinity is rising rapidly, being now $20 and $30, whereas a little time ago it was only $8 per acre. Several local industries have been established, there is a good system of electric light and sewerage, and every facility for comfortable living. The Canadian Pacific Railway is taking its terminal from Fort McLeod, 30 miles west, and bringing it into Lethbridge, where it has been decided to build the union station. Hardly any description could exaggerate the charms of the climate around Lethbridge, or the advantages offered by that district for ranching and farming.

THREE RIVERS BOARD OF TRADE.

At a meeting of the board of trade held last week at Three Rivers, Que., for the election of officers, the following were named: President, P. A. Gouin; vice-president, Alfred Gouin; secretary-treasurer, Alfred Peltier.

* * *

OUR AUSTRALIAN LETTER.

The 1904 session of the Federal Parliament was brought to a close before Christmas, unlikely as the feat seemed to be of accomplishment. A satirical newspaper has thus summed up the history of this Parliament:—"It lasted ten months under three ministries, made eight thousand three hundred pages of Hansard, and never passed one particle of useful legislation. It passed a Federal Arbitration Act, but in a form which the Labor Party that initiated it declares makes it utterly useless and which, those who unwillingly passed it assert, will not be used in 'a blue moon.' It also selected a site for a federal capital, but it selected that site in New South Wales, which the Parliament of that state declares shall not be surrendered for the purpose." The paper is not so far wrong as might appear. It is to be hoped this Federal gathering will go down in history as the greatest waste of time and money in the parliamentary record of Australia. The trouble is that there are three parties and divers factions in the Assembly, and objectionable as are some of the features of the British party system, the other system is infinitely worse. Before Parliament rose there was a dress parade discussion on preferential trade, but nothing new was said and nothing done as a direct vote was not reached. The two ex-Premiers were in favor and the present one against, taking Rosebery's lines. It does not follow, however, that he would be against it if some practical scheme were formulated.

Restrictions tend to economy in Australia as elsewhere. As a result of the industrial frictions the coal mine owners are putting in mining machinery with the result of displacing the high wage miners and employing cheap shovellers and shiftmen. Several hundred miners have been thrown out of work or reduced to accept less remunerative work. The Coastall steamship companies have been groaning under the unions and recent legislation, and have now consolidated taking off the smaller craft, and two hundred and fifty officers and men are out of employment. This is not a happy state of affairs, but it is part of the painful process through which Australia will reach a better state of things.

A New Zealander has given some Canadian interviewers a doleful account of the commercial condition of his country. His statements are over-drawn. New Zealand has prospered mightily on the misfortunes of both Africa and Australia, and now that these countries do not require her products at high prices there is some reaction; but while the country's exports last year were less than the previous one the decrease is not material, and the prospect is that the year on which we have just entered will be much like 1904, in respect to exports. The imports of 1904 were about ten per cent greater than those of 1903. In all probability they will be reduced this year by perhaps that percentage. New Zealand has great agricultural resources yet to develop, and unless its people get much wilder than they now show any signs of becoming there will be a slower advance, but as soon as its business gets into its normal condition, the country will continue to increase the volume of its trade.

It is reported that one of the large United States combinations has determined to build a big factory in Canada, a resolve due to recent Canadian legislation. There is another factor which led to the movement. This concern recently cabled for its Australasian representative to come back for a consultation. He told them that though their goods were not affected by the Preferential tariff of New Zealand it would help their sale if they were made in a British country. After his visit came the announcement of a British factory. Sentiment in trade is worth something. That sentiment in Australia has helped Canada to secure more than one of its new industries.

By the way, the policy of that company is to bring back

its representative once in three years for consultation and inspiration. He is thus put in touch with new productions and new methods of production, and the house in a few hours is put in possession of the conditions here that it would not by reams of correspondence. The Massey-Harris Company is, I think, the one Canadian company that keeps in close touch with its Australasian business in this way.

A second shipment of apples from British Columbia was sent in cool storage, and the goods came over in excellent condition. They are reported to have sold at fifteen to eighteen shillings per bushel case. At such figures and with proper shipments the trade should be profitable.

Australasia is entering the New Year under promising conditions. The harvest in New South Wales will be deficient in many sections, but it is very good in the other states. Dairying is suffering from dry weather just now, but has been good. The pastoralist outlook is very good, plenty of feed and water, and high prices for everything. New South Wales flocks are now estimated at thirty millions, and the crop of wool, 1904-5, is estimated worth two million sterling more than that of last year. If a policy of wisdom shall restore confidence, and economy be adopted in public affairs, Australia should recover from the commercial doldrum this year.

We are suffering from a heat wave just now. Thermometer at nine in the evening of Friday last was over ninety, and at Bourke it went thirty degrees higher during the day. Birds have dropped dead and all life pants. Oh! for a zephyr from cool Canada that we might sleep 'o' nights.

—F. W.

Sydney, N.S.W., 2nd January.

ROSSLAND BOARD OF TRADE.

We have received from the secretary of the Rossland Board of Trade, Mr. A. B. MacKenzie, copy of a resolution unanimously adopted at the regular monthly meeting of that board, held on the 4th of January, 1905. This is a most important matter to the lumbermen of British Columbia, and to that province generally.

J. Stephen Deschamps moved and George Urquhart seconded the following resolution, which was carried unanimously after a short address by Mr. Deschamps.

"That this Board of Trade desires in the strongest manner to urge the Dominion Government to place, at the ensuing session of Parliament, a duty of $2 per thousand on rough lumber, now allowed to enter Canada free in enormous quantities from the United States, especially into Manitoba and the North-West Territories, instead of these growing districts being supplied from their natural Canadian resources, British Columbia and Western Ontario. That in imposing such duty this board is assured that the British Columbia lumbermen do not object to such restrictions, regulations and conditions, as will insure the settlers of the great North-West getting this class of lumber without any material increase in its price; and that a copy of this resolution be sent to all the members of the Dominion Government and the British Columbia members of Parliament."

CANADA LANDED AND NATIONAL INVESTMENT CO.

The Canada Landed and National, which is usually first among mortgage loan companies of Ontario to hold its annual meeting presents this year an uncommonly satisfactory report. Indeed it is styled by the president the best the company has ever submitted. The funds were steadily well employed. Net earnings have been equal to more than nine per cent. on the capital; and $30,000 has been added to reserve besides paying all losses out of earnings, and carrying forward from the previous year the contingent fund of $33,000 intact. Payments by borrowers must have been good to enable all this to be done. It is very creditable indeed for this company to be able to say that it has "passed through the unfortunate boom period which resulted in serious troubles to many, without ever having to reduce the capital stock of the shareholders, or withdraw even one dollar from the reserve fund." In addition to three and a half millions of mortgage loans the company has among its assets more than half a million in municipal debentures, Government scrips and call loans, which are all liquid securities.

In the more than ordinarily lengthy address of the president, much attention is devoted to conditions in North-West Canada and to the probable future of that immense expanse of country. Mr. Blaikie is well known to be a cautious man, not given to boasting, and yet much of his address is in a strain of ardent confidence, with respect especially to Manitoba and the Territories. Some of his statements and statistics are extremely striking. Nor can it be maintained that there is not ground for his inferences as to the coming greatness of Canada. He is doubtless correct in saying that there are many financial men in the United Kingdom who are looking for trustworthy information about Canada. It would be well if many less pecunious persons, who would like to emigrate, could be got to understand what chances there are in this country for industrious and capable people. At the same time the speaker took occasion to remark, and properly, that, with all the actual growth and the splendid prospects of Winnipeg, "the values placed upon much property in that city are often very high, in our judgment too high to be taken as a basis for safe mortgage loans."

INDEPENDENT CASH-MUTUAL CO.

In April of last year, the Independent Cash-Mutual Fire Insurance Company began business in Toronto. In nine months they wrote $2,910,506 of business, largely for cash, yielding premiums of $47,573. They very properly wrote off organization expenses $1,650, instead of carrying part of them forward *as an asset,* as some companies have done. Reinsurance and rebates amounted to $11,488; expenses to $14,475; fire losses to $14,456—almost 40 per cent. of net premiums—thus there was a balance of some $7,000 to profit and loss. They have put aside a cash balance of $5,431 and premium notes of $4,598 to form a re-insurance reserve. So far, so good. But was it wise to declare a dividend so soon? True, the amount is but small; still it would have been better, it seems to us, to wait for three months, or even twelve months, longer. It remains to be seen what success will attend the doing of surplus line insurance in the United States. No doubt Mr. P. B. Armstrong can get the directors all the business they want to take.

BOOKS AND PAMPHLETS RECEIVED.

The Mystery and Ministry of Evil.—A poem: in two parts; by a commercial traveller. Sent by mail on receipt of price, twenty-five cents. Address "Drummer," Box 118, Brooklyn, N.Y.—Rev. James L. Hall, D.D., of Brooklyn, writes in praise of this work, admitting his startled interest in it, and asks: "Can it be that at last from a layman, we have a rational exposition of the existence and meaning of evil in the universe?" The poem, whose name is given above is, the author tells us, the product of odd moments found in hotels, in railway stations, in trains, while "on the wing," or in the quiet portions of the Sabbath rest. Feeling that the generally "accepted theories of evil are as incompatible with truth as they are inconsistent with each other," the author has "endeavored to present a view which to say the least does not dishonor God's character nor contradict the Bible."

A very attractive and valuable trade journal is the Northwestern Miller, of Minneapolis, now in its thirty-second year. We observe that the publishers have now a Canadian branch under the charge of Mr. Page A. Robinson, whose office is at room 211, Board of Trade building, Toronto, which makes six branches in all. The Canadian page of the news section contains special correspondence from A. H. Bailey, of Winnipeg; W. A. Ritchie, of Montreal; and Chas. B. Watts, of Toronto. And there are news and market re-

ports from twenty different cities of the United States and Europe. We have been favored with a copy—the selling price of which is two dollars—of the holiday section of this paper, quarto size, an inch thick, on plate paper. To describe it embarrasses one, there is so much of interest. Dainty colored lithographs of scenes in Holland, in France, in Minnesota, in Ohio, in the Eastern States—an etching of a lake flour port—half-tones of grist mills and harvest scenes—four admirable page drawings by Caton Woodville—portraits of European and other rulers: such are the illustrations. Then there are stories, humorous or educative, by good authors; a map of the wheat sections of the United States; a review of the year's milling, and scores of page advertisements of the big mills, including one of the Lake of the Woods Milling Co. The whole is contained in 200 pages of delightful matter.

* * *

INDUSTRIAL ACCIDENTS.

Last month's Labor Gazette contains a very interesting review of the chief events of the past year in Canada from an industrial and labor standpoint. In the matter of strikes and lock-outs there was a marked improvement over the previous year, the number of disputes having been only 103, as compared with 160 in the previous year, and 123 in 1902. The number of workingmen involved in strikes during 1904 was 15,665, and the loss of time, approximately 278,956 working days. In regard to industrial accidents, the railway service, with a total of 243 fatalities, was shown to involve the greatest amount of personal danger to employees, though heavy returns were also shown under the heading of mining, with 106 fatal accidents; general transport, with 100 fatal accidents; agriculture, with 100 fatal accidents; the metal trades, with 103 fatal accidents, and the lumbering and saw-milling industry, with 69 fatal accidents. Comparatively few fatalities were reported in the other branches of employment. Of non-fatal happenings involving injury, 492 were in the metal trades, and 331 in the railway service; 153 among wood-workers; 133 in the building trades; 122 among unskilled laborers; 117 in the agricultural industry. An especially valuable portion of the review is that which analyzes the causes of the different casualties. A large number of the fatal accidents reported to agriculturists, for example, are shown to have been the result of farmers being struck by trains while marketing their produce. Many of these, we fear, were brought about by their own carelessness. In the lumbering industry the largest number of fatal accidents were caused by falling trees. In mining, explosions caused the greatest loss of life.

* * *

SPONTANEOUS COMBUSTION.

Spontaneous combustion, which is charged with 139 fires in 1904, is doubtless the cause of a number of those reported as "unknown," and of some of those reported as incendiary. It is detected, if at all, before the flames have destroyed the evidence of its cause.

The term spontaneous combustion literally means the burning of a substance from causes inherent in itself, but it is commonly used to indicate the burning of inflammable bodies without the application of fire.

Some substances oxidize at the ordinary temperature of the air, the process going on so slowly that little heat is produced, but when the oxidizeable matter is spread out over bodies that are fibrous or spongy non-conductors, which expose very extensive surfaces to the air, the combination goes on rapidly and heat accumulates until it is sufficiently intense to ignite the interior of the mass.

Spontaneous combustion results from the chemical combination of two or more substances which produces a sufficient heat to ignite them. The oils like linseed, which dry rapidly by the absorption of oxygen from the air furnish the largest number of cases.

Rags, sawdust or scraps of silk saturated with linseed oil will burn within ten hours; or, if saturated with olive oil or cottonseed oil will burn within six hours. The time elapsing before the occurrence of spontaneous combustion is lengthened by free ventilation and shortened by the materials being surrounded by non-conducting matter. Animal or vegetable fats or oils are liable to get into any collection of rubbish and cause a fire, the source of which can only be surmised.

Moisture promotes spontaneous combustion, as is shown by the burning of barns from the igniting of damp hay; the burning of houses by the igniting of damp ashes and wet coal, and conflagrations in warehouses from moist cotton.

Oatmeal or bran and many other vegetable substances if damp and without free air will ignite. Substances confined in wooden boxes may oxidize and set the box afire before they are hot enough to ignite themselves; or, they may in heating form gases which will ignite when air is admitted by the opening of the box.

Rags which have been used to wipe excess of oil from the sewing machine; for reoiling furniture or woodwork or which are soiled with fresh paint are liable to take fire, especially if they are thrown into a closet where there is no current of air, or left in the sunshine or in a warm place. Greasy rags used in nestbuilding by rats, mice, and birds which build in the eaves of houses, have been the origin of many fires.

The facts about spontaneous combustion of matches, coal, dye-stuffs, charcoal, lampblack, celluloid, milk, dust, wheat, waterproof cloaks, sawdust, excelsior, iron filings, tanbark, lime, and from acids leaking on clothes or furs will be given hereafter.—H. D. Davis, Ohio Fire Marshal.

* * *

FOR GROCERS AND PROVISION DEALERS.

The election of officers for the Montreal Corn Exchange Association resulted in the return (by acclamation) of Mr. Norman Wright as president, and Mr. Jos. Quintal, as treasurer.

In Cowansville, Que., next week there will be held dairy and live stock meetings, under the joint auspices of the Bedford Dairymen's Association, and the Dominion Department of Agriculture. A feature will be an exhibit from the Central Experimental Farm of a carload of typical animals for the judging of live stock.

The Quebec Dairymen's Association held a convention in St. John's, Que., on the 26th and 27th inst., at which several prominent Montreal merchants were present. The election of officers resulted as follows:—President, C. Milot, Nicolet; vice-president, Jos. Girard, M.P., Rimouski; secretary, E. Castel, St. Hyacinthe. Among the interesting matters that were discussed incidentally during the course of the convention was the question of cuts by merchants in Montreal on account of short weights in the goods sent in to Montreal. This is a sore topic with the trade, as the dairymen feel that they are being unjustly treated in the matter of cuts. In one case a salesman stated that after being cut several times he had put less than 56 pounds of butter into his boxes and had not lost money because he would be cut any way. This was easily answered by several of the shippers present, who explained that the most frequent cause of complaint was that the butter did not weigh 56 pounds with a rising beam. This was substantiated by a leading factory man, who said for years he had shipped to the same firm and that he had never been cut. He was convinced that the reason was that he always weighed his boxes before putting the butter in them, so that he always had the gross and tare. In addition, he always put in a quarter pound extra, so that he was always sure of a rising beam of the scale in Montreal. His freedom from trouble in the matter in cuts in weight was due, he firmly believed, to his practice in this.

* * *

—A deputation from the Canadian Municipal Union waited on the Dominion Government a few days ago and asked for the passing of a law restoring to the municipalities the control of their own streets, of which a recent judgment of the Privy Council apparently deprived them.

The

Barber & Ellis Company, Limited.

TORONTO WAREHOUSE:

Nos. 33, 35, 37 and 39 Alexander Street.

Factory in BRANTFORD.

ENVELOPES made in great variety.

Mercantile Summary.

The Allan Line's new turbine steamer will be placed on the route between Canada and Great Britain next month, and another one as soon afterwards as possible.

Full charter rights have now been granted to the Brantford and Hamilton Electric Railway, which proposes to build an electric line from Brantford through the townships of East Brantford, Ancaster, and Barton, to Hamilton.

The Thibadeau business block at Pembroke, Ont., was on the 27th inst., destroyed by fire. It was occupied by Grave Bros.' boot and shoe store, R. Goody, paints, oils and wall paper; Pembroke Electric Light Co.'s offices, R. B. Harrison, jeweller, and Marten Co., grocers.

The Muskoka Lakes Navigation and Hotel Company, have elected officers as follows: Mr. J. S. Playfair, president; Mr. F. J. Phillips, vice-president; Mr. A. P. Cockburn, manager and secretary; Mr. Wasley, assistant manager and treasurer.

The Canadian Pacific Railway's report for the last six months of 1904 shows that there was an increase in gross earnings of a little over 9 per cent., and one in operating expenses of a little under 11 per cent., while the net earnings increased within a fraction of 5½ per cent.

The Polson Iron Works, Limited, Toronto, has been incorporated with a capital of $1,000,000. A. H. Jeffrey, W. B. Trudell, and Bessie T. Polson, are among the charter members. They will carry on business as shipbuilders and owners, contractors and builders of ships and dredges.

The Canadian Railway Club held its third annual banquet at the Windsor Hotel, Montreal, last week, under the presidency of Mr. S. King, the assistant master car builder of the Canadian Pacific. It was a representative gathering of railway men, the men who have largely made Canada the country it is to-day.

The largest furniture store in British Columbia, with the exception of that of Weiler Bros., at Victoria, is now claimed for Nelson. The Daily News says that the Standard Furniture Co.'s stock has been removed to the company's new quarters in the Laing-Stocks building. The new store is 120 feet long and 40 feet wide. The basement is the same length, and 60 feet wide.

The National Rubber Company's warehouse on Craig Street, Montreal, was on the 29th inst., destroyed, at a loss of $80,000. The damage to the company's stock was valued at $40,000, the insurance being $32,000. J. W. Kilgour Bros. Company, furniture manufacturers, suffered a loss of $18,000, with insurance of $14,000. On the same day, the Woodstock Gas Company suffered from an explosion in the purifying room, which caused damage to the extent of several thousands.

Estey's saw-mill in Fredericton, N.B., has been destroyed by fire at an estimated loss of $12,000, partially insured. The engine, boiler, and other machinery were destroyed, but the lumber was saved.

Several fine extensive blocks are being planned for erection in Vancouver. Among them is a large warehouse for McLennan, McFeely & Co., at a cost of $40,000. Another will be an expensive business block for Mr. Philip White.

We hear from Montreal that the Robert Simpson Co., Limited, of Toronto, who recently acquired the Montreal business of John Murphy & Co., have now purchased from Hartland, MacDougall, a parcel of real estate on St. Catherine Street adjoining the Murphy building, immediately east of it, and at present occupied by Winchs' Meat Market, in Montreal. The purchase price was about $52,000, equivalent to $15 per square foot.

At intervals, for half a dozen years, more or less, we have been the recipients, by favor of the B. F. Goodrich Company, at Akron, Ohio, of a series of their handsome lithographs. For the most part these have taken the shape of pictures of women, life-size. They are always captivating subjects—portraits we have been told—and are done in the highest style of art. A recent one represents Helen of Troy, a beautiful creature, full-throated, Juno-like. She was instantly framed and hung in our library. Now comes "Alice," a sweet girl of fifteen with a frank face and tangled hair, under an early English and very negligé hat. The humorist of the company, who has restrained his exuberance for this time, offers "The Lady for an Order. Price 75 cents each to the rank and file. If fancy-free, it's an opportunity." If he had asked ten dollars, it would have seemed more like the true value. Such pictures are a delight to the eye.

Meetings

THE CANADA LANDED AND NATIONAL INVESTMENT CO., LIMITED.

The annual general meeting of the shareholders of the company was held in the company's office, 23 Toronto St., Toronto, on Wednesday, 25th of January, 1905, at 12 o'clock noon, the following being present: John L. Blaikie, Esq., president; John Hoskin, Esq., LL.D., K.C., vice-president; Hon. James Young, Rev. Robert C. Moffat, D.D., and Messrs. John S. Playfair, Frank Turner, C.E.; Alfred Hoskin, K.C.; Newman Silverthorn, George Porter, J. C. Sinclair, E. J. Hobson, James Mitchell, C. S. Gzowski, B. E. Bull, John Aitken, George F. Burns, A. Nairn, John Stark, George W. Blaikie, George M. Rae, Alex. Smith, H. E. Hamilton, Rev. James Thom and Miss Robinson.

The president, John L. Blaikie, Esq., having taken the chair, the manager, Mr. Saunders, acting as secretary, the following report and balance sheet were read:

Report.

The directors beg to submit their annual statement to the shareholders for the year ending 31st December, 1904, which has been audited and examined by the company's auditors.

The net profits for the year, after deducting expenses of management, interest on debenture bonds, losses, and all other charges, amounted to $91,812 57

Disposed of as follows:—

Dividend of 3% paid 2nd July, 1904	$30,120 00	
Dividend payable 3rd January, 1905	30,120 00	
Transferred to reserve fund	30,000 00	
Balance carried forward	1,572 57	
		$91,812 57

The past year has been one of increased activity in every department of the company's business with a good demand for money, not only in the North-West, but also in Ontario. Payments by borrowers continue to be well met, and the resources of the company throughout the year have been fully and carefully employed.

The vacancy on the board created by the retirement of John Stuart, Esq., was not filled, and you will be asked to confirm a by-law passed by the directors reducing their number by one.

The officers of the company perform their duties with faithfulness and efficiency.

JOHN L. BLAIKIE, President.

Toronto, 14th January, 1905.

EDWARD SAUNDERS, Manager.

Auditors' Certificates.

We hereby certify that we have examined the books, accounts and securities at the head office of the Canada Landed and National Investment Company, Limited, for the year 1904, and have found them correct.

All our requirements as auditors have been complied with, and the statements of assets and liabilities, and profit and loss, as above, exhibit a correct view of the company's affairs at 31st December, 1904.

H. W. WILLIAMSON,
T. E. P. TREW,
Auditors at Head Office.

Toronto, January 14th, 1905.

I hereby certify that I have examined the books, accounts and securities of the Canada Landed and National Investment Company, Limited, at their Winnipeg office for the year ending 31st December, 1904, and have found the same correct. All my requirements as auditor have been complied with.

J. B. PEPLER,
Winnipeg, Jan. 4th, 1905. Auditor at Winnipeg.

In moving the adoption of the report, the president said:

Ladies and Gentlemen,—It affords me pleasure to meet you once more at an annual meeting of shareholders, and the pleasure is all the greater because the report and balance sheet for 1904 is a most satisfactory one. Indeed, I think, I am warranted in saying it is the very best that has ever been submitted for your approval in the whole history of the company.

As you see by the statement now in your hands the results of the year's business are such that after deducting from the profits the expenses of management, interest on debenture bonds, all other charges, also all losses arising out of the sale of properties; also two half-yearly dividends at the rate of 6 per cent. per annum, there has been carried to reserve fund the sum of $30,000, thus bringing it up to $400,000, or say 40 per cent. of the paid-up capital. Not only this, but the contingent fund of $33,081.29, with which we began the year 1904, is carried forward into 1905, no losses having been taken out of it, all these as has been already mentioned having been provided for out of the year's profits.

The reserve fund, now raised to $400,000, and to which may be fairly added the $33,081 of contingent fund, with a thoroughly well organized business in all its departments, makes the position of the company very strong and satisfactory; and in this connection I may remind you that we have passed through the unfortunate boom period which resulted in serious troubles to many, without our ever having to reduce the capital stock of the shareholders or withdraw even one dollar from the reserve fund.

As an evidence of healthy progress:

The reserve fund on 31st Dec., 1899, stood at	$350,000
The reserve fund on 31st Dec., 1904, stood at	400,000
An increase of	$ 50,000

The contingent fund on 31st Dec., 1899, was	$ 6,413 67
The contingent fund on 31st Dec., 1904, was	33,081 29
An increase of	$26,667 62

Municipal Debentures Owned by the Company—

As at 31st December, 1899, was	$217,262 83
As at 31st December, 1904, was	418,515 89
An increase of	$201,253 06

A fact of primary importance is that our assets are solid and good, indeed of the very highest class. Of course our largest asset is first mortgages on productive properties amounting to $3,575,733, and payments of both interest and principal as they become due are made most satisfactorily. Of municipal debentures and Government scrips, we own a larger amount than our reserve fund, which meets the views of some investors, who think that reserve funds should always be in that class of security, these being at all times readily realized, rather than in mortgages having years to run before their maturity. These amount to $442,985.39. Then another asset is our call loans on stocks and debentures, which is undoubtedly good, and can at any time be realized on short notice; the amount of these being $86,971.75.

Ontario still provides us with a large volume of good farm mortgages at lower rates of interest than prevailed some years ago, yet at rates that yield a margin of profit. Manitoba, Assiniboia, and Alberta, but principally Manitoba, have now opened a wide field for investing money in mortgage securities. An intimate acquaintance with all the districts where this company does business is possessed by our manager, Mr. Saunders, and by our local manager in Winnipeg, Mr. J. B. McLaren, also by Mr. E. K. Campbell, assistant manager there.

In the selection of localities for lending money, regard has been had at all times, not only to secure mortgages upon land of high quality and with suitable improvements and buildings upon it, but also to the class of settlers in the district. All our investments in these regions have proved safe and profitable. Our organization for doing business there is complete and works well. A lack of intimate knowledge might easily result in loss and disappointment.

The vastness of these regions in Manitoba and the Territories west of it is so great that comparatively few men can imagine even how immense it is. The way in which a friend of mine once spoke of it to me, one who had travelled over much of it on horseback, was "there are oceans of fine land lying unoccupied, admirably fitted for growing as fine wheat as can be raised in any part of the world."

There is room for millions of inhabitants, who could and yet will make for themselves comfortable homes with plenty and prosperity around them. The influx of population into Manitoba, Assiniboia, and Alberta, for the two past years has been very great, and that from many parts of the world. Very noticeable have been the large numbers from the United States, many of whom were originally from Ontario, and when Manitoba was little known or heard of, went to Dakota, Kansas and various other States, but who have now sold out there, and have settled under the shelter and protection of the Union Jack, the symbol of even-handed justice and freedom. Those who come from the United States make the very best settlers, having had experience of the kind of farming necessary to quick success, and have brought with them their families, their horses, implements, cattle, and often considerable sums of money. Already about 500,000 have made themselves homes in the Canadian Great West, and now an inpouring tide of population has set in, so that in the spring of the present year, and of each succeeding year, very large numbers may be confidently expected to take up land, rapidly bring it under cultivation and reap rich rewards. That country has already many railroads, both running from east to west and from north to south, which will make settlement rapid, and lend to the shipment of immense quantities of wheat, flour, and other products of the farm to Europe, China, Japan and elsewhere. Great Britain will within a few years get such a supply of breadstuffs as will make her to a large extent independent of supplies from countries that are often inimical to her interests.

The estimates made by competent authorities as to the crop of wheat for Manitoba and the Territories of the past harvest varies from about 60,000,000 bushels to 70,000,000 bringing to farmers about $40,000,000 to $45,000,000. In addition to that there may have been from $10,000,000 to $12,000,000 from other farm products.

There will be a very much larger acreage under crop this year than in any preceding year, and as the fall ploughing has been done under most favorable conditions, with anything like propitious weather, some authorities estimate there may be 80,000,000 or even 100,000,000 bushels of wheat.

There are now over 3,000,000 acres under cultivation, but fancy what the enormous quantity will be of wheat, flour and other agricultural products when instead of 3,000,000 acres ten or twenty times that many acres, and farther fancy if you can the wealth that will bring into the country, the traffic that it will give to all the railroads, calling as it will for increased facilities in the way of engines, cars and elevators, so that they may be able to carry the freight that will be waiting for them at numerous points upon their lines of railway. Not only will the railroads get wheat and farm products to carry out of the country, but they will have immense quantities of supplies of all kinds for the settlers to bring in and the manufacturers and merchants of Eastern Canada will find there a fine opening for their wares of all kinds at money-making rates of profit.

All this in truth is nation-building, to be always an integral part of the British Empire, glorifying in the privilege of being so.

There will be plenty of business for the Canadian Pacific, for the Canadian Northern Railway, and their tributary branches, as there will also be for the Grand Trunk Pacific, when settlers have taken up farms along their line of road, which will run more northerly than the two other companies.

The growth of the City of Winnipeg of late years is a marvel. In 1894 the population was 34,954; in 1904 the population was 67,137. The total assessment in 1894 was $22,001,330; in 1904 was $48,220,450. About $14,000,000 has been expended in buildings during 1904, yet dwelling houses are scarce, while there is a growing demand for them. There are now many handsome residences on beautiful paved, well kept streets, and there are many very large warehouses for wholesale business, with abundant evidences of push, enterprise and success.

This company holds no property in Winnipeg, but has some excellent business there. The values placed upon much property in the city are often very high, and in our judgment too high to be taken as a basis for safe mortgage loans. There, however, can be no doubt that Winnipeg is certain to become a very large city and the distributing point for the whole of the great North-West.

Having now been on a long journey to the North-West, let us suppose ourselves home again in our own beautiful City of Toronto, and take a brief glance at the condition of affairs here. On the whole, things generally are encouraging and satisfactory. Population steadily increases, being now about 270,000, and great difficulty is being experienced by many people in finding dwelling houses, but that difficulty will ere long be overcome by the activity there now is in building operations. Values increase for all well situated properties with the increased demand. There is a large measure of prosperity in mercantile business, as well as in industrial and manufacturing enterprises generally.

The great conflagration that occurred in April last did, of course, necessarily interfere with many of our merchants and manufacturers, whose premises were so rapidly destroyed by the devouring element, and, though most of them had a large amount of insurance, it could not fully make up the actual loss and the loss arising from interference with their business engagements. The insurance companies' loss by the fire amounted to about $9,000,000. Most of those whose premises were burned have already erected, or have in the course of erection, larger and stronger buildings than those that were burned. A considerable number have not rebuilt upon the old sites, but where it happened that they combined a sale warehouse with a manufactory of such articles as they sold, have moved farther west, where they could build much larger premises on cheaper ground. The losers by the fire have displayed great courage and enterprise, and will soon be in full blast again in their new and improved quarters.

I ought to apologize for having addressed you at such great length, but may mention that there are many in Scotland and England, who lend us money on our debentures, who like to get just such information as I have endeavored to give you to-day, and to which they are certainly entitled. As one gentleman expressed it in conversation with me when I was last in Edinburgh: "We like not only to hear about your company, but also about your great country."

In conclusion, I have only to add that we owe much of our prosperity to the unwearied assiduity of our manager, Mr. Saunders, and of Mr. McLaren, our local manager at Winnipeg, and his assistant there, Mr. Campbell. We also have an office staff thoroughly loyal to the company, and who do their utmost to promote its interests.

I have now to move, seconded by Dr. Hoskin, that the report and balance sheet be adopted.

Before putting the resolution, I shall be pleased to answer any questions should anyone desire further information.

The vice-president, Dr. Hoskin, K.C., seconded the motion, which was unanimously adopted.

The scrutineers reported the following gentlemen elected directors for the ensuing year: John L. Blaikie, Esq.; Sir John A. Boyd, LL.D., K.C.M.G.; Hon. Senator Gowan, LL.D., C.M.G.; Dr. Hoskin, K.C.; Alfred Hoskin, Esq., K.C.; J. Kerr Osborne, Esq.; J. S. Playfair, Esq.; Newman Silverthorn, Esq.; Dr. Thomson K.C.; Frank Turner, Esq., C.E.; Hon. James Young.

At a subsequent meeting of the directors, John L. Blaikie, Esq., was elected president, and Dr. Hoskin, K.C., vice-president.

* * *

A crop of tobacco has been grown in County Meath, Ireland, which Prof. J. N. Harper, an American expert, pronounces to be equal in quality to that produced in Kentucky or Virginia. Twenty acres was grown, and made 14,000 pounds of leaf, which for an initial experiment is very good.

BRITISH MORTGAGE LOAN COMPANY.

The annual general meeting of the shareholders of the British Mortgage Loan Company was held in the company's office, Market Street, Stratford, on Thursday, January 26th, 1905. The Hon. Thomas Ballantyne, president, was chosen chairman, and Mr. W. Mrs. Thomas Waldie, Miss Crerar, Miss C. J. Fraser, J. W. Scott, Listowel; A. Johnston, G. G. McPherson, K.C.; John McMillan, W. E. Buckingham, B.A., LL.B., Guelph; George Innes, Woodstock; H. M. Johnson, John Hamilton, W. Maynard, ex-Mayor Parker, R. C. Tye. Robert Morton, Stamp, Thomas Waldie, J. W. Brown, Dr. J. A. Robertson, James Trow, John McIntyre, W. Gillard, W. Spence, S. M. Loghrin, F. Buckingham.

The twenty-sixth annual report and the financial statements were read as follows:

Report.

For many years past it has been the privilege of the directors to point to the steady progress and the satisfactory profits of the company's business—fortunate conditions which happily continue. The tabular statement appended to the report is a remarkable exhibit. It shows the substantial addition year by year, for eight successive years, from 1897 to 1904, both inclusive, of ten thousand dollars to the reserve fund; while it will likewise be observed by those who have kept in close touch with the company's business that the balance to the credit of the profit and loss account has gradually crept up from 1895, when it was $114.66, to 1904, when it had reached $5,162.48—a steady gain in this period of a little over $5,000. These gratifying results have their root chiefly in one cause—the safeguarding of the company against the inroads of loss. For twenty years the average of our loaning rates on good real estate securities has perpetually fallen—from 7 per cent., in 1884, to something over 5 per cent. in 1903 and 1904, a difference on the present output of about $28,000 annually. The growth of the business and the avoidance of bad debts have had the effect not only of overcoming this large reduction in the interest derivable from investments, but also of constantly enabling additions to be made to what we have saved, after the payment to the shareholders of the regular six per cent. dividends on capital. Since 1898, when there was a small reduction of less than $200 on a mortgage, there has not been a dollar of loss on any one of the many hundreds of our loans.

The past twelve months were months of financial trial to our farmers, who are our best customers, necessitating withdrawals from their savings; but these have been more than made good by the increase in debentures. Together, they show a slight gain. The investing public are again reminded that the security of depositors and debenture holders is the whole credit of the company. In point of fact, they possess a two-fold security; the investment of the funds in land—a security which of itself has proven to be absolute—and in addition there are the entire capital and reserve fund belonging to the shareholders, amounting to over $600,000.

In the face of adverse circumstances, borrowers have managed to meet their payments with a fair degree of regularity, and without recourse to foreclosure in any instance.

Once more the directors are glad to be able to state that there is no property on hand.

The total investments have grown in volume, through an unusual demand for money in the latter part of the year, at better rates than had hitherto prevailed.

A vacancy, which occurred in the directorate, was filled by the election of Mr. James Trow, son of a former president, whose estate continues to own a large block of the company's stock.

Mr. William Irwin, M.A., Public School inspector for the County of Perth, was chosen to succeed as auditor the late C. J. Macgregor, M.A., a valued officer who had been engaged in the monthly audit for a long series of years.

It is, perhaps, needless to mention that the directors and auditors are eligible for re-election.

THOMAS BALLANTYNE, President.

Stratford, January 26th, 1905.

FINANCIAL STATEMENT FOR THE YEAR ENDING DECEMBER 31st, 1904.

CASH ACCOUNT.

Receipts.

Balance due company by Bank of Montreal, December 31st, 1903	$7,173 61

			$1,431,604 00

WM. BUCKINGHAM, Manager.

Auditors' Report.

This is to certify that the late C. J. Macgregor, M.A., and George Hamilton carefully audited the books of the British Mortgage Loan Company of Ontario, to the end of April, 1904, and that, since Mr. Macgregor's illness and death, the books for the past eight months have been audited with equal care by the undersigned; that they have examined all vouchers, and have found them to correspond with the entries in the said books; and that the foregoing statement indicates the financial position of the company on the 31st day of December, 1904.

GEORGE HAMILTON,
WM. IRWIN,
Auditors.

Stratford, January 9th, 1905.

The reports and the financial statement having been read, the president moved the adoption of the same in a speech fully explanatory of the company's business during the year, and congratulated the shareholders upon its healthy and highly satisfactory condition. There was a continuance of the two striking features which had characterized the operations of the company for some years past, as we had no property on hand and there had been no losses. The directors were unable, with the competition for the higher grade of loans, to control rates of interest, which had been gradually falling, until at last they seemed to have reached their lowest point. Indeed, there was some improvement towards the close of the year, and better rates than had prevailed for a long time before were then obtainable. Economy had been exercised in the management, combined with a very high degree of efficiency. In a word, no company could be better served, and no company was so well served at so low a ratio of expense. The president explained that each application for money on mortgage was first of all carefully scanned, then if it was thought likely to bring the necessary security, the property was closely inspected, and if the advance was made, constant supervision was exercised to see that the proper margin was maintained, and every year, as an extra precaution, all the securities in the mortgage ledger were passed in review by the president, the vice-president, and the manager, sitting together as a committee for that purpose. So that if a weak spot threatened to develop, the remedy was at once applied.

The vice-president, who had inspected and valued most of the lands, said he made it a rule not to recommend the company to invest its funds in anything on which he would not willingly loan his own money.

Mr. Scott spoke of the strong attitude of the company, and thought the time had come when the shareholders might reasonably look for a seven per cent. dividend, instead of adding year by year so much money to the rest.

This gave rise to a friendly interchange of views, some of the shareholders coinciding with Mr. Scott, and some thinking it the better policy to continue the conservative course of building up the reserve.

Mr. Hamilton and Mr. Irwin, M.A., were re-elected auditors.

Messrs. Maynard and Brown, as scrutineers, reported the choice, without an adverse ballot, of the former directors: Hon. Thomas Ballantyne, Messrs. McMillan, Scott, Parker, Innes, Johnson, Morton, and Trow.

Thanks were voted to the president, vice-president, and manager and assistant manager, accompanied by grants of $200 to the president, $150 to the vice-president, and $100 to the manager and his assistant.

The directors afterwards met, with Mr. Scott in the chair, and re-elected the former president, and vice-president, and the executive committee.

* * *

WATERLOO MUTUAL FIRE INSURANCE COMPANY.

The forty-second annual meeting of policyholders of the Waterloo Mutual Fire Insurance Company was held at the head office, Waterloo, Saturday, January 21st, 1905. There were a fair number of policyholders present. The president of the company, Mr. George Randall, took the chair at one o'clock and called the meeting to order. The manager, Mr. Frank Haight, was appointed secretary of the meeting. The minutes of the last annual meeting were read and confirmed. The directors' report and the financial statement were then read as follows:

Report.

The directors for the year 1904 beg to lay before you the following report of the business transacted during that year.

The number of policies issued and renewed was 11,764, insuring property to the amount of $14,405,364, on which premiums were collected amounting to $219,838.16, and the total number in force at the end of the year was 27,835, covering insurance to the amount of $31,392,219.

The assets of the company, including unassessed premium notes is $460,687.34, of which $208,214.64 consists of cash, mortgages and other items.

The total amount of losses paid was $160,829.67, on which we had a reinsurance of $18,422.93, and unadjusted losses of $5,284.38.

In this connection it might be worthy of remark that in the conflagration at Toronto in April last, the company suffered a total loss of $61,777.04, on which the net amount paid by the company was $50,328.34, and notwithstanding this unusual and very serious loss, the company is able to show a small balance to the credit of the year's business of $1,615.76. The cash balance over all liabilities amounts to $94,470.67, as compared with the similar balance of $92,860.91 for 1903, and a balance, including premium notes, of $343,520.59, as compared with $336,404.81 for the corresponding years.

Owing to the demands for office space on the part of the tenants of the company's building, it was decided, after reaching a basis of agreement for rent covering a period of years, to enlarge the present building. The contracts have been let and the work is in progress and will cost when fully completed in the neighborhood of $4,500, and will at the same time furnish additional and much needed room for ourselves.

An examination of the reports and certified statements of the auditors will be found interesting, and we would commend them to your careful consideration.

The retiring directors are George Randall, William Snider, and P. E. Shantz, all of whom are eligible for re-election.

All of which is respectfully submitted.

(Signed), GEO. RANDALL, President.

Waterloo, January 21st, 1905.

FINANCIAL STATEMENT.

Receipts.

Balance brought forward	$212,433 35
Premiums	220,217 66
Interest, rent and reinsurance	26,262 68
	$458,913 69

Expenditure.

Losses	$160,829 67
All other expenses	89,869 38
Balance	208,214 64
	$458,913 69

Assets.

Real estate	$ 17,475 72
Bonds, mortgages and cash	178,121 12
Other assets	16,040 58
	$211,637 42

Liabilities.

Unadjusted losses, etc.	$ 5,284 38
Reinsurance fund	111,882 37
Balance	94,470 67
	$211,637 42
Cash balance over all liabilities	$ 94,470 67
Unassessed premium notes	249,049 92
Total of assets	$460,687 34

The auditors, Mr. J. M. Scully, F.C.A., and Mr. Benj. Devitt, reported their examination of books and vouchers, which they had found correct.

The president, in moving the adoption of the annual report, expressed the pleasure he felt in placing before the members a statement which must be gratifying to them all. The past year had been one of very severe fire losses owing to the great conflagration in Toronto, in which the company's net loss was over $50,000. He felt proud to say the company was able to meet all claims as they fell due, and at the end of the year could show a small balance to the good.

Mr. Wm. Snider, vice-president of the company, seconding the adoption of the report, endorsed the sentiment expressed by the president, at which the report was unanimously adopted.

Messrs. George Randall, Wm. Snider and Peter E. Shantz were elected directors for the ensuing term. A vote of thanks to the manager and office staff was responded to by Manager Haight.

The directors met immediately after the annual meeting and elected Mr. George Randall president, and Mr. Wm. Snider, vice-president, for the ensuing year.

* * *

A PRACTICAL NOTION.

A suggestion as to how more money may be made by retail druggists and chemists is given in the January number of the Canadian Druggist. In the opinion of Butler Bros., of Chicago, New York, and St. Louis, the drug business is suffering from too much professionalism. That firm discourses on the subject in this style:

When you think about storekeeping, not as an incident to a professional life, but for the direct purpose of making money, what is it that determines the real worth of a business?

Adding up the year's sales doesn't give you a line on the value of a store.

To know where you're at in sizing up any business, you've got to get at the yearly NET, not in goods and fixtures but in cold, hard cash.

Twenty years ago folks just naturally went to the drug store for soaps, combs, notions, drug sundries in general, toys, fancy goods, and a lot of other stuff.

To-day, while drug stores continue to offer these lines most of the trade goes elsewhere. Why?

It costs you a certain amount every day for rent, heat, taxes, your own time some clerk hire—for these go on, hot or cold, rain or shine.

Up to a certain point, then, expense eats up profit on all sales. When sales pass that point, however, gains roll up fast, for after that gross profit is really net profit.

The druggist's need is not more profit. He has plenty of things now that pay a high percentage of profit. What he needs is more everyday sales.

* * *

While the reports as to the Washington Government's action with regard to the importation of Canadian wheat into the United States are somewhat conflicting, it seems to be an assured fact that it intends to allow the drawback of duty on Canadian grain when mixed with the United States grain in milling, and exported.

* * *

The quantity of butter imported into Great Britain from all sources last year, according to the Government returns, was: Butter, 4,241,005 cwts., valued at $102,770,186, of which $5,814,805 worth came from Canada, $43,815,033 from Denmark, $10,856,399 from Australia, $6,786,348 from New Zealand, and $8,846,315 from Russia. Of cheese the importation from all sources was 2,554,298 cwts., valued at $28,439,695, of which $20,609,311 was from Canada, $2,640,327 from Holland, and $2,449,452 from the United States.

Mercantile Summary

Said Chief Justice Falconbridge last Friday, in sentencing James Ryan, a postman, for theft of money letters, to five years in the penitentiary: "You were a trusted servant of the public and betrayed that trust. It was not the mere taking of the money but the impairment in the public mind of the confidence in the institutions of the country."

The Monarch Typewriter Co., of Syracuse, N.Y., has entered the Canadian field. The Toronto office is housed in the rejuvenated Canadian Northern building at the north-east corner of King and Toronto Streets, and is in charge of Mr. E. R. Hyland. Mr. Hyland speaks most enthusiastically of the possibilities in Canada for the Monarch.

There was a sale of sheepskins in London a week or two ago, at which the attendance was large. The offering amounted to 4,108 bales, and practically all were sold. Competition was brisk and prices were firm. Merinos were unchanged to 5 per cent. higher; full woolen fine cross breds, 2½ to 5 per cent.; coarse cross breds, 5 to 7½ per cent., and shorn 7½ per cent. dearer.

In the Minneapolis Journal we find the following story:—The chemist of the South Dakota food commission extracted enough coal tar dye from a bottle of port wine taken from an original package in the presence of members of the legislature to dye a brilliant wine color nine square feet of heavy woolen cloth. From a bottle of tomato catsup he took enough dye to color a like amount of woolen cloth. A single bottle of pop produced coloring matter of still greater power.

The proprietors of a retail dry goods business, carried on at Quebec under the style of "Les Quatre Saisons," Messrs. De Belzel and Dionne, have made a judicial assignment. The business was established in 1890, when there were five partners interested, but it has never shown material progress, and in the spring of 1903 a compromise was effected with creditors at 70 cents on the dollar. The present liabilities are stated at $19,700, with nominal assets of about $15,000.——A. Lajeunesse, a hardware dealer in a small way in the same city, is reported insolvent, after having been sued quite frequently of late. His liabilities are shown at $2,600.——Two grocery failures are also reported from Quebec city, G. G. Varennes owing about $2,000, with assets of $1,175, and Antoine Godbout, with local liabilities of $1,000, or thereabout.

The London City & Midland Bank, Limited.

ESTABLISHED 1836.

Paid-up Capital $15,000,000

Manager.
London, Ontario, 1905

Mercantile Summary

Reports from Winnipeg speak of the great convenience that the Winnipeg, Selkirk, and Lake Winnipeg Railroad is proving as a quick means of transit from the north end of the city to Selkirk. Steam power is being used and a new engine will soon be placed on the road to provide additional motive power. New rolling stock will be added and an improved service will be rendered in the near future. Not only has a passenger business been worked up, but large quantities of freight were also handled, principally wood. It is the plan of the company to place steamers on Lake Winnipeg to be used in carrying wood from the timber limits of the north to Selkirk, where it will be transferred to cars and shipped to Winnipeg at a saving to the consumer.

From Nova Scotia recent failures are reported as follows: Arthur Porter, of Billtown, a carpenter by trade, who for five years past has been running a planing mill, and doing a general contracting business, has assigned for the general benefit of his creditors.——A. C. Austin, harness-maker at Whycocomah, is reported as seeking a compromise at the rate of 40 cents on the dollar. It is about four years since he took up the business of his father who had been unsuccessful.——At Great Village, John Adams, carriage-maker, has assigned. He recently undertook a contract to build a school-house, on which he is said to have lost quite heavily.——Samuel Ehman, a maker of ladies' clothing in a small way in Halifax, has got behind, and being pressed by a Toronto creditor he asks for a general extension on liabilities of about $2,300.

The York Radial Railway Company is preparing for extensive operations as soon as the weather permits. The Scarborough line will be extended to Highland Creek early in the spring, and to Whitby and perhaps Oshawa as soon as the necessary arrangements with the municipalities affected can be completed. For the extension of the electric line from Long Branch to Oakville, plant and material are now being got ready, and it is anticipated that this western branch of the York Radial system will be particularly popular, not only for excursionists wanting a blow of pure fresh air, but the residents along the line. Another important undertaking will be the extension of the Metropolitan to Lake Simcoe. Preparations are being made for beginning work from Newmarket northwards to Roche's Point, and thence along the Lake Shore to Jackson's Point. It is expected the line may be opened by the spring of 1906. An important feature of the York Radial Company's enterprise will be the putting on of freight cars for the conveyance of farm produce,

Two years ago J. A. Bouthilet removed from the Beauce district of Quebec, and opened in the grocery line at Magog. He is reported as offering his creditors 50 cents on the dollar.——In a late issue we noted the insolvency of Moise Coté, dry goods dealer at Ste. Agathe, Que. He is also interested in a lumbering business carried on under the style of Coté & Fils, which firm has also now assigned.——Philippe Cloutier, general merchant, Lac aux Sables, Que., lately failed, is making an offer of 50

Mercantile Summary.

cents on the dollar.——The assignment is noted of D. Rancourt & Co., dry goods dealers, at St. John's, Que. Seven years ago he became insolvent, and resumed business under cover of his wife's name, but became again involved last year, when a compromise was arranged at 50 cents on the dollar.——After a business record of twenty-five years the assignment is reported of J. B. Desautels, general merchant at St. Cesaire, Que. Owing to some irregularity in habits his business is said to have much fallen off of late years, and a year or two ago he is said to have transferred to his wife two farms he owned, so that the estate is expected to realize poorly.

For almost a year, or to be exact, since the great fire of 1904, the Office Specialty Mfg. Company has been compelled to occupy most cramped temporary quarters at 57 Yonge Street. Anyone who knows aught of the office furniture business knows that a satisfactory display of goods calls for room and light, and plenty of both. These the company did not have at 57 Yonge Street. All that, however, has been changed, and to-day we find the firm housed in what are perhaps the largest and finest premises in the world devoted exclusively to office furniture and kindred articles. Their new home is on the south side of Wellington Street, near York. The entire front of the building (save for the girder work), is one mass of glass. One can imagine how much this means for the proper display of the goods. The interior wall is of light brick, which adds to the cheerful and bright appearance of the different floors. The ceilings are unusually high, and aside from the mere business value of the premises it is a most delightful place to visit as a permanent exhibition of office and labor saving devices.

* * *

THE HULL CEMENT WORKS.

We are informed from Ottawa that Sir Sandford Fleming has been elected president of the board of directors of the International Portland Cement Company, at Hull, in succession to Mr. F. W. Cowan, whose retirement has taken place by reason of failing health. Sir Sandford is a well known and influential man, with a long experience of railway-building, and a good knowledge of mechanics and of building materials. His opinion of such a concern therefore is valuable and the fact of his assuming the presidency shows confidence in it. He went over the works at Hull, which are nearly completed. After having witnessed the operation of several of the mammoth machines put in motion for the first time, and having inspected the plant, from where the raw material is received to where the finished product is stored ready for shipment, he expressed, we are told, his entire satisfaction with the buildings and machinery, all of the most modern and improved designs.

"The company," he said, "has a very capable staff of engineers. I am satisfied that this will be one of the most important industries in this country. The use of cement as a building material has come at an opportune time, for timber is beginning to get very scarce. One has only to pay a visit to the new Ottawa University to be convinced of its great utility and value. That building is entirely of cement, and is practically indestructible." Our correspondent tells us further that the home of this industry, although practically fireproof in construction, possesses a further precaution against fire in the installation of a complete fire fighting plant. Besides a large elevated tank, with a capacity of 50,000 gallons, and a complete system of distribution, the normal pressure at the plant of fifty pounds to the square inch can be quickly increased to 160 pounds.

UNITED STATES FINANCES.

Henry Clews & Co., in their weekly circular dated New York, January 28th, 1905, say:

The New York financial situation has been more or less affected by the outbreak in Russia. For a period it was impossible to tell what would be the extent and consequences of an uprising which has long been feared, and which has not yet by any means culminated. The fact, however, that the Government at St. Petersburg had taken rigorous methods of suppressing disorder, and with considerable success, tended to partially restore confidence; and there was much less uneasiness in the latter part of the week than when the outbreak first began.

The local situation is good. Large railroad earnings and bank clearings both testify to the heavy volume of business in progress. Farmers North, South, East and West are unusually prosperous. Manufacturers are generally well employed, and the great iron industry shows an altogether unexpected degree of activity at this season, having booked orders in advance that will keep furnaces and mills busy for several months to come. There is, consequently, no diminution of earning capacity in sight for either railroads or industrials. The only drawbacks are that good dividend-paying stocks seem exceedingly high, and the investment demand is abating, although desirable bonds still find ready buyers. Such conditions divert attention from established dividend payers to those which have recently entered the dividend list, or to those which have a good chance of so doing if present prosperity continues. Speculation has, consequently, been most active in these two classes of stocks, and operations were thus confined to a few specialties manipulated by their respective cliques. Money rates continue easy, and gold shipments had little or no influence. Bankers look for easy rates right along, this being one of the strongest inducements for the holding of stocks. Bullish enthusiasm had been

materially checked by recent events and a moderate decline followed; but there is a general indisposition to part with stocks while the situation at large is so satisfactory, particularly as any improvement in the Russian situation or a genuine peace movement would impart additional strength to the market.

* * *

TORONTO MARKETS.

Toronto, February 2nd, 1905.

Chemicals, Drugs, etc.—Opium is a strong feature in the market just now in sympathy with reports from primary markets. Quinine is meeting with a fair, though somewhat quiet demand. Menthol is easier. General trade may be said to be in about a normal condition, with few features worthy of special comment. New York reports speak of trade being rather dull. In England there has been some improvement both as regards the home and foreign requirements.

Dry Goods.—The spring trade is opening up well, especially in prints and fancy goods. Prices for all lines of staples continue steady. Of course the tendency in cottons is towards easiness, but it is offset by the increasing strength of woolens. And it should be remembered by retailers who think the present low prices of raw cottons should bring about an immediate reduction in finished goods, that the prices of the latter were never put up to the level demanded by 17 cent cotton, so that some time must elapse before they and the manufacturers can hope to obtain much benefit from the price now. Stocks in retail hands of both woolens and cottons are on the light side, for the reason that they deferred purchasing during the season of exorbitant prices; so that it is altogether likely that their demand from this time on will be quite steady in order to keep up with the necessities of their customers.

Flour and Grain.—The flour market is quiet, with ninety per cent. patents selling at $4.35, or a few cents more. Millfeed is steady. Wheat is 1 to 2c. higher, and firm at the advance. Barley is unchanged. Oats is 3 to 4c. higher, and in good demand. Peas, rye, and corn are a cent higher.

Groceries.—No further change has occurred in sugars, the movement in which is fair, nor, to any appreciable extent, in other lines of groceries, in which there is a fairly good trade being carried on. The price of canned strawberries has gone up to $1.60 to $1.75, while canned herring is quoted at 12 to 13c.

Hides and Skins.—Receipts are about equal to actual present requirements, but the quality is inclined to be poor. Calf and sheepskins are firm. Tallow is easier.

Live Stock.—In the case of poor and medium stock, trade has been on the dull side, while for good grades the demand has been quite brisk. Some export cattle sold as high as $4.90, but the bulk of the offerings went at $4.25 to

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

$4.50. The run of butchers' cattle lately has been rather light. Only a slow trade is being done in stockers and feeders. But few good milkers are coming in. The run of sheep and lambs has been light, and prices are firmer.

Provisions.—There is a good enquiry for choice dairy butter. Cheese maintains considerable firmness. Eggs are a little easier with new-laid beginning to come, but these are few. Fresh are quoted around 20c. It is getting late in the season for poultry.

Wool.—No change has taken place in the situation for wool. Prices remain nominally the same.

* * *

MONTREAL MARKETS.

Montreal, 1st February, 1905.

Ashes.—The market still shows weakness, with little or no enquiry reported from Britain. For No. 1 pots, $5.25 seems to be about the present idea of buyers; seconds, about $4.80. Pearls would probably bring around $7.50 per cental.

Dairy Products.—The cheese market is still a very slow one, and the English cable quotations have declined about a shilling since last report, but local holders seem fairly firm in their ideas; and while there is very little business passing on which to base definite quotations, it is a question if anything in really fine fall goods could be bought below 10¾ to 10⅞c. Butter values are very steady, with local consumptive demand quite equal to the supply, and it is hardly expected quotations will go lower before new milk goods come on the market. The shipments of cheese last week were 15,494 boxes, making a total of 209,972 boxes since the close of navigation. Of butter, 1,462 packages were shipped, making a total of 12,631 packages since the closing of navigation.

Dry Goods.—Spring orders are now coming in in rather better volume from the country, but city retailers are not much in evidence just now about the wholesale warehouses, being engaged with their annual stock-taking in a good many instances. The 4th of February is a pretty heavy day for payments, but so far as can be learned applications for renewal indulgence thus far received are comparatively few, and general remittances are reported fairly good. This is the day the new cotton merger takes effect, but thus far no intimation has been received of any price revisions. Woolen dress goods are all very firm, with reported difficulty in getting supplies of lustres, serges, etc.

Furs.—The principal feature in connection with the London sales of last week was the pronounced advance in mink of 50 per cent. Marten also showed great strength, prices being 45 per cent above the level of the sales of last March. There seemed to be an impression in some quarters that the competition from Russian buyers would be affected by the war, and that values in a good many cases might rule easier, but on the contrary, there has been an advance in the majority of lines. As compared with prices of last March lynx sold 12½ per cent higher; otter, 30 per cent. higher; wolverine, 15 per cent. higher; skunk, 15 per cent. higher; bear, 15 per cent. higher; wolf, 40 per cent. higher; coon, same; cross-fox, same; red fox, 22½ per cent lower; silver fox, 20 per cent. lower; possum, 30 per cent. lower; rats, from 7½ to 20 per cent. lower. Beaver sold 25 per cent. higher than last January.

Groceries.—In this line there is little recent news of an interesting character, and the movement is not marked by any special briskness. Sugar prices are steadily maintained at the late advance, the factory price for standard granulated being $5.75 in barrels, bags 5c. less, with yellows ranging down to $5.20. Rice quotations have recently been advanced 15 to 25 cents a hundred. The prolonged dullness in teas, which is hard to understand, is still unbroken. Dried fruits are dull, but fairly firm in price. Canned goods are stiffly held, standard brands of tomatoes being quoted at $1.30, and corn at $1.20.

Hides.—Offerings of hides are comparatively moderate, and are readily absorbed by tanners, while quotations are unchanged, dealers buying on the basis of 9½c. per lb. for No. 1, and quoting the usual half cent advance to tanners. Lambskins are firmer at $1.15 to $1.20 each. For No. 1 calfskins 13c. is quoted, and for No. 2, 11c. each.

Leather.—Boot and shoe manufacturers are reported to be buying somewhat more freely, and fair export business is reported in splits. The firmness in sole is quite pronounced, 24½ being the general quotation for Manufacturers' No. 2 sole; jobbing sorts of sole are said to be quite scarce. Western splits are firm at 20 to 21c.; harness leather, 30 to 31c.; grain, 14½c.; waxed upper, 15 to 15¼c.; Quebec buff, 12½c.

Metals and Hardware.—Enquiries for pig-iron from local foundry men and outside manufacturing centres are more frequent, and in hardware and heavy metals generally, the movement shows some moderate increase in volume. No. 1 Summerlee pig-iron is quoted firm at $21, and best domestic brands at $20 to $20.50. Boiler plate and iron pipe incline to firm—and American mfrs. in these lines are reported very full of orders. Ingot tin is stiffer at 33c., and copper at 16¼ to 16½c.; lead, $3.55 to $3.65; spelter, 6¾ to 7c.; antimony, 9½ to 9¾c.; Canada plates are firm at $2.45, the lately advanced quotation, but galvanized Canada's, black sheets, tinplates, etc., have undergone no recent change.

Oils, Paints and Glass.—Linseed oil is easier if anything, raw selling at 42c. per gallon in small lots, and boiled at 44 to

The Trusts & Guarantee Company.

ANNUAL MEETING.

The reports presented at the eighth annual meeting of the shareholders of The Trusts & Guarantee Company, Limited, held Jan. 26th in the offices of the company, 14 King Street West, Toronto, revealed a very satisfactory outcome of the operations of the year, a satisfactory increase in the volume of the business of the company, with correspondingly satisfactory earnings. The latter after the payment of all expenses of management, etc., showed a balance of $61,924, which permitted of the payment of two half-yearly dividends at the rate of five per cent. per annum, and also the application of a substantial sum to the increase of the profit and loss account, whose credit balance was thereby brought up to the figure of $100,313.59. The paid up capital stock of the company was increased by $185,295.12, making its total over a million dollars—$1,004,165.51—practical evidence of the confidence of the shareholders in the company, and of the value of its stock as an investing medium. These several circumstances formed the subject of congratulatory remarks by the President and Vice-President of the company, Hon. J. R. Stratton and Mr. D. W. Karn, in moving the adoption of the directors' report. It was pointed out that the satisfactory results flowing from the year's operations were likely to continue, as there was, owing to exceptional conditions, a prospect of a continuation of the prosperity which the country has enjoyed for the past few years. In a word all concerned in the success of the company have reason to feel gratified at the excellent results of the past year's operations.

At a meeting of the directors held after the shareholders' meeting Hon. J. R. Stratton was re-elected President and D. W. Karn and C. Kloepfer Vice-Presidents.

45c. Turpentine is quoted at 79c. Fish oils remain dull and inactive. Leads are firmer, and some houses are issuing circulars declining to shade pure below $4.50. Window glass is firm at former quotations, with stocks in narrow compass.

AGENCIES THROUGHOUT CANADA.

The oldest chartered accountant in Montreal died on Wednesday, in the person of John McIntosh, of McIntosh & Hyde. He was 75 years of age. In former years he was of the well-known firm of Court & McIntosh.

A Norwegian mechanic has invented a machine for stamping letters by electricity. The invention is said by the Canadian commercial agent in Christiania to do this important work in a quick and practical manner, and to be able to stamp from 560 to 800 letters per minute.

Some British Columbia papers give credence to the report that several Chinese capitalists of that province, with a capital of $300,000, are joining together with the object of establishing near Canton, China, a large sawmill, modelled according to some of the largest in Canada.

The Winnipeg Electric Street Railway Company held their annual meeting a few days ago. The annual report was declared satisfactory and adopted. Officers were elected as follows: William Mackenzie, president; William Whyte, vice-president; F. Morton Morse, secretary-treasurer; Sir William Van Horne, D. D. Mann, A. M. Nanton, and D. B. Hanna, directors.

News of an important transaction of a mercantile character reaches us from Montreal. A partnership has been entered into by Henry Birks & Sons, of Montreal, and Ryrie Bros., of Toronto, and these firms have amalgamated in what will be one of the largest jewellery concerns in America. The name of Ryrie Bros. will be retained by the Toronto house. The business will be formed into a joint stock company, with the following directors: William M. Birks, J. H. Birks, G. W. Birks, Jas. Ryrie, and Harry Ryrie. The Messrs. Ryrie will have charge of the Toronto end of the business. By the new arrangement the Toronto concern will have the benefit of a modern factory at its command, the Montreal concern being large manufacturers, whereas the firm of Henry Birks & Sons immediately acquires an extensive and favorably known business connection in Toronto.

A POLICY OF GUARANTEES.

The Manufacturers Life Insurance Company issues a most remarkable policy, known as the "Guaranteed Investment Plan." By this policy, the insured has a positive guarantee of advance on his policy, should he die before the dividend close of that period. For instance, if he should die at the end of the fifteenth year, not only would the face of the policy be paid to his heirs, but also all the premium paid after the tenth would be returned. Another feature is that all premiums after the fifth will be loaned, if necessary, and if the policy-holder should die between the tenth year and the year of maturity, all the loans for premiums after the tenth would be cancelled.

Write for rates to the Manufacturers Life Insurance Company, Toronto.

City of St. Thomas.

Debentures for Sale.

The City of St. Thomas, Ont., having decided by a vote of the ratepayers to purchase the existing Gas and Electric Light Works, will receive tenders addressed to the undersigned up to noon of Wednesday, February 15th, 1905, for $200,000 of Debentures of the said City of St. Thomas.

Debentures are to be issued in twenty series or blocks of $10,000 each, and the said debentures shall be payable in annual instalments within 30 years from the date of the issue thereof, at the office of the City Treasurer, St. Thomas, and shall have attached thereto coupons for interest at the rate of 4½ per cent. per annum, payable annually at the Treasurer's Office, St. Thomas.

Debentures will be dated March 1st, 1905, and will be ready for delivery on or about March 1st, 1905.

Tenders must state an amount on the dollar for the whole issue, or any series of $10,000, and accrued interest to date of delivery, and the Corporation reserve the right to reject any or all of said tenders.

For any further information and for printed copies of the By-law under which the debentures are issued, application may be made to the undersigned.

S. C. PERRY,
City Treasurer.

Head Offices—Queen City Chambers, Toronto
SCOTT & WALMSLEY,
ESTABLISHED 1858.
Managers and Underwriters.

On the 31st ult., there was a meeting in London of shareholders of the Le Roi Mining Company. A somewhat disappointing year was reported by the chairman, but prospects are fair, owing to the discovery of ore of a higher grade. The proposition was made, and approved by those present that the Le Roi should amalgamate with other Rossland mining companies.

The Canadian Pacific Railway Company's new workshops in Winnipeg are well under way. The area under roof is nearly 6½ acres, including the locomotive shop, 792 by 165 feet; freight car shop, 100 by 312; passenger car shop, 100 by 240; blacksmith shop, 100 by 216; planing mill, 100 by 216; power-house, 101 by 123; foundry, 90 by 120; offices and stores, 85 by 252, besides drying kiln, oil house and numerous other smaller buildings. The locomotive shop will be used chiefly for repairs, though if necessary it will be possible for locomotives to be built there. An important department will be the power-house. This will be fitted with five Babcock & Wilcox boilers of the latest type, equipped with superheaters, economizers, feed water heaters, etc. Two Rice & Sargent high speed engines are to be installed. These will develop 1,500 horse-power, which is to be distributed underground to the various buildings.

The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST

THE HUGH C. MACLEAN CO., LIMITED,
Publishers, Winnipeg.

The Methodist Church at Leamington, Ont., valued at $15,000, has been destroyed. It was partially insured. On the 30th ult., the Boultbee Co.'s implement and general milling premises at Broadview, Assa., were gutted, at a loss of $10,000.

The Hamilton and Barton Incline Railway Company have re-elected officers as follows: John Dickenson, ex-M.P.P., president; Geo. T. Tuckett, vice-president and manager; E. W. Pope, secretary-treasurer; John M. Eastwood, S. C. Mewburn, directors. The past year has been the best in the company's history.

INDEPENDENT CASH-MUTUAL FIRE INSURANCE COMPANY.

The following is the report of the directors for the year 1904, submitted at the annual meeting held at the head office, 24 King St. West, Toronto, on 26th January, 1905.

Report.

The directors beg to present the annual report of the Independent Cash-Mutual Fire Insurance Company, setting forth the results of the first financial year of its operations, covering a period of only nine months, as we did not begin business until April, 1904. During this time we have written 3,159 policies, covering $2,910,506 of insurance, representing a premium income of $47,573.77, to which is to be added accrued interest $302.64, making our total receipts $47,876.41. Deducting cancellations and reinsurance it leaves a net income of $36,388.34.

Our total expenses of every kind, paid and incurred during the year, including organization expenses, commissions, appointment of agency staff, cost of management, books, stationery, and fire losses, amount to $28,931.79, leaving a balance of $7,456.55.

We have considered it prudent to provide for all expenses of organization in our present statement, so as to finally dispose of same. The usual custom, however, is to carry a portion forward year by year.

In view of the satisfactory financial position of the company, your directors have decided to declare a half-yearly dividend upon the paid-up capital stock at the rate of six per cent. per annum, covering the period from July 1st to December 31st, 1904. This, together with the organization expenses fully paid up, leaves a cash balance of $5,431.55, which added to unassessed premium notes, amounting to $4 598.47, gives $10,030.02 available for re-insurance reserve.

Within a very short time after beginning business, the disastrous conflagration in Toronto of April last took place, and unfortunately in it we suffered quite severely. Including this, our loss ratio was 39.7 per cent.

After a great deal of consideration the directors decided that there was a profitable field in the United States for carefully selected business in surplus line insurance. Accordingly in July last an arrangement was entered into with Messrs. P. B. Armstrong & Son, of New York, who have had many years' experience in fire insurance, to accept the agency of our company. Our United States business thus far has been very satisfactory.

We are now well represented by agents throughout Ontario, and we look forward with confidence to a steadily increasing growth of business in the future.

The auditors have maintained during the year a continuous audit of the books.

The term of office of four of our directors expires with this meeting, W. Hendrie, Jr.; D. Carlyle, J. Richards, A. Burritt, all of whom are eligible for re-election.

CHAS. C. VAN NORMAN, President.
STEPHEN NOXON, Secretary.

"The Unexpected Always Happens."

Who is there but has had brought home to him the truth of the above statement? It is always the accident that was least looked for that actually does occur. Nobody is immune from accident. Your experience and observation confirm that fact.

WISE men prepare for such emergencies by carrying an accident policy. The WISEST men see to it that that policy is an Employers' Liability Combination Policy, issued by

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policy-holders and addition to Reserve.
$53,841.18 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1 800,000.00.

Another Milestone

Has been passed in the successful history of The Canada Life Assurance Company. Ten years ago the Company issued Policy Number 60,000. Now Policy Number 100,000 has been paid for. While 60,000 policies represented the growth of 47 years, the past ten years have alone produced two-thirds as many.

In assets too, there has been a proportionate growth.

For The Canada Life.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

MONTREAL COMMERCIAL OPINION.

In his address last week before the annual meeting of the Montreal Board of Trade, the retiring president, Mr. George E. Drummond, indulged in a broad outlook. He is not a "little Canadian," nor is he afraid of the future of his country. Happy reference was that of Mr. Crathern to the importance of the representations made to influential persons and public bodies in the United Kingdom by Mr. Drummond, Mr. Hodgson, and Mr. Ames, representing the Montreal Board of Trade. The efforts of these gentlemen, Mr. Crathern truly remarked, had done great good to Canada in bringing her resources and advantages before the minds of the British people. At a dinner given in his honor on his return to Montreal, Mr. Drummond received assurances from both Mr. Borden, the leader of the Opposition in the Commons, and Mr. Prefontaine, one of the Ministers of the Government, of the value of his services on that remarkable trip. And the Board, in full meeting, passed a resolution of thanks to him.

Commenting on the vast future of Canada and the importance of her future means of inter-communication, east and west, foreseen in 1854 by Joseph Howe of Nova Scotia, with prophetic vision, Mr. Drummond dwelt upon "the improvement and extension of lines by our great railway systems, the Canadian Pacific Railway, the Grand Trunk, the Canadian Northern, and our Government roads, last but not least, the inauguration of the Grand Trunk Pacific transcontinental system, under able management, all calculated (provided we had a strong Canadian trade policy guaranteeing the building up of a home market through the safe development of our industrial enterprises and pursuits), to weld the inhabitants of our different provinces into a strong, homogeneous, self-sustaining Canadian people." Pursuing this theme he expressed the opinion that "if our railway policy, combined with the revised fiscal policy that we had been faithfully promised and confidentially awaited, would accomplish this up-building and consolidation of our people at home, a first class trans-Atlantic steamship service, helped by a mutual preferential trade arrangement, would just as certainly bind us surely and closely to our own kith and kin, our best customers and friends within the Empire." The speaker declared that Canada could have no better advertisement than fast liners plying to and from the mother country, and added, respecting the much desired fast mail service: "This service, if established, should be second to none crossing the Atlantic; and let us refrain from placing a handicap on the enterprise by seeking to bind the promoters to sail to this or that particular port. So long as the vessels come to a Canadian port we should be satisfied, and we could safely leave the selection of the port to those financially interested." He would like to see the Montreal Board take the initiative in doing away with all sectional feeling in regard to this matter.

A resolution urging special consideration of this fast line, with a view to granting the necessary subsidy therefor, was submitted by Mr. F. H. Mathewson and unanimously adopted.

Mr. Robert Meighen made a strong speech in favor of Canadian wheat being made into flour in Canada, and combated the contention of certain parties that the policy of placing an export duty on wheat was "a narrow Eastern view." He declared that an increase in the number of milling establishments in the West would be greatly in the interest of the farmer, because the purchasing of the wheat by the large and small milling companies acts as a most effective regulator of the price paid for wheat. No one, he thought, would deny that to increase the milling business in Canada, and send the raw material, wheat, out in the manufactured state, would benefit not only the farmer, but the whole Dominion. "Putting an export duty on wheat, without doubt would compel the American miller to establish his mills in Canada, instead of in Minneapolis and Duluth. This certainly would be a great benefit to our western as well as our eastern farmer. * * * Legislate in the direction of compelling the raw material to be manufactured in the Dominion. The by-product will be of immense advantage to the farmers of Eastern Canada and the whole Dominion." Mr. Meighen insisted with much earnestness that the West will not develop as it ought to, unless large milling industries are carried on in its midst. Few people properly appreciate the influence of cheap mill by-product on extensive farming, and one is scarcely possible without the other. Dairying, he pointed out, only becomes a leading industry, and in a prosperous state when the milling of by-product, at reasonable prices becomes available. "Bran and shorts enter largely into successful poultry raising, swine husbandry, cattle and sheep feeding and dairying. I do not think I am putting the case too strong when I assert that Canada's greatest need to-day is cheap feed."

* * *

LUMBER MATTERS.

The annual meeting of the Ontario Lumbermen's Association took place in Toronto last week, Mr. W. D. Lummis presiding. One of the chief subjects discussed was the unfair treatment by the railroads in the matter of demurrage. It was alleged that, owing to the uncertain supply of railway cars at shipping points there was great irregularity in forwarding cars, with the result that a number of cars from one consignor accumulate in transit, and all are placed at one time on the siding to be unloaded, the demurrage being strictly assessed without regard to the cause of accumulation. It was finally decided to join with the Canadian Manufacturers' Association to urge some method for equitable adjustment upon the Railway Commission. The election of officers resulted as follows:—President, J. B. Miller; first vice-president, Robert Watt; second vice-president, Dwight J. Turner; secretary-treasurer, W. B. Tindall; board of management, W. D. Lummis, R. Laidlaw, George Thompson, W. B. McLean, W. P. Bull, R. H. Roys, D. L. White, J. B. Miller, W. J. Ard, W. J. Sheppard, Dwight J. Turner, and Robert Watt.

Another consequence of the deliberations of the Association was the sending of a deputation to Ottawa in conjunction with one from British Columbia, to interview the Government in the matter of tariff arrangements on lumber. This deputation, which was headed by Mr. J. B. Miller, of Parry Sound; the president; Mr. W. D. Lummis, of Sarnia, the retiring president, and the executive, interviewed Sir Wilfrid Laurier, Hon. Wm. Patterson, and other members of the Government on Tuesday last.

Mr. T. F. Paterson, who presented the case from the British Columbia lumbermen's point of view, repeated their request of former years:

> That the same duty be placed upon lumber and shingles coming into Canada that people of the United States impose upon lumber going into that country. They asked that they be not singled out in the formation of the tariff, but that they be given the same chance that the other manufacturers of the country have. They felt that the farmers of Manitoba and the North-West were in a better financial position than the individual citizen of British Columbia, and were well able to bear any just share of the taxation of the country. The lumbermen also protested against being singled out as the particular industry that should be called upon to give relief to the farmers of Manitoba and the North-West, who are protected by a duty of sixty cents per barrel on flour, twenty per cent. on oatmeal, 12 cents on wheat, 10 cents on oats, horses, twenty per cent., etc. These products in which they are protected are sent to British Columbia in large quantities, while they send their money for lumber to the United States, though they cannot sell their own products there.

Mr. Paterson also pointed out that British Columbia lumbermen were obliged to buy their machinery from the United States, and that the operation of the recently enacted dumping clauses was making it more expensive to buy. He also asked that the dumping clause be put into operation against dutiable lumber coming into Canada, the prices being in some cases as much as $250 to $500 below the list price.

The Ontario lumbermen, headed by Mr. C. Beck, of Penetanguishene, made their request for a duty of two dollars per thousand on lumber.

> Mr. W. P. Bull, speaking on behalf of the Ontario Lumbermen's Association, said that, notwithstanding the reduction of from $2 to $4 in the price of the red pine, the stocks on hand are still large. As an illustration of the competition to which the Ontario lumbermen are subjected, he quoted the experience of the lumbermen in Toronto. After the recent disastrous fire in that city the builders, it is alleged, were flooded with offers from the American lumbermen to supply lumber, with the result that eighty per cent. of the lumber used in the construction of new buildings is yellow pine from the United States. Mr. Bull calculated that on the basis of the recent Ontario sale, the first cost to the lumbermen of Ontario may be placed at $5 for stumpage and $2 for annual dues, totalling $7 per thousand, and if he wants to send his lumber to the United States, he has to pay $2 per thousand additional. The cost of production is also greater in Ontario than in the United States. The American lumberman has no stumpage and no dues to pay; he gets the land in fee simple for $2 per acre and can cut the lumber when he likes, while the Ontario lumberman has to take the lumber off within fifteen years.

From the reply of the Premier, it would appear likely that the Government intends to do something in the matter as soon as the Finance Minister returns home.

Last month the Western Retail Lumber Dealers' Association held a meeting in Winnipeg, and decided to terminate their agreement with the manufacturers. This agreement was made at a time when the trade in the whole western country was in a very desperate condition, and many lumbermen, both wholesale and retail, were on the verge of collapse. It provided that manufacturers should sell to none but members of the association, except in the case of sales to the Government and the railways; also that prices should be kept at a reasonable level, a feature which affected wholesale dealers and retailers alike. It is understood, indeed, that the cause of the break-up of the association was the heavy importation of lumber from the United States. The retailers could not resist the temptation to buy this at the cheap price at which it was offered. This competition is said to have prostrated the British Columbia interests, and the manufacturers of that province had to withdraw from the association, a step which it was afterwards decided by other manufacturers to follow. The retailers as well as the wholesalers and manufacturers claim there has never been anything in the nature of a combine to keep up prices beyond a reasonable limit, and the retail dealers claim they have never enjoyed a profit in their transactions of more than 20 per cent.; besides, that it has always cost 10 per cent. or more to carry on business.

A general belief seems to exist in the Canadian West that the practical result of the breaking up of the organization will be freer competition and a cheapening of prices for the consumer's benefit, while those immediately connected with the trade declare that the business will scarcely be affected in any manner.

* * *

THE SUGAR SITUATION.

From the Sugar Trade Journal, we glean some statistical information as to the course of sugar prices during recent years. The year 1904 opened with granulated sugar fetching 4.36c. per pound, which price declined to 4.26c. per pound in February. After that, a steady movement upward continued, in advances of 5 to 10 per cent., to 5.60c. per pound. The average price of granulated for 1904 was 4.772c. per pound, against 4.638c. per pound in 1903, a gain of .134c. per pound in refined sugars, against a gain of .254c. per pound in raw sugars. The average difference between raw and refined in 1904 was .798c. per pound, against .918c. per pound in 1903, a decrease of .12c. per pound in refiners' returns for the year. In 1902 the average price of granulated was 4.455c. per pound; in 1901 it was 5.05c. per pound, and in 1900 5.32c. per pound. The average price of granulated for ten years has been 4.731c. per pound.

For the last week or two, the position of sugar in the Montreal and local markets may be described as stationary. Last week, an easier tendency developed, owing to reports from the European beet centres. This, however, apparently did not have very much effect on the New York cane sugar market, and there was no anxiety to market supplies. Another thing which kept values up was the firm feeling by Cuban holders. However, yesterday, rather as a surprise, there was a drop of 10c. on all grades, the first decline that has taken place for several months.

A feature which will be somewhat novel for Montreal is the expected arrival in that port shortly of a cargo of raw sugar direct from the Fiji Islands, for refining purposes. Some sugar has come from that part of the world into the Dominion before, but it has hitherto always come by way of Vancouver. On this occasion, the cargo will come to New York and will be transferred by rail to Montreal.

* * *

CANADA PERMANENT MORTGAGE CORPORATION.

This important financial concern has assets of twenty-four millions, mainly in mortgage loans, and earned, net, last year, $537,193. Adding to this sum the $133,822 brought forward from 1903, there was a total of $671,015 to be dealt with; enabling the payment of six per cent. dividend, the addition of a quarter million to rest, and the carrying forward of $63,934 at credit of profit and loss. The corporation has within a fraction of six millions paid capital, and more than two millions of accumulated profits. It has borrowed from the public some $13,000,000 on debentures, and more than $2,500,000 in the shape of deposits: against which it holds $2,215,000 in liquid assets. This brief summary of its resources and earning power will suffice to show the nature and extent of this, the largest Canadian mortgage lending company.

The president in his address commented on the growth of the company's business during the year just past. It is shown that of the total assets the properties in default and held for sale amount in value to only $20,000. And whatever losses were sustained during several years have been paid out of the current revenue of each year. This is a remarkably favorable condition of affairs, and affords good ground for congratulation in this "the Jubilee Year of the Canada Permanent." The president is, we think, justified in the claim that "We present on our Fiftieth Anniversary one of the best statements we have ever had." And he also declares that "in respect of the extent of its business, its revenue earning power, and the uniformly prosperous position it has invariably maintained, it stands unrivalled in the history of Canadian land mortgage companies."

Mr. W. H. Beatty, the vice-president, made a condensed statement of the position and business of the corporation at the present time compared with the date, now some five years ago, when the amalgamation was effected of the four companies which went to form the present extensive concern. No one can deny that its progress has been very marked; and the existing agreeable condition of affairs, the activity of business throughout the country, causes that officer to say:—"The prosperity of the whole Dominion never was as great as it has been during the past year, and I would like to say here that there is no country, let it be where it will, that the sun shines on, in which the general well-being of the people is as good as it is in Canada, and particularly in the Provinces of Ontario and Manitoba. No poor, no distress, and every man willing to work can get employment and at remunerative wages." Before he closed his remarks, Mr. Beatty made, with a warmth that was happily superior to the conventional commonplaces usual on such occasions, reference to another record which the company established in its Jubilee Year. He expressed it as one which no company of any kind, banking, financial, commercial or otherwise, could point to. "Mr. J. Herbert Mason entered the service of the company at its inception, now fifty years ago, he has held a controlling position ever since then, and to-day he has the well-deserved reputation of being beyond all question the most successful and the most sagacious loan company's manager that has ever been in Canada."

* * *

MISMANAGEMENT IN LIFE ASSURANCE.

Perhaps one of the most deplorable instances of mismanagement in life assurance in the United States is that revealed by the examination of the New York Insurance Department of the condition of the Washington Life Insurance Company, an institution organized 45 years ago. The difficulties are easily traceable to incompetent management. The New York "Chronicle" puts it in this way:—

"The faults of financial management have been glaring. In order that this work should have been properly done, it was merely necessary that there should not be graft, and that care should be taken that the investments were safe. There is no possible excuse for the failure to make candid and honest reports to the Department. Such reports would have undoubtedly shown at any time within the last two years, at least, that the capital was impaired or entirely wiped out; but they should have been made. The same want of courage and rectitude on the part of the officers of the company is apparent, in the chronic excess of expenditures over the provisions therefor."

As a result of the disclosures, the president of the company, William A. Brewer, Jr., his son G. H. Brewer, secretary; C. Munn, vice-president, and Dr. J. W. Brannan, medical director, together with eight directors, tendered their resignations.

The Mutual Life Insurance Company of New York appears to be interested in the future of the Washington Life, and it is stated that:—

"Interests identified with the Mutual Life of New York, believing that the welfare of life insurance as a whole will be advanced if this company could be preserved for future usefulness, arranged for its control and future direction, with John Tatlock, assistant actuary of the Mutual Life, as president."

The Mutual Life of New York is to be congratulated in having stepped into the serious breach, and in having arranged that the president of the company hereafter, and the direction of its affairs, shall be in the hands of a skilled underwriter. The "Journal of Insurance Economics" in this connection states:—

"The president of the company, John Tatlock, is an underwriter whose qualifications for the work assigned him can hardly be over-estimated. His skill both in the scientific and practical aspects of the business is widely recognized. He has served the Actuarial Society of America in many official capacities. His insurance and diplomatic services to the Mutual Life have commanded attention, while impartial observers have not hesitated to predict for Mr. Tatlock future eminence in his profession."

There is, perhaps, no business which demands the expert skill essential for success in the same degree as life assurance. Failures and disappointments in life assurance can easily be traced to incompetent managerial control. The ideal system of life assurance management would appear to be that which attains in Great Britain, where generally the manager and controlling officer is a skilled and trained actuary. It necessarily follows, in such an intricate business as life assurance, that constant and serious errors will be committed by those in charge who have not had the necessary experience and skill. Apparently those directing the reorganization of the Washington Life recognize this, by appointing Mr. Tatlock as the chief executive officer.

* * *

JANUARY FIRE WASTE.

The loss through fires in Canada and the United States during the month of January, according to a compilation made by the New York Journal of Commerce and Commercial Bulletin was $16,378,100, compared with $21,790,200 for the same month last year, and with $13,166,350 for January, 1903. The following table shows the losses for the past two years:—

	1903.	1904.	1905.
January	$13,166,350	$21,790,200	$16,378,100
February	16,090,800	90,051,000	....
March	9,907,650	11,212,150	....
April	13,549,000	23,623,000	....
May	16,366,800	15,221,400	....
June	14,684,350	10,646,700	....
July	12,838,600	11,923,200	....
August	8,428,350	9,715,200	....
September	9,939,450	14,387,650	....
October	10,409,800	12,866,200	....
November	13,589,550	11,515,000	....
December	17,224,700	19,422,350	....
Total	$156,195,600	$252,364,050	$16,378,100

Our contemporary remarks that the fires this year have, to more than a usual extent, occurred in properties fully covered by insurance, so that underwriters have had particular cause for complaint. The terrible months of January, February, and April, of 1904, swept away eighty or ninety millions more than an average of those three months.

* * *

—It was no doubt welcome news to the people of the Pacific Coast that the Dominion Government had last week made a grant of fifty thousand dollars towards a Dominion Exhibition, to be held this year at New Westminster, B.C. And it will please many people in the East of Canada who acknowledge that other provinces than Manitoba and Ontario should have their turn at Government favors. There are conditions attached to the grant, similar if not identical with those made in the cases of Winnipeg and Toronto; one of which was that part of the money given shall be expended in paying freight on exhibits from other provinces. It is expected that New Westminster will make strong efforts to have the fair, which is to open probably about 1st October, a really good one. It is understood that a stock circuit will be arranged with the Lewis & Clark Exposition, to be held 1st June to 15th October, at Portland, Oregon. This last-named event will celebrate, as we have already stated, the exploration of the Oregon country, 1804 to 1806.

* * *

—Some ten days ago, one of the C.P.R. liners, the steamship "Empress of Japan" sailed from Vancouver for Hong Kong with a somewhat varied and interesting cargo. She carried, for example, 4,000 sacks of Canadian flour consigned to Japanese ports. There is ground for the statement, made by a western journal, that the exportation of Canadian flour to Japan will hereafter be larger than hitherto, and that large consignments will be taken out by each departing Oriental liner. The same steamship carried cotton, but very little of it was Canadian. It was American cotton for Shanghai. She took out about a ton of Canadian butter consigned to Japanese and Chinese ports. This was made in the vicinity of Calgary. An interesting shipment which went into the strong box of the Japan was one and a quarter ton of silver bullion from the Trail smelter in British Columbia, destined for Shanghai, where it will be minted into currency. The bullion was shipped in the form of bars.

* * *

OUR HALIFAX LETTER.

Mr. John Howard is Nova Scotia's efficient agent-general in London, and his services are none the less valuable in that they are rendered free, the only expense to the Government of the Province being a small outlay to cover office expenses. This gentleman has recently been on a visit to Canada, and before his departure was given a dinner by the Halifax Board of Trade. In the course of the public speaking which followed the dinner, Premier George H. Murray, after referring to the advancement which the Province has made in recent years, announced that for the first time in the history of the Province there is now under consideration an immigration policy, and discussed the advisability of such a move. The question, he thought, should be considered apart from politics. He proposed that the Board of Trade should work with the Provincial Government in the matter, and asked the Board to appoint a strong committee to co-operate with them in framing a policy, and to bring pressure to bear on the Federal authorities.

The suggestion was spoken upon by others present, and the sentiment was all in favor of such a move. The Board of Trade will follow up the suggestion and appoint a committee.

The idea, it must be understood, is not to attempt the encouragement of immigration on any large scale. There is only a certain class of farmers which would be suitable for this Province, or who would be likely to prosper here. This is the small tenant farmers of Great Britain; proprietors who thoroughly understand farming, and who have preferably a capital of one or two thousand pounds. They would of course, have to buy improved land, which in this case means, more properly, land which has suffered from neglect and the lack of improvement. There are scattered over the Province a considerable number of farms, either abandoned or poorly worked, which it is hoped might be profitably operated by the capital and well-known thrift, diligence and skill of the British tenant farmers. These farms have been neglected through various causes: the migration of the sons to the cities or to the United States, the "shiftlessness" of the occupiers, or their lack of skill, and the depression which existed in the farming pursuit until within the past few years being among the principal ones. Farming in the Maritime Provinces to-day is on a better footing than it has been, but except in rare instances it is not followed up to its full capabilities, and has not proved attractive to the rising generation. There is no one district of any considerable extent where these farms are to be found, but nearly every district has one or more of them. The success of the project will depend on careful deliberation and preparation before it is advertised. Many of the farms are "run out," and would require several years of careful cultivation. Unless the British farmer were made fully acquainted with the conditions the result might be disastrous. Many of the farms would certainly be excellently adapted for sheep raising, which would also be an excellent means for bringing them back into condition again. The scheme is attracting a great deal of interest.

The Halifax Board of Trade held its annual meeting last week, and a report was presented of the work done during the past year. The showing is by far the best in the history of the board. The interest was great, the rooms being crowded beyond their capacity. A year ago a special committee was formed to devise means of creating a greater interest in the work of the board, and a "Forward Movement" was inaugurated, as you have been advised. This committee undertook to enlarge the membership of the board and strengthen its finances. Its success may be gauged by the fact that the membership has increased over 50%, and the board has a credit balance in its finances of over seven hundred dollars. Subscriptions were solicited; kindred bodies, such as the Tourist Association and the Retail Merchants' Association, were amalgamated with the board, and a new and efficient secretary appointed. The achievements of the board during the year can only be briefly touched on, but they were notable when viewed from a Provincial standpoint. They have pushed the tourist work vigorously; paved the way for the shipbuilding yard; worked hard and hopefully for better insurance rates; and procured many advantages for the trade of the city which have been referred to from time to time in this correspondence.

The Committee on Reduced Rates for Fire Insurance in Halifax presented its report to the Board of Trade a few days ago, and it was to the effect that they have found it troublesome to make much headway with the underwriters. The latter have decided to re-rate the risks on a new basis. The result will be to leave the rates practically as they are at present, but that each risk will be charged according to certain well-defined rules, and in such a way that insurers could ascertain the reasons for any change of rate. If certain improvements are made in the water and fire protection services reduction of from one-half to three-quarters of one per cent. will be made in the rates. The improvements suggested will be made.

Halifax, 6th February, 1905.

ANNAPOLIS ROYAL BOARD OF TRADE.

The annual meeting of the Annapolis Royal Board of Trade was held in that Nova Scotia town last month. The president, Mr. F. C. Whitman, delivered his annual address. He referred to the amendment to the Act for the protection of forest fires. "There is now a well established body of men under the supervision of chief fire rangers in Western Nova Scotia; and the loss by forest fires this past year has practically been nil, as compared with an actual loss in our County of Annapolis in the previous year of $150,000, and proportionate losses in other counties. There is to-day a marked increase in the values of timber land, part as least caused by the better protection now afforded." The port shows for 1904, he said, a larger export than in any previous year in quantity and value. New wharves and larger piling grounds have been provided. Another matter suggested by this board in 1903 was the preservation of the shore fisheries from the ravages of the dogfish shark. The Dominion Government has provided a sum of $25,000 to adopt means of extermination of this pest. And the board works, as it has done in the past, towards the preservation of historic grounds in the province—a praiseworthy object. The chairman also mentioned the celebration of the ter-centenary of Annapolis, last June, a pleasing event, to which we referred at the time. It was Mr. E. D. Arnaud and Mr. F. Leavitt, who suggested this celebration, and planned the carrying out of the programme under the auspices of the Nova Scotia Historical Society.

It is expected that the Fruit Growers' Association of the province, and also the Annapolis County Fruit Exhibition, will be held this year in the pretty town, and the citizens are expected to welcome these gatherings as no doubt they will. The election of officers being next proceeded with, the following were elected: President, F. C. Whitman; vice-president, A. D. Mills; secretary and treasurer, A. E. Atlee. Members of Council: A. M. King, E. D. Arnaud, H. A. West, W. J. Shannon, J. M. Owen, S. Riordan, H. R. McKay, F. W. Harris.

Mr. Atlee pointed out that the rates of exchange on cheques in the Maritime Provinces are excessive, particularly on amounts up to thirty dollars. On motion, a resolution was adopted, a copy of which was sent to the Clearing Houses at Halifax and St. John, embodying the view that the rate should be reduced to "a basis at least equal to that charged by express companies for transmitting similar amounts." The next item is of interest. The town council passed the following resolution: "That this council, believing that the Board of Trade being a representative body of the citizens of the town, ask the members of the Board of Trade to select suitable candidates for nomination for mayor and councillors, who will serve for the coming term." This duty the board will undertake.

* * *

KING'S COUNTY BOARD OF TRADE.

The tenth annual meeting of the King's County Board of Trade was held on the 24th ult., at Kentville, N.S. The attendance was large and representative, and the topics discussed local and general questions of interest to the citizens of the county. The election of officers for the ensuing year resulted as follows: President, C. O. Allen; vice-president, Joseph Kinsman; secretary-treasurer, J. H. Cox, Cambridge. Council: J. W. Hubbard, E. A. Lewis, John Donaldson, J. Everett Kinsman, George McLean, E. S. Congdon, A. N. Griffin, Ainslee Bishop, Frank Gertridge, A. Bowser, W. C. Hamilton, H. D. Woodbury, W. W. Pineo, A. MacMahon, S. C. Parker, James Bryden, J. W. Ryan, R. S. Eaton, R. W. Starr, F. Porter.

* * *

CALGARY BOARD OF TRADE.

The annual meeting of the Board of Trade for Calgary, Alta., took place on the 31st ult., with a large attendance of members. Mr. Cushing, the retiring president, in the annual report, spoke of the great increases in the insurance rates in the West, and said that it seemed as though the companies were forcing the West to pay for the fire losses in the East, an unfortunate expression, quite opposed to the true conception of fire insurance averages. He suggested, also, that one of the things that the new province be called upon to undertake would be to establish insurance for different parts of the province something on the line of hail insurance, now in force in the Territories. The following officers were elected: President, R. J. Hutchings; vice-president, A. E. Cross. Councillors: C. W. Rowley, D. J. Young, J. S. Dennis, F. MacBeth, R. R. Jamieson, Colonel Porter, Mr. Watson, J. R. Janes, F. F. Higgs, Dan Cashman, C. F. Comer, C. W. Bowles, J. R. Miquelon, Dr. Stewart, Mr. Hanna, M. S. McCarthy, M.P., J. J. Young, W. M. Davidson, H. Neilson, and Mr. Morris.

* * *

THE MANUFACTURERS LIFE.

It is to be remarked that the mortality experienced among insurants in the Manufacturers Life was extremely light, for the Hm. Table being taken as the standard, only 61.5 per cent. of the expectation were returned as death losses. This betokens careful selection of risks, even if allowance be made for light mortality among lives fresh from the doctors' hands. We have not this year the figures of the company's Temperance Section, but a year ago it was shown that the experience of mortality was 34.4 per cent. less in the Abstainers' Section than in the General Section of the company's risks. In the Old Country there is controversy as to whether the results claimed by the Temperance and General Life Company, of light mortality among abstainers, can be taken as established, over a long period. But the figures of the Manufacturers Life do not seem to leave any doubt on this point, which indicates larger dividends for abstainers.

A specially interesting feature of the report for 1904 is the reduction in the ratio of expense in conducting the company. This amounted to 1.25 per cent. There is besides a considerable increase in surplus on policyholders' account, as well as in payments to policyholders. The new assurances of the year exceeded seven millions of dollars, and the aggregate of assurance in force is now $37,668,000, a great increase over the modest $9,555,000 of ten years ago. It included, however, between nine and ten millions of business taken over from the Temperance and General in 1901. The proportions which the company's business has reached in recent years, while in part a reflection of the growth of the country in prosperity and thrift, must also be attributable to the arrangements of the head office and the industrious efforts of the agents in the field. The Manufacturers is a live company, with a deserved reputation for enterprise and growth.

* * *

MONTREAL BOARD OF TRADE.

In the brief account we gave last week of the annual meeting of the Montreal Board of Trade, the list of officers got what the printers call "off its feet" (a sort of typographical gymnastic that sometimes bothers the editorial staff of journals), and a line of type was left out, which temporarily deprived a gentleman of merited honor. Mr. F. H. Mathewson, who was elected first vice-president, was unfortunately not mentioned at all. We now give the full list of officers for 1905:

President—Mr. W. I. Gear (acclamation).

First Vice-president—Mr. F. H. Mathewson, (acclamation).

Second Vice-president—Mr. R. M. Ballantyne (acclamation).

Treasurer—Mr. James Thom (acclamation).

Members of Council—Messrs. Andrew A. Allan, Geo. Caverhill, C. B. Esdaile, Albert Hebert, Leslie H. Gault, Harry A. Hodgson, Peter Lyall, Donald Munro, J. J. McGill, Edward C. Pratt, Alexander Ramsay, and G. F. C. Smith.

Mr. F. W. Thompson was elected a member of council to represent the flour-milling trade; but learning after the ballot papers had been issued that he had not attended the number of meetings of council required to qualify for re-election, he would not consent to take his seat on the council board.

* * *

MONTREAL CORN EXCHANGE.

The Montreal Corn Exchange has elected officers as follows: President, Mr. Norman Wright; treasurer, Mr. Joseph Quintal. Committee of Management—Messrs. D. Mahaffy, E. S. Jacques, A. E. Labelle, R. W. Reford, William Carruthers, M. A. Overend and Edgar Judge. Board of Review—Messrs. Thomas A. Crane, chairman; Edgar Judge, C. B. Esdaile, James Carruthers, G. M. Kinghorn and J. B. McLea. The question of the Government adopting measures for the establishment of a new steamship service to the West Indies, in connection with which a resolution was adopted in December, was referred to the incoming Committee of Management, as was also the request that, should a steamship line be subsidized between Canada and Mexico, the vessels have a Cuban port of call. Mr. Alex. McFee, the Association's representative on the Harbor Board, delivered his annual report.

* * *

THE EQUITY FIRE INSURANCE COMPANY.

This company has made public a lengthy report of its business for 1904, submitted at the seventh annual meeting, held last week. It is very cheery in tone. "Out of the nettle, Danger," the directors profess to have "extracted the flower, Safety," as Hotspur valiantly and poetically has it. They congratulate the shareholders on the income secured in the last eight months, which "so largely redeemed the position impaired during the first four months of the year." The meaning of which is that out of $165,290 net fire losses during the year $50,000 is understood to have been by the Toronto conflagration and some $20,000 at Fernie. Another subject of self-gratulation is that "the cash assets ($184,624) exceed the Government requirement ($128,848) for reserve by $56,475." Upon looking to see what these "cash assets" are, we find $23,976 of them represented by bills receivable (are these shareholders' notes for the call?) and $27,574 in outstanding premiums. Here, then, is $51,550 of so-called cash assets which would not be admitted as such by either the New York or the Connecticut departments of insurance.

An item among the assets reminds us that they made a call of 20 per cent. "following the recommendation of the Dominion Government Insurance Department," and we are pleased to see that they acknowledge the receipt of nearly 95 per cent. of it. They paid up their losses, like bricks, all but $5,945, and this done they felt so chirpy that they declared a dividend of six per cent. ($3,000) upon the original ten per cent. capital of the company. And they further felt encouraged to launch into the very risky field of writing surplus lines in the United States. Of course, they are entitled to take comfort out of the increase of gross premium by $122,560 over those of 1903; no doubt much of this comes from that very American business. But it is hardly becoming, considering the character of some of their cash assets, and the nature of their liability in the United States, to boast too much, as one of their final paragraphs does, of "the accumulated reserve, over and above capital, of $34.621."

The president, at any rate, is by no means so boastful in tone in his speech as the report. It may be because he is Scotch, and, therefore, cautious. His address, as reported in the Mail of February 1st, makes him say:

"True we fall considerably short of having enough money over and above our capital to make the Government standard of reserve."

Which is a widely different story from that of Mr. Greenwood Brown, or whoever wrote the report, for that document shouts braggingly that:

"The cash assets of the company exceed the Government requirement for reserve by $56,475."

If there is not a discrepancy here we do not understand English. But one may hardly dare to say that while Mr. Crawford frankly admits the non-liquid character of some of the assets, Mr. Brown has not the courage to do so. Mr. Brown might be angry. What the president says as to public carelessness and the moral hazard in their effect upon the annual fire-waste is well said; and his views upon the necessity for adequate rates of fire insurance are equally sensible. But we cannot agree with him in his lame paragraph justifying the dividend paid. Hopefulness and hurrahing do not build up insurance reserves; and the close of a conflagration year, when calls upon shareholders have to be made, is no time for distributing dividends. There is something very engaging, however, in the manner in which he alludes to the shareholder "who knows that he has been hit and has paid up an additional amount on his holdings." "This to him is either a loss or it is a larger investment; and it is interesting to him to know what the prospects are in either case." We regret not to have seen a report of Mr. Van Norman's address, the vice-president. He is a plucky man, with some practical ideas and an evident desire to learn fire underwriting. That he is learning it through tribulation is, let us hope, his misfortune rather than his fault.

* * *

HALIFAX BOARD OF TRADE.

The annual meeting of the Halifax Board of Trade has been held. The attendance was unusually large and the proceedings were watched with much interest. The report presented summarized the efforts and achievements of the Board in 1904, as is referred to in our Halifax correspondence.

The retiring secretary of the board, Mr. Creed, who has served for forty-three years, was presented with a handsome sum and given many expressions of thanks and good-will.

The new officers were elected by ballot as follows: President, James Hall; first vice-president, A. M. Bell; second vice-president, Geo. E. Faulkner; auditors, L. K. Payzant, W. A. Major. Council—Geo. S. Campbell, W. J. Clayton, L. J. Mylins, O. E. Smith, I. C. Stewart, J. E. DeWolfe, A. McKinlay, J. P. Cox, H. L. Chipman.

Subsequently this council met and completed organization by electing representatives from the various lines of activity the board represents. The personnel of the Executive and council is now as follows: James Hall, A. M. Bell, G. E. Faulkner, A. T. Weldon, G. S. Campbell, W. J. Clayton, H. L. Chipman, I. C. Stewart, O. E. Smith, H. A. Flemming, Alex. Stephen, O. H. Mitchell, L. J. Mylius, Alex. McNeill, J. P. Cox, A. McKinlay, James Billman, S. D. Boak, T. S. Bowser.

* * *

BANKING AND FINANCIAL ITEMS.

Mr. W. S. Becker, formerly chief accountant of the Hudson's Bay Company, Winnipeg, has been appointed manager for the Province of Manitoba, and the North-West Territories, of the Royal Trust Company.

Another branch of the Canadian Bank of Commerce has been opened at Melfort, Saskachewan, with Mr. E. R. Jarvis as acting manager. This makes, we are told, the 107th branch of this bank in Canada.

It has been decided, says the Gazette, to demolish the Stanley Hall, in Montreal, about May 15th next, to make place for the Molsons Bank branch, which will occupy the corner of Stanley and St. Catherine streets in that city.

The head office of the Bank of Toronto, corner of Wellington and Church streets, is being remodelled. New counters and grille work are being put in which, when completed, will very much enhance the appearance of the office. Quarter-cut oak will be used for the counters, while the grille work and cages, of which there are eight, will be in one of the latest designs, and of oxidized copper finish.

The Montreal Gazette understands that the Eastern Townships Bank is taking over the business of the Molsons Bank at Acton, in the Province of Quebec. Also that Mr. N. H. Slack, lately returned from the Grand Forks, B.C., branch, has been appointed manager at Acton Other offices of the bank being opened since 1st February are at Waterloo, under the management of Mr. J. Telfer Thomas, late of the Richmond branch, and one at Hemmingford, under the charge of Mr. P. H. M. Somerville, formerly of the Huntingdon branch.

The Merchants Bank of P. E. Island has made net profits of $57,894.71 in the calendar year 1904, and after paying eight per cent. dividend has added $30,000 to the Rest. This fund is now $296,000, with a paid capital of $344,073. Deposits are $1,112,301 and circulation $291,908. This is doing well in what was not a particularly prosperous year for the Island. We see that Mr. W. A. Weeks has been elected president of the bank to succeed Benjamin Heartz, recently deceased. And since receipt of the annual statement, we have heard that Mr. Heartz's son, Frank R. Heartz, becomes vice-president of the bank, vice L. L. Beers, retired owing to ill-health. The other directors are Arthur Peters and J. S. Hinton. Mr. J. M. Davison continues to be cashier.

As a pleasing sequel to the annual meeting of the Canada Permanent Mortgage Corporation, a supper party was given by the managing director of that company, Mr. J. Herbert Mason, to his staff at the King Edward Hotel, Toronto, yesterday evening. On that occasion a presentation was made to that gentleman in commemoration of the jubilee of the company. It consisted of a solid silver old-fashioned punch-bowl and ladle, bearing the following inscription:

Presented by his friends of the Canada Permanent Mortgage Corporation to

J. Herbert Mason, Esquire, of Ermeleigh.
A wise financier.
A good citizen.
A gentleman.

Toronto, 9th February, 1905.

* * *

A SUCCESSFUL CONVENTION.

One of the most enthusiastic conventions held by any large company in Toronto for some time was that of the Manufacturers Life agents on the 2nd and 3rd of February. The company should reap a rich reward from the enthusiasm generated among the field force on this occasion. The event celebrated was the completion of ten years of management by Mr. J. F. Junkin. At the banquet on the evening of the 2nd, the agents took occasion to express their appreciation of the good work done for the company by Mr. Junkin during the time he has been in his present position by presenting him with a solid silver tea service. The presentation was made on behalf of the agents of Canada and Michigan by Mr. J. Burbank, of Brantford, who referred in warm terms to the success of Mr. Junkin, and the pleasant relations existing between the management and the field-force.

The presentation proved to be a complete surprise for Mr. Junkin. In thanking the staff for the beautiful gift, he attributed a large part of the success of the company to the efforts of the field force. Year by year, he said, his work was becoming more pleasant, and he was more and more encouraged by the ample support given him by every one associated with him in the company. He believed that no more loyal staff existed in Canada.

The business meeting of the convention took place on Friday, February 3rd, when there was a full discussion of many points of importance to agents. Plans were developed for improving the work during the coming year, and all went away fully determined to make 1905 the greatest year the Manufacturers Life has ever known.

* * *

INSURANCE MATTERS.

Casualty companies find it takes a good deal of their time to keep up with modern accident hazards. For instance, one company, with an experience with over 20,000 travelling men, claims that ten per cent. of its losses during the past year were due to automobiles; and that an increasingly large per cent. was due to electric and interurban railways.

The Boston Transcript publishes a latter-day interview between Aunt Jane and her niece, Carrie, into which a life assurance story is worked. Thus: Aunt Jane—Did Mr. Sweeser propose last evening? Carrie—Yes, and I'm going to take out a policy for $1.000 Aunt Jane—For mercy's sake, what do you mean? Carrie—Well, you see, he began to make love to me, but the chance to get a new applicant was so strong he couldn't resist. He's a life insurance solicitor, you know.

There is something for members of fraternal societies to bear in mind in the recent decision of an Ottawa judge. This declares that they are liable to their fellow-members for everything that may be levied upon them until their names are formally removed from the roll. Although he may intend to resign from the order, and verbally says so, he is yet responsible for dues and assessments accrued or levied during his suspension, which was the result of his failing to meet the calls made upon him.

The experience of the Travelers Insurance Company extends over forty-one years. In that time it has paid 432,600 accident claims, and has distributed over $34,000,000 to accident policyholders. The statistics of its accident experience show the causes of accident to which all men are exposed without regard to their employment: Accidents to pedestrians, 24.14 per cent.; at home (indoors) 18.80; horses and vehicles, 18.16; at home (outside), 15.98; recreation, 6.15. Accidents to railway travellers amount to less than five (4.77) per cent.; and the percentage of bicycle accidents is only a trifle over four, which is remarkable, one must think.

A consideration which is worthy to be reflected upon is put into words in a recent issue of the Weekly Statement. It is to this effect: Though the aggregate of insurance on human lives is great, it is not half what it should be. "Many millions of insurable lives are without any insurance protection whatever, and most men carry less insurance than they should. The man with an income of $2,000, for example, is too apt to think that he has done his whole duty when he takes out a $5,000 policy, without considering that the interest on that amount would be a pitifully inadequate provision for his family should death rob them of his support. The money paid for life insurance premiums is not spent, but invested, and every man should thus invest as large a proportion of his income as he can spare."

Upon enquiry, we learn that there is absolutely no foundation for the following statement, contained in the "Life Insurance Independent," so far as the Canadian Life Insurance Officers' Association is concerned:

> A new accession to the ranks of insurance journalism is the Magazine of Insurance, of Montreal, Canada. It appears, in response to a call of the Canadian Life Managers' Association, a few days ago, for a "new and independent journal," a demand which until now has not been supplied.

The Canadian Life Insurance Officers' Association, we are informed, has no official organ, nor is it contemplated that it shall have one. It is altogether likely that if the association proposed to have a publication, it would be after the style of the Bankers' Journal, and the editing and publishing of it would be placed in the hands of competent and experienced members of the association.

FIRE AND MARINE INSURANCE.

Hospital Nurse: "These new patent fire escapes are great blessings." Hospital Doctor: "Indeed they are. It is much easier to cure fractures than burns."

The New Yorker describes a conversation, after a fire, as follows: "Yes," said the fireman, "there were two men in the building playing chess, and one of them is in the ruins yet. We couldn't get him out." "Why, how was that?" said the other. "He insisted that it wasn't his move."

One more illustration of the beauties of municipal fire insurance is shown in the performances of the city fathers of Minneapolis. They shouted for a reduction of rates and all kinds of things; in fact, they had already got some kind of favored nation clause. Then a big fire came along and burned up most of the place. It was ever thus. By the way, there is also a place called Spokane, where the mayor threatened the insurance companies if they did not remove what was called the pink slips. We believe there was a fire in Spokane some time ago. But all that is forgotten now, and it is another story.—London (Eng.) Review.

Mr. R. W. Elliot, the Toronto chemist, writes to the Monetary Times to say that he has read the Ohio Fire Marshal's report in our columns with interest, and sympathizes with much that official says as to causes of fire. He remarks, however, that Mr. Davis, in writing about spontaneous combustion "classes olive oil as dangerous, which is incorrect, for when pure, it is the safest of vegetable oils. Animal fats are safe, as tallow, mutton, suet, lard, seal, whale, cod, and other fish oils. Fruit oils, as olive, palm, cocoanut, and peanut, are safe. Seed oils are generally unsafe, linseed oil being the worst, followed by cotton seed, sesame, sunflower seed oils, probably corn oil. Olive oil is often adulterated with cotton seed oil, and that would make it less safe."

METROPOLITAN FIRE.

The experience of this company for 1904 illustrates what should constantly be in the minds of company managers—the chance of adverse seasons. It should be one of the aims of all authorities of a fire underwriting company to prepare, year by year, for adversity. Scarcely any one dreamed of the $12,000,000 conflagration in Toronto in April last, but it came. So may another come, here or elsewhere: and those who put their money or their names into insurance company ventures, should not be unaware of their responsibility. It is pleasing to hear of prompt settlement by this company of losses, and it is further satisfactory to know that its gross income from Canadian business has risen from $67,940 in the year 1903 to $80,167 last year. Still we should have preferred to hear that it had not been seduced into writing surplus lines in the United States. That is a precarious business, which only old and strong companies should dare venture.

CONTINENTAL LIFE.

This company submits its report for the past year, and shows an increase in transactions and a low rate of mortality. There is an increase in policies issued and assurance in force, a handsome increase in premium and interest income, an increase in total assets and in reserves—all gratifying features. The amount of insurance in force is now more than four millions. It is satisfactory to learn also that the ratio of expense to premium income is lessened, a very desirable thing; if we remember aright a decreased ratio in this respect was shown last year. The death losses were only $15,750, which is less than the expectancy. Mortgages, debentures, bonds, etc., are held to the extent of $327,000, of which the directors are able to say that only $28 interest was in arrears at end of year. There are other assets, of a less substantial kind, amounting to $80,000, and there is a surplus on policyholders' account, after calculating liabilities on the Dominion Government standard. The Continental has good prospects.

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, February 9th, 1905, as compared with those of the previous week:

	Feb. 9.	Feb. 2.

The Manufacturers Life Insurance Company.

Eighteenth Annual Report.

The Manufacturers Life held its Annual Meeting on Thursday, February 2nd, 1905. A detailed statement of the Report made will be mailed to all Policyholders, or can be had on application at the Head Office.

The year ending December 31st, 1904, was very successful in every particular. Some of the most notable and satisfactory features were the continued decrease in the ratio of expense, when compared with either premium income or total income, the large increase in surplus, and the extremely favorable mortality experienced.

The following table shows the growth during 1904:

Year.	Total Income.	Assets.	Reserves.	Surplus on Policyholders Account.	Insurance in Force.
1903	$1,435,288.58	$5,136,668.52	$4,461,800.00	$621,265.47	$34,392,303
1904	1,659,107.70	6,112,344.57	5,255,077.00	771,869.12	37,668,468
Increase	$ 223,819.12	$ 975,676.05	$ 793,277.00	$150,603.65	$ 3,276,165

This being the tenth report presented under the present management, the following figures are interesting as showing the remarkable progress made by the Company during that period.

	1894.	1904.	INCREASE.
Net Premium Income..........	$ 267,410.74	$ 1,421,347.82	$ 1,153,937.08
Total Income	296,468.31	1,659,107.70	1,362,639.39
Payment to Policyholders	50,069.46	339,691.26	289,621.80
Assets	821,320.88	6,112,344.57	5,291,023.69
Policy Reserves	628,429.00	5,255,077.00	4,626,648.00
Net Surplus	50,309.82	471,869.12	421,559.30
New Assurances	2,710,755.00	7,107,148.00	4,396,393.00
Assurances in Force	9,555,300.00	37,668,468.00	28,113,168.00

In calculating the expected death losses for the year, the Healthy Males Mortality Table of the Institute of Actuaries was taken as the standard for the whole business of the Company; but allowance was made for the light mortality which is expected in the first few years following the medical selection of the lives. Even on this stringent basis the total actual losses were only 61.5 per cent. of the expected.

This is in accordance with the experience of previous years, and bears out the reputation which the Company has for maintaining a high standard in accepting applicants for insurance.

The Manufacturers is a good Company for good risks.

The following directors were elected:—Hon. G. W. Ross, President; Lt. Col. H. M. Pellatt, and Lloyd Harris, Vice-Presidents; J. F. Junkin, Managing Director; Robert Junkin, Assistant Manager; Robert Archer, A. P. Barnhill, S. G, Bealty, C. C. Dalton, D. B. Hanna, Hon. V. W. La Rue, E. J. Lennox, Wm. Mackenzie, D. D. Mann, Lt. Col. James Mason, R. J. McLaughlin, K. C., R. R. McLennan, James Mills, LL. D.; Hon. J. Ald. Ouimet, R. L. Patterson, Hon. J. D. Rolland, William Strachan, A. J Wilkes, K. C.

NEEPAWA BOARD OF TRADE.

This Manitoba town has the advantage of two railroads, the north-western branch of the C.P.R. and the Mackenzie and Mann road. Besides, it aims to have the main line of the Grand Trunk Pacific run through it. It has some 2,500 inhabitants, and expects to have 3,000 before Christmas. Therefore, it must be a pretty live town. The Neepawa Board of Trade held its meeting some days ago, and the president, Mr. G. M. Gibbs, made a somewhat lengthy address. He referred to the discussion of municipal matters by the board, and noted that two handsome hotels, costing from $30,000 to $40,000 each, would be finished in March. He also gave the hotelkeepers of the place some sensible advice as to their untenable position towards the law in violating its regulations. The town has reason to expect a new C.P.R. station, which is needed.

Mr. Gibbs has some suggestions to farmers also with respect to their methods of cultivation and the character of their cattle. Neepawa has a good electric light system, a new fire engine and a good fire brigade, while in "proportion to population we have a larger number of telephones than any place on this continent." A hearty vote of thanks was tendered Mr. Gibbs for his labors during the year, and the presentation of such a well-prepared report. He was also honored with unanimous re-election as president. The other office-bearers are: J. H. Irwin, vice-president; M. H. Fieldhouse, secretary-treasurer, and a council composed of J. A. Clare, J, J. Hamilton, S. Benson, Geo. Hamilton, Geo. Foerster, Wm. Howatt, J. Brown, Fred Leach.

⁂

REGINA BOARD OF TRADE.

The annual meeting was held on 26th January, the president, Mr. H. F. Mytton, in the chair, and some thirty members present. The report of the Council was read by the secretary, Mr. J. Kelso Hunter. It referred to the unusual prosperity of the town during 1904. In that year the water works system was built, and Regina has now a fine supply of pure water. Buildings to the value of half a million dollars were erected, and electric light works are approaching completion. The council opposed a proposal from the Calgary and Prince Albert boards to place a discount on United States silver currency. Representations made as to the congested state of the town post-office and resulting delays in handling mail matter had caused the Government to arrange for an adequate customs and post-office building. Hotel accommodation is greatly lacking in the town, but the Building Committee have thus far been unable to get it increased. The erection of a skating and curling rink was one of the objects to which the board devoted its energies, and that its opening was the means of bringing 150 visitors to Regina, and keeping them there for a week, is the best proof that the effort was worth while. Joining with the city council, the board sent delegates to see Mr. Mackenzie, and also sent a deputation to the Government at Ottawa to have the Canadian Northern Railway extend their line from Hartney, Man., to Regina, and to have the Government guarantee the bonds of the extension line. Hopes are entertained that these will not fail of their object. The Arcola extension of the Canadian Pacific Railway has enlarged the trade of Regina with towns on that line. In the closing paragraph reference is made to the second annual convention of the Boards of Trade of the Territories, to be held in Regina next summer. Great hopes are built upon this gathering for an interchange ot views by commercial and financial men as to questions relating to the interests of the North-West.

The president's address, though not lengthy, was of an encouraging and suggestive tenor. The growth of the town has been, he said, not by boom or speculation, but of a healthy and steady character. He suggested that the influx of people rendered the place a good one for the investment of capital in dwellings. Implement makers have been making Regina their headquarters for Assiniboia and Saskatchewan because of its position as a distributing centre. And wholesale dealers and manufacturers are beginning to see this opening also. In his opinion: "Our city fathers cannot do better than help forward the establishment of industries that will supply the needs of our citizens and surrounding population, and which will bring wage-earners into our midst. The time has gone by when our merchants and consumers should have to send to outside points for many commodities which could be profitably produced here to the advantage of all concerned." In closing, Mr. Mytton de-
held its meeting some days ago, and the president, Mr. G. M.
clared that Regina, now the "Queen City of the Plains," must aim to be commercially recognized as the Kansas City of Canada. The election of officers for 1905 was then proceeded with. His Worship Mayor Laird suggested the re-election of Mr. H. F. Mytton as president. This was seconded by Messrs. Pettingell, McInnis, and J. M. Young, and Mr. Mytton was re-elected without opposition. The re-election of Mr. W. G. Pettingell was proposed by Alderman Cooper, seconded by R. S. Barrow, and carried unanimously. Mr. J. Kelso Hunter having resigned the secretaryship, Mr. Trant was appointed thereto. The members of council are: J. F. Bole, J. M. Young, J. W. Smith, R. S. Barrow, J. R. Peverett, A. F. Angus, R. B. Fergusson, Ald. Cooper and G. Mickleborough.

⁂

CANADA PERMANENT MORTGAGE CORPORATION.

The fifth annual meeting of shareholders of the Canada Permanent Mortgage Corporation was held in the head office of the corporation, Toronto, on Tuesday, the 7th inst., at 12 o'clock noon.

On motion, the chair was taken by Mr. J. Herbert Mason, the first vice-president, and the secretary, Mr. Geo. H. Smith, was appointed secretary of the meeting. At the request of the chairman, the secretary read the report of the directors and general statement for 1904, which are as follows:

Report.

In presenting to the shareholders their fifth annual report and statement of the business of the Canada Permanent Mortgage Corporation, the directors desire to again congratulate the shareholders on the improved condition of its affairs as exhibited in the accompanying statement, duly verified by the auditors.

The net earnings for the year amount to $537,193.24, to which falls to be added the unappropriated profits at the end of the previous year, amounting to $133,822.32, which were disposed of as follows:

Two half-yearly dividends of three per cent. each	$357.081 00
Added to reserve fund	250,000 00
At credit of profit and loss	63,934 56
	$671,015 56

All which is respectfully submitted.

George Gooderham, President.

Toronto, January 25th, 1905.

BANKERS

MONTREAL—Molsons Bank; Imperial Bank of Canada.
NEW YORK—The Importers and Traders National Bank
LONDON ENGLAND—The National Bank of Scotland.

ined the vouchers and securities of the Canada Permanent Mortgage Corporation for the year 1904.

The accompanying statement is a correct exhibit of the affairs of the corporation as on December 31st, 1904.

A. E. Osler, A.C.A.,
Henry Barber, F.C.A.,
Toronto, January 24th, 1905. Auditors.

The meeting was then addressed by the chairman, Mr. J. Herbert Mason, who said:

Ladies and Gentlemen,—Before inviting you to adopt the directors' report and statement for 1904, I desire to call your attention to some of its more salient features.

In the first place, you will find that there is a substantial increase in every branch of the business of the corporation. The funds placed with the company for investment increased during the year from $15,040,539 to $15,892,546, an increase of $852,006; of this sum $198,914 were for sterling debentures. The mortgages on real estate increased from $20,758,468 to $21,554,624. The total assets and business of the company was enlarged from $23,296,448 to $24,122,957.

When addressing you on previous occasions, I have adverted to the well known fact that among the assets taken over by this corporation at the amalgamation were a number of properties held for sale by the respective companies, although the rights of the original owners had not been foreclosed. This state of things was the outcome of the reaction, and depression in real estate values, which followed the collapse of the last boom. All the companies had assets of that character, some proportionately more and some less. You will be pleased to know that these properties have nearly all been disposed of. Of the whole of our $24,000,000 of assets, representing investments on securities extending all over the Dominion, the aggregate of properties in default and held for sale at the end of last year amounted to less than $20,000, including one foreclosed property of the value of $786, as appears in the statement. With this exception, all the properties in default, including all those that have come on hand through default since amalgamation, have been sold and any loss sustained has been charged against the current revenue of each year, without touching the unappropriated profits.

The net earnings in 1904, after deducting all charges and expenses, were $537,193. This sum, with $133,822 previous profits, unappropriated, enabled the directors to declare two half-yearly dividends of three per cent. each; to add $250,000 to the reserve fund, making that fund $2,000,000, and still leave the substantial sum of $63,934 at the credit of profit and loss.

Although in earlier days, when high rates of interest prevailed, I have presented statements to the shareholders showing larger profits than were made last year, in my long experience it has never been my privilege to present a cleaner and more thoroughly satisfactory balance sheet than that submitted to you to-day. In this connection permit me to call your attention to the fact that this is the jubilee year of the Canada Permanent, which was organized early in 1855, and from that date to the present has never failed to promptly meet every obligation. In respect of the extent of its business, its revenue earning power, and the uniformly prosperous position it has invariably maintained, it stands unrivalled in the history of Canadian land mortgage companies.

I regret to have to refer to the loss sustained by the board through the removal by death of their esteemed colleague, Mr. C. H. Gooderham, who was a member of the board of directors and also a member of the executive committee, from the date of the formation of this corporation to the time of his decease.

I beg leave to move, seconded by Mr. Vice-President Beatty, that the report of the directors for 1904 be received and adopted and together with the general statement be printed and a copy sent to each shareholder.

The motion was seconded by the vice-president, Mr. W. H. Beatty, who said:

Mr. Chairman, Ladies and Gentlemen,—It certainly is a very great satisfaction to me to second the adoption of the report which has just been moved by the chairman. In doing so, it may be well to call your attention to one or two facts in connection with the company's affairs which indicate the progress that has been made since amalgamation. At the end of the first year's business, our reserve fund was $1,490,000, now it is $2,000,000, or an addition of over half a million. Our deposits then were $1,833.000, now they are $2,734.000. or an increase of nearly a million. The debentures of the company, which were held by Canadians at the same date, were $2,389.000, now they are $3.767,000, or an increase of nearly a million and a half. Our total loans on the 31st December, 1900, were $21.578.000, now they are $22,035.000, or an increase of $1.500.000.

If one might use a trite expression, we might call 1904 a record year. The prosperity of the whole Dominion never was as great as it has been during the past year, and I would like to say here that there is no country, let it be where it will, that the sun shines on, in which the general well-being of the people is as good as it is in Canada, and particularly in the Provinces of Ontario and Manitoba. No poor, no distress, and every man willing to work can get employment and at remunerative wages. To refer to our own city of Toronto, we are having unexampled prosperity. Never has real estate been in such a satisfactory condition as it is today. A few years ago it was difficult to find tenants for houses, and now the people find it difficult to get houses, and real estate finds ready sale and at advancing prices.

In the province of Manitoba, where we are loaning a great deal of our money, and where our investments are increasing, everything looks bright and prosperous. However, in such prosperous times as are now being experienced in that province, it is prudent to trim our sails and see that no storm overtakes us, and we are exercising more than usual care in the selection of our securities for loans throughout the North-West. Though loans are only made after full reports by carefully selected appraisers, and to a small proportion of conservative valuations, which in most cases are confirmed by experienced inspectors from the company's office, the directors during the past year thought it advisable to take even further precautions against the possibility of making unprofitable investments. We were fortunate in securing an exhaustive report in connection with North-West lands from a gentleman of large experience, who had resided in the North-West for over thirty years, and who had travelled all over it many times. In connection with and accompanying the report, he prepared for us a number of maps showing, as his great experience enabled him to do, the localities in which he deemed it inadvisable for us to make loans at present. Some of these are districts which just now are enjoying a large measure of prosperity, but which in the past have been subject to what they call a "cycle of dry years," during which, through lack of rainfall, crops were a comparative failure, though these dry years have been followed by a "cycle of wet years," enabling the farmers to reap a fair crop. He has furnished us with a great deal of information which, based as it is upon an experience almost unique, has been of immense value to the company, and has enabled the directors to avoid localities which for a few years have seemed desirable fields for investment, but the future of which is not yet assured.

The same cautious policy is adopted in Winnipeg, where real estate is very active, but we are not entertaining applications on the basis of any but assured permanent values. We have no property on hand in that city, except our office premises, which we could sell at any time for nearly twice the sum at which they are carried in our books.

We look forward for some years to come to increasing our business in the province of Manitoba at good rates of interest, and when the present loaning districts in Manitoba and the North-West Territories become like the province of Ontario, a place where it is difficult to get remunerative rates of interest, we may expect to find in the new districts opened up by the Grand Trunk Pacific and other railways contemplated and under construction, further fields for the profitable investment of our funds; so that the prospects for well managed loan companies are brighter than they have been for years.

And now let me allude to the fact that this company has another record. I think I may say without fear of truthful contradiction, that there is not a company of any kind, banking financial, commercial or otherwise, that can point to one of the records of this corporation as the successor of the Canada Permanent. I allude to the fact that the managing director of this company, Mr. J. Herbert Mason, entered the service of the company at its inception, now fifty years ago, that he has held a controlling position ever since then, and to-day he has the well-deserved reputation of being beyond all question the most successful and the most sagacious loan company's manager that has ever been in Canada. Not only is he a successful manager, but a good citizen, and having the respect of the whole community. What better could a man wish for?

Referring to Mr. Beatty's concluding remarks, Mr Mason said:

Ladies and Gentlemen,—It would be ungrateful of me not to acknowledge the very flattering terms in which the vice-president has alluded to me here. I can only say that I have on all occasions endeavored to do my duty to this company. It owes its origin to me, and I formed its constitution, and have attended in my official capacity every annual meeting for the last fifty years, and I can assure you that while I appreciate the kind remarks of Mr. Beatty, I appreciate much more highly the fact that we present on our fiftieth anniversary one of the best statements we have ever had.

The chairman's motion for the adoption of the directors' report was unanimously carried. The election of directors was then held, resulting in the re-election of Messrs. Geo. Gooderham, J. Herbert Mason, W. H. Beatty, Ralph K. Burgess, George F. Galt, Winnipeg; W. G. Gooderham, W. D. Matthews, George W. Monk, S. Nordheimer, R. T. Riley, Winnipeg; J. M. Robinson, St. John, N.B.; and Frederick Wyld.

At a subsequent meeting of the board, officers were re-elected as follows: President, George Gooderham; first vice-president, J. Herbert Mason; second vice-president, W. H Beatty.

CANADA PERMANENT
MORTGAGE CORPORATION.

Toronto Street, - - TORONTO

THE haste to get rich often leads many a person who has money to invest to speculate in bonds and stocks ground out by speculators during good times when everything is on the boom, and which, when times are hard and the investor is most likely to need his money, must be sold at a great loss. We would advise you not to speculate with this class of stock, but to invest your money in the Debentures of The Standard Loan Company, which bear interest at the rate of five per cent. per annum, payable half yearly; interest coupons are attached to debenture made payable to bearer. 8

DEALERS IN
GOVERNMENT
AND OTHER HIGH GRADE
BOND INVESTMENTS

CORRESPONDENCE INVITED.

Mercantile Summary.

The Canadian Northern Railway has taken over the recently constructed line between Melfort and Erwood, N.W.T.

A meeting will be held in Winnipeg shortly for the permanent organization of the General Merchants' Association of Manitoba.

The New Brunswick Government will in the spring set out several more illustration orchards. The eight planted a year or two ago have done well, and are receiving considerable attention from farmers in their various localities.

The premises of the "Shareholder," Montreal, were the other day damaged by fire to the extent of $20,000, covered by insurance. Chief Benoit, after the fire was out, remarked that it gave as fine an example of the danger of elevator shafts as could be desired. The shaft acted as a flue to carry the flames from the cellar to every floor in the building.

A general dealer at Finch, Ont., named D. P. Gormley, has assigned, showing liabilities of $6,500, and nominal assets of about $5,000. He formerly clerked in Morrisburg, and bought the insolvent stock of W. H. Ault, in 1901. ——J. F. Black, a grocer at Cobden, is reported as having failed. He started business in 1902, and had previously been employed as a station agent on the Canadian Pacific Railway.

We understand that a Canadian syndicate has acquired control of the Alaska Central Railway. A. C. Frost, of Chicago, is president, and H. C. Osborne, of Toronto, is vice-president. The proposed railroad will run from Leward to the Tenana River, a distance of 420 miles. In connection with this same syndicate, a coal company with a capital of $500,000 has been formed to develop the coal mines on Metamuska River.

A small manufacturer of clothing at Montreal, Saul Solomon by name, has assigned, and his affairs are likely to turn out poorly, as he is reported to have pawned a good deal of stock before his assignment. Liabilities are estimated at about $10,000. In 1896 he was reported as compromising at 40 cents.——Joseph Besner, of Montreal, carrying on a sort of peddlers' supply business in dry goods, etc., under the style of the Union Importing Co., has assigned, and is reported as owing $5,100.

From St. John, N.B., is reported the suspension of Morrell & Sutherland, dry goods retailers, who began business as principals in 1899, having previously been clerks, with the leading firm of Manchester, Robertson & Allison. Their liabilities are placed at $17,000 to $18,000, with assets approximated at the same figures.——Another New Brunswick failure is that of J. J. Melanson, general dealer, of Bathurst. He was formerly of Melanson Bros., which firm obtained an extension prior to dissolving just about a year ago. He has been much sued of late, and now proposes a 60 per cent. compromise on liabilities of $7,000 to $8,000.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

WILLIAM F. BULLEN,
Manager.
London, Ontario, 1905.

G. R. Gregg & Company, Limited, Toronto, capital, $250,000, has been granted a charter by the Dominion Government for the purpose of carrying on business as wholesale and retail merchants, and to act as agents for merchants, traders, and manufacturers.

Mercantile Summary

Word comes from Orillia that great efforts are being made to induce the James Bay Railway to touch at that town.

Last week fire in the Grand Trunk blacksmith shops, at Point St. Charles, (Montreal), did damage to the amount of $10,000.

The new armories at London, Ont., were formally opened on the 1st inst. by Lord Aylmer, Inspector-general of the military forces in Canada.

A Halifax despatch states that Mr. H. H. Wickwire, M.L.A., for Hants County, has been appointed a member of the Nova Scotia Government without portfolio.

The Pender Nail Works Company held their anual meeting in St. John last week, when the old board of directors was re-elected, as follows: W. Murray, James Pender, G. S. Fisher, Joseph Finley, J. D. Purdy. The reports submitted were very satisfactory. During the year the shareholders received 28 per cent. in dividends and bonuses. It has been decided to erect a new mill equipped with the most up-to-date machinery, at a cost of $25,000.

The Canadian Northern Railway in asking for an extension of time for the construction of uncompleted lines, desires authority to lease or acquire running powers over the Great Northern, the Chateauguay and Northern, the Irondale, Bancroft and Ottawa, the Quebec, New Brunswick and Nova Scotia, and the James Bay Railway, and authority to construct the following branch lines: From Regina to Carlton, on the North Saskatchewan; Regina to Pas Mission on the Saskatchewan; from a point on the C.P.R. between Humboldt and the South Saskatchewan to a point near the crossing of the Saskatchewan by the Prince Albert branch of the Canadian Northern, and from a point on the main line of the Canadian Northern into Battleford.

The Customs Department has issued further regulations in the endeavor to prevent "dumping." Exporters in other countries will in future have to show on invoices of goods exported to Canada the amount of any freight prepaid on such goods, and also the amount of any freight allowance made by the exporter to the purchaser in Canada, in order that the collector may determine the actual selling price of the goods to the Canadian purchaser in the country of export, in condition packed ready for shipment as prescribed by the customs regulations. The "fair market value" of goods manufactured solely for export and not sold for home consumption may usually be determined by ascertaining the total cost to produce the goods in condition ready for the market, including all expenses, and adding thereto the usual ratio of profit made on home consumption sales of similar lines of goods. This basis should be followed by exporters in arriving at the estimate of value to be stated by them on their invoices.

An ideal present to give to any man about to travel is the

Mercantile Summary.

The McLennan Timber Lands and Lumber Company, Limited, Quebec, has received a Dominion charter. Its capital is $50,000, and it will purchase and deal in real estate, lumber, mines, etc. A. J. Price, of Notre Dame de Quebec, and J. McLennan, of Syracuse, N.Y., are among the members.

The R. P. Campbell block at Portage la Prairie, Man., was on the 6th inst. destroyed by fire at a total loss of $35,000, the chief losers being Cassel's general merchandise store, Tallow's furniture stock, and the C.P.R. Telegraph and Dominion Express. Most of the losses were covered by insurance, either wholly or in part.

The output of gold from the Atlin fields for the season just past is placed at $600,000. The impression prevails that Atlin is no longer a camp for the individual miner. This, says Dr. Young, M.P.P., who represents that district, is entirely wrong, and the results during the season just past prove that, while the big companies have done good business, the small miners, who work individually, have had a very prosperous year.

An order-in-council recently passed by the Dominion Government makes it compulsory that all vessels carrying freight from port to port in Canada shall be subject to the Canadian steamboat inspection act. It further provides that all tugs, yachts, or other vessels registered elsewhere than in Canada, shall be subject to the like inspection. This latter regulation will apply to yachts, motor boats, etc., which are brought to Canada during the summer season by United States tourists. It has also issued an order bringing into force a new set of rules for the inspection of steamboats and for the examination of engineers of steamboats. The new rules are a consolidation of the regulations for the inspection of steamers and for the examination of engineers along with a number of amendments rendered necessary to bring the same up to date.

A syndicate has been formed, under the name of the Canadian Canals Corporation, with headquarters at Toronto, for the purpose of building canals from a point on Georgian Bay between Waubaushene and Port Severn, or on Nottawasaga Bay, on Lake Simcoe, thence to some point on Lake Ontario, and from some point on Nottawasaga Bay along the valley of the Nottawasaga River, thence to some point on Lake Ontario. One terminus on Lake Ontario is to be in the County of York, and the other either in the County of York or in the County of Ontario. The company seeks authority to construct the necessary basins and reservoirs. It asks the expropriation powers, and desires authority to levy and collect tolls. The capital stock of the company is placed at fifteen million dollars. H. C. Spalding, of New York; Col. J. I. Davidson, and Mr. Peleg Howland, of Toronto, are the promoters of the enterprise.

Mercantile Summary.

In a daily paper, Mr. W. S. Smith, secretary-treasurer of the Automobile and Supply Company, of Temperance street, denies that the company were about to move to Queen street, opposite the City Hall. But it will build an addition of three stories to the present building.

Canadian Builders, Limited, Toronto, capital, $1,000, has been incorporated. John Mackay, Toronto, and J. C. Stewart, of New York, are prominent members. — Another company recently formed for building and contracting purposes is the Standard Construction Company, Limited, capital, $1,000,000; headquarters, Ottawa, in which E. J. Chamberlain and J. W. Smith, of Ottawa, are interested.

A recent despatch from Lindsay states that the Rathbun Company has sold its branch at that place to a local joint stock company, capitalized at $100,000, the Baker & Bryans, Limited. G. H. M. Baker was local manager for the Rathbuns during the eighteen years that it did business there. Robert Bryans has for years been a lumber and fuel merchant. The transfer includes the mills, warehouse, towing outfit and timber limits.

—The Dominion Government has granted a charter to the Dominion Rubber Company, of Montreal, having $1,000,000 capital, whose object it is to carry on the business of making rubber boots and shoes, to purchase or in other way acquire the shares, debentures, etc., of any other company with similar objects, and to generate electric or other power for the production of light, heat or power. R. D. McGibbon, of Montreal, is among the charter members.

A despatch from Rossland, B.C., says that the shipments of ore for the week ending with Saturday last reached a total of 6,690 tons, and the outlook is that there will be a material increase in the weekly tonnage extracted. The leading feature of the week was the locating with the diamond drill of a seventeen-foot ore vein on the intermediate level of Jumbo mine. The vein is only a short distance from where the diamond drill boring began, and the management state that the cross-cut which is being run to tap it will reach it within a few days. Shipments of ore from this vein should be made before the end of the week. The ore bodies in the lower levels of Centre Star and Le Roi are developing in a satisfactory manner, and give promise of being extensive in character. The tonnage of ore shipped from and crushed at the Rossland mines for the week ending this evening, and for the year to date, was as follows: Le Roi, 2,700 tons; Centre Star, 1,650 tons; War Eagle, 1,320 tons; Le Roi, No. 2, 175 tons; Spitzee, 270 tons; Jumbo, 300 tons; White Bear, 125 tons; White Bear (concentrated), 150 tons; total for week, 6,690 tons, and to date, 32,231 tons.

Mercantile Summary.

The Dailey Rotary Engine Company, Limited, Galt, has received an Ontario charter. Its capital is $100,000, and it will manufacture and sell rotary engines, water meters and machinery. Charles Hetherington, of Galt, is a prime mover in the enterprise.

According to the Regina Leader, Indian Head, Assa., is to have an auto, Mr. Isaac Jackson having bought from the Canada Cycle and Motor Co. a $2,200 auto car. This is a twelve horse-power, and four passenger car, the latest and most up-to-date.

Some of "Whyte's Sayings" are good. Here is one of them on the subject of advertising: The best way to get ahead of the other fellow is to advertise oftener and better—and pay better attention to your business.

At the annual general meeting of shareholders in the British Columbia Record, Limited, held at Victoria, British Columbia, on February 1st inst., Mr. E. Jacobs was appointed managing director of the company in succession to Mr. H. Mortimer Lamb, who for health reasons voluntarily retired from the management of the British Columbia Mining Record, with which he has been actively associated for about seven years. By arrangement with Mr. Lamb, Mr. Jacobs had already relieved him of the duties of editor of that journal, which is a well-informed and fearless champion of what it believes to be the true interests of our great Pacific province.

It is proposed by the Canadian Pacific Railway to spend over $5,000,000 in improving their lines and equipments during the current year. Five hundred miles of new standard rails are to be laid between Montreal and Vancouver. Bridges will be replaced and renewed, grades improved and terminal facilities increased. In every way possible the intention is to work towards the shortening of the passenger time tables on the main stretches, and to add to the equipment for handling freight in general and wheat from the West in particular.

IN HER PUBLIC LANDS

many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.

Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.

For maps, reports, Mines Act, etc., apply to Hon. E. J. Davis, Commissioner of Crown Lands, or Thos. W. Gibson, Director Bureau of Mines, Toronto.

DISTRICT OFFICES:
Montreal, Halifax, Ottawa, Winnipeg, Calgary, Vancouver, Rossland.

Mercantile Summary.

Mr. Charles Schmidt, of the Betz Manufacturing Company, Hamilton, Ohio, manufacturers of laundry machinery and paper mill specialties, is thinking of locating a branch factory at Hamilton.

The directors of the Amalgamated Copper Company, at a meeting in New York, declared a regular dividend of ½ of one per cent. and an extra dividend also of ½ of 1 per cent. This is the first time within three years that the dividend has exceeded the rate of 2 per cent. per annum. Mr. F. P. Addicks, formerly assistant treasurer, was elected vice-president, and Mr. A. H. Melin was elected secretary and treasurer.

The Canadian Press Association, which held its annual meeting in Toronto last week, and discussed several highly interesting papers on various subjects, elected the following officers: Mr. A. McNee, Windsor, president; Mr. A. H. U. Colquhoun, Toronto, first vice-president; Mr. John R. Bone, Toronto, secretary-treasurer; Mr. A. E. Bradwin, Blyth, assistant secretary-treasurer.

Debentures for Sale.

TOWN OF MORDEN, MANITOBA.

Tenders will be received up to Saturday the 25th February, instant, for the purchase of Debentures of the Town of Morden, duly authorized by vote of the ratepayers, to the amount of Three Thousand Dollars, which are repayable with interest at five per cent. per annum included, as follows:—Nine debentures for $388.50 each, maturing 28th December in each of the years 1905 to 1913 inclusive, and one debenture for $388.60, maturing 28th December, 1914. These debentures bear date 28th December, 1904, from which date interest accrues.

The town of Morden is situate 80 miles south-west of Winnipeg on the C. P. R. Pembina Branch, has a population of 1,650, and an assessed value (50% of actual cash value) of $144,250.00, is the centre of the Southern Judicial District of Manitoba, and the Morden Land Titles District, and has County and Surrogate Courts. It is also the heart of the finest agricultural district in Manitoba. It has no indebtedness, except a balance of $1,250.00 and interest, on a twenty year water supply loan, none of which is overdue, and all of which is payable within six years.

The right is reserved to reject any or all tenders.

For further information apply to the undersigned.

C. McCORQUODALE,
Secretary-Treasurer.

CONTINENTAL LIFE
Insurance Company.
ANNUAL REPORT FOR 1904.

INSURANCES.—The number of applications for new insurance and revival of policies was 1,149, aggregating $1,399,069; 45 applications, for $58,700, were rejected or deferred. The policies issued and revived were 1,113, amounting to $1,342,628, a gain of $32,004 over 1903.

The total amount of insurance in force at 31st December, 1904, was $4,053,556, a net increase of $625,515 during the year.

EXPENDITURE.—The ratio of expenses to premium income was considerably lower than in the previous year.

The death claims for the year were $15,750, which was again much below the amount expected according to the mortality tables and provided for in the reserves. The total death losses paid were $12,000. Claims amounting to $3,750 were awaiting proofs at the end of the year.

RESERVES.—The reserve for assurances and life annuities has been increased by $77,326.98, and now amounts to $269,341.98. These reserves have been computed according to the stringent standard adopted by the Dominion Government, and are invested in first mortgages, bonds and debentures.

INVESTMENTS.—One of the best evidences of the high quality of the company's mortgages and other securities is the fact that only one item of interest amounting to $28 was in arrears at the end of the year.

COMPARATIVE STATEMENT.—The usual comparative statement of the company's business for 1903 and 1904 follows:—

		1903.	1904.	Increase.
1.	Policies issued and revived	$1,310,624	$1,342,628	$32,004
2.	Net premium income	100,174	127,631	27,457
3.	Interest income	9,340	12,402	3,062
4.	Income from premiums and interest	109,514	140,033	30,519
5.	Death claims	10,500	15,750	5,250
6.	Total assets	337,118	408,202	71,084
7.	Reserves	192,015	269,342	77,327
8.	Insurance in force	3,428,041	4,053,556	625,515

Country failures in the Province of Quebec have been rather more numerous of late, as indicated below: Joseph L. Bernard, of Namur, an immigrant from France, and for some time a farmer, began storekeeping about a year ago, and is already reported in deep water, and his affairs in the hands of the assignee.——I. A. Beland has carried on business in the boot and shoe line at Louiseville for six years, but has always been found more or less slow pay. Now he has assigned.——C. Winter, in the dry goods line at Grande Mere, wishes to compromise at 40 cents on the dollar. He was burned out last month, having an insurance of $4,000. He claims he had a stock of $9,000, but his figures are generally considered extreme.——An assignment has been made by G. A. Drouin, selling shoes at Drummondville, under cover of the name of his wife, and his indebtedness is placed at $3,900. He failed in that place in 1889, and later became interested in the firm of Drouin & Trudel, general dealers, at Abenakis, which firm was unsuccessful. The shoe business here was being carried on at the same time as a personal venture, and the efforts of the creditors of the Abenakis business to include the Drummondville assets, were unsuccessful.——I. A. Laudeau, also in the boot and shoe business, at Fort Coulonge, and whose failure we lately noted, has settled at 25 cents on the dollar.——Joseph Fortier, a grocer and butcher, at Sherbrooke, who was burned out last December, has been obliged to assign.——In the fall of 1903, A. H. Hebert, a baker by trade, began hotelkeeping at Windsor Mills. He has now assigned, and is said to owe some $6,000, with assets of only about $1,500.——A demand of assignment has been made upon Hector Dallaire, a plumber at Sorel, whose liabilities are light.——An offer of compromise, at 25 cents on the dollar, is made by A. O. Loiselle, a young harnessmaker, of Granby.——L. Henrichon, of Lake Megantic, the harnessmaker with a host of other occupations, whose failure we lately reported, is trying now to settle liabilities of $2,800 at 50 cents, a previous offer of 35 cents having been unacceptable.——Upon demand, an assignment has been made upon Nathan Fickler, dealing in clothing, dry goods, etc., at Three Rivers. He has been previously interested in businesses carried on by himself and brothers in Quebec, Fraserville, Joliette and elsewhere, with a hitherto favorable record. His liabilities are said to amount to about $15,000.

⁂

TORONTO MARKETS.

Toronto, Feb. 9th, 1905.

Chemicals, Drugs, Etc.—No particular change has taken place in the situation so far as the local market for drugs is concerned. Prices continue steady. Opium is a little more active. New York reports show that there is no special feature calling for comment, and that trade is a little on the dull side.

Dry Goods.—For all lines of spring goods, the demand is very active. Millinery goods, especially, are in request, ribbons phenomenally so. Deliveries of the latter are likely to be slow, as the factories in Europe are already overcrowded with orders. Dress goods are moving out quickly, the retailers having come to the conclusion that prices are quite likely to advance. The most popular materials will be mohairs, voiles, eoliennes, lustres, etc.

Flour and Grain.—A quiet trade only in flour for export is going on at present, but it is expected to improve with lower freight rates. Ninety per cent. patents are quoted at $4.40, or a few cents higher. No change is announced in millfeed. Wheat is on the firm side. Corn is scarce, and the quality is not good. Peas and buckwheat are steady. There is a firm market for oats, though not very much actual business is passing.

Hides, Skins and Leather.—For hides a dull market prevails, but prices continue as before. Calf and sheepskins are both firm. Tallow is easier. Leather continues unchanged, at last week's prices, but it has a firming tendency.

Groceries.—Sugars continue as before, and the, movement is fairly good. Some of the wholesalers report quite a brisk demand for general groceries from the country districts. For dried fruits there is a good demand for this time of the year. There is great firmness in canned goods. Teas are quiet.

Live Stock.—More active demand is noted this week at the Cattle Market, though this is partly to be accounted for by the comparatively small offerings. Prices for export animals had a firm tendency. Butchers' cattle were not of particularly good quality, and offerings were rather eagerly snapped up. Some feeders are being sold, but the enquiry is not very brisk. A considerable number of milch cows sold readily. Sheep and lambs are in active demand.

Provisions.—The market for butter is steady, but no great actual trade is being done, though for medium qualities the supplies are barely large enough. Cheese is quite firm, though the Old Country buyers have been holding off somewhat. Eggs are more plentiful, and limed have declined a cent. The poultry market is quiet, with not much business passing.

Wool.—Prices are nominally the same, and quite steady, but nothing is being done.

⁂

MONTREAL MARKETS.

Montreal, 8th, February, 1905.

Ashes.—Values continue on the easy side with first quality of pots quoted at $5.25 to $5.35, with transactions reported at the inside figure, and as low as $4.90 for seconds, though about $5 is the general price. For pearls a nominal quotation is about $7.50 per cental.

Dairy Products.—The butter market is firmer by nearly half a cent since last report, and supplies are on the light side, so that some further advance in price is deemed not improbable. Finest creamery is now held at 22 to 22½c., while fine Western dairy brings 17½ to 18c.; dairy rolls, 18½ to 19c. for goods of hest grade. In the cheese market there is no change, and 10¾ to 10⅞c. appears to be the general idea for fine fall goods. Stocks are being steadily re-

NOTICE.

The Queen City Fire Insurance Company.

The Annual General Meeting of this Company will be held, pursuant to the Act of Incorporation, on **Tuesday, the 28th Day of February, 1905,** at 12 o'clock noon, at the Company's Office, Queen City Chambers, 32 Church Street, Toronto.

By order, THOMAS WALMSLEY,
Secretary.

Toronto, February 7th, 1905.

NOTICE.

The Hand-In-Hand Insurance Company.

(*Mutual and Stock.*)

The General Annual Meeting of the Members and Shareholders of this Company will be held on **Saturday, the 25th Day of February, 1905,** at 12 o'clock noon, at the offices, 32 Church Street, Toronto, for the Election of Directors for the ensuing year, and transaction of other business relating to the management of the Company.

By order, HUGH SCOTT,
Manager and Secretary.

Toronto, February 7th, 1905.

duced. Shipments for Europe last week were 19,348 boxes, making the total of 229,320 boxes since close of navigation. Butter exports last week were light, only 243 packages.

Groceries.—Sugar prices remain steady at $5.75 for standard granulated in barrels, with $5.25 the lowest in yellows, but some evidences of easiness are reported in the New York market. A war in prices has broken out among the starch manufacturers, and the trade was surprised to-day by the announcement of a cut in prices ranging from 1c. to 1½c. per lb. on all grades. Canadian manufacturers of jams advise an advance in their goods. Active buying up is reported of evaporated apples, with the object of cornering the supply, and in a jobbing way 6¾ to 7c. is now asked. Rolled oats are advanced to $2.35 a bag, and white beans are scarce and very firm at $1.60. Pressed hops are also dearer.

Hides.—Beef hides now offering are generally grubby, but prices are holding steady, dealers buying No. 1 at 9½c. per pound. The demand from tanners is fair. Calfskins are coming in a little more freely, and are bought at 13 and 11c. for Nos. 1 and 2 respectively. Lambskins are steady at $1.15 to $1.20 each.

Metals and Hardware.—There is little change apparent in these lines. The demand is, if anything, a little more active from general consumers, but agents for British manufacturers report some falling off in the placing of import orders. Carron and Summerlee iron are quoted at $19 to $19.25 per ton for spring delivery, from wharf, net terms; Ayrsome, $18.75. From store $21 is asked for ordinary lots of first named brands. Bars are steady at $1.75 to $1.80. Nails, wire, etc., are unchanged. There is a feeling that galvanized sheets at $4.15 are too low, and some revision of price may take place shortly. Canada plates are firm at $2.45; galvanized Canada's $3.90 for fifty-twos, and $4.15 for sixties; black sheets, $2.15; tinplates, $3.65 for cakes, and $3.90 for charcoals; boiler plate, $2. Tin, lead, copper, etc., are all steady at last week's figures.

Oils, Paints, and Glass.—Linseed oil has been showing some little stiffening in the London market during the past few days, but not sufficient to lead to any alteration of local prices, and raw is still being sold at 42 to 43c., and boiled at 44 to 45c. Steam refined seal is quoted at 50 to 55c. in a jobbing way, and cod oil at 37 to 40c., but there is really little request for fish oils. Turpentine remains at 79c. per gallon for single barrels. Ground white lead is firmer at $4.50 the lowest for pure. Putty, $1.45 in bulk, and $1.65 in

bladders. Window glass is very firm at $3.25 per 100 feet for first break, and stocks are low.

Dry Goods.—General payments by retailers on the 4th of the month were just fair, the best returns reported being about 69 per cent. While travellers are doing rather more than they were, the general volume of orders is not found so large as last year, and in certain cases spring shipments are not being rushed out until customers' statements for the past year are received. In values of textiles there is nothing new reported. The spring millinery openings are fixed for the 27th and 28th inst.

Furs.—Owing to the high prices reached by mink at the late London sales, local dealers in furs have advanced their figures and are now paying from $4 to $5 for No. 1 dark, according to size. Skunk did not reach the high figure at said sales that was expected, the Germans proving indifferent buyers, and Canadian dealers who bought freely in anticipation of much higher prices may stand to lose: Large black prime skins bring $1.50 to $1.75; short stripe, $1.35 to $1.50. For marten higher figures are being realized, large ordinary bringing $3 to $4; ordinary dark, $5 to $10, and Labrador black from $10 to $20. Muskrat is weak with dealers indisposed to buy at all freely.

Wool.—The market is a quiet one, with woolen mill men buying in only small lots to fill present needs. Capes are quoted at 17½ to 22½c., according to condition and quality; fine B.A., 37 to 42c.; medium ditto, 32 to 35c.; crossbreds, 25 to 32c.; North-West, 19 to 20c. Pulled domestic and fleece are very scarce.

⁂

Wm. Blackley, Limited, of Toronto, wholesale jobbers and importers, seems to be having considerable difficulty in piloting the business. The liabilities are placed at $23,126.10, with assets of $15,000. On January 25th, 1905, a fire inflicted a loss of $2,000, covered by insurance. A meeting of creditors was held February 9th, at the office of Curry & Eyre, the result of which we have not yet learned.

The Tuckett cigar factory, on St. Laurence St., Montreal, was on Friday last gutted by fire with a heavy loss of stock, covered by insurance. Damage to the extent of $26,000 was also done to the Peerless Gaslight Company's premises, and these were insured only to the extent of $4,000. The Merchants' Telephone Company's premises were also destroyed. The multiplicity of wires did much to hamper the firemen's movements.

⁂

METROPOLITAN FIRE INSURANCE CO.

CASH-MUTUAL AND STOCK.

A good attendance of Members and Shareholders marked the seventh Annual Meeting, held yesterday at the Head Office, 24 King Street West.

The Directors' Report was as follows:—

In presenting the accompanying statement of the financial operations of the company for the year 1904 your Board of Directors considers that while the results shown are not such as were anticipated a year ago, owing mainly, of course, to the Toronto conflagration, yet in view of all the facts the Company may fairly be congratulated. Thanks to the loyal support of agents and all others interested, the Company since April last has been rapidly overtaking the conflagration losses of that month. These losses, it need hardly be said, were settled and paid with tbe greatest promptitude.

The income shows a material increase over the previous year, due partly to the Board's action in extending the Company's field of operations to the United States. This decision was arrived at in the latter half of the year. The object was to secure a share of the most desirable surplus line insurance obtainable in that country, and the result thus far has proved very satisfactory. Apart altogether from the United States field, however, business shows a fair increase, the gross income rising from $67,940 in 1903 to $80,167 in 1904.

It is to be noted at the same time that the policy of conservative underwriting is being adhered to as formerly. In confirmation, the fact may be mentioned that in the Toronto fire, covering the large area it did, the Company only lost some $23,000 net. This, together with the noteworthy fact tbat the ratio on direct business underwritten at the head office, tbat is, excluding all reinsurances and the United States business, which is underwritten in New York, but including, of course, the Toronto fire, was only 53 1-2 per cent., indicates that careful underwriting is at least being attempted.

It is gratifying further to note that tbe balance at the credit of Profit and Loss, together with the net unassessed Premium Notes in force, is sufficient to reinsure the Company's entire business and leave the paid-up capital intact.

We might call the attention of the insuring public to our statement, showing the ample security to Policy-holders of $186,358.00. This, taken in connection with our conservative underwriting, already referred to, including thorough inspection of individual and collective hazards, ought to satisfy the most exacting of future applicants for fire insurance. Our policies during the past year have been accepted for large amounts by many of the very highest rated houses, both of Canada and the United States. It is our aim to prove worthy of this confidence and of the high and honorable standing generally of Canadian insurance companies.

The term of office of four directors expires with this meeting, viz.: Messrs. James Torrance, M.P.P., H. E. Irwin, K.C., Whitford Vandusen and A. Burritt, all of whom are eligible for re-election. All of which is respectfully submitted.

D. HIBNER, President.
F. CLEMENT BROWN, Secretary.

THE GROWING WEST.

The report of council to the annual meeting of the Winnipeg Board of Trade, held last week, shows that the needs of our growing West have been considered and dealt with in a statesman-like manner by that body. The Board has been in existence since 1879; and its members, while giving attention to whatever would enhance the importance and advancement of that remarkable city have not been unmindful of measures which would conduce to the healthy growth of the great country around it.

Recent examples of this broad-spiritedness are found in the efforts made by the Winnipeg Board to assist outlying places in circumstances of difficulty. Witness their negotiations with the C.P.R. in May last at the instance of the Prince Albert Board, when some 248 cars of freight—settlers' effects included—were delayed for weeks by the wreck of the Saskatoon bridge: and their interview last summer with the C.N.R. authorities when merchants of Melfort were put to inconvenience by delayed freight. Manifestly the requests of so influential a body as the Winnipeg Board of Trade must have great weight even with railways; and it is pleasing to find its influence exerted on behalf of comparatively remote and struggling communities.

It gives much satisfaction to the council of the Board to be assured that in answer to its representations as to postal needs, the Dominion Government has, as our readers have been told, begun the erection on Portage Avenue of what is likely to be the finest post-office building in Canada. Also that important improvements have been effected with respect to United States mails, and that much-needed better custom house facilities will presently be afforded. Lengthy negotiations with the Government on the subject of grain and flour inspection resulted in the passing of an act which is described as being "in line with the recommendations of this Board from time to time."

Much space is devoted in the report to fire insurance matters; first to the suggestion made by a joint deputation from several public bodies to the local Government that a fire marshal for Manitoba should be appointed; second, to rates of insurance and the position of Winnipeg with regard to its fire-fighting equipment and water supply. The Board endorsed the proposition of the city council to purchase meantime a larger fire engine, an aerial ladder and water-tower; also approved the proposal of the city engineer to construct a system of high pressure water-works for fire and sewer-flushing purposes in the down-town district, the cost of the latter to be assessed in specified proportions upon the properties immediately benefited and upon the citizens generally.

Looking to the future of Western Canada and the probable need ere long for a larger grain outlet via the Great Lakes, the Winnipeg Board moved in the direction indicated by the Kingston and Thorold boards of trade to so enlarge the Welland Canal as to make it capable of accommodating the largest class of freight steamers. Along with the Grain Exchange of the city it prepared for submission to the Transportation Commission statements on freight matters and improvements to navigation in not only the rivers and lakes of the North-West but in Hudson Bay. "Mr. J. H. Ashdown of this Board was appointed as a member of the Commission, and we may depend," says the report, "upon the needs of the West being fully considered by this important commission." In August, the Railway Commission met in Winnipeg, and a committee of the Board secured a hearing before that body of various matters of complaint about freight classification or rates. "So far no report as to the decision reached has been made public, and it is reported that owing to the resignation from the chairmanship of the Commission by Mr. Blair, all of the Western cases will have to be reheard." Verily there are others than sufferers by the Toronto fire of April, who have small cause to bless Mr. Blair for his ill-timed desertion of an important post. Lastly in the case of applications respecting probable openings in Winnipeg for manufacturing establishments; persons so applying make a prominent feature of the bonus question, desiring to know what bonus or exemption from taxation would be given by the city. It is pleasing to observe that, "on the general principle, affirmed by the Board, that if any industry could not be run on a paying basis on its own merits it should not be established, all applicants were notified to this effect." This is a sound conclusion; and we only wish that other boards of trade and the councils of many Canadian cities and towns had been of the same sensible mind, for the bonus system as applied to manufactories is as a rule inequitable and in the majority of cases bound to result in disappointment.

* * *

COAL IN THE CROW'S NEST PASS.

In the Crow's Nest Pass of the Rocky Mountains, not far from the boundary between the territory of Alberta and the province of British Columbia, lie the extensive coal measures which are of so great import to Western Canada. For quite a number of years these have been tapped at Lethbridge. Later, within ten years, Eastern capitalists and Western managers have been developing great seams in the Pass, which now the southern loop line of the Canadian Pacific traverses, and new towns, such as Fernie, Morrissey, Michel, have sprung up. The C.P.R. Co. themselves proposed, a year or two ago, to go largely into the coal-raising business, but appear to have much modified their intentions. The advent of the railway line itself stimulated exploration, of course, through that mineral district, but the greatest growth has come through the operations of the Crow's Nest Pass Coal Company.

This company supplies a large area of that Western country with coal, and likewise supplies Kootenay smelters in British Columbia as well as Montana smelters across the line with coke. It mined last year the great quantity of 742,000 tons of coal, and produced 245,000 tons of coke, for which it has large facilities, namely 424 coke ovens at Fernie, 464 at Michel, and 240 at Carbonado, 1,128 in all. It has trebled its annual exports of coke to Montana, which last year took 109,000 tons. These figures of coal and coke produced are much increased from those of the previous year, and imply the employment of an enormous number of men and very large expenditures. But the company also owns the stock of a local electric light and power company, a telephone system, and a railway six miles in length which connects its mines with the Great Northern Railway (Jim Hill's road), and the C.P.R. Thus it has grown year by year for eight years until now the value of its mines, plant, real estate, machinery, and development is placed at $5,064,000; the stock of the subsidiary enterprises mentioned at $480,000; and its fixed assets at $6,064,000—not including great areas of land which should in the future yield town-sites and further mines.

There was an explosion in the company's mines at Coal Creek in May, 1902, whereby a number of miners were killed, and this resulted in no fewer than 93 actions of damages against the company. No neglect was proven, however, the explosion being purely accidental; and after trial and subsequent appeal the company was relieved from all liability. Costs of this litigation, $32,000, were written off the gross profits of 1904, and after this was done the net profits of the year were found to be $406,000. Out of this sum was paid ten per cent. dividend on $3,476,000 capital stock paid up; and the company has an accumulated reserve fund of $1,764,600 besides $203,320 at the credit of profit and loss account, a very successful and satisfactory showing. What the president's speech says about the quality of product, and the company's aim to produce only coal and coke of a high standard is important in its bearing on the success of the Western smelters it supplies. Referring to the management of the works, and the settlement of difficulties, Mr. Jaffray paid a high compliment at the annual meeting last Friday to Mr. G. G. S. Lindsey, whose tact, legal knowledge, and administrative ability had done so much to produce the satisfactory state of affairs the report exhibited.

* * *

THE FUR TRADE.

There was another series of fur sales held in London from the 17th to 30th of January. After the general revival of business in the trade during the latter part of last year, and the protracted winter, the demand showed considerable briskness and, taken on the whole, the tendency of prices was a distinct advance. Germany and the United States were heavy buyers, France and Holland moderate, while Russia, as might be expected, bought comparatively little. But while there certainly has been what may be described as a flurry in the trade, it should be remembered that the advance had been discounted already. The difficulty to be contended with is that trappers jump to the conclusion that there was a real advance in prices at the sales, compared with what were being realized just before, the fact being that the rise was only in ratio on those of a year ago. For example, there was, it is stated in the reports of the sales, an advance of 40 per cent in mink. It should be taken into consideration, however, that this refers only to skins from some localities; in others the advance was not more than 25 per cent., and common sorts were not received with much favor. And the enhanced value of 40 per cent. in the former was already being given before the sales took place. Some stuff again declined. For example, muskrat declined 20 per cent., musquash also, except Canadian skins, declined 20 per cent.

Skunk brought the prices of a year ago, and some nice skins sold at an advance of 20 per cent., the cold weather just before Christmas having stimulated the demand. England, France, and Germany were all good buyers. Beaver also rose in price, 20 per cent., the advance being not so marked in "firsts" as in "thirds." This skin does not so much affect Canadian consumers however. Good lynx from the North-West of Canada fetched prices at an advance of 20 per cent. Most of it was bought for the United States. American opossum sold for 10 per cent. cheaper than at last year's sales. Raccoon sold a little higher, and was bought largely for the North-West, as well as Europe.

All classes of coat stock for China were very much disturbed owing to war requirements in the Far East. China dogs, China goats, etc., were completely out of the market. Japan has been a heavy buyer of coat stock, and the Government of that country has been buying up all available goat and dog skins, and of course they did not come forward as usual.

* * *

WOOL PRICES.

No unanimity exists among wholesale dealers and manufacturers of woolen goods regarding the prospects for prices of wool in the future, though few will admit that there is much possibility of any strong downward movement for some time to come. Certain dealers believe that the crest of the high prices has been reached already; others that there will be no relief till next spring's yarns have been put in the market. Some again believe that prices will decline owing to the tendency of manufacturers, through stress of present high values, to use substitutes. For the present at any rate, prices of raw material and of finished products are very stiff. Certainly, there is an actual absolute scarcity of wool, not only for present needs, but for prospective. The only remedy would seem to be in a determination of the farmers to raise sheep more extensively; or, at any rate, to raise them for wool, rather than for young carcases. The present profitable character of the wool branch of the farming business will doubtless tend to bring this about.

The talk from the Old Country centres does not conduce to any feeling of confidence in the probability of a speedy decline in price. The Bradford manufacturers, it is said, are refusing orders, and many even refuse to quote prices on staple goods. And all the time the demand seems to be increasing at a rapid pace—too rapid indeed for the makers who do not know where to obtain their raw material. This is particularly the case with goods of a coarser grade, which are now being called for more largely than ever, both for linings and coatings.

Retailers in this country have become imbued with the belief that prices are not at all likely to drop but may rather advance. They are therefore sending in orders at a rapid rate, their stocks, even though some parcels were left over from last winter owing to its severity, having been allowed to become rather low.

* * *

DISHONEST GOODS.

Attention may properly be paid by Canadian exporters to a communication in to-day's issue signed by Ex-Traveller, who gives us his name and whom we know to be a business man of good character, and a salesman of long experience. What we said in the item he quotes was that dealers in Canadian canned goods in the British Islands complained that "neither meat nor fruit products can be relied on as being equal to sample." We have received and printed months and even years ago complaints from the Old Country, and from Australasia, about defects of this kind in Canadian manufactures of several kinds. It is not alleged that our goods generally are deserving of this censure; if they were we could not sell abroad at all, either canned goods or any thing else. But the iniquitous exceptions such as are objected to, and of which Ex-Traveller gives an example, are enough to prejudice Canadian goods generally in the minds of far-away buyers. It is quite possible that there are dishonest United States goods exported, too—for we do not believe American commercial morality any higher than Canadian. But this does not excuse us. Dishonestly packed barrels of apples; untruthfully labelled cans of fruit, or vegetables, or meat, cannot for any length of time impose upon buyers, either home or foreign. And it will be in vain for Associations or Government agents to continue their efforts to build up our export trade with the United Kingdom if we send to that country merchandise inferior to what we give buyers to understand is their real quality. The British market will buy freely of good goods, carefully packed. And no other kind should be allowed to be sent from Canada.

* * *

PUBLIC CARELESSNESS.

In matters of building construction, in protection from dangers of exposed machinery, in decayed or abraded insulation of electric wires, in negligence as to common and apparently trivial causes of fire, the public has grown in large degree callous. We suffer, often seriously, for our remissness in these respects. People and animals are killed or injured, and a frightful deal of loss is suffered because people will not pay attention to self-evident truths and protect themselves and others from fire and accident. True, we have building laws and fire inspection regulations and city by-laws, none of them excessively well enforced as a rule, designed to increase the public safety. But the great public itself cannot be saved from harm if it will not help in the observance or enforcement of such municipal or other orders. And as a matter of fact it is very refractory about such matters, and calls the fire underwriters "unreasonable cranks" and other stronger names for imposing conditions designed to lessen devastation by fire.

A fire-marshal in the State of Ohio, Mr. Henry Davis, is doing good work in arousing the people of his State to the enormity of the fire-waste. One of his circulars, on Spontaneous Combustion, we have already printed; another takes cognizance of dangers from matches. Speaking of lucifer, or parlor matches, he says:—

> "In Ohio the burning of buildings [453 fires in a single year, loss $500,000] by carelessness with these matches is a continuous performance; the attending light is never allowed entirely to go out, because a new fire is started for each sixteen hours. . . Of the 446 fires in Ohio in 1904 from carelessness with matches, 122 were from children being allowed to play with them; 298 were cases in which those of mature years, and presumably mature judgment, were the culprits, and 26 were instances of matches being ignited by rats or mice. . . . The Spectator says a parlor match was responsible for the Sioux City fire, which resulted in the heaviest loss in the West during 1904. A man stepped on the match, and the blazing head flew into a pile of cotton batting near by."

He recommends the discarding of the parlor match and the adoption of safety matches which will light only on the box, and shows that Denmark and

Switzerland have prohibited parlor matches, and even New York passed an (inoperative) ordinance against them. It is not necessary to go so far as Mr. Davis does in denunciation of the cleanly parlor match or its congener, the kitchen stinker, or brimstone match. But the public need to be reminded to carry matches on the person in a metal safe; in the house, warehouses, and especially in factories in metal-covered boxes, and in grocers' stocks in tin-lined and covered cases, or else in compartments walled, ceiled and roofed with metal. Matches should be carefully kept out of the reach of children, mice and rats.

The proper care of warehouses and shops is another matter deserving to be continually impressed upon manufacturers and employees. Paper, straw, sweepings and waste, when they cannot be at once destroyed or removed from the premises should be put in metal bins. So should oiled rags—a prolific source of fires.

* * *

MORTGAGE LENDING COMPANIES.

There are some features in the report of the Huron and Erie, and in the speeches of the president and others which warrant attention. The demand for money has been found good throughout the year, and at somewhat higher rates of interest; the increase in mortgages is over $100,000, and in total assets $203,000. Reserve fund is built up to a round million, and there is besides a profit balance of $29,600. This brings us to notice a gratifying experience of the year, namely, that an item of $13,000 previously set aside to cover possible depreciation in securities was not needed for that purpose, and is therefore placed to the credit of profit and loss. The company's assets earned in the twelve months $402,000 gross and $150,000 net on its capital and rest, $2,400,000 and money borrowed, $5,750,000, showing an average of just about five per cent. The company has almost a million dollars in liquid assets, and is in an excellent position.

It has come about, from causes that need not be dwelt upon at the moment, that the number of loan companies doing business in St. Thomas has been reduced from five to one, and therefore the Huron and Erie have arranged to secure increased business at that important point near Lake Erie. One may note just here that the name of the company was chosen probably because it was doing business between lakes Huron and Erie. The president's figures show that out of its 4,280 mortgages in force 4,212 of them are on properties in Southwestern Ontario. As an illustration of the exceptional promptness in meeting payments comes the statement that compulsory proceedings were necessary in only seven cases. The company has but two farms on hand, 135 acres in all. With much regret, we are sure, the directors parted with one of their number, Mr. Philip Mackenzie, the vice-president, who for forty years had been prominent in the management and whose services were greatly valued, as instanced by a special vote to him. Judge Macbeth was selected to fill the vacancy on the board.

An agreeable experience has been that of the managers of the Ontario Loan and Debenture Company during 1904. They have done a larger business than in the previous year and made more profit, at the same time effecting a reduction in expenses. This sort of achievement is not always possible. The net earnings of the twelve months were $103,251, an improvement over the $97,606 of 1903. After paying the usual dividend, $25,000 has been added to the reserve, making it $625,000 on a paid capital of $1,200,000, and a larger sum than a year ago has been left at the credit of revenue account. The company loaned $766,127 in the year, an increase of $100,000, and had $917,000 principal and interest repaid. Its mortgages now reach a total of $3,661,000, and the aggregate of assets is $3,926,918. Among them we notice a new item in the shape of $91,520 of municipal debentures owned, apparently a step in the direction of keeping a larger proportion of its assets in liquid form. The obligations of the company to the public are $2,033,757. These consist of $1,026,088 in sterling debentures, $455,738 in currency debentures, $525,097 deposits, plus interest and commissions. The affairs of the company are in a very satisfactory shape.

In the case of the Toronto Mortgage Company the sixth annual report exhibits results which resemble somewhat closely those of 1903, the gross interest earnings being in the year last named, $115,986, and in the year now under review $117,093. Adding the balance brought forward of $36,054, the directors had $153,148 to deal with. After paying interest on debentures and deposits and costs of management, six per cent. was divided (being one per cent. by way of bonus, added to the usual dividend of five), there was enough left to add $25,000 to reserve and to carry $19,488 forward. Again, as was done last year, the satisfying declaration is made that "the revenue taken credit for has been actually exceeded by the cash receipts for interest and net rentals." It is noteworthy too that all the capital stock, $724,550, is now fully paid up, and that the former liability thereunder has been extinguished, the debentures and other obligations of the amalgamated companies having been discharged. It is of interest to compare the real estate held by the company five years ago and now. On 1st January, 1900, there were 767 houses and shops in Toronto held by this company for loans—there is now but one; there were 88 farms and suburban properties and farms—there are now but six; there was $60,950 worth of vacant land—there is now but $500 worth. Thus the burden of real estate which was so heavy has been reduced to a comparative trifle. This of itself is an evidence of the improved condition of affairs in city and country. The president was justified in congratulating the shareholders on the prosperous condition of the company.

* * *

UNITED STATES EXPORTS OF MANUFACTURES.

The Bureau of Statistics report on the export of manufactures from the United States makes a remarkable exhibit. It shows that manufactures exported from that country last year exceeded $500,000,000 in value, compared with $421,455,000 in 1903, and with $441,406,000 in 1900, the highest point until then recorded. The increase of last year over the one immediately preceding, $81,000,000, was the largest ever recorded for one year. United States exports of manufactures in 1894 amounted to only $177,800,969. Iron and steel products were responsible for the increase last year to the extent of over $29,000,000. Copper products increased from $43,509,000 to $74,816,000. It should be stated, however, that the large increase in exports of iron and steel was due to a heavy falling off in domestic consumption. Beyond iron and steel, copper, and mineral oils, which also showed great gains, the increases were usually only moderate, and it may be remarked that these three products are just the ones which, comparatively speaking, require the least labor in manufacturing. There was an increase of something over $6,000,000 in cotton goods, due largely to a revival in the Chinese demand, while, on the whole, the position of the United States manufacturers and exporters in this line is not particularly encouraging, considering their advantages. In agricultural implements there was a slight decline. The export of leather goods increased only about $3,000,000.

* * *

BANK OF NOVA SCOTIA.

On Wednesday last was held in Halifax the annual meeting of the Bank of Nova Scotia. A resolution was adopted authorizing the directors to increase the capital stock of the bank from $2,500,000 to $3,000,000, should they deem it advisable. The general manager, Mr. H. C. McLeod, expressed the opinion that there would likely be before long legislation dealing with the growth of reserve of banks. The present law says the reserve must not exceed double the amount of capital stock. In his address he further said that whatever changes might be made in the future, if any, the name of the bank would never be changed but the institution would always remain "The Bank of Nova Scotia." Strong satisfaction was expressed by several of the shareholders with the report submitted.

* * *

NATIONAL TRUST COMPANY, LIMITED.

The growing disposition, business-like and commendable as it is, of utilizing corporate capital instead of individual effort in executorship, trusteeships, and the like, helps to account for the progress of trust companies. The National Trust Company, for example, has during the year last past increased its assets under administration by a million dollars. This company exhibits separately, and properly so, in its financial statement, 1st, its own assets and liabilities; 2nd, funds received for investment under its guarantee and the securities held in trust thereof, and 3rd, the aggregate of estates and trust and agency funds received and assets held against its various administrations, executorships, and agencies. The aggregate of assets so held is $7,813,538, and the president declares in his address that they are of a uniformly excellent character. The third department shows $3,633,393 in estates, trust and agency funds under administration by the company, which has an extensive directorate and is capably managed. The profits continue to increase slowly. Enough was made last year to pay six per cent. dividend, to write $10,000 off safe deposit vaults and office premises, and to increase reserve fund by $30,000 to the sum of $350,000, besides carrying $4,424 forward.

* * *

CONFEDERATION LIFE ASSOCIATION.

In the year just past the Confederation Life wrote the largest amount of new business in the history of the company, the increase over 1903 in this particular being close upon a million dollars. And the total of insurance in force exceeds thirty-nine millions, the gain over the previous year being the handsome one of $2,660,464. These figures attest the reliance of the Canadian public on one of the long-established life assurance institutions of the country. As is usual in the case of this company the income from interest and rents sufficed to pay all adjusted and accrued death claims and to leave a good surplus over and above. Payments to policyholders, including death claims, $360,190; endowments, $237,233; annuities, $19,208; surrendered policies and cash profits, amount to the handsome sum of $731,391. The cash profits paid out amounted to $65,590, which have doubtless been welcome to many a policyholder.

The balance sheet makes known that the assets have increased from nine and a half millions to nearly ten and a half. Seven millions of them are in mortgages, bonds, and debentures. On the company's own stringent basis of valuation, the surplus is $610,495, the reserve on policies and annuities being $9,519,733. There is here a gain of $75,000 over the previous year's result. If the Government standard had been used the liability under this head would have been only $9,269,595, and the surplus therefore $860,633. The company's full report, which is more voluminous than the condensed statement we print, goes into details that show the character of the company's business. The disbursements, for instance, are particularized and the assets subdivided in their listing in a plain and satisfactory way. Not all companies make their accounts equally plain. The Confederation Life, entering its thirty-fourth year, offers resources and plans which may well attract the Canadian who is looking for life assurance.

* * *

AETNA LIFE INSURANCE CO.

Life, Accident, Liability and Health Insurance—such is the comprehensive announcement of the scope of the Aetna Life's beneficence. And it ought to be able to do them all well for it has the benefit of skill, experience and abundant capital. For forty-five years this old and strong company has been growing in reputation and solidity, and it is able to make the boast that since 1850 it has paid to policyholders the large sum of $145,918,000. The business of the past year has resulted in an increase of assets, in premium income, and in life and accident insurance in force. And as to its strength, it has besides its legal reserve and a two million special reserve a guarantee fund of six millions in excess of requirements. Messrs. Orr & Sons in Toronto, and Mr. Christmas in Montreal, and the Canadian agents generally have good opportunities in working for a company that can show so many advantages.

* * *

BOOKS RECEIVED.

A deep Fall-green background of maple-leaves, against which are relieved trefoil groups of Spring-green ditto, decorates the front cover of "Canada First; the Canadian Preference League Magazine," the first issue of which, that for February, reached us too late for notice last week. This is an attractive and well-printed periodical, Canadian in tone, devoted to the extension of the idea that Canadians should, other things being equal, buy and consume home-made goods But, sensibly says the editorial on page 3: "We do not believe in buying Canadian-made articles at all costs and at any hazard." And on the same page are some strong words of censure for the scalawags who try to "cover up a defect of quality or an exorbitance of price with the cry of Made-in-Canada." The symposium devoted to How to Build up Canada will be found interesting: it is taken part in by W. B. McMurrich, Arnold Haultain, R. W. Leonard, and W. T. Jennings; and we wish we had room to quote Mr. Haultain's racy paragraphs. "A Literary Chat," by Prof. Pelham Edgar, is out of the common; the pages on "Canada's Forest Wealth," as well as those on "What Canadians Buy," are instructive. A feature to be commended is the department giving Canadian Club Addresses, the first of which is Professor William Osler's "Canada's Triple Relationship." A story by C. G D. Roberts and poems by Duncan Campbell Scott, Wm. Wilfrid Campbell, Mrs. Sterry Hunt and Archibald Lampman, well known Canadian writers, are appropriate to such a publication. Among the illustrations are portraits of our new Governor General and Lady Grey. The latter has a fine face, full of character. The editor of this creditable magazine is Mr. F. Page Wilson, and the business manager Mr. H. A Drummond. They and their collaborators merit praise for this first issue, which leads us to hope for a long continuance of what has been so well begun. The subscription, which includes membership in the League, is one dollar a year. The office is in the Home Life Building, Toronto.

TORONTO BOARD OF TRADE.

THE SIXTIETH ANNUAL MEETING.

On Friday last was held the sixtieth annual meeting of the Toronto Board of Trade, and about fifty members were present. In his address the retiring president, Mr. J. F. Ellis, called attention to the marvellous changes that had taken place in Toronto in a lifetime. At the time the board was first incorporated there was not a railway entering the city, nor a telegraph service. In winter the mails from New York and Montreal were weeks in reaching Toronto. The founders of the institution, said Mr. Ellis, mentioning the names of George Percival Ridout, Thomas Clarkson, Peter Paterson, John Mulholland, and William Leadly Perrin, were far-sighted, patriotic, unselfish citizens, working for the public welfare.

In reviewing the year 1904, the Toronto conflagration of April 19th was mentioned as the striking event. Many members of the board were heavy sufferers, yet despite this handicap the board could point to the year as being fruitful in measures of importance to the city. The president expressed satisfaction that money had been voted for installing high pressure water mains in the business section of the city. This would lead to a reduction in rates.

JAMES D. ALLAN, PRESIDENT TORONTO BOARD OF TRADE.

Speaking of the proposed Esplanade expropriation, Mr. Ellis said, and we agree with him, "I hold that the railway company should be obliged to grant substantial damages to the men whose property is thus to be confiscated, sufficient in fact to compensate them for the disturbance of their business plans during the time the land has been tied up in dispute."

The questions of level railway crossings was one that pressed for immediate action, and the speaker urged that legislation should be sought for the incorporation of an independent commission on a permanent basis, clothed with full power to deal with the whole question of level crossings, as now obtains in the city of Buffalo. He further declared that a recent visit to the Western Cattle Market convinced him that the removal and amalgamation with another institution on a fair business basis as to rates, and the utilization of the property for other purposes, would be in the best interests of the city.

Speaking of the purchase of gas stock by the city council, which was authorized by the ratepayers, he thought the civic investment should be limited to enough to give the Mayor representation on the board of directors. Indiscriminate speculation in Consumers' Gas stock by the corporation of Toronto, would, he believed, be a very unwise move.

A paragraph about Canada and Mexico contained the following:—"The growing importance of Mexico as a field for profitable investment has been recognized by Canadian capitalists, who have been exploiting it. I feel that the Government is alive to the fact that Canada should do all in her power to foster the trade, and I am sure the Board of Trade can be depended upon to render every assistance towards that end."

The Imperial unification of the Empire, Mr. Ellis reminded his hearers, was a question that had engaged the attention of the board for years. In October, 1903, resolutions favoring Mr. Chamberlain's policy were unanimously adopted. And he took it upon himself to say that if a comprehensive preferential tariff were arranged this country would be among the first to approve of it."

A tribute to the secretary, Mr. F. G. Morley, and the incoming president, Mr. J. D. Allan, concluded the address.

The following are the officers of the Toronto Board of Trade for the current year, all having, except the Exhibition Board, been elected by acclamation: President, James D. Allan; first vice-president, Peleg Howland; second vice-president, R. C. Steele; treasurer, George Edwards. John F. Ellis, Joseph Oliver, Charles S. Meek, John Pugsley, Hedley Shaw, W. J. Gage, John D. Ivey, Noel Marshall, W. D. Ross, C. W. I. Woodland, Hugh Blain, Archibald Campbell, M.P.; R. J. Christie, E. J. Dignum, W. F. Cockshutt, M.P.

Board of Arbitration:—D. O. Ellis, J. N. Hay, W. E. Milner, D. Plewes, Jr., H. N. Baird, J. C. McKeggie, Thomas Flynn, W. D. Matthews, D. O. Woods, S. McNairn, C. B. Watts, John L. Fisher.

Representatives on Harbor Committee:—J. H. Hagarty, J. T. Mathews.

Industrial Exhibition Board:—C. W. Band, S. E. Briggs, John Carrick, R. Y. Ellis, Andrew Gunn, Andrew Duncan.

* * *

THE NEW PRESIDENT TORONTO BOARD OF TRADE.

Mr. J. D. Allan, who was last week elected president of the Toronto Board of Trade, spent his early days gaining a knowledge of lumbering, milling, and general merchandise, shipbuilding, etc., and to this wide and close experience with various forms of business life may perhaps be attributed his versatility, which has often been noticed. He has been connected with Toronto business life for thirty years past, and has always taken a deep interest in matters concerning its commercial and general progress. He first became prominently identified with the work of the Board of Trade in opposition to the life assurance scheme of ten or twenty years ago, assailing it on the ground that insurance was no part of the legitimate business of the Board of Trade. Ever since that time Mr. Allan has been on the Executive in one capacity or another. During four years he represented the Board on the Executive of the Technical School, and had much to do with introducing the Commercial Department which has proved so successful. He only retired from that position when the school was merged into the general educational system of the city. Most of our readers will remember his address on the subject of Technical Education, which was widely quoted, not only in this country and the United States, but in Great Britain. The London Chamber of Commerce sent over for several copies. Mr. Allan has always been a busy man and has connected himself with several interests outside his own business. The Union Stock Yards at Toronto Junction is an instance in point, he being the president of that important undertaking. We may mention that Mr. Allan has the advantages accruing from wide and frequent travel, and from a knowledge of several foreign languages, so that his conversation and opinions are of peculiar interest.

* * *

WINNIPEG BOARD OF TRADE.

On Wednesday afternoon, Feb. 8th, was held the twenty-sixth annual meeting of the Winnipeg Board of Trade. The gathering was in the board room in the Grain Exchange building. A review of the work of the Board for the past year was given, the retiring president's address was delivered, routine business transacted, new members admitted, and finally the officers for the ensuing year elected. Some sixty members were present.

The retiring president, Mr. H. W. Hutchinson, delivered a lengthy address, and he began by disclaiming any intention of referring at length to matters treated in the report of council, which we have summarized elsewhere in this issue. He spoke about the growth of Canadian trade; told of the remarkable progress of the North-West—into which 130,329 settlers had come in the last fiscal year, i.e., 51,000 British, 43,000 Americans, 36,329 from elsewhere; Manitoba wheat in the United States; spoke of grain inspection; transportation and the growth of railway mileage and equipment in the prairie country; Winnipeg's advancement; better equipment for fire protection in the city; St. Andrew's Rapids improvements; the growth of membership by forty during the past year. It was an interesting story. The address was well received, and the chairman thanked for his services to the Board during the year. The council's report was adopted as read. The treasurer's report showed a net gain of $567 for the year, and a balance in hand of $2,126.

Charles N. Bell, Secretary Winnipeg Board of Trade.

The election of officers was then proceeded with, and resulted as follows:

President, A. L. Johnson.
Vice-president, G. F. Carruthers.
Treasurer, Andrew Strang, re-elected.
Secretary, Charles N. Bell, re-elected.

Council, H. W. Hutchinson, J. W. Dafoe, W. Sanford Evans, F. W. Drewry, J. H. Ashdown, William Georgeson, H. M. Belcher, D. W. Bole, M.P.; John B. Persse, John Love, D. K. Elliott, F. H. Heubach, E. D. Martin, D. E. Sprague, John Aird, and T. R. Preston.

Fourteen standing committees were chosen.

Mr. Hutchinson gave a dinner, in the evening, at the Manitoba Club, to the members of last year's council.

The incoming president, Mr. H. L. Johnson, has won his position by faithful and persistent work. A willing and energetic member of council, he was always to the front when measures were to be considered, and gave ungrudging attention to the business of the Board. For years he has been manager at Winnipeg for the Ames-Holden Company, is of good business capacity, and has many friends. To our regret, Mr. Johnson has no photograph of himself to send, else it was our intention to have reproduced it for this issue. We are able, however, to give a portrait of Mr. Charles N. Bell, for many years the well-known secretary of the Board and a prominent personage in the history and development of Manitoba.

* * *

NORTH OF ENGLAND LETTER.

Reports from Canada's Commercial Agents in all parts of the world receive publicity in this country, and some that we find in the official journal of the Board of Trade are genuinely informative. But of the agents in our midst, one ventures to say that we hear too little, and that it were better for both nations if we were to hear and see more. Mr. J. B. Jackson, of Leeds, has been addressing Chambers of Commerce within his own sphere of influence, and it is highly likely that his activities will have a good effect. In many other ways agents can keep their office before the public. Whether your neighbors in the States select their Consuls because of their oratorical gifts is not perfectly certain. Yet it is not to be denied that at functions, public as well as commercial, the speech of the local American Consul is quite a feature of the evening. Why should not your agents be encouraged to take a hand in the social side of public life? To an extent they do so already, but it is demonstrable that the silver tongues of United States Consuls are better known than the voices of Canada's agents.

There are reasons for this state of things, apart from any questions of individuality. Every exporter comes to know the United States Consul as a matter of necessity. So many questions arise out of tariff schedules, and so much supervision is bestowed on invoices, that it is impossible not to have more affairs to transact at the Consulates than most people care to trouble with. As the officers themselves are, with rare exceptions, the soul of courtesy and ready to oblige all-comers, they have good opportunities of first making, and then improving acquaintanceships of value to them in discharging their own duties. No invidious comparison is intended; it is recognized that the agencies are of much more recent growth than the consulates; but some contrast is inevitable, and it is the regrettable truth that your agents are some distance "out of the swim." It would pay Canada over and over again to have all her agents in most intimate touch with all phases of English life. The means may be left to them or their official superiors to devise with a simple intimation that the *rapprochement* is emphatically worth contriving.

Be it said that official England has little to teach Canada in the business of appointing and maintaining Commercial Agents. We have eight or so in various parts of the globe and two out of the number are conspicuously willing and able men. How the others attend to particular enquiries, made privately, one does not know. But such general instruction as they vouchsafe to the trading body is not so important that it could not handsomely be spared. Although our consular and commercial reporting system is thoroughly weak and futile, we are denied the half-promised Ministry of Commerce. Or so well informed rumor runs, and perhaps the disappointment need not be taken bitterly. In truth, the scheme outlined was little better than a change of names and an enhanced salary list for the Board of Trade. Reform can be dispensed with until a clean sweep and a new organization on sound principles can be effected.

The woes of tanners in Canada are shared to the full by their English compeers. In truth the business is one of extreme difficulty, and our tanners are not at all relieved to know that we import some 16 million dollars' worth per year of the hastily made leather of the United States. Boots, it would seem, are to be dearer, although our boot-makers are certainly reluctant to pay the prices producers ask for new contracts. Some tanning firms, rather than sell at the rates ruling, are declining orders which have long been theirs. Those who use wet hides off native cattle, or off transatlantic beasts killed at Birkenhead, make a singular complaint. They insist that they are being denuded of their natural supply by the export of hides from Birkenhead. Enquiry at the United States Consulate indicates that the import into the States is not considerable, as the tariff of 15 per cent. interferes. It is supposed, therefore, that Canadians are paying higher prices for hides off animals killed on landing than the English tanner cares to give.

Cables tell of a remonstrance addressed by Mr. Sydney Fisher to the Home Government, provoked by some remarks of Mr. Chaplin, our Minister of Agriculture. The latter is understood to have said that Canadians were well content with the state of affairs which prevents the importation here of Canadian live cattle. Mr. Fisher, of course, demurred. Perhaps it is to the point to say that Mr. Chaplin is the chief "farmers' friend" in our Government circle. He is a squire of the portwiniest kidney, a Protectionist of the most uncompromising type. Ireland resents any suggestion of removing the embargo, and there are agricultural interests in the rest of the kingdom opposed also. But the question is one that is likely to be left to the mercies of the next Liberal administration. How they will deal with the subject is a puzzle that it were idle to attempt to unravel.

By advertisement in our daily papers, manufacturers desirous of establishing plants in the Dominion are entreated to investigate the merits of the Shawinigan Falls location.

Stockbrokers complain loudly of the apathy of speculative investors. Critics write mysteriously of sinister subterranean movements intended to hold in check the prices of "Kaffirs" as the South African mining shares are known. Even in less questionable financial operations there is a lull portending a temporary absence of loose money. Hudson Bay shares have been in active movement under the influence of this rumor and that. But it is to "Canpacs" and "Trunks" that the fevered gambler turns for an excitement which is good neither for him nor for the best interests of Canada. Business in these shares is reputed to be, for the present, in the hands of professionals. Perhaps that fact explains why some financial organs are "talking biggity" about the dazzling developments that must shortly come to pass in the Dominion, and must wax greater during the next ten or fifteen years. It could be wished that the advocacy came from less suspected quarters.

NORTH COUNTRY.

Manchester, February 3rd, 1905.

HALIFAX LETTER.

Fire insurance continues to be a burning question here—with no pun intended. The general impression was voiced at a meeting of the city council recently, when an alderman asked the underwriters to explain why there had been a reduction in the rates of St. John, because they had purchased a chemical engine, while this city, with two chemicals, was refused a reduction? It is considered unfair discrimination, because the Halifax department is admittedly better equipped than that of St. John. The Board of Trade Committee has had the matter in hand with the underwriters, but has not made much progress. The latter have decided to re-rate the city on a new basis, but the result will be to leave the rates practically as they are at present. It will be a change, but no reduction. The underwriters do not seem to regard risks here as desirable, consequently the demand for insurance exceeds the supply.

W. R. McInnes & Co. is a new stock and bond broking firm which has begun business in the offices formerly occupied by E. T. Smith, who failed disastrously in the same line some months ago. W. R. McInnes, who was in the office of the Furness line of steamships for a number of years, is the sole partner.

The Halifax Academy of Music, after many years, is at last beginning to pay a dividend. The net profits last year were $6,800, and a dividend of five per cent. was declared on both common and preferred stock. Last year a dividend of three per cent. was declared, these two being the only dividends since 1877.

The twelfth annual statement of the Eastern Trust Company shows that 1904 was the best year in its history. There is a large increase shown in earnings, as well as in the number and amount of estates held by the company. Total assets are now $3,706,983, and the reserve fund is $14,000.

J. C. McIntosh, who has been doing a banking and broking business in Halifax for many years, has admitted to partnership his son, A. F. McIntosh; his son-in-law, J. E. Wood; and W. H. Wetherby, his accountant for twenty years.

The Union Bank of Halifax has declared the usual half-yearly dividend of 3½ per cent.

Isaac Greenwell, of Sydney, has been appointed by the Provincial Government an official assignee for the county of Cape Breton. He will act for Sydney and surroundings and northern Cape Breton. Stuart McAulay, of Glace Bay, will act for Glace Bay and the southern sections.

The steamer Baines Hawkins recently took a cargo of codfish from Cape Breton to Gloucester, Mass. This incident has caused much comment, this being the first cargo of fish ever brought to that port in a foreign (i.e., other than American) steamer. Owing to the diminution of the Bank fleet sailing "out o' Gloucester," and a yearly decreasing catch, it has been found necessary, in order to hold their trade, to bring in fish caught by outside fishermen, even if they had to pay the duty.

Halifax, 13th February.

CANADIAN LIFE INSURANCE OFFICERS' ASSOCIATION.

The regular meeting of the Association took place on the 16th inst., in the rooms of the Insurance Institute of Toronto, the president, Mr. T. Hilliard, occupying the chair.

The other members present were: J. K. Macdonald (Confederation); David Dexter (Federal); G. B. Woods (Continental); J. F. Junkin (Manufacturers); T. Bradshaw (Imperial); C. H. Fuller (Continental); A. McDougald (British Empire); L. Goldman (North American); P. C. H. Papps (Manufacturers); Col. W. C. Macdonald (Confederation); J. G. Richter (London); John Milne (Northern); E. Marshall (Excelsior).

Consideration was given to the proposed revision of the General Insurance Act, and the obtaining of special legislation in Ontario respecting life assurance. Practically unanimity exists amongst the companies members of the Association, regarding the elimination, in competition, of competitive and comparative literature, and it is believed that since this condition came into effect good results have followed.

It was reported that the difficulty which had existed in the Province of Nova Scotia amongst doctors, relative to the fee for medical examinations, had been satisfactorily adjusted.

The next regular meeting of the Association takes place in June.

LINDSAY BOARD OF TRADE.

Judging from the character of several of its prominent men and from the aspect of the town one would not expect to find Lindsay a place which would not maintain an active Board of Trade. But looking back over our fyles we cannot find any record of a meeting of the Lindsay Board of Trade since 1899. A dispatch from that place describes a large meeting of business men there on 2nd February for the purpose of resuscitating the Board of Trade, which had been in a state of suspended animation for nearly three years. Accordingly, the board was reorganized, and has a present membership of forty-six. The following officers were elected: President, Robert Kennedy; vice-president, Alexander Fisher; secretary-treasurer, J. P. Donald. Council—Messrs. N. Hockin, John Carew, H. J. Lytle, E. Gregory, Joseph Staples, Richard Sylvester, R. Bryans, W. McWalters, Thomas Brady, W. F. Sutcliffe, R. M. Beal and Lorne Campbell.

* * *

CHATHAM, N.B., BOARD OF TRADE.

The annual meeting of the Chatham, N.B., Board of Trade was held on the 28th ult., Lieut.-Governor Snowball in the chair.

The secretary read a communication from the Maritime Board, giving the resolutions that were passed at its last session, and a letter from the Windsor (Ont.), Board of Trade asking co-operation in a movement looking to the acquisition and operation of all telephone lines by the Government.

It was resolved that the Dominion Government be memorialized to grant $1,000 a year to the Miramichi Steam Navigation Company for carrying mails during the open season to Bay du Vin, Burnt Church, and Escuminac.

W. L. T. Weldon regretted that the proposal that the Government acquire the telephone lines had been given no consideration. He thought the Government should at least own the long-distance telephone lines.

A number of new members were proposed and elected.

The following are the officers elected: Hon. J. B. Snowball, president; D. P. MacLachlan, vice-president; James Nicol, secretary; V. A. Danville, treasurer; George Watt, auditor. Mr. Watt was chosen representative on the council of the Maritime Board.

* * *

GALT BOARD OF TRADE.

The Galt Board of Trade has decided to take up the problem of overcoming the dearth of dwelling-house accommodation in that town. The Dominion Government have written to ascertain the real nature of the inability of the town of Galt to house workingmen, and are anxious to know what action, if any, will be taken as a remedy. The course of the Toronto city council in asking the Legislature for power to put up a large number of houses is noted, and as private enterprise in this direction appears to be very stagnant, it seems to the Board of Trade to be the only practical way to overcome the difficulty for the municipality to embark in the real estate business itself.

* * *

ANSWERS TO ENQUIRERS.

Brant.—(1) The New York Life is an amply safe company. (2) It is preferable to some, but not to the one you mention. (3) United States companies do have to deposit security with our Canadian Government if they operate in Canada, and so do the British companies. The Mutual Life of the United States has $2,300,000 deposited at Ottawa; the Equitable, $1,900,000; the New York Life, $1,357,000; the Aetna close to $4,000,000, the Standard of Edinburgh nearly $6,000,000, and the British Empire Life, $400,000.

R. S. S., Winnipeg.—What your letter tells us is peculiar, to say the least. But it involves no legal wrong, however irritating it may be to individuals. There is no room for public criticism in the affair. You must remember that, as a Yankee writer put it: "Them as has, gits;" and although worthy poverty seems to have got unhappily the worst of it, there is no remedy but patience and hope.

Subscriber, Rossland.—In the Monetary Times for 25th December, 1903.

Banker, Montreal.—There is not a single copy of that issue left.

Prospector, Hull, Que.—(1) If the property is on the Ontario side of the Ottawa, apply to the Ontario Bureau of Mines, Toronto; if on the Quebec side, Mr. J. Obalski, C.E., would be a good authority. (2) Write to Major R. G. Leckie, at Sudbury.

C. B., Calgary.—No, it was none of our staff. It was Mr. Edward Gurney, who at a banquet of the Manufacturers' Association in November, 1903, made use of the expression. He said that on his return from the trip to the Pacific, "I have been so impressed since that time that I have seen men as trees walking."

* * *

ROYAL BANK OF CANADA.

The annual general meeting of shareholders in the Royal Bank of Canada was held last week in Halifax, and Messrs. Thomas E. Kenny, president; Thomas Ritchie, vice-president; Wiley Smith, H. G. Bauld, and Hon. David MacKeen were re-elected to the board of the bank. At the same time Mr. H. S. Holt, president of the Montreal Light, Heat and Power Company, and Mr. James Redmond, vice-president of the Ames-Holden Company, Limited, were elected directors.

* * *

WHOM TO CANVASS.

An interesting compilation has been made by a Vermont insurance company, the National Life, of the 11,410 new insurants in that company last year. It may afford life agents elsewhere an idea as to the field of industry, or commerce, or civic life, or the professions, in which to look for business. First in the list come farmers, to the number of 2,266, or say twenty per cent.; merchants, 1,141, about ten per cent.; accountants, book-keepers, and clerks, 1,089; professional men. 779; teachers and students, 544; railroad and steamboat officials and workers. 464; women, whether housewives, milliners, or dressmakers, 435; commercial travellers, 244. Then come editors and publishers—government and municipal officials—contractors and builders—livery men and expressmen—telegraph and telephone officials. These various classes make up about 8,000 to 9,000. There is quite a variety of mechanics in the list, which closes with designers and artists as the least numerous.

* * *

THE FIRE INSURANCE SITUATION.

Editor, Monetary Times:—

Sir,—I notice in your paper of 3rd inst. a communication under the above heading, referring to the competition at Toronto for unlicensed companies. It may not be known, however, that in other parts of the Dominion the companies which are licensed are exposed to competition from Ontario mutuals licensed to transact business in Ontario only.

On the 17th December last a fire occurred in St. John, and it was found that the clothing stock of Mr. L. M. Cohen, or the American Clothing Company, was insured in the York County Mutual of Ontario.

The circumstance was brought to the attention of the Superintendent of Insurance, at Ottawa, and a reply received from the actuary in his office stating that the Superintendent was absent at the time and the matter would be placed before him on his return. It was further stated that the York County Mutual Fire Insurance Company was an Ontario company licensed under the Ontario Insurance Act, that it had received no license from and made no deposit with the Dominion Government, and was not authorized to transact business outside the Province of Ontario.

The actuary stated further that he was sending a copy of the Insurance Act, Section 22 of which would give information relating to the penalty for anyone transacting any illegal business. This has not been received.

Nothing further has been heard of the matter, and the presumption is that the York County Mutual is to be permitted to continue transacting business outside the Province of Ontario without being put to the trouble of making a Dominion deposit.

It may be advisable to make the law more restrictive with regard to companies outside the Dominion; but surely the provisions of the present law, as to the provincial companies which have not made the necessary deposit at Ottawa, should be enforced.

I enclose my card, and am, yours truly

St. John, N.B., NEW BRUNSWICK.
7th February, 1905.

DISHONEST CANNED GOODS.

Editor, Monetary Times:—

Sir,—Referring to an item in your valuable paper of 3rd inst., respecting "quality of Canadian canned goods sent to British market," on page 1,024, it is very unfortunate that our Canadian packers cannot be either sufficiently careful in labelling or they wilfully substitute inferior goods.

I am an old grocery traveller, and having a large family acquired the habit of buying my canned goods by the case, and, since leaving the road, still continue this habit. I very much regret to say that most canned vegetables and fruits are not uniform, often not two cans alike in quality. At the present time we have in our dwelling a case of peas, supposed to be of a very choice Canadian brand and labelled "Petit Pois;" whereas about one-third the cans have proved to be nothing but common large Marrowfats.

No doubt the "Old Country" grocer gets our goods, some which turn out much after this stamp; and we cannot blame him if he buys "American" goods, which almost invariably turn out as represented on the label.

Feb. 10th, 1905. EX-TRAVELLER.

UNCURRENT COIN.

Editor, Monetary Times:—

Sir,—I would like to draw your attention to the circulation of Straits Settlement silver in our country. There are parties, in Vancouver or on the Coast, who bring the coin into the country and have agents all through British Columbia and Alberta, who sloff it off on the public at par. I understand these agents obtain the coin at about 35 cents on the dollar. I think the British Columbia Government's attention should be drawn to the case.

J. H. FARMER.

Frank, Alta., 9th February, 1905.

MUTUAL FIRE UNDERWRITERS.

Within a few days, the annual meeting of the Mutual Fire Underwriters' Association of Ontario will be held. This has an entirely voluntary membership. Its circular says: The Mutual Fire Underwriters' Association is entirely a voluntary membership. We aim to draw together in mutual helpfulness all mutual fire insurance companies, that by fraternity of interests and experience every company may be strengthened, and that by mutual good understanding and co-operation we can more easily secure amendments we find from time to time necessary to the Insurance Act.

Mutual Fire Underwriters' Association of Ontario; Levi Stauffer, president; Hugh Black, secretary, Rockwood, Ont.

Number of policies in force	214,564
Income for the year	$ 1,641,426
Expenditure for the year	1,481,066
Assets	7,865,444
Insurance carried	307,244,721

These figures are taken, Mr. Hugh Black says, from the last Ontario reports.

ELMIRA BOARD OF TRADE.

The annual meeting of the Elmira Board of Trade was held in the reading room of the public library on February 2nd, 1905. Mr. J. S. Weichel, the late president, took the chair, and the secretary, Mr. A. Werner, read the minutes of the last annual meeting, which were adopted. The chairman gave a report of the work of the council and members for the past two years, and spoke of what had been accomplished by the hearty co-operation of the citizens working in harmony with the Board. Various members present spoke of the current affairs which needed attention; among them Messrs. J. P. Luckhardt, C. W. Schierholtz, M. L. Weber, W. H. Otto, C. Heimbach, A. J. Kimmel, A. Werner, and I. Hilborn. This southwest Ontario town is not unfairly called "Enterprising Elmira." It already has some important industries, and hopes to add to them, and is besides a good market for farm produce as well as a depot for agricultural implements. It looks to have shortly C.P.R. connection and main line, Goderich to Toronto. The officers elected are as under: President, W. H. Otto; vice-president, A. J. Kimmel; secretary-treasurer, A. Werner; auditor, R. H. McMickling. We regret that we cannot make room for the names of the various committees of the council, which are six in number.

A 1905 CONVERSATION.

"Toronto is the Home o' Hope, I'll tell you, for young cubs that want to cut it rich on a small screw."

"Why, how's that?"

"It's just the woosiest town I ever struck for cheap credit. They're all in it, the shop keepers, I mean; but I guess the tailors are a little the worst."

"What can you know about such things, when you say you pay cash for your clothes?"

"Know! Why, Great Scott, young fellow, don't I see my next door clerks' bills. And haven't I proposed to a chum to go into a drug store to buy stamps, and had him say to me: 'No; don't let's go in there; I owe that fellow two dollars for cigarettes and perfume." And this kid of a junior getting six dollars a week. And don't I know of an airy cub with a bill of $60 at Ready Trust's on Yonge Street, since 1903, who is paying five dollars a week on it. Oh! *don't* I know it."

"Well, it seems to me these tailors and other tradesmen must encourage young men to run bills."

"Why, cert; the suckers do it to get trade, and some of them seem to be satisfied to get four or five dollars every thirty days on account. And the young bounder whose salary is thirty or forty a month, thinks he's smart to be able to run his face for his clothes—or for his two-dollar ties—or his ten-dollar meerschaum—or his twenty-dollar fur gauntlets."

"But this is all wrong. What right has a junior clerk on four hundred a year to such extravagances?"

"Search me. I'll never tell you. But the town is just rotten with this kind of thing. Cabs; suppers at McConkey's or Webb's (but they are cash); two-dollar seats at the theatre (they are cash, too), little games at cards, and so on; and you bet these things mean borrowing money."

"What! do you mean to say that in addition to borrowing credit, the young men of to-day borrow money from one another as well?"

"Yep. It's this way: Tom sees Harry doing it, and like the son and his father in the story, he 'wants to see the folly of it, too.' Then Dick takes a hand and gets into the game. I know it, I tell you. Haven't I had these soft kids try to borrow money off me? You just bet, I have; and other shysters, older and scalier, cleaned out the night before, make a mealy mouth and promise to cash up on Saturday. But I'm out of it; they don't come it over me any more. They've socked it to me already."

"Yet there must be exceptions—young men, who do live within their means, and who would be ashamed to borrow money or be dogged by collectors."

"Oh! sure; plenty of them, clean fellows, who are up-and-up, afraid of debt and leary of speculation. The town couldn't run if there weren't. Such chaps as Charlie, who pays his board to the day, smokes a pipe instead of cigars, and goes up Church

BANKERS

MONTREAL—Molsons Bank; Imperial Bank of Canada.
NEW YORK—The Importers and Traders National Bank
LONDON ENGLAND—The National Bank of Scotland.

Street for a suit of clothes at $20 instead of to some swell tailor farther West that would charge him $45. I would lend that fellow a V any day in the week, if he wanted it, for he's straight, all right."

"Dear me, it is hard to think that all you have said is true about such prodigality. Do the employers of young men know about it?"

"Well, you've only my say-so for it. But go and ask ——— of your cousin's firm. He's onto the racket, altho' he don't go round with the boys much, and he don't try to swell it on a thousand a year. He pays as he goes and keeps his weather eye open. He's been bled by some of the youngsters around him, but has quit on the lend, nowadays."

"Really, I am surprised. I was told in ——— that Toronto was such a fine place, that I did not expect to hear of so much looseness, as I call it. This city has the reputation of high moral tone."

"Oh! shoot the moral tone. It is no better than ——— or ———; I have lived in both. There's *tone* here, all right enough, dead loads of it, but it ain't the kind of tone to make people poney up their debts, or live inside their incomes. Perhaps if you get higher up or among older people you'll find things better; but I'm telling you what I've found out in these last two years among the young fellows. There are plenty of chaps who are not really scalawags, but get led away by vanity and bad example. Some day soon they will cut it all out, this lavish spending. By Jove! they'll *have* to. They don't mean to be dirty, may be, but they are getting smoked and don't know it in the meantime. This debt business is just Hell! I see young cubs made miserable by it.

* * *

THE NORTHERN LIFE.

Progress is again shown by this company, in the report for the year just past. There is an increase in the new business written and a still larger increase in the amount of policies in force. Assets are also considerably swelled by the operations of 1904. The total assets, exclusive of uncalled capital, are now $486,949, of which the sum of $311,326 is set apart as Government reserves for the security of policyholders. Of these assets, $416,000 are interest bearing, and include bonds, debentures, mortgages and real estate. The premium income has risen to $130,468, and the interest income to $21,460, while the death claims were $17,345, and the total outgo for the year in claims, surrenders and expense was $66,591. The company makes no splurge, but seems to be content to grow steadily on conservative lines.

* * *

LIFE ASSURANCE MATTERS.

Says the Union Mutual: "Life insurance is a theory, a principle, a fact; the merging of desire, philanthropy and experience; a system founded upon good intentions and supported by worthy purposes; a contract which manifests proper recognition of family obligations; an investment which indicates thought; a protection that evinces love."

We offer a further indication of the carelessness of people. Since 1893 this company has paid to persons for accidents due to the careless handling of firearms the large sum of $400,000. The number of policyholders in the accident department is very small in comparison with the whole population of the country. It was only 63,857 in 1904. What, then, must have been the total loss in all these years?—F. and C. Bulletin.

A San Francisco insurance paper, the Adjuster, ventures the opinion that the book we lately reviewed, "The Umbrella and Other Stories," comes to us anonymously, but of course we all know, or think we know, they are from the pen of 'The Oracle,' and that 'The Oracle' is none other than Miles Menander Dawson."

Contrasting sixty years ago with to-day, Mr. Buckner, of the New York Life, compares the conditions of that company's policies with those issued to-day. In 1845, said he, the limit of risk on a single life was placed at $5,000. To-day it is $200,000. The first policy gave the holder permission to travel in the United States south of Virginia and Kentucky between November 1st and June 1st. Travel to-day is practically unrestricted. The only benefit then provided under the policy was the insurance payable at death, which became null and void, and all payments were forfeited to the company from any of the following causes: (1) The non-payment of any premium; (2) death by the insured's own hand; (3) any untrue statement in the application; (4) death upon the high seas; (5) death in consequence of a duel; (6) death by the hand of justice; (7) death in the known violation of any law of the United States or of any State or Province wherein residence and travel were permitted; (8) residence or travel south of the southern boundaries of Virginia and Kentucky, between July 1st and November 1st, or at any time beyond the settled limits of the United States and the British Provinces of Canada, Nova Scotia, and New Brunswick; (9) military or naval service, the militia not in actual service excepted. All which goes to show how much more liberal insurance companies are of late years.

An agreement was recently arrived at between the Australian Mutual Provident Society, the largest and most influential company in Australia, and the Equitable Life Assurance Society of the United States, which has an extensive business in Australia, to refrain from the use of controversial literature and from "twisting." The basis of the agreement is as follows: "(1) Both societies agree to abandon the system of individual attack, by means of pamphlets and other printed or written documents. (2) They undertake to confine campaign literature to general statements and tables compiled from official documents, with only sufficient explanation to make these intelligible, and in which each office shall be only one of a number similarly dealt with; (3) No documents are to be issued by either office, or used by the agents of either, which do not bear the imprimatur of the office; (4) No 'twisting' is to be encouraged or allowed; (5) No agent is to be allowed to make any statement reflecting upon the integrity or stability of either office. All printed matter which is not in harmony with the terms of the agreement is to be withdrawn by the 31st December, 1904." These conditions are very similar to those which were agreed to by the members of the Canadian Life Officers' Association, and which, we understand, are being lived up to by the companies members of it, very greatly to their benefit, and to the advancement of insurance generally.

* * *

BANKING AND FINANCIAL.

Dividends have been declared by the Canadian Pacific Railway Company of two per cent. on the preference shares, and three per cent. on the common stock, for the half-year ended with December last. Preference stock dividend will be paid on 1st April.

In the Province of Ontario the succession duties collected during the month of January have beaten all previous records for one month. During the year 1904 the succession duties amounted to $458,693, while for last month alone the duties were more than a quarter of that amount, being $123,267.

It is reported in Montreal that the Credit Foncier Franco-Canadian, which has been doing business in Canada since 1881, and whose shareholders are in France, has purchased the north-east corner of St. James St. and St. Lambert Hill, 98 by 83 ft., for $75,000 and will erect a ten-story building thereon, to cost $400,000.

At the meeting of the Huron and Erie Loan Co., in London the other day, Mr. Little, the president, gave an illustration of the activity of the company's business when he stated that in one January week 77 applications for money were laid before the board. And during the year 1,356 applications in all, say 26 per week, were received and considered. Of these, about forty per cent., totalling $1,370,000, were accepted and completed.

The following appears in the Port of Spain Gazette. Trinidad: "Since Tuesday last, the 3rd of January, the local branch of the Union Bank of Halifax has been issuing its new notes, as authorized by the recently passed ordinance. We yesterday had the opportunity of seeing these notes, and they are certainly very tastefully designed. The values are $5, $10, $20, $50 and $100; and each value is a different colored note, the shades being very delicate tints of sea green, lime yellow, sky blue, pale brown and a beautiful salmon pink. The notes

Bankers—Great Britain—The National Bank of Scotland. New York—The American Exchange National Bank. Montreal—The Quebec Bank.

are in size uniform with the American greenbacks, but they are far more attractive in design and color; and we understand they will be uniform also with the Government $1 and $2 notes to be issued shortly. As a medium of exchange, they should do much to facilitate business relations with this enterprising bank."

Counterfeit ten dollar bills of the Canadian Bank of Commerce are in circulation in Nova Scotia. Our Halifax correspondent says that they are of the issue of 1891, and very well executed.

Two pages of the January issue of the Rand-McNally Bankers' Monthly are occupied by a description of the Toronto Clearing House, prefaced by a brief sketch of the rise and growth of banking in Canada. The writer is Mr. G. W. Yarker, manager of the Clearing House, who insists upon the "inestimable value to the country" of the branch plan of banking. such as Canada has adopted. Out of thirty-four banks in the Dominion, Mr. Yarker shows that twenty, with thirty-six branches, are in the Toronto Clearing House. These twenty have $606,965,000 in capital, rest, deposits, and circulation. At the beginning of its operations, which was in 1892, the Clearing House had a membership of thirteen banks, and the clearings for the first month averaged $900,544 per day. The clearings for the year 1904 were $842,097,066, being $33,348,806 greater than 1903. The largest clearings in one day, November 24th, 1904, were $5,917,477, and the heaviest month in any year was December of 1904, namely, $91,040,170.

* * *

FIRE INSURANCE MATTERS.

The first test of the new $6,000 aerial extension ladder, operated by compressed air, was made last week in Winnipeg. The great truck, the great 85-foot ladder, and all parts tested worked rapidly and perfectly. The machine was made in Walkerville, Ont.

A New York exchange tells us that the electrical bureau of the Western Insurance Union is addressing a communication to all electrical inspectors in Union territory asking their opinions as to the advisability of calling a general meeting to consider the organization of the Electrical Inspectors' Association, whose object would be the enlargement and improvement of electrical inspection work in the Union field.

George L. Chase, of Hartford, and George L. Chase, of *The* Hartford, have been familiar expressions, in fact almost one and the same, for many a long day. Mr. Chase is still the head of the Hartford Fire Insurance Company, which has just published its ninety-fifth annual statement. The company's surplus to policyholders now amounts to $5,276,248, and its total assets reach $15,632,000. The Hartford paid seven and a quarter millions of losses in 1904.

Co-operation has been resorted to as a cure for the heavy expense of fire-loss adjusting in the States, especially in the West. The Investigator synopsizes the annual report of the Western Adjustment and Inspection Co. for 1904. It shows that for the sixty-eight companies now in the membership, 3,359 losses were adjusted during the year, 14,135 policies for $51,685,292 of insurance being represented. The average cost of these adjustments, including attorneys' fees, service and other charges, was $1.75 per $1,000 of insurance. The volume of business has much more than doubled in the last four years. The average cost of adjustment has shown a steady decrease since 1884, when the organization was formed, from $7.50 per $1,000 in the first quadrennium to $1.61 in the four years ending December 31st last. The following officers were elected: President, I. S. Blackwelder, Niagara; vice-president, A. J. Harding, Springfield; secretary, J. S. Gadsen, Aetna; treasurer and general manager, W. E. Mariner.

* * *

—The shingle manufacturers of British Columbia held a meeting recently and fixed the price of shingles for Vancouver at $1.50 and for Winnipeg $2. Until recently they sold at $2.40 and $2.60. It was thought best to fix the price at bed-rock, below which no mill could sell, except at a loss, so that as trade improves the price may be gradually raised by mutual consent.

OUR SAINT JOHN LETTER.

It is estimated that only 60,000,000 feet of lumber has been cut on the St. John river and its tributaries during this winter. There is 30,000,000 feet in the booms from last year and 18,000,000 feet hung up on the streams, a total of 105,000,000 feet if all comes out in the spring. In 1904 there was rafted and delivered to the mills 138,000,000 feet, more than double the quantity to be cut this season. The St. John river operators are vigorously pressing their opposition to the American syndicate who are building piers in the upper river. The matter has been taken up with the American authorities in Maine and at Washington.

The Canadian Pacific Railway Company announces that $227,000 has been appropriated for work on the Atlantic division during the coming season. The largest portion of this will be for renewing bridges.

There is a prospect of St. John becoming quite a distributing point for American shipments to South Africa. The last steamer of the Canadian line to South Africa took away a considerable quantity of United States freight, and more is booked for the next boat. The shippers say it pays, because of the cheaper freight rates, to send the shipments here rather than to forward them by American lines. This trade, if it continues, will go through Montreal in the summer season.

A fire on Monday in the Alexander Building, corner of Church and Germain Streets in this city occasioned a loss of fully thirty thousand dollars. The property was destroyed by a fire on December 14, 1903, but had been thoroughly repaired and reoccupied by the former tenants.

There is likely to be quite a fight over the affairs of Messrs. Morrell & Sutherland, dry goods merchants, whose store was closed last week. In 1898 they started in business, getting supplies from Messrs. Gault Brothers, Montreal, under an agreement. Later they extended their patronage to other merchants, the Messrs. Gault consenting. It is now said that recently Messrs. Gault demanded possession of the stock and book debts under the agreement, but that Messrs. Morrell & Sutherland declined on the ground that it would not be fair to other creditors, but they offered to assign. Messrs. Gault, through their solicitors, secured an injunction restraining Morrell & Sutherland from doing business. This closed the store, and now action is being taken to dissolve the injunction. The firm owe about $17,000, of which $9,000 is to the Messrs. Gault and $8,000 to other creditors. The matter is creating great interest from the fact that it is the first time the law was ever invoked in the way it has been in this case.

Announcement is made to-day of the dissolution of partnership between Messrs. Quinn & Allen, plumbing and hardware merchants, carrying on business on Main Street. They have been together for five years, and the store was a branch of the business of C. B. Allen. Now Mr. Quinn will manage it independently.

Mr. F. S. Thomas, hatter and furrier, has purchased from Messrs. Phillips Brothers their building on Main Street, and will spend considerable money remodelling it and fitting it for his business.

Hum Willie, a Chinaman, who for a year or more has been carrying on an Oriental store in this city, now announces that he is going to give the city a modern Chinese restaurant. This will be a novelty here.

Statements that have leaked out since the recent meeting of the Pender Nail Company show that the business is a very profitable one. It is said that in twelve years each $100 share has yielded $240, and that there is now on hand a cash surplus of $97,000. The dividends and bonuses of the year aggregated 28 per cent. The company intends building quite an addition to the present plant.

Moncton does not look with favor on Newcastle's desire to become a divisional point on the Intercolonial, and the Moncton Board of Trade has decided to fight the move.

St. John, N.B., 14th Feb., 1905.

* * *

Since our last issue, the following appointments have been made among the staff of the Dominion Bank: Mr. H. J. Bethune to be chief inspector; Mr. Evan A. Begg to be secretary; Mr. M. S. Bogert to be inspector; Mr. S. L. Jones to be inspector. The following appointments were made in the Toronto branch of the bank: Mr. Arthur Pepler to be manager; Mr. John C. Wedd to be assistant manager; Mr. F. W. Broughall to be assistant manager. Mr. J. W. B. Walsh is appointed manager of the branch at Yonge and Cottingham Sts.

* * *

WINNIPEG LETTER.

I have a great mind to begin with curling: it is so much "on deck" just now, and the local interest in the Bonspeil so general. We are great sports here in the winter, far greater, it seems to me, than in summer, perhaps because there seems so much more leisure for "the boys." When I say the boys, I mean fellows anywhere from 16 to 66. If any of your readers doubts the extent of the interest in curling let him look at our daily papers—from five columns to twelve columns a day given by each to describing the games and making lists of the draws. There are curlers here from Duluth in Minnesota and from points 700 miles west and 1,200 miles east of Winnipeg. We have with us Toronto, Lindsay, and Montreal curlers; Indian Head, Regina, and Medicine Hat curlers. Hundreds in all; for twenty places in Manitoba have sent players, eager to meet our own "Thistles" and "Granites." And a rousing time they are having.

But I am afraid this is scarcely the kind of thing you expect for a commercial and financial journal like the Monetary Times. So if you will let me off an apology I will tackle something else. An account of the Winnipeg Board of Trade meeting goes forward by this mail, and, I am told, that you already possess an advance copy of the annual report. It was a good meeting and Mr. Hutchinson made a good speech. Mr. Ashdown seemed to think the Board had not met often enough, and made the suggestion of regular monthly meetings. The fact is, this is such a busy community that it seems hard for many merchants to tear themselves away from their own business to attend to commercial interests in general. But the same thing may very likely be said of other cities, even of those which are not growing so fast as Winnipeg.

A subject, which is very much in the minds of thoughtful citizens, is the prevalence of typhoid fever in the city. From 582 fatal cases in 1900, the number ran down to 356 in 1902, but rose to 489 in 1903, and last year exhibited the alarming number of 1,276 deaths. An expert, Professor Jordan, of Chicago, has just made a report on the subject, showing how greatly in excess of some thirty American cities the typhoid record has been for years in Winnipeg. It was between 6 and 8 per 10,000 population in 1900 to 1903, inclusive, and in 1904 went up to more than double that ratio (on an estimated population of 67,360), while Albany's rate is only 5; Detroit's, 2; St. Paul's, 2.3; Cleveland's, 4; and Pittsburgh's, 10.8. Dr. Jordan declares that box closets are the primary cause of this alarming mortality, and condemns the water of the Assiniboine River. His recommendations include disinfection of all box closets, careful handling and inspection of milk, that private wells should be done away with, that an expert be put in charge, and the health office be given more money and ample powers.

Some statistics of the city's extent and growth are instructive. They are the latest I have seen. Winnipeg has now 17 miles of asphalt, 33 miles of macadam and 16 miles of block pavement, 23 miles of artificial stone, and 186 miles of plank sidewalks, 99 miles of water mains, 87 miles of sewers, and 65 miles of boulevard, and there are 10 miles of pavement, 13 miles of sewer, and 14 miles of water-mains ordered, and to be gone on with in the summer. It is very satisfactory to be able to say, too, that the rate of taxation for 1904 was only 17 mills on the dollar (five mills less than the previous year), the total assessment being $48,220,000, as compared with $36,232,000 in 1903. Official figures quoted by Mr. Hutchinson the other day show that the building permits issued in Winnipeg exceeded in probable expenditure that of the three cities of Montreal, Toronto, and Hamilton, the total being $9,651,750, and the cities named showing only $5,885,120 for Toronto; $3,646,484 for Montreal; and $1,060,000 for Hamilton. Indeed our building permits exceeded those of either Cincinnati, Buffalo, Detroit or Minneapolis, and were only surpassed by the four biggest cities of the Eastern States.

Winnipeg, 13th Feb., 1905. PLAIN TALES.

Meetings

THE HURON AND ERIE LOAN AND SAVINGS COMPANY.

The forty-first annual general meeting of shareholders was held at the company's office, in London, Ontario, on Wednesday, February 8th, 1905.

Present: Messrs. Henry Arnott, M.D.; F. P. Betts, A. A. Booker, U. A. Buchner, Major Hume Cronyn, F. R. Eccles, M.D.; Colonel C. E. H. Fisher, Alexander Fraser, Caleb Hurkett, George F. Jewell, F.C.A.; John Labatt, F. E. Leonard, J. W. Little, Judge Talbot Macbeth, G. A. Somerville, and others.

The president, Mr. J. W. Little, took the chair, and the manager, Mr. G. A. Somerville, acted as secretary.

The notice calling the meeting having been read, the minutes of the last annual general meeting were read and approved.

The annual report and financial statement were submitted, as follows:

Report.

The directors of the Huron and Erie Loan and Savings Company have pleasure in submitting herewith their forty-first annual report, showing the result of the company's operations for the past year, accompanied by the balance sheet to December 31st, 1904, duly audited.

After defraying the expenses of management and all other charges, and writing off anticipated as well as actual losses, the balance available for distribution is $182,996.99, as follows:

Brought forward from the previous year's accounts	$ 19,812 68
Net profits upon the past year's business	150,184 31
Provision for depreciation in securities found to be unnecessary	13,000 00
	$182,996 99

Of which the following disposition has been made:

Two half-yearly dividends at the rate of 9 per cent. per annum, and income tax	$128,396 32
Transferred to reserve fund	25,000 00
Balance carried forward	29,600 67
	$182,996 99

The reserve fund now amounts to a million dollars, or over seventy-one per cent. of the paid-up capital.

The demand for money during the year has been very satisfactory, and payments falling due upon loans have been exceptionally well met. The cash value of first mortgages on real estate is $7,367,125.90, and the increase in total assets for the year is $203,590.53.

The value of the real estate held by the company other than office premises is $2,800. This sum includes all properties remaining unsold which have come into possession of the company by foreclosure, failure to obtain purchasers under power of sale, or otherwise.

The directors desire to bear testimony to the very efficient manner in which the manager and other officers of the company have discharged their respective duties.

All of which is respectfully submitted.

J. W. Little, President.

London, Ont., January 25th, 1905.

G. A. Somerville, Manager.

We hereby certify that we have carefully audited the books and accounts of the Huron and Erie Loan and Savings Company for the year ending December 31st, 1904. The cash and bank accounts have been audited monthly; the postings and balances of all the company's ledgers examined quarterly; and we find the whole correct and in accordance with the above statements. We have also examined the company's securities and find them in order.

Geo. F. Jewell, F.C.A.,
Alfred A. Booker,
London, January 25th, 1905. Auditors.

The president, in moving the adoption of the report, said:

I am sure the report which has just been read will prove satisfactory to all our shareholders, showing, as it does, another year of continued prosperity in every department of the company's business.

Slightly higher rates of interest have prevailed, especially towards the close of the year, whilst all through the year there has been a good demand for money; and, owing to the company's valued connection with a large staff of most efficient correspondents throughout the Western district, where the company has been doing business for so many years, a great number of applications for mortgage loans have been received. This week 77 applications were laid before the board, and, during the year, 1,356 applications in all were received and considered. After the most careful investigation about 40 per cent. of this number, amounting to $1,370,000, were accepted and completed.

The net results of the year's business are about the same as in previous years. In accordance with our usual practice, no item has been taken into account about the collection of which there appeared to be any doubt, and ample provision has been made for anticipated losses. A pleasing addition to this year's profits is the item of $13,000 previously set aside to cover possible depreciation in securities and now found to be unnecessary.

The dividend of 9 per cent. per annum has been maintained —$25,000 added to the reserve, and the balance of undivided profits carried forward increased by nearly $10,000.

The business of the company may still be said to be practically confined to first mortgages on Western Ontario real estate. Out of 4,280 mortgages in force at the end of the year, nine were on property outside of Ontario, 59 in Ontario east of Toronto, and 4,212 in Western Ontario.

The number of loan companies doing business in St. Thom having been reduced within a short time from five to one, t board thought it wise to make an effort to secure increas business at that point. Arrangements were therefore made with Messrs. D. M. Tait and W. H. Murch to represent the interests of the company there. Mr. Tait had been long and favorably known as manager of the Star Loan Company, and Mr. Murch had a creditable record as manager of the South-Western.

The business they have secured has been most satisfactory, the large number of excellent mortgage loans being particularly gratifying.

Collections during the year have been made without much difficulty, compulsory proceedings having been necessary in only seven cases. We have two farms on hand (135 acres in all), which fell in shortly before the end of the year, and should be disposed of very quickly.

All our assets are in a most satisfactory condition, and the company was never in a better condition to serve the interests of its patrons. The reserve fund, it will be observed, is now one million dollars, a feature which must be pleasing alike to depositors, debenture holders and shareholders, since it increases so materially the stability and earning power of the company.

In the early part of the year Mr. Philip Mackenzie, our oldest director, and vice-president, was obliged to send in his resignation, owing to continued ill-health. Mr. Mackenzie became connected with the company on its organization in 1864, and for forty years took a prominent part in its management. He, whilst prudent and cautious, was at all times most zealous in furthering the interests of the company, and his familiar voice and figure are greatly missed at our board meetings.

The directors reluctantly accepted the resignation, and appointed His Honor Judge Talbot Macbeth to fill the vacancy. Judge Macbeth is well and favorably known to most of our stockholders, and will no doubt prove a worthy successor to our old friend and colleague.

Mr. Leonard, in seconding the adoption of the report, emphasized the cardinal principle SECURITY, adopted at the inception of the company and so closely adhered to by the directors ever since. All securities offered are closely examined by the company's inspectors before an investment is accepted, and the system of re-inspection adopted gives constant information regarding the condition of all the properties mortgaged to the company. Although depositors may see higher rates of interest advertised elsewhere, they have the satisfaction of knowing that with us they have absolutely unquestionable security.

Mr. Alex. Fraser said he was convinced that the board looked after the affairs of the company as they would their own. The profits of the business were excellent, and he thought this should be regarded as a jubilee year, the reserve fund having reached an even million dollars.

Mr. U. A. Buchner expressed himself as highly pleased with the report.

Dr. Henry Arnott thought the fact that the company was able to do so large a business almost entirely at home was the highest tribute that could be paid to the management; it was an evidence of square, honest dealing, and he thought there was more reason to be proud of that feature of the business than of any other referred to in the report.

The report was unanimously adopted.

The usual votes of thanks to the president, directors, manager, and other officers of the company, and a special vote to Mr. Philip Mackenzie, the late vice-president, were unanimously adopted.

In responding to the vote of thanks to the directors, Judge Macbeth said:

"It has been a pleasure to me to attend the directors' meetings, since my appointment a few months ago in Mr. Mackenzie's place. As a new member, I would like to mention to the shareholders one or two matters which have been impressed upon me. I was surprised at the very large amount of business which came before the directors every week, and I was struck by the great caution shown by the board in dealing with applications for loans. And I found that any information required by the board as to transactions in former years would be forthcoming in a few minutes, showing that the records of the enormous amount of business passing through the company's offices are kept in the most careful and systematic manner.

The business in which I was engaged for many years gave me opportunities of forming some opinion as to the values of real estate, especially in the County of Middlesex, and since I became a director I went over the valuations of a large number of properties in Middlesex, upon which mortgages were held by the company. So far as my judgment goes, I found that these valuations were on a conservative basis, and the company's claims seemed to me, in every case, to be amply secured.

The retiring directors were unanimously re-elected.

⁂

THE ONTARIO LOAN AND DEBENTURE COMPANY.

The thirty-fourth annual meeting of the shareholders of this company was held at their office, in London, Ont., on Wednesday, the 8th inst., when the affairs of the company were shown to be in a very satisfactory state, two half-yearly dividends, at the rate of 6 per cent. per annum, having been paid to the shareholders, $25,000 added to the reserve fund, which now amounts to $625,000, and $32,161.06 carried forward.

The annual report, as follows, was adopted by the meeting:

Report.

The directors have pleasure in presenting to the shareholders the thirty-fourth annual report and statement of the affairs of the company, showing the results of the past year's business.

The net earnings, after deducting cost of management and all other charges, amount to $103,251.54; this, with $25,909.52, which remained at the credit of revenue account from the previous year, amounts to $129,161.06, from which two half-yearly dividends at the rate of 6 per cent. per annum have been paid, $72,000, and $25,000 added to the reserve fund, making it now $625,000, leaving $32,161.06 at the credit of revenue account to be carried forward, an increase of $6,251.54 over last year.

The sum of $766,127.14 has been loaned, and $917,149.51 principal and interest has been repaid during the year.

The assets of the company are nearly double the liabilities, and are invested almost wholly in mortgages on real estate securities, which are one of the best class of investments the Dominion of Canada affords.

Messrs. Wm. Home Cook & Co., C.A., of Edinburgh, our general agents for Scotland, are as usual giving their valuable services in placing our debentures in Great Britain.

All of which is respectfully submitted,

JOHN McCLARY, President.

London, Ontario, January 23rd, 1905.

London, Ont., January 23rd, 1905. Auditors.

The retiring directors, Messrs. John McClary, A. S. Emery, William Bowman, Lieut.-Col. Wm. M. Gartshore, and John M. Dillon were re-elected, as well as the auditors, Messrs. George F. Jewell, F.C.A., and A. M. Smart.

At a subsequent meeting of the directors, Mr. John McClary was re-elected president, and Mr. A. S. Emery, vice-president.

WILLIAM F. BULLEN, Manager.

⁂

TORONTO MORTGAGE COMPANY.

The annual general meeting of the shareholders of the Toronto Mortgage Company was held at its offices, No. 13 Toronto Street, Toronto, at 12 o'clock noon, on Wednesday, the 8th day of February, A.D., 1905.

There were present: Hon. Wm. Mortimer Clark, Edmund Wragge, John Macnamara, Thomas R. Wood, H. Schmidt, Jno. Cowley, Dr. H. B. Yates, William Spry, Herbert Langlois, Thomas Gilmour, George F. Burns, S. W. Black, C. S. Gzowski, Bernard Saunders, R. C. Carlyle, George Martin Rae, James H. Fleming, William Martin, Dr. Larratt W. Smith, Edward Galley, E. R. Greig, Wellington Francis, James F. Smith, Geo. H. Husband, Rev. T. M. Campbell, Theron Gibson and others.

On the motion of Dr. Yates, seconded by Mr. C. S. Gzowski, the president, Hon. Wm. Mortimer Clark, took the chair, and the manager acted as secretary.

The secretary read the notice calling the meeting.

The minutes of the last annual meeting were taken as read, and confirmed.

The secretary read the financial statement and profit and loss account for 1904, and the sixth annual report.

Report.

The directors of the Toronto Mortgage Company beg to submit the usual financial statement of the company's affairs, for the year which ended on 31st December, 1904.

The gross earnings, including the balance of $36,054.18 brought forward from 1903, amount to		$153,148 06
After deducting cost of management, interest on debentures and deposits, and all other charges, amounting in all to		65,186 98
There remains a net profit of		$ 87,961 08
Out of which dividends at the rate of 5 per cent. on the capital have been paid, amounting to	$36,227 25	
Together with a special bonus of 1 per cent., amounting to	7,245 50	
		$ 43,472 75
Leaving a surplus of		$ 44,488 33
From which has been transferred to reserve fund the sum of		25,000 00
Leaving a balance to be carried forward to 1905, of		$ 19,488 33

Debentures matured during the past year amounting to $214,540, to renew which, and for new moneys, new debentures of the company have been issued to the extent of $203 950.

Loans were made amounting to $465,750, and mortgages aggregating $91,150 were renewed for further terms, after revaluations of the properties in question by the company's inspector.

The revenue taken credit for has been actually exceeded by the cash receipts for interest and net rentals.

Sales of properties were made during the year, at satisfactory prices, to the large extent of $238,190, the balances of purchase money being secured by active interest-bearing mortgages, repayable by instalments.

It is satisfactory to be able to state that all the capital stock of this company is now fully paid up, and that the former liability thereunder has been extinguished, the debentures and other obligations of the amalgamated companies having been discharged, and a certificate to that effect obtained from the Registrar of Loan Corporations.

The office staff have performed their duties to the satisfaction of the directors, and the books and accounts, and all securities held by the company have been regularly audited.

All of which is respectfully submitted,

WM. MORTIMER CLARK, President.

FINANCIAL STATEMENT FOR THE YEAR ENDING 31st DECEMBER, 1904.

WALTER GILLESPIE, Manager.

We have audited the books and accounts of the Toronto Mortgage Company for the year ending 31st December. 1904. We have examined the vouchers and securities relating thereto. We find the books carefully kept, and hereby certify that the foregoing statements are correct.

E. R. C. CLARKSON, F.C.A.,
HENRY WM. EDDIS, F.C.A.,

Toronto, 7th January, 1905. Auditors.

Before moving the adoption of the report, the president congratulated the shareholders on the result of the last year's business, and called attention to the fact that, after payment of all charges, and of the usual dividend of 5 per cent., together with a special bonus of 1 per cent., the board had been able to transfer to the reserve fund the handsome sum of $25,000, as well as to carry forward a balance of profits amounting to $19,488.33.

The president also said that, "1904 has been a record year in the history of the company, since all that had been contemplated at the time of the amalgamation five years ago has now been accomplished. All the obligations of the old com having been discharged, the liability of stockholders partly paid shares has been extinguished, and the stock fully paid up. The stock is now readily saleable at a but the supply in this respect does not equal the d it is practically all held by private investors."

"The real estate on hand, with which at first we wer -dened, has now been reduced to a minimum, and the earning power of the company has been thoroughly re-established. The result has been that the directors were able to present the shareholders with a special bonus of 1 per cent., and to make a substantial addition to the reserve fund.

"The following interesting comparison of the real estate held by the company at the commencement of 1900, with that still left in its hands for sale, should be very gratifying to all the shareholders and debenture holders."

Year.	Toronto Houses.	Toronto Shops.	Suburban Properties.
1900	690	77	51
1905	1	0	4

Year.	Farms.	Outside Properties.	Vacant Land.
1900	37	86	$60,950
1905	2	7	500

"Five years ago we had seven office buildings in Toronto on our hands. This number has now been reduced to three, of which one is our head office building, one is splendidly situated and pays us better than a mortgage, and one will in all likelihood shortly be sold advantageously.

"With regard to mortgage loans, it has not been the policy of the directors, in the past, to go far afield for investments, tempted by the high rates of interest offered, but rather to lend, at moderate rates of interest, upon carefully and personally selected securities, in districts where values are not subject to great fluctuations. Judging by our experience hitherto of these investments, and by the excellent statement laid before you today, it is submitted that this policy has been not only a prudent but a wise one."

The president wished particularly to call attention to the Canadian debentures of the company. Some $300,000 of these have been issued, but the directors are desirous of increasing this amount. He reminded trustees, and others, that the debentures of the company are now a legal investment for trust funds, according to the "Trustee Investment Act of Ontario," and said that no safer way of employing such funds can be found than by purchasing the 4 per cent. bonds of this company.

The president concluded by congratulating the shareholders, even more emphatically than last year, "on the thoroughly sound and prosperous condition of the company in every particular," and then moved, seconded by the vice-president, "That the annual statement and report, as read, be adopted." Carried.

It was moved by Mr. James F. Smith, K.C., and seconded by Mr. Bernard Saunders, "That the thanks of the shareholders are due, and are hereby tendered to, Messrs. Allan, Buckley, Allan & Milne, advocates, Aberdeen; Messrs. J. & A. F. Adam, W.S., Edinburgh, and Messrs. Fraser, Stodart & Ballingall, W.S., Edinbugh, the British financial agents of the company in Scotland for the valuable services they have rendered this company during the past year." Carried.

It was moved by Mr. Edmund Wragge, C.E., and seconded by Mr. William Spry, "That Messrs. E. R. C. Clarkson, F.C.A., and H. W. Eddis, F.C.A., be appointed auditors for the current year at a salary of $300 each." Carried.

"It was then moved by Mr. James H. Fleming and seconded by Mr. Edward Galley, "That a poll be opened for the balloting of votes, for the election of directors, to be closed if at any time three minutes should elapse without any votes being polled. Also that Messrs. E. R. Greig and S. W. Black be appointed scrutineers for the occasion." Carried.

The scrutineers reported as follows: "We hereby certify that the following gentlemen have been unanimously elected directors of the Toronto Mortgage Company at the sixth annual meeting, held at the offices of the said company, this day, at 12 o'clock noon: Messrs. Wm. Mortimer Clark, Wellington Francis, Thomas Gilmour, C. S. Gzowski, Herbert Langlois, George Martin Rae, Larratt W. Smith, Thomas R. Wood and Henry B. Yates."

(Signed) Edward R. Greig,
S. W. Black,
Scrutineers.

At a subsequent meeting held by the board, the Hon. Wm. Mortimer Clark, LL.D., W.S., K.C., was re-elected president, and Mr. Thomas R. Wood, vice-president.

* * *

NATIONAL TRUST COMPANY, LIMITED.

The seventh annual general meeting of the shareholders of the National Trust Company, Limited, was held in the company's board room, 20 King Street East, Toronto, on Wednesday, 15th day of February, 1905.

Among those present were the following: Hon. Justice Britton, J. W. Flavelle, Z. A. Lash, K.C.; Robert Kilgour, H. H. Fudger, C. D. Massey, William Davies, E. R. Wood, W. T. White, W. E. Rundle, R. Home Smith, A. G. Ross, B. E. Bull, William Crocker, M. A. Thomas, Richard Brown, David Smith, Andrew Gunn, Fred. G. Cox, and H. L. Watt.

The president, Mr. J. W. Flavelle, was in the chair, and Mr. W. T. White, the general manager, acted as secretary to the meeting.

The secretary read the seventh annual report of the directors, and the financial statement, which is as follows:

Report.

The directors have pleasure in submitting herewith their seventh annual report, showing statement of the assets and liabilities of the company both on capital and trust accounts, as at 31st December, 1904, together with the profit and loss account for the year ending on that date.

The net profits, after providing for all cost of management, salaries, advertising, auditors' fees, and other expenses, amount to $92,620.90. This sum, together with $11,803.12 brought forward from 1903, makes a total at credit of profit and loss account of $104,424.02, which has been appropriated as follows:

(a) To pay four quarterly dividends at the rate of six per cent. per annum, amounting to $60,000.

(b) To increase reserve fund $30,000.

(c) To write off office premises and safe deposit vaults $10,000.

(d) To carry forward in profit and loss account $4,424.02.

The reserve fund now stands at $350,000, and the total assets under administration by the company on capital and trust accounts amount to $7,813,538.54.

Respectfully submitted,
J. W. Flavelle, President

W. T. White, General Manager.

The president, in moving the adoption of the report, said:

The report of your directors exhibits so clearly the results of the last year's business and the financial position of the company that it will not be necessary for me in moving its adoption to more than indicate its leading features.

The earnings, amounting to the net sum of $92,620.90, show an increase of $3,260.96 over the record of the previous year, and represent over 9¼ per cent. upon the company's capital stock. In this connection it may be interesting to note for the purposes of comparison the net earnings for the past four years, during which period the shares of the company have been fully paid. The figures are as follows:

1901	$78,097 91	1902	$83,206 05
1903	89,359 94	1904	92,620 90

In disposing of the earnings for the year, your directors, after paying a 6 per cent. dividend, have added the sum of $30,000 to reserve, which has now reached the substantial sum of $350,000. With regard to the general statement presented for your consideration, you will observe that it has been divided into three parts, the first showing the company's own assets and liabilities; the second, funds received by the company for investment under its guarantee and the securities held in trust thereof, and the third, the aggregate of estates and trust and agency funds received and of assets and investments held in connection with the various administrations, executorships, trusteeships and agencies now being carried on by the company.

With regard to the assets held for capital and guaranteed trust accounts, I may say briefly that the mortgages are of a uniformly excellent character, and that interest payments, both here and in Manitoba and the North-West Territories, have been exceptionally well met; that such stocks as we own are not only high-grade and listed, but stand on our books at figures lower than their value on the Exchange; that our bonds and debentures are those of railway, traction and electrical companies and of municipalities whose security is absolute, and that we have always found loans upon approved collateral with substantial margin a profitable and convenient form of temporary investment of the company's own funds or such trust or agency funds as we are specially authorized to invest in this way.

It will doubtless be gratifying to the shareholders to note that the total assets under administration by the company now aggregate nearly $8,000,000.

Your directors make grateful acknowledgment of the services rendered to the company by the Advisory Board at Winnipeg, and the resident directors of Montreal and to the staff at the several offices of the company for the efficient discharge of their duties during the year.

I beg to move, seconded by Mr. Z. A. Lash, the adoption of the report.

A vote of thanks to the general manager and staff of the company was passed, after which the following were elected directors of the company for the ensuing year:

President—J. W. Flavelle, managing director The Wm. Davies Company, Limited, director Canadian Bank of Commerce.

Vice-Presidents—Z. A. Lash, K.C., of Messrs. Blake, Lash & Cassels, barristers. E. R. Wood, vice-president and managing director Central Canada Loan and Savings Company.

Hon. Mr. Justice Britton.

Hon. Mr. Justice MacMahon.

Hon. George A. Cox, Senator, president Canadian Bank of Commerce.

George H. Watson, K.C., of Messrs. Watson,, Smoke & Smith, barristers.

Chester D. Massey, president Massey-Harris Company, Limited.

Elias Rogers, director Imperial Bank of Canada.

Robert, Kilgour vice-president Canadian Bank of Commerce.

F. W. Gates, Hamilton president Hamilton Gaslight Co.; vice-president Canada Life Assurance Company.

James Crathern, Montreal, director Canadian Bank of Commerce.

H. S. Holt, president Montreal Light, Heat and Power Company; director Royal Bank of Canada.

H. Markland Molson, Montreal, director Molsons Bank.

Alexander Bruce, K.C., Hamilton, of Messrs. Bruce & Counsell, barristers.

E. W. Cox, general manager Canada Life Assurance Co.

H. H. Fudger, president The Robert Simpson Co., Limited; President the Goldsmiths' Stock Company.

H. B. Walker, agent Canadian Bank of Commerce at New York.

A. E. Kemp, M.P., president Kemp Manufacturing Co.

William Mackenzie, president Canadian Northern Railway Company; president Toronto Railway Company.

J. H. Plummer, late assistant general manager Canadian Bank of Commerce.

W. T. White, general manager National Trust Company, Limited.

Advisory Board—Winnipeg Office:

I. M. Ross, Esq., Winnipeg, chairman.

Hon. Mr. Justice Bain, Winnipeg.

Hon. F. W. G. Haultain, Premier North-West Territories, Regina, N.W.T.

Hon. J. D. Cameron, ex-Attorney-General for Manitoba, Winnipeg.

A. McT. Campbell, Esq., manager Canada Life Assurance Company, Winnipeg.

* * *

THE CROW'S NEST PASS COAL COMPANY, LIMITED.

The eighth annual meeting of the shareholders of the Crow's Nest Pass Coal Company, Limited, was held in the city of Toronto on Friday, the 10th day of February, 1905, at 2.30 p.m.

Amongst those present in person were: Samuel Trees, J. A. M. Alley, James Henderson, Wm. Crocker, Norman Ainley, S. C. Smoke, Beverley Jones, W. A. Boys, J. H. Swan, D. S. Cassels, J. Kerr Osborne, Sydney H. Jones, Col. G. A. Stimson, D. Davies, Andrew Young, G. G. S. Lindsey, S. H. Thompson, Col. James Mason, J. D. Chipman, Charles Perry, Major J. G. Langton, C. C. Dalton, Thomas Paterson, Thomas Walmsley, D. Teaban, Col. H. M. Pellatt, Robert H. Shipman, E. R. Wood, C. R. Cherry, Robert Jaffray, J. F. Edgar.

After reading the notice calling the meeting, the secretary read the eighth annual report, including statement of assets and liabilities, as follows:

Annual Report.

The directors beg to submit to the shareholders of the company their eighth annual report, including statement of assets and liabilities, as of the 31st December, 1904.

The balance at the credit of the profit and loss account brought forward from 1903 amounts to $1,879,813.13. To this has been added the sum of $406,049.56, being the company's net profits from the operations of the year (after providing for the costs of litigation, $32,697, in connection with the explosion of May, 1902); also the sum of $38,865, representing the premium received on calls paid on new stock issues, the whole making an aggregate to the credit of the profit and loss account of $2,315,727.69. From this amount the directors have paid four dividends of 2½ per cent. each, making 10 per cent. for the year, and amounting in all to $347,807.25, have transferred to reserve the sum of $1,764,600, representing the income derived from the premium on calls on stock, and have carried forward to 1905 $203,320.44 to the credit of the profit and loss account. This amount represents the net profits of the company from operations, after payment of dividends. All the income derived from premium on stock has been set aside as a reserve fund.

The increase in coal mined this year over last amounts to 81,000 tons, and the coke exported shows an increase of over 78,000 tons.

During the year there has been spent on improvements (not including those of subsidiary companies) the sum of $254,000, as against $810,000 in the preceding year. The Crow's Nest Pass Electric Light & Power Company, Limited, and the Morrissey, Fernie & Michel Railway Company are subsidiary companies, formed for the purpose of taking care of some of the company's necessary auxiliary projects. The capital stocks of these are owned, practically exclusively by this company, and are referred to in the balance sheet as "Securities owned."

Ninety-three actions for damages brought against the company by the dependents of the miners killed in the explosion of May, 1902, at Coal Creek, for sums amounting in the aggregate to a large figure, were disposed of in the company's favor last June, after two years of litigation and twenty-one days' trial at Nelson. Later, the plaintiffs appealed to the Supreme Court of British Columbia, but later still abandoned their appeals, which finally relieved the company of all liability.

In December the final settlement of all outstanding questions between this company and the Canadian Pacific Railway was arrived at, and the deeds transferring 250,000 acres of land to this company executed. Since the year 1897 a number of intricate questions had accumulated and presented themselves for settlement, but these were disposed of, to the mutual satisfaction of the parties.

A lease for twenty years of the Coal Creek Branch of the Canadian Pacific Railway to the Morrissey, Fernie & Michel Railway has been executed, and an additional mile of track constructed, which gives the mines at Coal Creek and the coke ovens at Fernie connection with both the Canadian Pacific Railway and the Great Northern Railway. On the 15th of December the Great Northern Railway commenced operating the extension of its line to Fernie.

On the 1st of July T. R. Stockett, jun., acting general manager, resigned to accept the position of general manager of the Western Fuel Association, with headquarters at Nanaimo, and G. G. S. Lindsey, K.C., was appointed general manager. R. G. Drinnan, M.E., who had been with the company for four years, latterly as inspector, and whose eighteen years' experience in mining has been otherwise gained in Scotland, England and Vancouver Island, was appointed general superintendent, the coke department placed under the care of George L. Pearson, an experienced coke-maker, and the land department transferred to the care of James McEvoy, M.E., C.E., the company's geologist.

Some advance has been made in extending the domestic trade of the company, which, it is expected, will yield much larger results during the present year.

The staff at Fernie and the collieries is capable and efficient, and is contributing well towards the company's success. Complete harmony exists between the company and its men, and everything points to a continuance of friendly relations.

All of which is respectfully submitted.

G. G. S. Lindsey, General Manager.
Geo. A. Cox, President.

Toronto, 10th February, 1905.

Profit and Loss Account.
For Year Ending 31st December, 1904.

Balance at credit, 31st Dec., 1903..	$1,870,813 13	
Net profits for 1904..............	406,049 56	
Premium received on calls paid on new stock	38,865 00

I have examined these statements of profit and loss, and of assets and liabilities, also the books and vouchers, of The Crow's Nest Pass Coal Company, Limited, and find the same correct.

A running audit has been maintained, and I certify that the books are well and truly kept.

J. G. Langton, Auditor.

Toronto, 10th February, 1905.

The President's Address.

Mr. Jaffray, in moving the adoption of the report, regretted the absence of the president on account of a slight cold, and read for him the following address, which he had intended to deliver in moving the adoption of the report:

In connection with the resolution certain information has been prepared which I think will be of interest to the shareholders; after that any questions which you may ask in connection with the report will be gladly answered.

The coal produced during the year 1904 amounted to 742,210 tons, as compared with 661,118 tons in 1903. Of this tonnage 393,016 tons were sent to the coke ovens, and produced 245,118 tons of coke, against 167,789 tons made in 1903, while of the balance 349,194 tons (with the exception of 27,572 tons consumed under the boilers), were disposed of as merchantable coal.

During the year the construction of the coke ovens has been completed, making altogether 1,128 ovens, of which 424 are at Fernie, 464 at Michel, and 240 at Carbonado.

As was intimated in the last annual report, the demand for coke in the State of Montana has increased, the company having exported during the last year to the United States 109,412 tons, as against 31,089 tons in 1903.

By reference to the profit and loss account, it will be observed that $1,870,813.13 was brought forward from the year 1903. The net profits, as a result of the year's operations, amount to $406,049.56, of which $347,807.25 was paid out in dividends. There was also received for premium on calls paid on new stock during the year $38,865. Of the total, $2,315,727.69, so much thereof as has been derived from premium on stock has been set aside as a reserve fund, and the balance, $203,320.44, carried forward to the credit of the profit and loss account for the current year.

Our fixed assets are, as you know, made up almost entirely of what we have purchased for cash in the way of plant and development. Our magnificent property can hardly be said to have been valued among our assets. Securities owned are the stocks of the Crow's Nest Pass Electric Light and Power Company, which supplies the light and water to the company's houses at the collieries and to the town of Fernie, and also operates a telephone system, and will hereafter have the management of the real estate; and the Morrissey, Fernie and Michel Railway Company, which owns approximately six miles of track, connecting the company's mines at Carbonado with the Canadian Pacific and Great Northern Railways, has leased a like number of miles of track connecting the company's mines at Coal Creek with these two great railway systems at Fernie, and has constructed a mile of track at the latter point.

The offers of larger markets made to the company in the month of January, as well as the actual output of the company for that month (74,580 tons), give a promised fair expansion to the output. During the past year great attention has been paid to producing only standard coal and standard coke. This has been accomplished by keeping the chemists continually at the working faces, taking samples of the coal mined and making analyses. Where for any reason the quality of the coal proved inferior, work was stopped at this point, and only the higher grades of coal mined. In this way the quality of the coal has been gradually improved, and the percentage of ash in the slack going to the coke ovens reduced, so that the coke is equal to any produced in America. The value of this will be best understood when I tell you that a difference of 5 per cent. in the quantity of ash in two cokes makes the better at least a dollar a ton more valuable in a smelter.

It is gratifying to be able to report that our organization at the collieries is efficient and effective, and is one working harmoniously together in the best interests of your company, and that the feeling of the miners towards the company is greatly improved.

Mr. Jaffray added the following remarks, which he had intended to make in seconding the motion to adopt the report, which was seconded by Col. Pellatt:

The result of the trial of the actions arising out of the explosion at Coal Creek in No. 2 mine, on the 19th day of May, 1902, was most gratifying to the directors, it being clearly demonstrated that the system of mining carried on at the time was on the approved modern principles, and that the misfortune was entirely due to accident. The origin and propagation of the explosion were clearly shown not to have been due to any neglect on the part of the company or any of its officials, and while the length of the litigation, the number of counsel employed, the large fees paid to expert witnesses brought from England and America, make up a considerable amount of the costs, the result on the whole must be entirely satisfactory to the shareholders.

In connection with the selection of our present general manager, Mr. Lindsey, the directors had ample opportunity of judging of his fitness, qualifications and ability to fill the position before making the selection. His services to the company for a length of time previously, the business of the year under review, and the difficulties that have been overcome and satisfactorily settled largely through him, would not have been possible without the assistance of a legally trained mind.

During the year our outstanding difficulties referred to and other important matters have been adjusted by the general manager. Our difficulty in the past has been in getting technically skilled men, who, though capable of superintending the operations, have had as well the business capacity for general management. Under the present system all departments, as well as the whole, are carefully managed, and the change has been fully justified by results.

It is a pleasure to feel that this year opens up with so many long-standing difficulties removed, and with promise of comfortable management and increased prosperity.

Colonel Pellatt, in seconding the motion, emphasized the value of increased railway facilities, the acquiring of the company's properties by deed, and the settlement of all litigation, and dealt at some length with the bright outlook for the future.

The following gentlemen were elected directors for the ensuing year: Hon. George A. Cox, Robert Jaffray, Lieut.-Col. H. M. Pellatt; William Fernie, J. A. Gemmill, J. D. Chipman, David Morrice, E. R. Wood, Thomas Walmsley, Lieut.-Col. James Mason, Frederic Nicholls, G. G. S. Lindsey, K.C.; and C. C. Dalton.

The meeting then adjourned.

At a subsequent meeting of the directors, held immediately after the meeting of the shareholders, the Hon. George A. Cox was elected president for the ensuing year, Robert Jaffray, first vice-president; Col. H. M. Pellatt, second vice-president; G. G. S. Lindsey, K.C., third vice-president, and E. R. Wood, treasurer.

CORRESPONDENCE INVITED.

Mercantile Summary.

One of the wings of St. Laurent College, Montreal, was a few days ago destroyed, at a loss of $6,000.

An American company is thinking of starting a company in Canada, probably in Toronto, for the manufacture of insulating pipes.

One hour spent in the execution of justice is worth whole years of prayer. This is from the Mohammedan, and is quoted by Ruskin.

An offer of compromise at the rate of 37½c. on the dollar is being made by Charles Brosseau & Co., grocers, at St. John's, Que. Brosseau was unsuccessful before as a merchant in 1898, and subsequently as one of the firm of Payette & Brosseau, in 1901.

The firm of Johnson & McLeod, dealing in boots and shoes at Westville, N.S., are looking for indulgence at the hands of their creditors, and propose paying 50 per cent. of their liabilities now, and the balance in four years' time. Surely here is Scotch leisureliness and caution.

W. H. Rollans, of Arnprior, Ont., handling agricultural implements in a small way, and also dealing in scrap metals, has assigned to W. F. Sparham. ——Wilfred Dupuis, in the general store line at Glen Robertson, Ont., has assigned to H. Lamarre, a Montreal accountant, and is said to owe about $4,000.

The new building of the New York Times is described as one of the notable architectural triumphs of the world. The building is New York's tallest structure, from base to top being 31 stories, with an extreme height of 476 feet. In compliment to it the district from 42nd Street north for seven blocks has been named Times Square.

A Montreal dry goods retailer, named Zephirin Daoust, in business since the spring of 1901, is reported failed. He sought some renewals in full on 4th February payments, and being refused the indulgence asked, has found it necessary to assign.——A. A. Valiquette & Co., also doing a suburban dry goods trade at Montreal, have placed their affairs in the hands of the assignee. Mr. Valiquette was before unsuccessful in 1901, and has since done business under cover of his daughter's name.

M. Lemire & Co., general dealers, of St. Guillaume d'Upton, Que., are reported to be seeking a compromise. Mr. Lemire's general business record in the past has not been such as would inspire general confidence in the account as a desirable credit mark. He formerly was of Lemire & Frere, who failed in the general store line at Drummondville in 1893. He continued the business alone but is reported to have again failed within a year or so. He resumed in his wife's name, and moved to present address in 1896, failing last December, without getting a settlement. Of late he has been doing business in the name of a minor daughter. He has made about failures enough.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

The flour mill at Weyburn, Man., has been sold by the firm of A. R. Leitch & Company to the Weyburn Lumber and Elevator Company. Of the old company Messrs. Jarrett and Leitch are leaving, and J. Adamson enter the new firm.

Mercantile Summary

A demand of assignment has been made by Duclos & Payan, tanners, St. Hyacinthe, Que., upon Odilon Gagnon, a Montreal manufacturer of boots and shoes in a limited way.

Mr. Peter McKenzie, president of the McKenzie Trading and Chibagamo Mining Companies, will leave shortly for the northern part of the province of Quebec with thirty prospectors. They propose to go direct by sled to a district some 180 miles north-west of Roberval, and will not only prospect for minerals, but will begin developing some of the properties already owned there.

The German Government is considering a project for taking over the coal mines in the Rhenish-Westphalian and Silesian districts, and is taking bankers' advice as to the feasibility of raising funds for such a purpose. Apparently it has two objects in view—first, to learn if the nationalization of the mines is really feasible, and, secondly, to show the mine-owners what might happen if the coal strike is not settled, namely, that the Government has means in reserve whereby it could take the whole controversy out of the hands of both the owners and workmen. The sum of $250,000,000 is mentioned as a rough approximation of the cost of such an undertaking.

It is stated that the No. 2 blast furnace of the Dominion Iron and Steel Company, at Sydney, C.B., produced more last month than both the No. 1 and No. 2 furnaces in January, 1904. The output of No. 2 for the present month will, it is expected, amount to 9,000 tons of pig iron, an average yield of about 300 tons daily, a remarkable result when it is considered that the guaranteed daily product of each furnace is 250 tons.

The Joseph Ladue Gold Mining and Development Company, Dawson City, whose authorized capital is $5,000,000, are said to be considering the question of winding up business. Mr. Chauncey M. Depew is one of the first directors of the concern.

The annual statement of the Richelieu and Ontario Navigation Company shows that the gross receipts last year were $999,869, as compared with $1,104,800 in 1903. This decrease of $104,932, mainly in passenger earnings, is attributed to the influence of the St. Louis Exposition, and to the lateness of the season's opening. The operating expenses were only $8,000 less than in 1903. The net profits last year amounted to $94,312, as compared with $189,632 in 1903. The assets of the company are given at $3,708,978, made up of steamers, real estate, buildings, wharves, coal stores, provisions and so forth and accounts receivable. Against this are liabilities of which capital stock amounts to $3,132,000, and five per cent. sterling bonds to $349,426. The original amount of these bonds was $571,833, but $193,206 were cancelled, and there are $29,199 on hand, the bond liability being thus reduced by $222,406.

R. G. DUN & CO.,
Toronto and Principal Cities Dominion

Mercantile Summary.

Edmonton ratepayers have voted by a large majority in favor of granting a bonus of $100,000 for the establishment of Grand Trunk Pacific shops and a union depot.

The Esquimalt and Nanaimo Railway, known as the Dunsmuir line, has been taken over by the Canadian Pacific Railway, the consideration, it is rumored, being $3,000,000. The line will be extended from Nanaimo to Quatsino Sound at the head of Vancouver Island.

Mr. James Cronin, of Spokane, who has been appointed general manager of the War Eagle and the Centre Star mining companies of Rossland, to succeed Mr. Edmund R. Kirby, says that reconstruction of the concentrator at Trail, will not be started until spring, since work will be cheaper then.

In June, 1904, the Canada Cork Co., Limited, Toronto, was incorporated with an authorized capital of $500,000. This company succeeded to the business formerly carried on by Nassau Brown Eagen, as the Canada Crown Cork and Seal Co. There seems to have been keen competition on the part of an American company, which, it is reported, indulged freely in cutting of prices. As a result of the trouble, a winding-up order has been granted, with Osler Wade as interim liquidator. Liabilities, $60,000, with assets of about $25,000, consisting of stock and machinery.

The Canadian Pacific will soon begin the work of developing the coal measures which it owns at Hosmer, seven miles from Fernie, B. C. Under an agreement between the Crow's Nest Coal Company, the latter cannot produce coal from this property for two years yet, but as it will take two years to properly bring them up to a productive stage, the work is now to be inaugurated, so that the shipments can be made just as soon as the time specified has expired. It is anticipated at Fernie that the work of putting these coal measures on a productive basis will give employment to a large force of men.

To show the activity prevailing at the plant of the Lake Superior Corporation, Sault Ste. Marie, it may be stated that there are at present 3,800 men employed and that the pay-roll for last month was over $142,000. Of the first mortgage securities, $2,800,000 and $750,000 of creditors' claims have been converted into an investment in the property, and now the claims of creditors, which amount to $2,500,000, have all been adjusted and settled. The subsidy from the Dominion Government to the amount of $340,000 was received under agreements that the full amount will go into the actual work of extending the Algoma Railway. The company has met the interest on the bonds guaranteed by the Ontario Government, and those issued on the sole credit of the company.

We hear that the Amherst Boot and Shoe Mfg. Co., of Amherst, N.S., have extended their business to the Pacific Coast, and that their trade now covers from St. Johns, Nfld., to Victoria, B.C.

Mercantile Summary.

The Canadian Pacific Railway bill for building a line from Robson to Penticton, in British Columbia has been passed by the Railway Committee.

The Ottawa Northern and Western Railway has been authorized to extend the time for the construction of its lines from Shawville to Pembroke, and other points in the upper Ottawa Valley, by five years.

John MacKay's pot and pearl barley mills, at Bowmanville, which were recently burned down, are to be rebuilt. Goldie & McCulloch, of Galt, have the contract for the installation of a complete steam plant and other equipment.

The failure is noted of P. S. Hardy, one of the old-time merchants of Chambly Canton, Que., who has been in business there over 25 years, with a hitherto favorable record. Four years ago he bought a saw milling business which is thought to have proved an unfortunate investment.

The gross receipts of the Grand Trunk Railway for the half year ending December 31st, according to a report just received from London, amounted to £3,129,800. The working expenses were £2,205,100, leaving a net revenue of £924,700. Deducting debenture charges, £507,200, and adding a surplus of £14,500 of the Detroit & Grand Haven, there remains a balance of £432,000. With £4,300 brought in, £436,300 is available. This suffices to pay the half year's dividend on the guaranteed and full twelve months' dividend on both first and second preference stocks, leaving £6,500 to be carried forward. Last year the third preference received two per cent. The sum of £2,699 was carried forward.

A few weeks ago we made reference to the assignment of J. B. Hill, dry goods merchant, of St. Thomas. Since that time charges have been brought against him for transferring goods with the intention of defrauding his creditors. On Monday of this week the case was tried before Magistrate Glenn, of St. Thomas; when no fewer than seventy-six different charges were made against Hill, all of which appear to be transactions occurring in the ordinary course of business. The evidence showed that Hill had sold goods to one R. M. Lindsay on May 5th, 1904; $50.41 of this at net invoice prices, and the balance at a reduction of 50 cents on the dollar, and that he was in insolvent circumstances when the transaction occurred. On the charge of not keeping a proper set of books it was contended by the defence that the statute of 1904 did not apply, because the offence in its entirety was not committed since the passing of the statute. The Act is specific, giving as one of its requirements that the person charged has not kept a proper set of books for five years prior to the insolvency. The magistrate reserved his decision on this and the other charges until Monday, the 20th inst.

Mercantile Summary.

Skedden & Co.'s brush factory, at Hamilton, was a few days ago damaged by fire.

Ross & Howard are about to put up a large and up-to-date machine shop in Vancouver.

Hamilton, Ont., city council have granted the application of the Hamilton, Ancaster and Brantford Electric Railway Company for an independent entrance into the city.

The United States Rubber Company, or Rubber Trust, as it is usually styled, decided early this month to advance prices again to the extent of 6 2-3 per cent. over the schedule laid down last January.

The Grand Trunk Railway is spending large sums of money acquiring valuable sites in the centre of Battle Creek, Mich. It is said that one will be used for erecting thereon a $100,000 depot, and another for engine and tool shops. It is believed that the final result of Grand Trunk development in this locality will be to make of Battle Creek the third city in the State in point of importance.

People in various parts of the North-West are trying to hurry the Canadian Pacific in the building of its lines. For instance, residents of Lauder ask that it be not given later than September 1st, 1906, to complete the Glenboro and Lauder branch. Residents in the vicinity of Broomhill petition that it should be forced to complete its Broomhill branch by 7th of May next, or otherwise the charter be forfeited.

The Cumberland Railway and Coal Co., of Nova Scotia, held their annual meeting in Montreal last week, and re-elected the board of directors, as follows: Sir G. A. Drummond, Messrs. E. McDougall, D. Morrice, J. R. Cowans, G. L. Cains, E. S. Clouston, W. J. Morrice, and W. J. Crossen, and H. R. Drummond. The annual report showed that the output of coal last year was 505,804 tons, the largest in the company's history.

The annual report of the Toronto Electric Light Co. shows an increase of $122,052, from $630,263 to $752,315. Expenses, including interest on debentures, were $450,273, increasing only $57,924, so that the net earnings of $302,041 are $64,128 larger than in 1903. The dividends paid altogether were 7 per cent., leaving $114,076 surplus profits to add to the balance of $188,828 carried over from 1903; total, $302,904, from which $300,000 has been transferred to a reserve fund.

The Canada Southern Railway fast freight line will in future operate through Buffalo over the Pennsylvania instead of the New York Central. This means that freight will be delivered to the Pennsylvania at Black Rock by the Michigan Central instead of to the New York Central at Suspension Bridge. Railroad men generally seem to think that the change signifies a possible alliance between the New York Central and Pennsylvania interests.

Debentures for Sale.

TOWN OF MORDEN, MANITOBA.

Tenders will be received up to Saturday the 25th February, instant, for the purchase of Debentures of the Town of Morden, duly authorized by vote of the ratepayers, to the amount of Three Thousand Dollars, which are repayable with interest at five per cent. per annum included, as follows:—Nine debentures for $388.50 each, maturing 28th December in each of the years 1905 to 1913 inclusive, and one debenture for $388.60, maturing 28th December, 1914. These debentures bear date 28th December, 1904, from which date interest accrues.

The town of Morden is situate 80 miles south-west of Winnipeg on the C. P. R. Pembina Branch, has a population of 1,650, and an assessed value (50% of actual cash value) of $144,250.00, is the centre of the Southern Judicial District of Manitoba, and the Morden Land Titles District, and has County and Surrogate Courts. It is also the heart of the finest agricultural district in Manitoba. It has no indebtedness, except a balance of $1,250.00 and interest, on a twenty year water supply loan, none of which is overdue, and all of which is payable within six years.

The right is reserved to reject any or all tenders.

For further information apply to the undersigned.

C. McCORQUODALE,
Secretary-Treasurer

MORDEN,
February 1st, 1905.

Mercantile Summary.

A demand of assignment has been made upon A. Dufresne & Co., carriage-makers, St. Dominique de Bagot, Que. Dufresne who failed in 1891, has since been doing business in his wife's name.

Here is what may be termed a symposium of editors on the subject of recklessness as to fire on this continent: Eleven million letters in the dead letter office in one year is a pretty good record for carelessness for our 70,000,000 population.—New York Sun.

Two hundred and fifty million dollars worth of consumed property in the national ash heap for 1904 is another "pretty good record for carelessness for our 70,000,000 population."—The Insurance Press.

Three thousand seven hundred and eighty-seven dead and 51,343 injured in railroad accidents, during the fiscal year ending June 30th, 1904, is a new record and "another pretty good illustration for carelessness for our 70,000,000 population."—Insurance World.

TORONTO MARKETS.

Toronto, Feb. 16, 1905.

Drugs, Chemicals, etc.—A brisk trade is going on locally in drugs. Opium seems to be steadily advancing. Holders of quinine are watching for the results of the sales in Amsterdam next week. Camphor is still moving up. Oil of peppermint is weaker. Ipecacuanha is expected to go up, the stocks having become low. Norwegian cod liver oil is easier. Iodide of potash is very firm at the recent advance. Trade in the New York market is rather dull. Not much change is reported in British trade, either for home or export.

Flour and Grain.—Not much export demand is being experienced for flour. Ninety per cent. patents sell at $4.30 to $4.45 in buyers' bags, east or west freights. The wheat market is unchanged. Barley is from 1 to 2c. up. Not very much business is being done, the country roads being largely blocked. Oats are firm, and holders think there will be an advance. In millfeed there was another advance of about $2 per ton for bran and $1.50 for shorts at the beginning of this week.

Groceries.—There is scarcely any feature this week worth special comment. Sugars continue fairly steady at the recent decline. The movement in general goods is much as before, though the storms in country districts last week are likely to interfere somewhat with business. In teas trade is quiet. Canned goods continue strong.

Hardware.—Seasonable goods of all classes are in fairly good request. The metals are all fairly firm at unchanged prices. Iron preserves its steadiness.

Hides, Skins and Leather.—An easier tendency is discernible for hides, both here and in Chicago. Prices, however, continue steady. Leather is temporarily a little unsettled.

Live Stock.—Receipts of cattle at the market this week were light, probably owing to the state of the roads throughout country districts. The demand was fair, and, with so few animals in the markets, there was quite a lively competition among dealers. For exporters business was a little quiet, though there was some demand to fill space, and prices were quite firm. For butchers' cattle the light run gave considerable briskness to the enquiry, and some of the animals fetched as high as $4.75; heavy deliveries, however, would probably have caused a drop. Feeders were firm, with prices showing a higher tendency. All sheep and lambs sold quickly. Calves were firm. Hogs sold for 10c. lower, and the dealers seem to think prices will continue easy.

Provisions.—Owing to the smallness of receipts in the country owing to the bad state of the roads there is a comparative scarcity in the city of good dairy produce, and prices are firm. Butter has advanced, generally speaking, about a cent. The cheese market holds steady. Smoked meats and hog products are very steady.

Wool.—Prices are nominally the same, and firm, but no business is being done.

* * *

MONTREAL MARKETS.

Montreal, Feb. 15th, 1905.

Ashes.—The market has an easy tone, receipts for January having been almost equal to those for the first four months of 1904, and the English demand is light. For first quality of pots dealers quote $5.35 to $5.40; seconds, $4.90 to $5; pearls would realize probably in the vicinity of $7.50, but there has not been a transaction reported for some weeks.

Dairy Products.—Owing to the great scarcity of butter, prices have gone up like a rocket, and it is claimed that business has actually transpired in finest creamery at 28c., being an advance of over 5c. since a week ago. Cheese continues very dull, buyers being apparently very indifferent, while holders are firm in their ideas at about 10¾ to 10⅞c. for finest fall 'makes.' The shipments of cheese last week were light, only 6,678 boxes, and of butter 965 packages.

Dry Goods.—The late bad weather has somewhat affected travellers' orders in this line, but business is expected to assume its normal conditions in the course of a few days. Remittances on the whole are fair. Cables to hand from buyers abroad report considerable difficulty in securing supplies of lustres and other bright woolen, with manufacturers quoting higher prices. Silks are also somewhat scarce. Ribbons will be in great request, it is said, the next two years, and a number of Swiss embroidery manufacturers are turning their looms on to this class of goods. Linens show some evidence of easier values. In cotton goods there is nothing new, and millmen are apparently marking time and awaiting future developments in the raw cotton market.

Fish.—The demand in this line is very fair, but supplies of some kinds are very light owing to the stormy season on the coast. Green cod stocks are very low, and large fresh herrings are also scarce. We quote: Green cod, large, $7; No. 2, $5.50; Labrador herrings, $5; halves, ditto, $2.75; mackerel, $2 for 20-lb. kits; sea trout, $9.50 per bbl.; boneless cod, 6c. per lb.; fresh herrings, $1 to $1.25 per hundred; finnan haddies, 6 to 6½c. per pound.

Groceries.—The movements of travellers have been much interfered with by the late severe storms, and as a consequence the volume of business has been lessened somewhat this week, while remittances are also less active. We last week referred to a probable easing off in sugars, which took effect the day after last writing, the local refineries announcing a decline of 10c. a cental on all grades, making the present factory price for standard granulated $5.65 in barrels, with the lowest figure in yel-

lows $5.15. Molasses rules very firm, stocks in jobbers' hands being now extremely light, and the last cabled quotation from the island is 20 cents. Teas are very slow of movement, and the long-continued dullness in this line is hard to understand. The corner in evaporated apples is said to be an accomplished fact, and 7c. is now quoted in round lots; there were very few of these goods put up last fall, some of the largest concerns in the line not having operated their evaporators at all, and the total output is said to have been less than a quarter of the usual figures. Dried apples are also very firm at 4¼ to 4½c.

Hides.—Business has been moderate since last report, the heavy storms apparently having affected receipts from the country. Prices are still steady, 9½c. for No. 1 beef hides, being buyers' figures; No. 1 calfskins bring 13c., and No. 2 11c; lambskins, $1.15 to $1.20.

Leather.—There is nothing specially new in this line. Consumers of jobbing sole report a difficulty in getting needed supplies, local stocks being very low, and the quotation for No. 2 is very firm at 25c., and 24c. for No. 3; manufacturers' No. 2 is quoted at 24 to 24½c. Black leathers are comparatively dull, but are steady in price as last quoted.

Metals and Hardware.—Some little more enquiry is noted for pig iron, and domestic brands seem to be in growing favor. Hamilton, Midland and Londonderry are all quoted at about $10, spot price in ordinary lots; Summerlee and equal, $20.75 to $21 from store, and about $19 for spring delivery from wharf. In bars, wire, nails, horseshoes, etc., no change is reported. The English market is reported a shade easier on Canada plates, but the local jobbing figure is steady at $2.45 for fifty-twos. Tinplates, Ternes, black sheets, etc., are all steady at last quotations. Boiler plate, $2; iron pipe, $4.20 for inch. Lead is easier at $3.40 to $3.45; tin, firm at 32½ to 33c.; spelter, $6.75; antimony, 9½c.; copper, 16¼ to 16½c.

Oils, Paints and Glass.—While actual present deliveries are light, orders for despatch when spring freight rates take effect are said to be coming in in goodly volume. The only change in quotations is a reduction in turpentine to 77½c. per gal. in single barrel lots. Linseed oil remains easy at 42 to 43c. for raw; boiled, 44 to 45c.

⁂

TORONTO'S FINANCES.

The general statement of the finances of Toronto as they stood at the end of the year 1904 shows that the general debenture of the city debt stood at $14,999,916; debentures matured were $614,560. The debentures issued during 1904 were $2,615,559. The Toronto Railway paving debt stood at $363,620. Altogether, the general debt on December 31st, 1904, was $4,391,319; gross debt, $23,652,812; the sinking funds on hand were $6,034,670. The net debt for 1904 was $17,618,142 compared with $15,316,266 for 1903, or an increase of $2,301,875. Among the large expenditures provided for during the year were the fire protection by-laws, $750,000; Exhibition improvement by-law, $300,000; public library site, $83,000. In addition there is the expenditure on parks; the sum which is specially provided by legislation will this year amount to about $147,000, being one mill on each dollar of the assessment.

⁂

NEWS FROM THE MINES.

The Britannia Mine Co. at Howe Sound, B.C., are doing extensive development work on their property, and are putting in a large quantity of up-to-date machinery.

The generating plant will consist of two 250-kilowatt alternating current three-phase generators, operating under a pressure of 6,600 volts, coupled to Pelton water-wheels. The generators and their equipment of panels, lightning-arresters, oil-switches and apparatus are all made by the Westinghouse Electric Company. There is also installed one

Canadian Pacific Railway Company

Dividends for the half-year ended 31st December, 1904, have been declared as follows:—

On the Preference Stock, two per cent.

On the Common Stock, three per cent.

Warrants for the Common Stock dividend will be mailed on or about April 1st, to Shareholders of record at the closing of the books in Montreal, New York and London respectively.

The Preference Stock dividend will be paid on Saturday, 1st April, to Shareholders of record at the closing of the books at the Company's London Office, No. 62 Charing Cross, London, S.W.

The Common Stock Transfer Books will close in Montreal, New York and London at 3 p.m. on Wednesday, March 1st. The Preference Stock Books will also close at 3 p.m. on Wednesday, March 1st. All books will be re-opened on Monday, April 3rd.

By order of the Board.

CHARLES DRINKWATER, Secretary.

Montreal, 13th February, 1905.

Tenders Wanted.

Sealed tenders will be received by the undersigned up to 4 p.m. on Saturday the 25th day of February, 1905, for the purchase of Debentures of the City of Niagara Falls as follows:—

$8,000 Water Works Debentures at 4½ per cent., repayable in 15 equal annual payments, and

$15,000 Electric Light Debentures at 4½ per cent. repayable in 25 equal annual payments.

The highest or any tender not necessarily accepted.

JOHN ROBINSON, Clerk

Niagara Falls, Can., Feb. 13th, 1905.

NOTICE.

The Queen City Fire Insurance Company.

The Annual General Meeting of this Company will be held, pursuant to the Act of Incorporation, on **Tuesday, the 28th Day of February, 1905,** at 12 o'clock noon, at the Company's Office, Queen City Chambers, 32 Church Street, Toronto.

By order, THOMAS WALMSLEY, Secretary.

Toronto, February 7th, 1905.

NOTICE.

The Hand-in-Hand Insurance Company.

(*Mutual and Stock.*)

The General Annual Meeting of the Members and Shareholders of this Company will be held on **Saturday, the 25th Day of February, 1905,** at 12 o'clock noon, at the offices, 32 Church Street, Toronto, for the Election of Directors for the ensuing year, and transaction of other business relating to the management of the Company.

By order, HUGH SCOTT, Manager and Secretary.

Toronto, February 7th, 1905.

250-volt direct current generator, complete with its panels and equipment.

Power for the purpose of driving the entire equipment is obtained from the Britannia Creek, the water being conveyed from the creek a distance of two and a half miles. The pipe-line used to convey the water is, owing to the high head of water (upwards of 1,600 feet), especially heavy, being what is known as seamless oil tube steel pipe, to withstand a hydraulic pressure of 1,800 pounds to the square inch.

The tonnage smelted in the three Boundary District, B.C., reduction works last week was 13,089 tons, of which the quartz smelter treated 10,560 tons. The British Columbia Copper Company now has its briquetting plant almost completed. It has also just put up a pumping plant so as always to have a reserve power in case of failure of the electric power. The Hesperus Gold-Copper Mines Company has installed a five-drill straight-line air compressor, and has spent several thousand dollars in other improvements. The Rambler-Cariboo Mines Co. has just passed a resolution to increase the capital stock by $62,500 in order to complete the long tunnel now in course of construction.

Prospects in the Slocan continue good. The "American Boy" mine is about to commence shipping zinc, and is sending out this week three cars as a trial shipment. The Washington mine, which is said to have 8,000 tons of zinc ore in sight, is going to start up shortly. The Rosebery Mining Co. is now installing a zinc extracting plant.

⁂

WESTERN GRAIN EXCHANGE.

The first annual meeting of the Western Grain Exchange was held in the secretary's office, Union Bank building, Winnipeg, and was quite enthusiastic. There was a total of 96 applications to be acted upon, and the outlook was for successful organization. Officers were elected as follows: President, N. T. Macmillan; vice-president, Jacob Friesen; secretary-treasurer, O. A. Glenn; council: T. J. Noble, J. M. Bick, D. N. Macmillan, James Lawrence, A. M. Lewis, W. G. Potter, C. C. Robinson, W. T. Gibbins, Jacob Friesen; arbitration board: N. T. Macmillan, Jacob Friesen, T. J. Noble, A. M. Lewis, James Lawrence; board of appeals: J. M. Dick, D. N. Macmillan, W. T. Gibbins, W. G. Potter, Alex. Morrison.

Accidents vs. Fires

It is said that 20,000,000 Accidents and Illnesses occur each year, but only 80,000 fires.

A business man protects his property against the loss that rarely happens—fire. He can replace his property, but he can never replace his time or his damaged arm.

The most liberal accident and sickness policies are issued by

The Employers' Liability Assurance Company,
Temple Building, - Toronto.

THE NORTHERN LIFE
Assurance Company of Canada.

The Annual Meeting of the Shareholders of the Northern Life Assurance Company of Canada was held at their Head Office, Masonic Temple, on Monday, the 6th instant. The chair was occupied by T. H. Purdom, K. C., President. Mr. John Milne, Managing Director, read the following report, which was unanimously adopted.

To the Shareholders of The Northern Life Assurance Company of Canada:—

The Directors in their last report stated, "The year 1903 has been the year of most satisfactory progress in the history of the Company." A similar statement is applicable to the business for the year 1904. There is no direction in which progress could have been made that the result is not satisfactory.

The amount of insurance written during the year was $1,231,580, and the amount in force on the 31st day of December, 1904, was $4,144,881.

The assets of the Company have been increased by the sum of $79,729.93, and the income of the Company has been sufficient to meet all liabilities, including the additional amount necessary for Government reserve, and leave a surplus remaining of the sum of $15,043.25.

The total assets of the Company, exclusive of uncalled capital, amount to the sum of $486,949.15, of which the sum of $311,326 is set apart as Government reserves for the security of Policyholders.

The Directors are pleased that each year since its formation, the Company has grown stronger, not only in fact, but in the estimation of the insuring public as well. This is evidenced by the growth of the business of the Company.

The Directors believe the results attained have been due to the adherence in the management to sound, progressive, conservative principles. The men in the field have been active, loyal workers, and have assisted in promoting the welfare of the Company in every way.

It will be gratifying to our Policyholders to learn, that during the year, the surplus for their benefit was increased by the sum of $15,043.25, which now amounts to the sum of $175,623.15. This, together with the reserve, makes the security to our Policyholders amount to the sum of $486,949.15, exclusive of unpaid capital, which amounts to the further sum of $622,950.00.

The Financial Statement, showing the income and expenditure, the assets and liabilities, duly audited, is herewith submitted.

The Directors are pleased to bear testimony to the constant zeal and efficiency of the Managing Director and the Staff at the Head Office, and express their satisfaction with the work accomplished by the increasing number of good Agents connected with the Company.

All of which is respectfully submitted.

T. H. PURDOM, President.

FINANCIAL STATEMENT

We have carefully examined the foregoing financial statements of income and expenditure, and find them correct. Vouchers have been produced for all expenditure. The above statement of assets and liabilities is a fair and just statement of the Company's business, We have carefully examined all the mortgages and other securities, and find them as here represented. We have conducted a running audit during the year and certify that the books are well and systematically kept. (Signed),

W. M. GOVENLOCK,
WILLIAM SIMSON,
Auditors.

The following gentlemen were unanimously elected directors for the ensuing year:—T. H. Purdom, K.C., Thomas Long (Toronto), W. S. Calvert, M.P., J. D. Balfour, M. D., Lord Strathcona and Mount Royal, Matthew Wilson, K.C., (Chatham), John Ferguson, John Davis (Windsor), N. H. Stevens (Chatham), Francis Love, P.M., John Purdom, M. McGugan, ex-M.P., Charles Jenkins (Petrolea), and John Milne; and at a subsequent meeting of the directors T. H. Purdom, K.C., was re-elected president, Thos. Long (Toronto), first vice-president, and W. S. Calvert, M. P. (Strathroy), second vice-president.

Another Milestone

Has been passed in the successful history of The Canada Life Assurance Company. Ten years ago the Company issued Policy Number 60,000. Now Policy Number 100,000 has been paid for. While 60,000 policies represented the growth of 47 years, the past ten years have alone produced two-thirds as many.

In assets too, there has been a proportionate growth.

For The Canada Life.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

MORTGAGE LENDING IN ONTARIO.

The funds of the London Canadian Loan Company have been well employed in 1904, a much larger aggregate of new loans having been made. Rates were firm as a rule throughout the year both in this Province and in the West, where the company does considerable and increasing business. Borrowers have been prompt in meeting their payments, and the directors have found the year a satisfactory one. The aggregate of loans is somewhat larger than at the close of 1903, the other assets not materially altered, call loans being somewhat larger and cash somewhat less in amount. Gross earnings were about the same, net earnings a few thousand dollars more. The reserve account was not increased, but there is $50,000 behind it in the shape of contingent account and profit and loss balance.

It is important to notice, in the speech of the president, the announcement that the mortgages in default, to meet possible losses in which the contingent fund was formed, have been largely realized upon; and the further statement that "Our Ontario borrowers have met their engagements so promptly that we have practically no arrears of interest." The president gave some interesting information about the nature of the company's mortgage assets and the conditions of borrowers. The mortgages held on properties in Manitoba and the Territories now exceed a million dollars, approaching closely to the amount loaned in Ontario. Mr. Cockburn referred, as did Mr. T. R. Wood after him, to the fact that this company had never had to reduce the capital stock, and that it had never paid less than six per cent. dividend. The present showing appears to be about the most comfortable one the company has had for some years, and the tone of the meeting indicated general satisfaction.

The shareholders of the Landed Banking and Loan Company have good reason to be satisfied with the outcome of that company's operations last year, which was its twenty-eighth. It did a larger business, made more profit both gross and net, and added a larger sum to reserve than in 1903. The reserve, we note in passing, is now $240,000, equal to 34 per cent. of the capital. The company's funds have been well and profitably employed; its experience has been that mortgage repayments have been well met. Lieut.-Col. Henry McLaren, whose death the directors record with deep regret, was a most estimable gentleman and one of the first directors of the company. In his room, Mr. C. S. Scott was chosen a member of the board. Mr. Matthew Leggat was re-elected president, and Mr. John Waldie, vice-president.

⁂

GOOD ROADS.

The period is approaching when the poorness of the country roads in most parts of Canada will make itself felt with peculiar force. Mr. S. B. Morris, of Rodney, in a recent address before the West Elgin Farmers' Institute, made some remarks upon this subject which should be taken to heart by all our rural communities. He said it costs the people of the United States each year $300,000,000 more to transport the surplus products of farm and forest to shipping point than the total cost of transporting all the freight, passengers, mails, and express matter over all the railways in that country. In this country, our various governments have expended millions of dollars in constructing canals, and in building and aiding railways, but the providing of good highways has, at any rate until recently, been left almost entirely in the hands of farmers who only had the poor means of statute labor to fall back upon. This system, it is needless to say, has outgrown its usefulness.

Some excellent work of an educational nature is being done in Ontario by the Eastern and Western Good Roads Associations. The Eastern Association arranged with the Grand Trunk Railway for a special train, with the manufacturers of road-making machinery for machinery, with the cement manufacturers for cement, and in a tour of Eastern Ontario built several pieces of good road and made concrete pipe, which latter was the first the people in the eastern part had seen. Meetings were held at each point, which were attended by the members of local councils and others interested. As a result, many of the municipalities have abandoned the statute labor system, several are making their own concrete pipe, and some counties have bought out existing gravel roads and applied the county system of good roads, thereby availing themselves of the Government grant of $1,000,000. It is to be hoped the Western Association may be able to arrange for a similar tour throughout the West, as much good would thereby be accomplished. Much yet remains to be done, however.

During the thirteen years for which we have statistics in the Province of Ontario, there has been expended by township councils in labor and cash about $25,000,000, for which Mr. Morris ventures to say a very small percentage of value has been received. What is needed is a continued educational campaign in order to impress upon the minds of village and county councils and upon farmers and others the terrible waste which is still going on for want of proper country roads.

* * *

RECORDS OF CANADIAN EXPORTS.

We have received the following letter on this subject from the office of the Minister of Customs, Ottawa:—

Ottawa, 17th February, 1905.

Editor Monetary Times:

Sir,—The Honorable the Minister of Customs has carefully read the article entitled "Exports from Canadian Cities" in the issue of your paper under date January 20th, a marked copy of which you sent him, and has noted particularly your suggestion that it would be well to point out in the Blue Book how Bridgeburg and Niagara Falls are credited with exports which should go to the credit of Toronto and Hamilton.

Mr. Paterson appreciates the kindly tone of the article, and has asked me to write you, calling your attention respectfully to the explanatory notes which appear at the front of the Trade and Navigation Returns, from which you have evidently made your quotations. You will observe that it is stated in such notes that

> "Under the regulations commencing July 1st, 1900, all export entries are delivered at the frontier port of exit, and the totals thereof are credited to the respective ports where the goods pass outwards from Canada. In view of the more complete returns obtained under this system, the additions heretofore made to the export statistics (prior to July 1st, 1900), under the head of "Short Returns" are now omitted."

The Minister has also asked me to explain to you that the change which was made on the 1st of July, 1900, in the method of recording statistics of exports from the country appeared to be necessary to ensure accuracy. Prior to that date, the regulations required that export entries had to be filed at the Customs office nearest to the place where the shipments for export originated, but in practice we found that there was no supervision over such shipments, and that shippers who were located at places where there was no Customs office did not give proper attention to the regulations. In quite a number of instances we found that exports went out of the country without being recorded. It was also found that the old system did not ensure full credit being given to the places where the shipments originated. For instance the Province of Manitoba was not credited with its full exports of wheat for the reason that much of the wheat grown there was sent to Fort William and Port Arthur, in the Province of Ontario, and was shipped from there for export, the ultimate destination thereof not being known when the wheat left Manitoba.

It is believed that under the new system, whereby all exports from the country are recorded at the port of exit, we secure much greater accuracy. We hold the transportation companies responsible for the filing of export entries at the inland frontier points and at seaports, and, having supervision over the goods that go out of the country at these points, we are better able to see that proper export entries are filed.

Yours very truly,
JOHN BAIN,
Assistant Commissioner.

Mr. Bain's letter gives an explanation of the cause of the change made on 1st July, 1900, in the Government's method of recording statistics of exports, and gives one instance out of many which induced the Government to make the change. It is probably true, as the Department contends, that the new method secures more full returns of Canadian manufactures exported. But we still think it unfortunate that no means exist of ascertaining from any Government publication, what proportion of the whole exports of Canada any city or large town contributes. We do not know who could object to such information being compiled, unless it be a manufacturer who is a sort of commercial ostrich and thinks that the extent of his output or export must remain unknown to the inquisitive public so long as the Government returns do not give the export figures from his town. And we hope that the Department may be induced to effect some arrangement by which the activity of the manufacturing towns and cities, of whose progress we are proud, may be shown from year to year in the Government returns. That many Canadians would welcome such publication we feel quite sure.

And besides, the present complications are a stumbling-block to the Englishman or the foreigner who looks in a Blue Book for the amount of the export trade of our large inland towns, and is absolutely misled in respect to it. Witness the absurdity of putting down the foreign trade of our Ontario cities on page 19 of the Tables of Trade and Navigation as under:—

	Fiscal year, 1904.	
	Imports.	Exports.
Brantford	$2,108,119	Nil.
Hamilton	9,328,014	$586
London	5,200,343	Nil.
Ottawa	4,688,297	64,235
Peterboro	1,529,371	Nil.
Toronto	47,671,288	3,150

How is a man in Liverpool or Hamburg or Washington ,who looks at this table, to know that the above figures give a distorted view of facts, and that he has to look under Bridgeburg (the frontier port) for an idea of the exports of Hamilton, and under Niagara Falls (the frontier port) for part of the exports of Toronto.

NOTES ON IMMIGRATION, ETC.

From the report of the Department of the Interior for the year 1903-4, which has just been received from the Dominion Government, we find that the nationality of the immigrants arriving in Canada from all sources in that year was divided as follows:—

English and Welsh	36,694
Scotch	10,552
Irish	3,128
United States	45,171
Galicians	7,729
Germans	2,985
Hungarians	1,207
Austrians	2,201
Scandinavians	4,203
Doukhobors	.....
French and Belgians	2,392
Russians and Finlanders	2,806
Miscellaneous	11,262
Total	130,330

It is remarked that a large number of the arrivals were young men from Great Britain, seeking work on farms. In spite of this, however, not enough came in to fill the applications placed in the Department's books. This fact will help to show the remarkable development which is going on in the West.

We note with the peculiar sort of interest which attaches the circumstances of the "I-told-you-so" description the remarks which are made concerning the progress of the all-British colony. There has apparently been a strange tendency to depend upon co-operation rather than upon individual efforts. This has resulted in the calling of many meetings to discuss points which might have been just as readily decided by the individuals. Be this as it may, it is a fact that the average rate of progress in the colony holdings has not been so rapid as is the case with the ordinary homesteader. The Department has now thrown open the remainder of the land in this settlement for outsiders, and it is believed that the proximity of a few experienced men will be for the benefit of all.

The number of homestead entries during the last fiscal year was 26,073 as compared with 31,383 for the year previous, and 14,673 for 1902. The sales of lands by companies holding Government grants shows a falling off. They were 1,267,187 acres, and the amount realized was $5,564,240 compared with 4,229,011 acres, and $14,651,757 in the previous year. The revenue of the Department on account of Dominion lands is in excess of that of previous years, taken on the whole.

During the latter half of 1903 there were no less than sixty-nine parties engaged in surveying Dominion lands, of which forty-four were engaged in the Territories. In the early part of 1904 there were still more engaged in this work.

* * *

BANK STATEMENT.

We present below a condensation of the monthly statement of Canadian Banks for January, 1905. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities, averaging holdings of specie and Dominion notes, etc.:

Canadian Bank Statement.

LIABILITIES	Jan. 1905.	Dec. 1904.
Capital authorized	$100,546,666	$100,546,666
Capital paid up	80,378,420	80,055,596
Reserve Funds	$54,194,407	54,071,656
Notes in circulation	58,021,075	$64,507,394
Dominion and Provincial Government deposits	11,038,083	12,656,888
Public deposits on demand in Canada	128,962,627	134,280,104
Public deposits at notice	322,270,620	319,132,078
Deposits outside of Canada	39,470,656	38,814,613
Bank loans or deposits from other banks secured	1,104,292	811,954
Due to other banks in Canada	5,003,241	5,684,483
Due to other banks in Great Britain	2,716,272	2,452,651
Due to other banks in foreign countries	1,511,299	1,224,203
Other liabilities	7,738,654	8,353,622
Total liabilities	$577,836,895	$587,918,063
ASSETS.		
Specie	$17,796,556	$17,617,529
Dominion notes	37,804,229	38,436,983
Deposits to secure note circulation	3,328,771	3,328,771
Notes and cheques on other banks	21,067,517	23,784,768
Loans to other banks, secured	1,085,854	811,954
Deposits with other banks in Canada	6,016,708	8,183,400
Due from banks in Great Britain	9,472,707	9,041,191
Due from other banks in foreign countries	20,173,572	20,849,499
Dominion or provincial Govt. debentures or stock	9,374,840	9,561,422
Other securities	56,562,607	55,986,308
Call loans on bonds and stocks in Canada	38,214,280	38,950,978
Call loans elsewhere	46,184,911	48,782,441
	$267,082,552	$275,335,244
Current Loans in Canada	412,901,073	413,779,520
Current Loans elsewhere	18,324,151	17,344,724
Loans to Dominion and Provincial Governments	1,948,922	2,934,306
Overdue debts	2,130,438	2,149,162
Real estate	667,370	691,582
Mortgages on real estate sold	768,024	805,101
Bank premises	10,256,829	10,165,341
Other assets	6,797,205	6,710,804
Total assets	$720,876,763	$729,915,962
Average amount of specie held during the month	17,512,748	17,190,701
Average Dominion notes held during the month	37,135,737	36,677,105
Greatest amount notes in circulation during month	64,031,382	70,239,598
Loans to directors or their firms	9,933,389	9,688,611

* * *

THE SEVERE WEATHER.

From almost every part of Eastern Canada come accounts of severe winter weather and snow storms and drifts, which have not only impeded railways, but blocked country roads for days. The effect of this upon business of all kinds has been marked. Our Montreal correspondent tells us, for instance, that wholesale dealers in dry goods, groceries, and metals, all tell the same story of business checked and remittances hindered by the deep snow. One commercial traveller in Prince Edward Island had to abandon his samples and go on foot a distance of fifteen miles over a road which a team could not traverse. In a great part of Ontario traffic has suffered and the railways have had to resort to unusual effort to keep their main lines open, to say nothing of regular, while the branch lines have fared badly. In the course of these efforts lives have been lost. In Nova Scotia there has been, during ten or fifteen days this month, a succession of the most severe storms experienced during the past thirty years, and Halifax has been more or less cut off from the rest of the province. The railways have been nearly all tied up. The recently opened Halifax and South Western, we are told, has had a train stalled in the snow at Middleton since February 11th, and last week announced that all trains were suspended for the present. The Midland Railway of that province has not run a train since February 7th, so say our Halifax advices of 20th instant. The Dominion Atlantic has been unable to get trains through for several days at a stretch. The Intercolonial has not been much better off than the others, except through the advantage gained by superior equipment and snow-fighting facilities. Its trouble was worst between Truro and Sydney, but nearly all the branch roads are closed indefinitely. Travellers are snowed up all over the Eastern Provinces, and the majority of firms do not know of the whereabouts of their travelling men. No attempt is being made to send out goods, says our Halifax correspondent. "Supplies of coal are very low in many places, and the schools have had to be closed. There is even a scarcity of provisions, and flour has sold in some places as high as nine and ten dollars a barrel."

If it were not that there is the month of March still to come, we might surmise that these violent storms were the last effort of an expiring winter. But we have had, since November, a sufficient variety of weather to make one wary of predicting any sudden moderating of temperature.

* * *

THE CONDITION OF JAPAN.

Some thirty pages in English out of the hundred of the "Industrial Orient" for January 14th, are devoted to discussion of the social and commercial features of Japan, statistics of her finance and trade, and articles upon the war. A resumé of the financial situation of that country is given by the president of the Bank of Japan, Mr. Matsuo, showing that bank deposits are increasing, that more capital is going into railway construction, that convertible notes and subsidiary coin are being sent in increasing millions to Korea and Manchuria. But we had better give Mr. Matsuo's own words:—

It is a subject of congratulation that while the nation is providing ample war funds business has nevertheless progressed. From the point of view of bank deposits the returns show that whereas the total lodged in the banks of the six cities having clearing houses namely, Tokyo, Osaka, Kobe, Kyoto, Nagoya and Yokohama, was 333 millions of yen last January, it had increased to 351 millions in October. Further, while the capital of railway companies and others was 910 million yen in January, it grew to 929 millions in October, an increase due to the electric railways, the Keiju Railway, the Hakodate-Otaru Railway, the Maezuru-Osaka Railway and the Sanyo Railway, all of which, despite the pressure of the war, made steady progress. As for convertible notes, there were 214 millions circulating in January, and there are now 240 millions. But included in the latter amount are 20 millions sent direct by the Bank of Japan to Manchuria and Korea, so that the actual increase at home is only 6 millions. Moreover, a considerable quantity of subsidiary coins have also gone to these places from Japan, and if that be taken into account the issue of convertible notes is probably smaller in effect than it was before the war began.

Compared with the previous fiscal year, the foreign trade of Japan shows an increase in 1904 of 24,990,000 yen (about $12,500,000), in exports, and 38,900,000 yen in imports. This growth of imports is not, however, on account of goods for the nation's ordinary use; it is due directly or indirectly to inevitable purchases connected with the war. The increase in exports, on the other hand, proves that although so many of the country's young men have gone abroad, its industrial power has not been impaired. With regard to war expenditures, the Vice-Minister of Finance has just told you that we have paid out over 400 millions. Of that total 280 millions have been obtained by floating a domestic loan, the paid-up instalments of which amounted at the latest date to 130 millions. There is no indication that the subscription of this sum has produced influence in other directions. Bank deposits, on the contrary, have increased. Note issues have not grown. From what source, then, has the money been obtained? Investigation is needed before answering that question. Mr. Sonoda, a few minutes ago, suggested the query, what is the net annual income of the Japanese people? He thought that if a part of that income were devoted to meeting war outlays, the war might be continued for several years without inconvenience. We have no statistics now to show what the income is, but seeing that the payment of 130 million yen has not produced any sensible effect, one is tempted to think that the money may have been defrayed from the income. Or have the people exercised proportionate economies? Apparently one source or the other, or both perhaps, have been drawn upon. At all events no consequent deficiency is perceptible elsewhere.

* * *

CANADA LIFE ASSURANCE COMPANY.

The year 1904 closes a quinquennial period for this company, and a comparison with previous quinquennial periods shows how great has been its progress, the income of the year just past approaching four millions, and the total assurance in force at 31st December exceeding one hundred millions of dollars. The following table shows leading figures at the close of different years:

Year.	Total Income.	Total Assets.	Total Assurances in force.
1885	$1,336,680 58	$ 7,044,940 20	$34,890,225 71
1890	2,098,205 10	11,032,440 09	54,086,801 26
1895	2,737,470 74	16,324,476 93	70,541,395 67
1900	3,055,905 33	22,648,204 08	81,039,083 00
1904	4,350,857 35	29,074,599 00	101,805,944 00

The company has completed the change to 3½ and 3 per cent interest basis for reserves, which is not only a more exacting one than the Government requires, but a stronger basis than other Canadian life companies have as yet adopted. This, while it places the Canada Life in an excellent position looking forward to any exigencies of the future, has absorbed a good deal of the surplus profit which some policy-holders naturally expected would go to them. But the fact is that money is nowhere earning the rates of interest it used to do, and this, along with the fact that by the altered standard a company is strengthened, ought to solace those who long, and must long in vain, for such profits as 1885 used to bring forth. The president's address reminded his hearers that "in addition to the $500,000 reserved from the surplus of the previous quinquennium we have, during the five-year period just ended, in order to complete the change to our present valuation basis, transferred from the surplus to the reserves the large sum of $725,000; and when it is borne in mind that during the same time we have opened and equipped a large number of new branches, and more than doubled our new business, the present surplus of $1,376,000 is a result of which we may justly feel proud. This surplus will enable us to pay cash profits to policy-holders substantially larger than were paid five years ago."

An interesting announcement was made at the meeting, of action taken on the suggestion of the company's actuary. This is in the direction of liberalizing the loan values, surrender values, and paid-up insurance of the older policies of the company. That is to say where men who have carried policies for long terms, find their circumstances so altered that they feel compelled to realize upon their policies, or else to stop paying premiums and take paid-up policies for what they have already paid, the new regulations of the company in this regard grant much more liberal values than before. Such a voluntary and graceful act of the company is greatly to its credit, and will, we doubt not, give needed relief to many persons. We do not find in any of the addresses particular reference to the growth of the United States business of the company, but its English business is much greater than the management expected. These are all feeders, but after all the home business is the main stream, and that flows on in good volume, attesting the confidence of Canadians in this old and strong life company.

* * *

EQUITABLE LIFE ASSURANCE SOCIETY.

The latest annual statement of the Equitable Life exhibits large increases in most of the important items, and satisfactory progress generally. The assets now reach the great sum of $413,953,020, and the increase during the year was greater than in any preceding year. The surplus is $80,794,269.21, also a large increase. Dividends to policy-holders amounting to $6,001,902, death claims of $18,049,539 were paid, and the total payments to policy-holders were $36,389,047. The new business amounted to $222,920,037, and the amount outstanding at the end of last year was $1,495,542,892, which is an increase of some ninety millions during the twelve months. Of the year's income of $79,000,000, more than $62,000,000 was from premiums. The reserves exceed $300,000,000. These and other figures of the report attest the wide extent of this great company's operations and the strength of its resources.

Shortly before the annual meeting it was deemed advisable by the president, Mr. Alexander, and all but three of the managing officers of the society, to have the possible control of its affairs taken away from Vice-President James H. Hyde (son of the late Henry B. Hyde), who is the owner of 51 per cent. of the stock. And a petition was presented to the board of directors, asking that the control of the society be taken from the stockholders and given to the policy-holders. At the meeting, the board expressed the unanimous opinion that policy-holders should be given the right to vote for directors, and that steps be taken to carry this principle into effect at the earliest possible moment. A committee of seven was appointed to arrange the details, and all the officers were re-elected. Thus the movement to convert the Equitable into a great policy-holders' company has been successfully accomplished. This is one of the most important steps ever taken by a life insurance company, and its satisfactory settlement is a proper cause of rejoicing to all friends of this prominent company.

* * *

TORONTO GENERAL TRUSTS CORPORATION.

The functions of this concern are varied and important, embracing executorships, trusteeships, investment agency, and the functions of a guardian or administrator. As the chairman of this week's meeting put it: "Our business is simply that of skilled managers of great estates and trusts, involving continued oversight and the greatest possible care in every branch of management." At the same time, the corporation has always made it clear that it does no business of a speculative kind, promotes no schemes, and underwrites no enterprises, but confines its attention, as it has done for twenty odd years, to the management of estates and trusts. And it is able to point to an aggregate of more than $22,000,000 in assets as a proof of the confidence reposed in it by the public. It is distinctly well managed, and the list of its directors contains gentlemen of good business repute in almost every part of Canada.

There are many persons who, while admitting the superiority of a corporate executor or trustee to an individual for the same purposes, contend that the former is the more expensive servant. These people have got an exaggerated notion of the high charges of companies such as this for their services. But if any one will divide the sum of capital handled into the amount of profit earned by this corporation he may see for himself that no extravagant charge is made. Indeed, three experienced professional and business men among the officers, Dr. Hoskin, Mr. Beatty, and Mr. Langmuir, have declared that the charges made by the Toronto General Trusts Corporation are much less than those of private individuals doing like work. In his address the managing director traced the progress of the corporation since 1882, pointing out that up to 1890 it was the only trust company in Canada, whereas there are now fourteen distributed from Halifax to Winnipeg, and he distinguishes their constitution and scope. The corporation handled last year over two millions of new business. Its earnings were sufficient to pay 7½ per cent. dividend on the paid capital of a million dollars, to write $11,000 off its buildings, and to carry forward $14,521. The holdings of assets against the various branches of its extensive business are stated in the balance sheet on another page.

* * *

HOME SAVINGS AND LOAN COMPANY.

It was stated a year ago that this company had opened more new accounts with depositors in 1903 than in any year since 1891. That its accounts must be much more numerous now is to be inferred from the great increase of $591,000 in its deposits and interest, even if we were not told that they number nine thousand. "This is the twenty-sixth and last annual report of the Home Savings and Loan Company," were the words in which the president began his address to shareholders last week. This may need to be explained to those who are not familiar with the plans and proceedings of the management during the past twelve months. It is intended to change this company into a bank, and a charter has accordingly been obtained. Various occurrences have delayed the carrying out of this purpose, as the report explains, but it looks now as if the Home Bank of Canada would be open for business in a very few months, with good prospects.

The earnings of the year were practically the same as in the year preceding. A branch office was opened in the western part of the city some ten months ago, and the result has quite come up to the expectations of the directors. It is observable that there is a lesser amount of assets in the shape of mortgages on real estate. This is because mortgages are being called in in preparation for the change to a bank. Debentures and bonds owned, and loans on the security of stocks, bonds and debentures are, on the other hand, much increased. They amount, together, to $3,180,031. Reference is made in the report to the regretted death of the vice-president, Mr. John Foy, in December last. He had been a member of the board of directors continuously since the company's formation. The board is now composed of Eugene O'Keefe, president; Thomas Flynn, vice-president; Edward Stock, Col. James Mason, and James J. Foy, K.C.

* * *

PEOPLE'S BANK OF HALIFAX.

The People's Bank of Halifax issued its annual statement last week. The profits for the past year, added to the balance brought forward, amount to over $100,000. This creditable earning enabled the payment of the usual 6 per cent. dividend and a considerable addition to the profit and loss account. The capital was increased to the round $1,000,000 during the past year. The meeting of shareholders is set down for 7th of March.

NOVA SCOTIA TOWNS.

The financial statement of the town of Antigonish for the past year shows a balance on hand of $193.57, and the town has no liabilities. The annual meeting of the Board of Trade of the town was held recently, and the following officers were elected: President, Thomas Trotter; vice-president, W. Chisholm; secretary, D. G. Whidden; representative to the Maritime Board of Trade, C. E. Gregory.

The finances of New Glasgow for the past year were less promising than those of Antigonish. Overdrafts and unpaid bills of the municipality amounted to $9,093.11, against which are about $4,000 of collectible unpaid taxes.

The financial statement of the town of Glace Bay for 1904 shows a balance against the receipts for the year of $10,109.22. The total bonded indebtedness is $356,309, made up of bonds and loans secured on debentures.

At the annual meeting of the Lunenburg Marine Railway, recently held, a dividend of 5 per cent. was declared and $200 added to the rest account, which now amounts to $1,900.

* * *

BRITISH WOOD TRADE.

The Liverpool circular of Farnworth & Jardine, dated 1st February, shows unusually small arrivals of timber or lumber from Canada at that port. Some leading lines show a reduction in stock on hand, which was needed. Prices generally were steady, with a fair aggregate of deliveries for the month.

Both square and waney pine timber are very slow of sale, and the supply is ample. First-class rock elm seems to be the only wood there was any real demand for. Values rule high, and the stock is low. Birch has gone fairly into consumption; logs are steady in value; planks are moderately wanted, and, though stocks are light, values are easier.

For pine deals the demand continues dull. Nova Scotia and New Brunswick spruce and pine deals are unchanged in price, with the overstocks getting gradually reduced. There is a demand for really good pitch pine, hewn, and for sawn; values have hardened, the already large stocks not having been added to.

* * *

COUPON AND DIVIDEND REGISTER.

We have received with thanks a copy of Moody's Coupon and Dividend Register, published by the Moody Publishing Company, 35 Nassau Street, New York. Price, $5. The most laborious work of every banker's and broker's office has always been the collection of coupons and dividends on the first of every month, and particularly on January and July 1st. There are so many thousand bond issues now in the hands of investors, as well as dividend-paying stocks, that it has usually involved a vast amount of work to ascertain where the many thousand different coupons and dividends were collectible. There has never been any general source from which to gather this information, and it has, therefore, been necessary for the coupon clerks and investors to employ all sorts of means, involving both confusion and annoyance, to ascertain this seemingly simple information. It is the object of the book under notice to remedy this state of things. With its aid a great deal of labor is eliminated, and the banker, broker, coupon clerk or investor is now able by referring to it to ascertain at a glance where and when all coupons and dividends are payable. The publishers issued a first edition of this book a year ago. This first edition was necessarily incomplete, as first editions usually are, but much careful work has resulted, we are told, in making the new edition, now just issued, a very comprehensive and important affair. In it there are listed over 16,000 different bond issues of all kinds and descriptions. The book is handsomely bound in flexible leather, and the different bond issues are alphabetically arranged for convenient reference.

LIFE ASSURANCE MATTERS.

The Provident Savings Life Assurance Society of New York announces the appointment of Mr. J. F. Bain, of Toronto, as general agent, with headquarters in this city.

We learn that A. H. Fair, who has been Nova Scotia manager of the Imperial Life Assurance Company since its inception, has removed to Toronto, where he is with the same company. He has been succeeded in Halifax by J. C. Gass, of Shubenacadie, N.S.

An excellent statement of new business for 1904 is made by the Sun Life of Canada. It has written in the twelve months the large sum of $15,911,000 new policies issued and paid for. The assets were increased by $2,345,984, bringing them up to nearly $18,000,000, and in cash income the year's increase of $575,000 made the total income $4,561,000.

The Union Mutual Life Insurance Company of Maine has made gains in assets, surplus, paid-for business and insurance in force last year. The assets of that company December 31st last were $11,069,240, an increase of $864,513 over the figures of the previous year. The surplus was increased from $563,565 to $632,949, a gain of $69,383; the new paid-for business written during the year amounted to $9,084,458, a gain of $682,105, bringing the insurance in force on a paid-for basis up to $60,598,837, a gain of $3,213,639. During the year 6,674 policies were written, making a total number of 42,155 in force at the close of the year.

We agree with our contemporary, the Insurance Record, that it is quite astonishing to find that there are agents of life, fire and marine insurance companies who do not subscribe or read the respective trade organs. We have always held that if a man only got one idea a year out of them, it would be ten times over worth the money he paid as a subscription. The head offices of some companies are wise enough to provide their best agents with copies, and these companies naturally take the lead in the insurance business, because their agents learn and know what is going on, and, as we have before said, pick up ideas now and then.—London Review.

That was a good story Mr. Queen told at the Canada Life meeting on Wednesday. He had a prospective insurant "on the string," who was always talking to him about the profits that different companies offered, and objecting that the Canada Life did not offer enough, but put aside too much for reserves. "He rubbed this into me so often," said Queen, "that I got a little tired. So one day I said to him: 'Look here, Mr. Dash, you've got $1,000 on deposit in the Bank of New Brunswick, and you used to get a nice little cheque of $35 interest on it every twelve months. But last time you went down you only got a $30 cheque; and when you tackled Mr. Stavert about the reduction in interest, what did he say to you? He said: 'Mr. Dash, we have paid you all we could earn on your $1,000. If you want the $35 you used to get, you will have to put up more deposit.' So now I think Mr. Dash understands, by this concrete instance, the operation of reserve earnings and the meaning of our new basis."

* * *

FIRE INSURANCE ITEMS.

We observe that the Queen City Fire Insurance Company, of Toronto, which is now in its thirty-fifth year, has declared its usual dividend, which is equal to 50 per cent. on the amount of the original paid-up capital.

From advance returns secured by the Journal of Commerce and Commercial Bulletin, it develops that the nine leaders in New York City fire business during the latter half of 1904 ranked in the following order: German-American, Liverpool and London and Globe, Home, Hanover, North British and Mercantile, Continental and Royal, Hartford and Commercial Union.

In spite of the disastrous fires of 1904, the Agricultural Insurance Company, of Watertown, is able to show good increases in both its assets and net surplus, the former item now standing at $2,691,926 and the latter at $712,923 in the new statement issued January 1st, 1905.

The anniversary of the great fire in Baltimore, February 7th, was observed by the return of hundreds of business houses to their former locations in the burnt district of that city, and to occupy the new and greatly improved structures which had been erected for them. The Maryland Casualty Company expect to finish their building in a few weeks. The United States Fidelity and Guaranty Company has given out the contract for the erection of their new structure, which will be double the size of the former building.

The chief of the New York fire brigade says there are a dozen theatres in that city so badly built and so poorly protected against fire as to be unsafe. Mr. Oscar Hammerstein, who owns three theatres in that city and manages others, says Chief Croker is wrong, and has asked Mayor McClellan to appoint a committee to examine.

The Chronicle learns that Mr. S. H. Lockett, manager of the Insurance Survey Bureau of Chicago, has tendered his resignation, to become assistant secretary of the Committee of Twenty of the National Board, headquarters, New York; and adds: "Mr. Lockett is probably without a peer in the West as a technical expert in questions of hazards and fire underwriting." '

The shipping casualties occurring on or near the coasts of the United Kingdom and Ireland in 1902-03 were increasingly numerous, totalling 4,357, an increase of 233 over the figures for the previous year. There were 270 total losses, and the lives lost numbered 339. The need and value of the services of the Royal National Lifeboat Institution, which maintains on the coasts 302 lifeboats, are shown by the following statistics: Between 1854 and 1903 no fewer than 31,610 persons perished from shipwreck on or near the coasts of the United Kingdom, but a still larger number—34,575—were saved through the agency of the Lifeboat Institution.

The Union Assurance Society and the Guardian Fire and Life Assurance Companies are suing the Quebec Railway Light and Power Company for the loss sustained by a fire that occurred in a residence in October, 1903, which caused considerable damage. The loss was paid by the companies, who now seek to recover the same from the electric company on the ground that heavily charged and defective wires and appliances caused the fire. The Quebec Railway, Light and Power Company deny the allegations, and say that while they were under contract to deliver the electric current on the outside of the house, they had nothing to do with the inside wiring.

A match may be ignited by the sun's rays being focused upon it by a bubble in a window pane, an irregularity in a mirror, a water bottle, a fish globe, a spherical paper weight, or a pair of spectacles. Matches loose in drawers or desks are liable to take fire from friction or concussion. Matches on the mantel-piece often ignite from the heat from grate or stove; they may be brushed or blown off and ignite from concussion when they alight, or in placing an object on the mantle a match-head may be rubbed to ignition. A blow or friction under the heel or the bite of a cockroach will set off one of these red-headed spit fires. Matches, other than "safety," should be kept in an iron box or a stone jar and covered so as to protect them from dampness, rats and sunshine.—Ohio Fire Marshal's Report.

The annual report of the Superintendent of the Fire Patrol shows there were forty-seven fires in sprinkler-equipped plants in New York City during 1904. In eighteen instances a fire was entirely controlled by the sprinklers, and in seventeen other cases the fire was held in check by them until the arrival of the city fire department. This is an encouraging record, but here follows something which ought to attract attention, especially in the Northern States and Canada. Frozen pipes cause sprinkler loss. The Boston Manufacturers' Mutual, in its January monthly report calls attention to a sprinkler break which occurred in the Hebron Manufacturing Co. cotton mill, Hebronville, Mass., December 24th, 1904: "At about 5.30 a.m. two automatic sprinklers opened in the third or top story of the north section of cotton storehouse. The cause of the accident was due to the improper pitch of the pipes when the equipment was put in, thus allowing water to pocket in the end of the pipes, which, freezing up, burst open the sprinklers."

* * *

—The clearings for Toronto from January 1st to date are $39,605,607 greater than for same period of 1904.

BANKING AND FINANCIAL ITEMS.

The Molsons Bank is about to erect in St. Henri, near Montreal, a stone building for a branch office. It will be at the corner of St. Remi and Notre Dame streets in that municipality.

Speyer & Company, of London and New York, are stated to have successfully carried through the issue of $15,000,000 worth of 4 per cent. bonds for the Grand Trunk Pacific Railway.

The Monterey Electric and Gas Company, Toronto, has received a Dominion charter. Its capital is placed at $3,000,000, and it proposes to operate a tramway in Monterey, Mexico. Wm. Mackenzie, Toronto, and H. S. Holt, of Montreal, are prominently interested.

We note with interest two important sales of Ontario municipal debentures during the past ten days. The first was in the case of the town of Walkerville, amounting to $133,700, and the second the city of St. Thomas, amounting to $200,000, the successful tenderer in each case being Messrs. Æmilius Jarvis & Co., of this city. It is satisfactory to see that these high grade securities are taken up by our local dealers, which is strong evidence of the prosperity of Canada. The prices paid show a considerable improvement over sales of similar issues a few months ago, and it is evident that the market for municipal debentures will strengthen materially in the near future.

Our Australian correspondent's letter, dated 24th January, notes among other interesting features of finance and commerce, that the bank clearings of 1904 were, in Sydney, below those for 1903, but in Melbourne above them. "This," he says, "is an indication of the relative states of business in the two cities. An incident in the same direction is that a Sydney bank has had to reduce its dividend from 4 to 2½ per cent., through unexpected losses in this city (Sydney). It is relatively a small concern, but the fact is an indication."

A simple illustration will show the care that is taken of cents by the First National Bank of Chicago. Stamped postcards are not used, and not one of the thousands of routine letters that are written every day is stamped or sealed until the whole routine mail of the day is assembled in the afternoon. Then all the cards and letters to one correspondent are put in a single envelope, and—except for letters from the officers and the like,—the bank comes as near as possible to getting its entire mail carried at two cents an ounce, or a cent for every postal-card, instead of often paying two cents for a quarter of an ounce, as it would have to do if every communication were sealed and stamped separately. This little matter of getting full value out of a two-cent stamp makes a saving of from $25 to $30 a day.—The World's Work.

J. Spencer Phillips, president of the London Institute of Bankers, in his inaugural address, touched on the subject of bank reserves. In the course of his remarks he said: "After the Baring crisis the banks were severely lectured by the then Chancellor of the Exchequer—Mr. Goschen—on the inadequacy of their reserves, and justly so, too; but I may remark, in passing, that far and away the greatest sinner is the Government itself, who, in respect to the savings bank deposits, are the biggest bankers in the country, and keep scarcely one single sovereign against nearly £200,000,000 of deposits. I have known a case of withdrawal of some £30 from the post-office, when they have come to one of our branches to lend them the money, and we have had to telegraph to London for authority to do so. What would be the result of our treating one of our own depositors in this way, I need not ask."

* * *

The Bell Telephone Company in New Brunswick is seeking to increase its capital to $600,000. It is intended to improve the service, to build a new exchange in Fredericton, and to carry the lines into Quebec to connect with the system in that Province.

* * *

Messrs. McFarlane, Sons & Anderson, of Fredericton, foundrymen, are largely increasing their capital, the idea being to extend their business, add new machinery and make other improvements.

LONDON AND WESTERN TRUSTS COMPANY.

This company has passed its eighth year, and has been increasing its business gradually. Its policy is to specialize its work, avoiding all duties but those which properly belong to a trustee. And this bids fair to popularize it among persons who prefer as executor or administrator a trust company which does not go beyond such fiduciary duties as those indicated. The paid capital is now about $140,000, and a reserve of $25,000 has been accumulated. At the close of last year the total assets, capital and trust, had grown to $1,599,000. The result of the year's operations has been a profit sufficient to justify a dividend of five per cent. Among the twenty-five directors are a number of gentlemen well known in south-west Ontario.

⁂

LONDON MUTUAL FIRE INSURANCE COMPANY.

This company is able to say that, in spite of its heavy loss by the conflagration of April last in Toronto, it has met all claims promptly without having to sell any of its debentures, realize on any of its mortgages, call up any extra capital, or borrow any money. This is a source of satisfaction to the management and a credit to the company. We observe, too, that the company has resolved to set aside in the future a substantial sum to provide a special conflagration fund. This is prudent, for in these blazing days there is no telling where a conflagration will start next. The receipts of the year were $544,883, which amount was pretty well absorbed by the $402,904 of fire losses and the expenses which accompanied them. The company has $143,000 cash assets on hand, besides other assets and $380,000 of unassessed premium notes. It shows a good surplus over all liabilities, including re-insurance reserve.

⁂

UNION LIFE ASSURANCE COMPANY.

That there was room for this company, and that it is doing an active industrial business, is shown by the figures of its 1904 report. In the first year they wrote a million and a half, in the second year had almost four millions in force, and this year they have $5,087,000 in force. The income in 1903 was $172,713; in 1904 it was brought up to $242,189; the claims and expenses, $206,174, left enough to make the net ledger assets, $151,?350, as compared with $115,336 a year ago. Considering the age of the company, this is doing very well, and implies that there must have been some "hustling" done by the agents.

⁂

DRY GOODS NOTES.

Henry Morgan & Co., the Montreal dry goods merchants, have purchased practically the whole block in the rear of their present premises. The price was about $200,000, and buildings will be erected, it is said, at a cost of $1,000,000.

H. Vineberg & Co., wholesale clothing manufacturers, Montreal, have bought a large site, on which they will erect a large additional factory at a cost of $75,000, to employ 400 hands. They will probably also generate their own electricity for power and lighting purposes. Two floors of the building, we understand, will be occupied as a clothing factory for the Hart Manufacturing Co.

The Montreal Cotton Co. held their annual meeting a few days ago, and re-elected the following directors: S. H. Ewing, H. Markland Molson, A. Hamilton Gault, R. R. Stevenson, Jacques Grenier, James Rodger, the Hon. J. K. Ward. At a subsequent meeting, Mr. S. H. Ewing was re-elected president, and Mr. H. Markland Molson, vice-president. The reports presented were considered very satisfactory.

Reports from Paris state that the chief changes of colors for the coming season will have regard rather to shades than to tints. Green, purple, red and pink will be most prominent, while brown will continue in favor, with a still wider range of shades, including hazel, chestnut and a cinnamon shade called "cannelle." Greens will include grass green, an oak-leaf tint, spinach green, and, among the lighter shades, apple green. The purple shades, which will include "petunia," will run rather to red than to blue, and closely resemble those colors lately known as "orchids." Higher grades of blue will replace the indistinct shades, and, in fact, the whole tendency is a gradual movement towards those higher grades of coloring. The same motive is encouraging the use of the glossy materials in light-weight cloth, and the term "foulard satin" is being introduced to describe some of these materials, and "supple" cloths promise to become widely known.

⁂

—The annual statement of the Eastern Trust Company was laid before the shareholders at the meeting of the company on Tuesday of last week. Owing to the rapid increase of business it was found necessary to double the capital, the additional $250,000 being nearly wholly taken up by present shareholders. The securities and investments now held by this concern amount to over $3,500,000.

⁂

—The seventh annual convention of the Associated Boards of Trade of Eastern British Columbia opens at Nelson this week. The chief subjects being discussed are the municipal ownership of telephones; good roads for the Flathead Valley; the appointment of an expert to report on the zinc resources of the province; the establishment of fruit experimental stations on the lines of the Canadian Pacific and Great Northern Railroads; the creation by the Dominion Government of a Department of Mines to be presided over by a Minister selected from the parliamentary representatives of British Columbia.

⁂

FOR GROCERS AND PROVISION DEALERS.

Duncan Macdonald, ex-mayor of Virden, Man., and others, are making a move to establish a meat-packing industry at that place, run by local capital.

The vegetable growers in the vicinity of Toronto and Hamilton have decided to form a Provincial association on the lines of the fruit-growers', dairymen's and such organizations. Millions of dollars are invested in the industry.

The tomato growers of Niagara district are waging a controversy with the Amalgamated Canners' Association over the question of prices. The growers claim they will not grow tomatoes for less then 30c. per bushel, instead of 25c., the price they have been receiving in the past. The canners refuse to comply, stating they will be able to obtain all they want at their own price. The farmers announce their intention of growing other products, rather than give in.

The Dominion Cattle Breeders' Association held their annual meeting last week in Toronto, and gave their unanimous approval to a proposal by Mr. F. W. Hodson for the nationalizing of the stock records of Canada. They also passed a resolution, asking the Government to regulate the importation of pure-bred stock. The following officers were elected: President, Alex. Smith, Maple Lodge; vice-president, Lieut.-Col. McGillivray; secretary-treasurer, A. P. Westervelt.

⁂

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursdav. February 23rd, 1905, as compared with those of the previous week:

	Feb. 23.	Feb. 16.
Montreal	$22,461,033	$20,976,205
Toronto	16,973,992	18,540,743
Winnipeg	4,901,596	4,950,093
Halifax	1,115,069	1,522,040
Hamilton	1,221,954	1,036,738
St. John	815,796	812,837
Vancouver	1,299,674	1,218,732
Victoria	488,973	565,522
Quebec	1,375,844	1,048,340
Ottawa	2,000,556	1,938,782
London	761,205	780,130
Total	$53,415,692	$53,386,162

NEW WESTMINSTER BOARD OF TRADE.

The annual meeting of the Board of Trade for New Westminster took place on the 8th inst. Reports by the president and secretary showed that prospects for the board during the coming year were cheering in every respect. The president was particularly optimistic in his views. With regard to the vexed question of halibut-fishing by Americans, he thought things might be worse than they actually are. He called attention to the fact that the United States were the chief consumers of the fish at present, and that as things stand now, Canada nets the proceeds arising from the customs duty on the fish, the outfitting of the fishing vessels, and the freight on the fish which are taken east on Canadian lines. The president exhorted all the members of the board to do all in their power to help along the Dominion Fair, and make it a success. He detailed a number of industries that intend to locate in the city in the course of the year.

The speech concluded with a plea for a duty on lumber imported from the United States. Statistics were given showing the amount of lumber used in Winnipeg in the past year, and it is stated that the greater part of this lumber had come across the border. It was demonstrated that had this lumber been the product of British Columbia mills it would have meant thousands of dollars for the Province, which has instead gone over into the American side. The same thing, he declared, is going on all over Manitoba and the Northwest Territories. Other speakers were less favorably disposed towards the present state of the halibut fisheries.

Mr. J. D. Taylor called attention to the fact that New Westminster had lately been losing her old-time importance as a centre of the canning industry owing to the policy of the Canners' Association of allowing several of their establishments to remain idle. The election of officers resulted as follows: President, Mr. William Mathers; vice-president, Mr. D. S. Curtis; secretary, Mr. A. E. White. Executive Council—Messrs. T. J. Trapp, F. R. Glover, A. E. Rand, H. G. Brymner, C. G. Major, F. J. Hart, T. S. Annandale, L. A. Lewis, Judge Bole, D. S. Curtis, H. Ryall, W. R. Gilley, Dr. H. A. Holmes, J. W. Creighton, M. Sinclair, and J. Cunningham.

OUR AUSTRALIAN LETTER.

New South Wales seems destined to disasters. The dry weather cut short the harvest, but on the last day of the old year there set in what is termed a heat wave. This is a correct expression for Sydney, where it lasted only one day; but in the country and as far south as Melbourne it lasted for a week, day and night. The thermometer went up in places to 124°, and a wind like the African sirocco blew, blasting any green stuff like a furnace flame. There followed the usual bush fires, severe in Victoria, but infinitely worse in this State, where it swept away standing grain and grass, which was the reserve for the stock during the hot season. Fences and buildings were destroyed, and much stock and some lives were lost. Though the loss is not so great as at first reported, it is bad enough, and subscriptions have been opened for needed relief. The Government is also doing well in this respect. The fires for the present are over, and may not recur again.

The wheelers in the coal mines of the Newcastle and Maitland districts have flouted the Arbitration Act and struck. They are only about three hundred in number, but they have thrown about four thousand men out of work. The Government is prosecuting some of the strikers, but in a fashion that does not give much hope of good effect. The most serious thing about the matter is not the direct loss, though that is not inconsiderable, but that it is another blow at the Arbitration Act, and to the confidence of investors in the industrial and commercial stability of the State. The Arbitration Act is more than ever regarded as a machine for oppressing employers, and without giving corresponding benefits to the worker.

These things have not tended to make trade brighter.

The fires will create a demand for some merchandise, but it will be mainly for the articles that Canada cannot supply—wire, barbed and plain, for fencing, and corrugated iron. In the rural districts the timber for rebuilding will be locally supplied.

It is somewhat better in the other States, where the harvest has been more liberal and the calamities fewer.

The bank clearings for 1904 were below those for 1903 in Sydney, but higher in Melbourne. This is an indication of the relative states of business of the two cities. An incident in the same direction is that a Sydney bank has had to reduce its dividends from four to two and a half per cent. through unexpected losses in this city. It is relatively a small concern, but it is an indication.

There is nothing in the statistics of the volume of trade that shows that it should be poor, but it is attributable to the keen competition and reduction of profits.

The Australian Government, Federal and State, have got the Canadian bee in their bonnets, and think they can secure Canadian prosperity by advertising Australia. The Premier of this State has taken up the matter actively. They have got the notion somehow that Australia is not known in Britain, not too favorably known may be accepted as true. Australia was discovered financially by London twenty years ago, when the promoters showered loans and advances upon Australia, and then its evil days began. Its boomsters fattened for a while, and its politicians found that the expenditure of loans easily gotten were the easiest method of keeping in power. The boomsters have been wiped out, but not so the loan-hungry politicians, though Victoria, in the beginning the worst sinner, has straightened them up for a time. The English people, therefore, know Australia through vanished millions and diminished dividends. They unluckily know it, too, by the legislation, as well as by the financing of both the Commonwealth and State Parliaments. Then, too, how does this State expect to compete against America when the best it can offer is land with a low rainfall at £3 per acre, weighted with curious residential conditions as against the free grants of Canada, where crops are certain. It is much easier to advertise than it is to take the bull by the horns—that is the real cause of the backwardness of Australia, impossible socialism.

Canadian trade here does not show much improvement, and Canadians are not pushing it. Enquiries reach the agents here and in Melbourne, but if Australian firms are got to take up the offered lines the probabilities are that the Canadian manufacturer will discover that he cannot give attention to it just then, and he forgets to tell his Australian correspondent so. Canada seems to have the goods to sell, but not many of the makers seem inclined to undergo the cost of getting their articles known. The other day I met a commission agent who was regularly taking orders for Canadian goods, for which another firm was the authorized agent. He told me he had no trouble in getting his orders promptly filled, but he took good care not to approach the manufacturer directly. He used London and New York agents, who offered spot cash if the orders were promptly shipped. Not only were the orders quickly filled, but he secured lower prices than the appointed agent could quote. The authorized agent, too, says he cannot get shipments under six months. There will be trouble some day between principal and agent. Such orders go forward only where the goods have been made so well known as to be in demand. And, as I have said, there is the rub, for it involves money.

F. W.

Sydney, N.S.W., 24th January, 1905.

LA CHAMBRE DE COMMERCE, MONTREAL.

This active body continues to give attention to a wide variety of subjects. Its newly-elected council held its first meeting last week, when the various committees for the coming year were appointed. Seventeen different committees were formed, the chairmen being as follows: Municipal, Mr. J. R. Savignac; Agriculture and Colonization, Mr. Damase Parizeau; Reports, Mr. J. Contant; Special Investigations, Hon. F. L. Beique; Finance, Mr. I. Prefontaine; Groceries and Liquors, Mr. Euclide Mathieu; Hardware, Mr. A. Jeannotte; Manufactures, Mr. A. V. Roy; Legislation, Hon.

A LINK WITH THE PAST.

Montreal papers of last week contained an announcement of the death of Mr. James Poustie, an old resident of that city, whose connection with the Montreal Telegraph Company began some fifty or sixty years ago and continued until 1890.

Mr. Poustie was a Scotchman, a fact which many people in Canada who knew him were not aware of, having been born near Montrose, in Forfarshire, about 1825. While quite young he came out to Canada, and was engaged, off and on in the early fifties, as a repairer of the lines of the Montreal Telegraph Company, which had been founded in 1847. By dint of energetic faithfulness and good sense—for of book learning he had got but a small share—Mr. Poustie worked upward, and was made Superintendent of Construction in 1855. He was the "boss" of the various gangs of line-builders and repairers, who soon became familiar throughout Canada. In the "Story of the Telegraph," which ran through many successive issues of the Monetary Times in 1892 and 1893, the following reference to Mr. Poustie and his line-builders occurs:

In the building of telegraph lines, or in the duplicating of wires upon the poles already placed, the construction corps plays a very important part. And it was with somewhat of the kind of thrill whch pervades a rural community when the coming of a circus is announced that the advent of a telegraph construction corps was welcomed in the earlier days. It would require the pen of an accomplished writer to effectively describe these pioneers of the modern army of commerce. Largely French-Canadian, possessing the pluck and hardihood of their class, these gangs of men made their way through swamp and forest, through town and hamlet, thinly clad, simply fed, performing their arduous work, in reliance upon orders from headquarters, with a rough strength, a sturdy loyalty and a celerity that was almost awe-inspiring to the newly-appointed local agent or raw operator, who for the most part felt his suddenly-acquired importance in town or village eclipsed by that of these Rembrandtesque sailors-of-the-forest. The Chief Inspector, Jem Poustie, was a great personage in those days. A man of few words, whether of tongue or pen, Jem magnified his office; and, like the conductor of a special train with royalty in his charge, claimed the right of way wherever he went, for he was the manager of the construction corps of the Montreal Telegraph."

It speaks well for the Boss that the hundreds of men he supervised were fond of him, and trusted him. In speaking of him the linesmen did not say "Monsieur Poustie" or "Le Boss," but always Le Bonhomme, a term of endearment, meaning the good man, or the good-natured man. And truly he was their friend, and aften their benefactor. His employers, Sir Hugh Allan and Mr. O. S. Wood, and Mr. Dakers and Mr. Dwight, found him a model of integrity, as well as a marvel of tenacity and physical endurance. A former superintendent of that company, the late Mr. William Cassils, used to relate stories of "Jim," as he was then called; among the rest this one:

"The company had built a batteau for use in connection with the crossing of the Rapids. In this craft Mr. Poustie, Mike Connors, and a gang of men actually ran the Lachine Rapids in the winter of 1851—a feat which, about twenty-five years later, was repeated by others, who imagined they were doing something which had never before been accomplished. Mr. Poustie is not given to boasting, or he would have publicly claimed priority when the repetition of the feat was being noticed in the newspapers."—*Story of the Telegraph.*

In December, 1890, or thereabout, Mr. Poustie resigned his position as general inspector of the lines of the Great Northwestern Telegraph Company (which years ago took over the lines of the Montreal Company), his place being taken by Mr. A. B. Smith, who still occupies that important post. After he had severed his connection with the Montreal Telegraph Company, Mr. Poustie became manager of the local office of Messrs. R. G. Reid & Co., railway contractors. It was while constructing the C.P.R. bridge at Lachine that Mr. Reid made Mr. Poustie's acquaintance, and conceived a high regard for him.

UNION BANK OF HALIFAX.

This bank is about fifty years old, and has no fewer than thirty-three branches, all of them in Nova Scotia except the branch at St. John, New Brunswick, and one at Port of Spain, in the Island of Trinidad, for the accommodation, doubtless, of West Indian trade, which is to Halifax of considerable importance. The year's figures, as shown in the report for 1904, exhibit profits up to the average of recent years. They were more than 11 per cent. on the capital, and about 6½ upon capital and rest combined. They sufficed to pay seven per cent dividend, to write off $20,322 from buildings and office furniture, as compared with $10,500 in the previous year, and to transfer to reserve account $38,594. which is nearly double the amount so transferred out of profits a year ago. The rest is swelled to $970,000, which is equal to 72.59 per cent. of capital.

Turning to the general statement, we find circulation somewhat greater than in 1903, and deposits almost half a million greater. On the other side of the account the liquid assets are almost 30 per cent. of the total, which is $10,371,000. Current loans are hardly so great as before, nor is there any increase this year in Dominion or Provincial securities. The increase is in liquid assets, in the shape of balances due to the Union Bank in Canada and elsewhere. We observe that the bank did not need to do any writing down of consols and Provincial bonds, as was done last year. The showing is an encouraging one, and the balance sheet indicates that the bank is in good shape and well conducted.

OTTAWA FIRE INSURANCE CO.

The tone of this company's report for the year just past is neither apologetic nor boastful. It acknowledges that the year has been a disastrous one; shows that all adjusted losses have been paid without depleting the investments; and confesses that writing surplus lines in the United States, not having been found successful, was discontinued, and the outstanding risks in that country re-insured. The company lost $36,499 by the Baltimore and Rochester conflagrations and $75,491 by that in Toronto, besides ordinary losses amounting to $148,256. So they called on their stockholders to pay up $30 a share, which brought them in $150,000, paid their losses, all but $2,887 unadjusted, and obtained special legislation to reduce their capital by $150,000 to avoid impairment. The business of the latter half of 1904, the president states, showed a fair underwriting profit. The directors were authorized to "put up money enough to pay the debts, write off the losses, try to benefit by the experience of the past, and go on with the business hopefully." There is something courageous and business-like here—no beating about the bush, but a plain avowal of fact and of a change of policy to be pursued. The management has had enough of the dangerous surplus line writing in the States, and will stick to our own country in the future.

* * *

—An effort is being made in the United States Congress to have the President take joint action with the British Government for the preservation of Niagara Falls from further waste and diversion of water. It is pointed out that present schemes "threaten not only to despoil this natural scenic wonder of its beauty and grandeur, but to imperil the very existence of the American Falls." And it is suggested that an annual State tax should be imposed upon the use of the water for commercial power purposes.

Meetings

LONDON AND CANADIAN LOAN AND AGENCY COMPANY, LIMITED.

The thirty-first annual meeting of the company was held at the head office, No. 103 Bay street, Toronto, on Wednesday, 15th February, 1905, at 12 o'clock noon.

On motion, the president, Mr. Cockburn, occupied the chair, and the secretary, Mr. W. Wedd, Jr., acted as secretary of the meeting.

The following report was adopted:

Report.

The directors have pleasure in submitting to the shareholders the 31st annual report of the company and the statement of accounts for the year ending 31st December, 1904, the result being as follows:

The gross earnings, including the balance ($19,935.44) brought forward from last year, amounted to	$199,721 99
And after deducting the cost of management, interest on debentures, and all other charges, amounting in all to	113,143 60
There remains a net profit of	$ 86,578 39
Out of which two half-yearly dividends at the rate of 6 per cent. per annum and the usual tax on capital and income have been paid, amounting in all to	60,900 00
Leaving a balance to be carried forward to 1905 of	$ 25,678 39

The company's funds have been fully employed during the year, and applications for loans on mortgages were accepted to the amount of $498,333 on property valued at $1,229,000.

Interest rates continued firm in Ontario, Manitoba and the North-West Territories. Payments by borrowers in the various departments of the company's operations have been promptly met and the business of the company is in a satisfactory condition.

Owing to the death during the year of the auditors, the late J. J. Woodhouse and John C. Copp, it became necessary for your directors to appoint two others to fill the vacant positions; Messrs. G. H. G. McVity and James George, gentlemen of high reputation and well-known Toronto accountants, were appointed, and their certificate of audit of the books, vouchers and securities is hereto appended.

The various officers of the company have performed their duties faithfully and to the satisfaction of the directors.

Geo. R. R. Cockburn, President.

Toronto, 6th February, 1905.

Auditors' Certificate.

To the president and directors of the London and Canadian Loan and Agency Company, Limited:

Gentlemen,—We have completed the audit of the books and accounts of the company for the year ending 31st Dec., 1904.

We have also examined the mortgages and debentures and other securities for loans, together with the various statements thereof, and find that they agree with their respective entries in the ledger, and we hereby certify to the correctness of the accompanying statements of "Assets and Liabilities" and "Revenue Account," for the past financial year.

We are, gentlemen, yours faithfully,

G. H. G. McVity,
J. George, F.C.A., (Can.)

Toronto, 1st February, 1905. Auditors.

		$199,721 99

December 31st—By balance carried to next year $25,678 39

V. B. Wadsworth, Manager.

Mr. Cockburn:—Before moving the adoption of the report, I beg to draw your attention to one or two points in connection therewith. It will be noticed the company's funds have been fully employed during the year and that applications for loans on mortgages were accepted for $498,333 on property valued at $1,229,000 by the company's own appraisers. The large values of the properties taken as security show the great care exercised by your directors in selecting our mortgage investments. They are first scrutinized by our appraisers, then by our inspectors, managers and directors. Thus we do our utmost to have the money of the company safely and securely invested.

Both the directors and myself have to deplore the death of our late auditors, Messrs. J. J. Woodhouse and J. C. Copp, during the past year. Both were faithful in the discharge of their onerous duties, and their death was much regretted by all. We appointed Messrs. G. H. G. McVity and James George to fill the position of auditors for the remainder of the year, and we are satisfied that we have made a very good selection to safeguard the shareholders' interests.

Turning to the statement of accounts for the past financial year, you will find that mortgage loans increased about $40,000. In Manitoba and the West our mortgage loans now aggregate $1,035,000. Last year they stood at $916,125, an increase for the year of $119,476.

In the properties account a reduction has occurred of $2,392. No change has been made in the value of the company's offices and buildings in Toronto.

In municipal and other negotiable debentures there has been an increase of $23,737, by the purchase of school debentures during the year in Manitoba and the West.

Loans on call or short date on debentures and securities have decreased $159,657. We have found other means of investing the money more profitably. These loans are effected upon choice listed stocks, and life insurance policies in selected stock companies.

Taking the liabilities account, our capital stock is fully paid, $1,000,000. The Rest remains the same, and the contingent fund is somewhat more than last year being $24,692. I explained to you very fully at last year's meeting how this account originated and the probable eventual result thereof. Therefore, I shall not go into that matter now. I may say that the mortgages in default (and to meet deficiencies therein this contingent fund was formed), have been so largely realized upon that it is not likely the contingent fund will be further infringed upon.

The debentures and certificates in force are somewhat less than last year, occasioned by high interest rates in Britain.

You will notice there is little change in the various items of the revenue account from those of last year. The balance at credit thereof is $25,678, or $4,443 more than last year. We could safely have placed a portion of this sum of over $25,000 directly to the rest account, but your directors determined, and I think wisely, to leave it at the credit of the revenue account for another year, at which time such addition could be made to the rest account as may be thought advisable.

With our rest account at $210,000, contingent fund at $24,692, and balance at credit of revenue account, $25,675, we now have $260,370 of surplus, or over 25 per cent. of our capital. I may add that this company has never paid less than 6 per cent. dividend, and that it has never found it necessary to reduce the capital stock of the shareholders.

We still continue the policy of extending the company's land mortgage business in Manitoba and Eastern Assiniboia, confining our business exclusively to improved farm properties. Nor are we neglecting our Ontario mortgage business, which aggregates over $1,250,000.

Regarding the crops in Manitoba and the West, although they were disappointing in quality, yet the high price obtained for wheat has enabled the farmers to meet their engagements as promptly as in former years under better crop conditions. Our Ontario borrowers have met their engagements so promptly that we have practically no arrears of interest, thus showing the great prosperity of this province.

The manager made his usual trip to the West last autumn and reports great growth and stimulation of business in all the cities, towns and country districts visited. Railways are being constructed all over the country, thus causing the occupation and cultivation of large new areas of rich agricultural land, leading us to the conclusion that the production of the West will be much increased from year to year, and will present for us a field for mortgage investment (adopting proper safeguards) unrivalled in any part of the Dominion.

We have to thank our general manager and the various officers of the company in Ontario, Manitoba and the North-West Territories for their attention to the business of the company and the success resulting therefrom. To the Scottish board and Messrs. Mackenzie & Black, the general agents of the company at Edinburgh, we have to tender our sincere thanks for the satisfactory results attained in conducting the company's business in Great Britain.

Before moving the adoption of the report, I would like to say that if there are any explanations required I shall be pleased to furnish information.

Rev. Mr. Campbell and Messrs. Aitken and Cumberland, three of the shareholders present, desired information which was given them by the president and manager.

Mr. Thomas R. Wood:—Before seconding the adoption of the report, I wish to repeat what has already been stated by the president, namely, that no reduction has been made in the capital stock of the company, and you have always been paid 6 per cent. and over in dividends.

With reference to the reserve remaining stationary, the question of adding a sum to the Rest was thoroughly discussed by the directors, and it was thought best not to take such action this year. This is one of the best statements ever presented in the history of the company, and we are now in such a position that we will make good progress in the future. Never in the history of the company has there been as clean a statement as there has been to-day.

I have much pleasure in seconding the adoption of the report.

The motion was declared carried.

Some formal resolutions were then passed.

The scrutineers reported the following gentlemen duly appointed directors: G. R. R. Cockburn, Sir W. P. Howland, Donald Mackay, Lord Strathcona and Mount Royal, Dr. Larratt W. Smith, Thomas Long, T. R. Wood, and C. S. Gzowski.

At a subsequent meeting of the newly-elected board, Mr. George R. R. Cockburn was appointed president and Mr. Thomas Long, vice-president.

* * *

THE HOME SAVINGS AND LOAN COMPANY, LIMITED.

The twenty-sixth annual general meeting of the shareholders was held at the head office of the company, No. 78 Church St., Toronto, on Thursday, February 16th, 1905, at 12 o'clock noon.

The president, Mr. Eugene O'Keefe, occupied the chair; and the managing director, Lt.-Col. James Mason, acted as secretary.

The minutes of the last annual general meeting, held 18th February, 1904, were, upon motion to that effect, taken as read, and were confirmed.

The annual report and statement was then presented as follows:

Report.

The directors beg to submit the twenty-sixth annual report with accompanying financial statement, duly audited, showing the result of the company's business for the year ended 31st December, 1904, and its position on that day.

The business of the year was very satisfactory.

After paying and providing for two half-yearly dividends at the rate of seven per cent. per annum, and paying all expenses, including salaries, printing, advertising, auditors' fees, Government tax, and providing for directors' compensation, there remained a balance of $19,837.54, which added to $1,701.86, balance profit and loss account last year, made $21,539.40. Of this amount, $3,811.57 was written off office premises, office furniture and other accounts, and the remainder, $17,727.83, is at credit of profit and loss account.

The reserve fund stands at $200,000, and the contingent account at $55,000.

Deposits increased $591,741.64. Loans on collaterals increased $633,361.85 and mortgage loans decreased $99,485.95. These latter loans are being called in in preparation for the change to a bank.

For some time past it was felt that, in order to accommodate many of the depositors of the company residing in the West End of the city, and also to have a better share of the large deposit business of that section, a branch should be opened in it, and accordingly in March last suitable premises were secured at No. 522 Queen Street West, and a branch opened. The result has proved the wisdom of the step, as a business quite up to expectations is now being done.

In consequence of some vacancies having occurred during the year among the provisional directors of The Home Bank of Canada, arising from death and other causes, and there being no provision in the Bank Act for the filling of these vacancies, it was found necessary to apply to the Dominion Parliament for a special act to complete the number of directors. The application was granted, and an Act passed in accordance with the wishes of the provisional board. This was responsible for the delay in opening the stock subscription book of the bank. The book is now open and the stock is being taken up. The subscriptions are coming in satisfactorily, and when a sufficient number of shares have been subscribed, the shareholders will be called together and the bank opened for business.

The directors have to regret the loss during the year of one of their number—Mr. John Foy, vice-president—who died in December last. Mr. Foy was a director of the company continuously from its organization, and always took a deep interest in its affairs.

All of which is respectfully submitted.

EUGENE O'KEEFE, President.

Toronto, February 1st, 1905.

STATEMENT OF ASSETS AND LIABILITIES, 31st DEC., 1904.

James Mason, Managing Director.

We hereby certify that we carefully examined the books, receipts and vouchers of the Home Savings and Loan Company, Limited, for the year ending 31st December, 1904, also the securities and cash on hand, and found the same correct and in accordance with the above statement.

J. M. Sullivan,
J. G. Hall,
Toronto, February 1st, 1905. Auditors.

Upon motion of the president, seconded by Mr. Thomas Flynn, the report was adopted.

The president spoke as follows:

This is the twenty-sixth and the last annual report of The Home Savings and Loan Company.

The business of the year was very good, for, although rather low rates of interest prevailed, the profits of the company were seventeen per cent. on its paid-up capital, that is, it paid a dividend of seven per cent., eight per cent. placed to the credit of profit and loss account, and the remainder written off.

The increase in deposits for the year was remarkable, amounting to nearly $600,000, an increase of over twenty per cent. of the amount on hand a year ago. This speaks well for the future of the institution, and its popularity. Loans on mortgages on real estate are being gradually disposed of. As banks are not allowed to lend on the security of real estate, the loans of the company are practically confined to loans on collaterals, and these increased $633,000 during the year.

It will be observed from the report that a branch office of the company was opened last March on Queen Street West, and the reasons for doing so are stated in the report. For many years past the depositors and friends of the company living in the West End of the city have been asking that a branch be opened, and in some cases felt compelled to change their accounts, the distance being too great to come down here. The result has been successful, and quite up to expectations both in number of depositors and amount of deposits.

The accounts now open in the head office and branch reach the large number of 9.600, and the deposits at the present moment exceed $3.400.000.

Much disappointment was felt at the delay in starting The Home Bank of Canada, but this was caused by reasons over which the directors had no control.

As stated in the report, the Bank Act, under the authority of which the bank is incorporated, makes no provisions for the filling of vacancies in the provisional board of directors, and as several vacancies had arisen it was thought undesirable to go to the public for subscriptions for stock with four directors instead of seven, the full number. There was no difficulty in getting the Act put through, but it occasioned a long delay, as the Act had to be passed by the Dominion Parliament.

The stock subscription book is now open and subscriptions are coming in very fairly, and it is hoped and expected that in the course of two or three months the bank will begin business.

There will be no distribution among the company shareholders of the money at credit of the contingent account and profit and loss account, until all the assets of the company are realized on, that is, converted into cash, or taken over by the bank. It may be that when it comes to realizing on or converting into cash such of the assets of the company that the bank cannot legally take over, it will be found that shrinkages in value will occur, and the contingent account and the profit and loss account will be used to make such shrinkages good. When all are settled the surplus will be divided among those who were the shareholders of the company at its final stage.

Moved by Mr. Thomas Wood, seconded by Mr. H. T. Kelly: "That the thanks of the shareholders be and are hereby tendered to the president and directors for their careful attention to the affairs of the company during the past year. Carried.

Moved by Mr. M. O'Connor, seconded by Mr. Edward Stock:

"That the thanks of the shareholders are due and are hereby given to the managing director and other officers of the company for the efficient manner in which they performed their respective duties during the past year." Carried.

Messrs. J. M. Sullivan and John G. Hall were re-appointed auditors of the company.

A poll was opened for the election of directors, and the following were declared duly elected: Messrs. Eugene O'Keefe, Edward Stock, Thomas Flynn, Lt.-Col. James Mason, and the Hon. James J. Foy, K.C.

On motion, the chair was taken by Mr. Thomas R. Wood, and a vote of thanks was tendered the president for his conduct in the chair.

The meeting then adjourned.

At a meeting of the new board, held immediately after the close of the above, Mr. Eugene O'Keefe was re-elected president, and Mr. Thomas Flynn elected vice-president of the company.

* * *

LONDON AND WESTERN TRUSTS COMPANY.

The eighth annual meeting of the London and Western Trusts Company was held at its office in London, Ontario, on Thursday, February 16th.

The following report was submitted and adopted:

Report.

Your directors have pleasure in submitting a report for the past year.

The net earnings were greater than those of 1903, which was thought to be an exceptional year.

The dividend has been increased from 4 per cent. per annum to 5 per cent. A further sum of $1,000 has been written off office fittings, reducing that item to $1,000. $5,000 has been added to the reserve fund and the balance carried forward increased to $3,357.64.

The shareholders have taken the opportunity of paying on stock to the extent of about $15,000. Those who have not yet taken advantage of the privilege to pay an additional 20 per cent. may do so at any time.

A large amount of new business was received, as may be gathered from the following table:

Total assets, December 31st, 1903	$1,440,563 50
Total assets, December 31st, 1904	1,599,754 48

It will be seen that notwithstanding the liquidation of the Elgin Loan and Savings Co., which was very heavy, the assets remaining in the hands of the company for distribution and management have increased about $160,000. This should be very satisfactory evidence to the shareholders of the popularity of the company.

There was a material increase in the investments of the company during the year, as shown below:

Increase in company's investments	$ 34,436 85
Increase in trust investments	239,507 96
Total increase	$273,944 81

In this connection it may be pointed out that the company has been in operation for eight years and has not lost a single dollar, either of its own funds or those invested for trusts; nor has it been necessary to take proceedings in the case of a single investment made by your directors.

The policy of the company in specializing its work, avoiding all duties but those which properly belong to a trustee, seems to have commended itself to the public. Something further might be done by each shareholder taking a personal interest in the company and using every opportunity of placing its name and record before those who are likely to require its services.

The books and vouchers have been audited, and a certificate is attached to the report.

All of which is respectfully submitted.

George C. Gibbons,
London, February 6th, 1905. President.

STATEMENT AS AT 31st DECEMBER, 1904.

John S. Moore, Manager.

We hereby certify that we have examined the books and accounts of the London and Western Trusts Company, Limited, for the year ending 31st December, 1904, and find them correct and in accordance with the above statements. We have also examined the company's securities, and find them in order.

Geo. F. Jewell, F.C.A.,
Alfred A. Booker,
London, Ont., Feb. 6th, 1905. Auditors.

The retiring directors, Messrs. George C. Gibbons, K.C.; John Labatt, J. L. Englehart, Petrolea; John McClary, George Robinson, T. H. Smallman, T. G. Meredith, K.C.; George B. Harris, W. H. Bowlby, K.C., Berlin; John McLean, St. Thomas; John Curry, Windsor; Major T. Beattie, H. E. Gates, J. C. Duffield, D. Milne, Sarnia; M. Masuret, M. D. Fraser, R. W. Puddicombe, Robert Fox, J. H. Nellis, Woodstock; Judge Holt, Goderich; Wm. Ball, Chatham; Col. T. R. Atkinson, M.P.P., Simcoe; W. J. Reid, and G. G. McPherson, K.C., Stratford, were unanimously re-elected.

The auditors, George F. Jewell, F.C.A., and A. A. Booker were re-appointed for 1905.

After the usual vote of thanks to the president, manager and staff, the meeting adjourned.

Subsequently, at a meeting of the board, Mr. George C. Gibbons, K.C., was re-elected president, and Messrs. John Labatt and J. L. Englehart, vice-presidents.

⁂

THE TORONTO GENERAL TRUSTS CORPORATION.

The sixth annual meeting of the shareholders of The Toronto General Trusts Corporation (being the twenty-third of The Toronto General Trusts Company), was held in the board room of the corporation, on the corner of Yonge and Colborne streets, Toronto, Wednesday, 22nd February, 1904.

There were present: W. D. Matthews, W. H. Beatty, J. L. Blackie, B. E. Bull, Alfred Hoskin, K.C.; J. W. Langmuir, Hon. J. J. Foy, E. E. Argles, Robert Jaffray, A. D. Langmuir, Hon. Colin Campbell, John Y. Reid, J. G. Scott, K.C.; John Paton, S. Nordheimer, E. T. Malone, K.C.; B. E. Walker, W. G. Watson, Alexander Smith, John T. Small, James Davey, B. Osler, E. Galley, Thomas Long, Æmilius Irving, K.C.; Hon. S. C. Wood, I. J. Kenny, D. R. Wilkie, Hon. Richard Harcourt, A. L. Malone.

Owing to the absence of Dr. Hoskin, the president, the Hon. S. C. Wood, vice-president, took the chair, and Mr. A. D. Langmuir, the assistant manager, was appointed to act as secretary.

The various financial statements, showing the operations of the corporation for the year ended 31st December, 1904, were submitted by the managing director, Mr. J. W. Langmuir, and commented upon by him.

The report of the directors to the shareholders was then read, as follows:

Report.

Sixth Annual Report of the Directors of The Toronto General Trusts Corporation, for the Year Ended 31st Dec., 1904.

To the Shareholders:

The directors of The Toronto General Trusts Corporation beg to submit their sixth annual report (being the twenty-third of The Toronto General Trusts Company), which, together with the accompanying financial statements, shows the operations of the corporation and the financial results of the same for the year ended 31st December, 1904.

The new business taken over by the corporation for the year amounts to $2,122,296.26, as shown by the following summary:

Executorships	$334,429 19
Administrations	357,282 42
Trusteeships	503,848 00
Investment agencies	363,225 25
Estate agencies	299,417 39
Guaranteed mortgage investment agencies	137,372 61
Committeeships	6,715 79
Guardianships	68,177 38
Lunatic estate agencies	51,828 23
Total	$2,122,296 26

In addition to the foregoing, the corporation has during the year acted as trustee for the issue of bonds and debentures for a large amount, and has also been appointed registrar, transfer agent, and in other capacities not included in the above summary.

The profit and loss statement herewith submitted shows the sources from which the revenues of the corporation were derived, and the charges against the same. The net profits for the year, after making provision for every ascertained or estimated loss, amount to $100,797.72. Out of these net profits your directors have declared two semi-annual dividends at the rate of 7½ per cent. per annum, amounting to $75,000; have written off from the buildings and vaults at the head office and Ottawa $11,276.52; and have carried forward to the credit of profit and loss $14,521.20.

Your directors have to record with deep regret the death of three of their colleagues during the past year, namely, Messrs. T. Sutherland Stayner, A. B. Lee and John Foy. The two former were on the directorate since the organization of the corporation in 1882, and Mr. Foy was appointed in the place of Sir Frank Smith, in 1901.

All of which is respectfully submitted.

J. W. Langmuir,
Managing Director.

John Hoskin,
President.

Toronto, February 20th, 1905.

We, the undersigned, beg to report that we have made a full examination of the books, accounts and vouchers of The Toronto General Trusts Corporation to the 31st December, 1904, and find same to be correct and properly set forth in the above statement of profit and loss. We have examined and find in order all mortgages, debentures, bonds and scrip of the corporation, as well as those negotiated for the Supreme Court of Judicature for Ontario, and trusts, estates and agencies in the corporation's hands, and have checked same with the mortgage and debenture ledgers and registers.

The bankers' balances, after deducting outstanding cheques, agree with the books of the corporation. We have also examined the reports of the auditors of the Winnipeg and Ottawa branches, and find that they agree with the head office books.

(Signed) R. F. SPENCE, F.C.A., "Can.,"
GEO. MACBETH,
Toronto, 15th February, 1905. Auditors.

The Vice-President's Address.

Vice-president, the Hon. S. C. Wood, in moving the adoption of the report, said: In the absence of President Hoskin, I have the pleasure of moving the adoption of the report which has just been read. Upon the whole, it should be accepted as satisfactory.

You will notice that during the year over $2,000,000 worth of new estates and trusts have been placed under the care of the corporation. The net profits, after payment of all expenses at the head office, and at the branches in Winnipeg and Ottawa, and after providing for every ascertained loss, amounted to a little over $100,000. Out of this there has been paid the usual dividend of 7½ per cent. per annum, amounting to $75,000; $11,276.52 has been written off our office buildings and vaults, and $14,521.20 has been carried forward to credit of profit and loss.

For the enormous amount of business transacted, the profits have been very moderate, and will be considered by bankers, managers of loan companies and other corporations, as decidedly small, and not by any means a fair equivalent for the responsibility assumed and work done; it may as well be frankly stated that, for the kind of business the corporation is carrying on, large profits can never be looked for. Our business is simply that of skilled managers of estates and trusts, involving continued oversight and the greatest possible care in every branch of management. The revenues of the corporation and the sources from which they are derived are plainly set forth in the profit and loss statement, which has just been submitted to you, and from which it is quite evident that we are strictly conducting a trust and agency business, and nothing else.

Our board religiously adheres to the policy that was adopted when the corporation was organized in 1882, and from which it has never deviated, viz.: that it shall not transact any business of a speculative character, such as promotions, underwriting or the purchase of securities of a more or less fluctuating value. Doubtless, with the expansion that has taken place in Canada in recent years, this practice may have resulted in pecuniary loss to the corporation in the investment of its capital, but your directors consider that the capital of the corporation should be kept intact and free from risk, as security for the proper performance of its duties as executor, trustee, etc. The strict adherence to this policy, along with the moderate fees allowed to and charged by the corporation will in the future, as in the past, result in only moderate profits.

The successful management of estates and trusts aggregating over $22,000,000, requires not only that the general and assistant managers shall be men of acknowledged financial ability, and peculiarly adapted for this particular work, but also that the whole staff should be carefully selected and trained, with the view of handling of estates and trusts in strict accordance with the law, the provisions of each trust and in the best interests of the various legatees or parties interested, and also the proper investment of the funds of the corporation.

As an evidence of our success in this direction, I may state that in establishing the important branches at Ottawa and Winnipeg, two of our superior officers were placed in charge, and their places filled by competent and trained members of the staff, without in any way interfering with the efficiency of the work at the head office.

Mr. W. H. Beatty, vice-president, in seconding the adoption of the report, said:

"In seconding the adoption of the report, I would like to say a few words, but rather in my capacity of chairman of the inspection committee than as vice-president of the corporation. I have occupied that position for the past fifteen years, and along with my colleagues on the committee have performed the duties devolving upon us under the inspection by-law. The scope and variety of work that has to be performed by the committee is very clearly set out in the by-laws of the corporation, copies of which you will find on the table. When I tell you that our inspection for the past year necessitated the reading of over 600 pages of minutes of the executive, you will have some idea of the volume of work devolving upon us.

The inspection committee has not only to assure itself that the directions of the executive, as recorded in the minutes, have been carried out, but they have to examine and initial every mortgage, debenture and security that has been taken as an investment by the corporation during the quarter. The securities examined and initialed during the past year, apart from call loan scrip, amount to two millions and a quarter dollars. The committee have further to see, under the certificates of the auditors, that the securities so examined are ear-marked in the books of the corporation to the respective trusts to which they belong. Under this system the securities held by the corporation pass under the review, first, of the inspection committee at the end of each quarter, and then again, at the end of each year, of the auditors of the corporation.

I am sure you will agree with me that the inspection of the affairs of this corporation is as thorough and searching as it is possible to devise.

The securities taken for trusts all come within the provisions of the Trustee Investment Act, unless the instrument under which the corporation acts authorizes the taking of other classes of securities—and I may say, as one having had a pretty long and extensive experience in investing, that the mortgages taken by the corporation are of a distinctly high grade. Another word or two, and I have done. Occasionally I hear it said that the compensation of the corporation is greater than is allowed or paid to private executors or trustees. On this point I can also speak from the standpoint of long experience, and I have no hesitation whatever in corroborating the statements made by President Hoskin at previous meetings of the shareholders, that the charges of the corporation, instead of being greater, are very considerably less than is allowed to private individuals. This statement is also amply corroborated by the exceedingly moderate profits that the corporation makes (as is shown in the profit and loss statement, which has just been submitted to you) out of a business aggregating nearly twenty-five million dollars.

The Managing Director.

Mr. J. W. Langmuir, being asked to make a few remarks, said:

Before the report is submitted for adoption, there are two or three matters which I would like to say a few words about; and the first is to call attention to the changed conditions that the corporation has now to face in the transaction of its business, as compared with what existed at the time of its organization in 1882. Then, and up till about 1890, we were the only trust company in Canada. Now, we have seven trust companies in Ontario, three in Manitoba (with another seeking incorporation there), two in Quebec, with agencies all over Canada, and two in the Lower Provinces—in all fourteen companies. Some of these trust companies were established by chartered banks, and are practically being carried on by them, inasmuch as the directors of such banks are also on the board of the trust companies, thus throwing the whole weight of their influence, which is very great, in favor of the trust companies so affiliated. Moreover, a loan company in Western Ontario has also established a trust company, with the same directorate on both boards.

Many of these new companies undertake every variety of financial work; promoting industrial organizations, underwriting bond issues, and in many instances competing with the banks, inasmuch as they receive deposits and accept cheques drawn against them in the same manner as chartered banks, with the exception that they pay a higher rate of interest. Not only this, but guarantee companies have practically entered the field, and their bonds are accepted by surrogate courts, which enables estates to be wound up, either directly or indirectly under their supervision.

I do not wish it to be understood that I am finding fault with this greatly enlarged scope of trust companies in Canada. In this respect the Governments of the Dominion and the Provinces, in granting such wide charters, are simply copying the methods in existence in the United States, under which trust companies in that country practically are banks with the control of enormous accumulations of capital, out of which they earn enormous profits. Such companies in the United States do not care to be troubled with estate management, with its great responsibilities and comparatively small earnings, when ten times the profit can be made from the custodianship of the immense blocks of capital deposited with them.

Notwithstanding all these changes, and the greatly increased scope and variety in the work of trust companies in Canada, this corporation has fastly adhered to the principle adopted at its organization, that it would strictly confine itself to the management of estates, trusts, administrations, and work of a kindred character, firmly believing that the corporation, having in charge estate and trust funds approximating closely to twenty-five millions of dollars, should not engage in transactions of a speculative character, through which its capital and trust estates might be endangered, but should confine itself exclusively to the management of the estates and trusts committed to its care.

The second point that I wish to refer to is our compensation for the management of estates, trusts, etc. The idea prevails in some quarters that the corporation's charges are greater than is allowed to individual executors and trustees. This conclusion is based very often on statements made by parties who are entirely opposed to trust company administration, and although we are generally treated very fairly by the legal profession, I regret to say that now and again interested solicitors, who desire to keep the estates in their hands, and under their own management, inform their clients that the charges of the corporation are excessive. If parties intending to make wills and trusts, instead of accepting such interested advice, would only communicate with the corporation, or instruct their solicitors to do so, they would ascertain beyond all doubt that, so far from the corporation's charges for the management of estates being excessive, they are, as Vice-President Beatty has already stated, considerably less than is allowed to or exacted by individual executors and trustees. This statement has been made over and over again by President Hoskin, and is now corroborated by Vice-President Beatty, than whom no men have had greater or wider experience upon the subject than these two gentlemen, and I know that I can appeal to all the directors on the board of the corporation, who have made enquiries and have looked into the subject, in order to corroborate this statement to the fullest extent.

Having regard to the increased competition now existing, and the other conditions which I have referred to, and which to a greater or less extent operate against the corporation in its endeavors to transact a purely trust and agency business on an extensive scale (and I may as well admit that its business has to be on a most extensive scale. with the charges made, in order to pay a reasonable profit), I have to ask the co-operation of every shareholder, and more particularly every director, in using their good offices and influence in bringing business to the corporation.

Many men of means have sons, relatives or friends whom they consider perfectly capable to act as executors and trustees, but apart from the fact that such individuals may not live to execute the trusts, there are very few instances, even in such cases, where it would not be in the best interests of a widow or daughters to create, under provisions in wills or otherwise, a trust fund, which would, under the care of the trusts corporation, be free from all the vicissitudes of business operations, and be absolutely safe for all time to come for the purpose for which it was designed. Our friends can safely point out three cardinal points in the system of management adopted by the corporation, which cannot fail to commend themselves to all parties who contemplate making their wills or creating trusts:

(1) That by strictly confining ourselves to the business of executor, trustee or agent, and eliminating from our transactions everything of a speculative character, the funds entrusted to us will be absolutely safe.

(2) That the charges of the corporation are not only reasonable, but considerably less than would be given to individual trustees under similar circumstances. Anyone can determine this for himself without taking the word of interested parties, who are opposed to trust companies, by simply applying to the corporation.

(3) That all business committed to the care of the corporation, whether an estate of a few hundred dollars or a million dollars, will receive not only careful but the most prompt attention. In this connection it has come to my knowledge that some solicitors, for reasons of their own, when consulted with a view to the appointment of the corporation, have informed their clients that the corporation has so much business to attend to that it cannot give their clients prompt attention to what they desire to place with it. This statement, I need not say, is entirely without foundation.

Before sitting down I desire to say that the entire staff of the head office and branches have performed their duties in the most satisfactory manner.

The report of the directors was adopted. as well as the report of the inspection committee, as presented by Mr. W. H. Beatty.

Certain by-laws and amendments were confirmed.

The following shareholders were elected directors:

Election of Directors.

John Hoskin, K.C., LL.D., director of the Canadian Bank of Commerce and the Canada Life Assurance Company, etc., etc. Hon. S. C. Wood, vice-president of the Imperial Life Assurance Company, and director of the Western Assurance Company. W. H. Beatty, vice-president of the Bank of Toronto; president of the Confederation Life Association, etc. John Bell, K.C., formerly chief counsel for the Grand Trunk Railway Company of Canada. John L. Blaikie, president of the North American Life Assurance Company, and president of the Canada Landed and National Investment Company. W. R. Brock, president of the Canadian General Electric Company; director of the Dominion Bank. J. W. Digby, M.D., president of the Royal Loan and Savings Company, Brantford. Hon. J. J. Foy, K.C., M.P.P., Commissioner of Crown Lands for Ontario; director of Dominion Bank, and president of the Niagara Navigation Co. Hon. G. T. Fulford, Senator Dominion of Canada. George Gooderham, president Bank of Toronto, and president Canada Permanent Mortgage Corporation. William Hendrie, director Imperial Bank of Canada. Æmilius Irving, K.C., treasurer of the Law Society of Upper Canada. Robert Jaffray, president of the Globe Printing Company; director of the Imperial Bank of Canada. J. J. Kenny, managing director of the Western Assurance Company. J. W. Langmuir, managing director of the Toronto General Trusts Corporation; chairman, Niagara Falls Park Commission. Thomas Long, director of the Merchants Bank of Canada, and the British-America Assurance Company. W. D. Matthews, director of the Canadian Pacific Railway Company, and of the Dominion Bank, etc. Hon. Peter McLaren, Senator Dominion of Canada. E. B. Osler, M.P., president of the Dominion Bank and director of the Canadian Pacific Railway Company. J. G. Scott, K.C., Master of Titles for Ontario. Byron E. Walker, general manager of the Canadian Bank of Commerce, and director of the Canada Life Assurance Company. D. R. Wilkie, vice-president and general manager of the Imperial Bank of Canada, and director of the North American Life Assurance Company. Together with the following members of the advisory boards at Winnipeg and Ottawa:

Winnipeg.—Hon. Sir D. H. McMillan, Lieut.-Governor of Manitoba, chairman; D. W. Bole, M.P., president and managing director of the Bole Drug Co.; A. M. Nanton, of Messrs. Osler, Hammond & Nanton, and H. H. Smith, formerly Dominion Land Commissioner for Manitoba and the North-West Territories.

Ottawa.—Hon. W. C. Edwards, Senator, chairman; George P. Brophy, president, Ottawa River Works, and director Ottawa Electric Company; George Burn, general manager Bank of Ottawa; C. A. Douglas, financial broker; J. B. Fraser, director Bank of Ottawa; James Gillies, lumber merchant; W. D. Hogg, K.C., president Capital Real Estate Company; Capt. J. L. Murphy, capitalist; Hiram Robinson, president Hawkesbury Lumber Company, and Peter Whelen, manager Shepherd & Morse Lumber Company; president Ottawa Investment Company, and director Ottawa Electric Railway Company.

At a subsequent meeting of the board of directors, Dr. Hoskin was re-elected president, and Hon. S. C. Wood and Mr. W. H. Beatty vice-presidents. The executive committee was re-elected, and Mr. W. H. Beatty, chairman, and Messrs. Æmilius Irving, K.C., and John L. Blaikie were appointed on the inspection committee.

⁂

LONDON LIFE INSURANCE COMPANY.

The thirtieth annual meeting of the shareholders and policyholders of the London Life Insurance Company was held at the company's offices, London, Canada, February 13th, 1905.

The president, Mr. John McClary, occupied the chair, and there were present a number of shareholders and policyholders of the company.

The notice calling the meeting was read by the manager and secretary, Mr. J. G. Richter, after which the following report and financial statement was submitted:

Report.

The directors of the company beg to submit the annual report and duly audited financial statement for the year ending December 31st, 1904.

During the year 14,194 applications for insurance, amounting to $2,065,775.40, were accepted and policies issued therefor.

The net premium and interest receipts of the year were respectively $355,507.92 and $74,228.11, totalling $429,826.03, an increase of $31,814.75 over the previous year.

The sum of $99,456.40 was paid for death claims, matured endowments, surrendered policies and cash profits during the year, an increase of $4,218.15 over the previous year.

The insurance in force on the company's books at the close of the year, after deducting all re-insurances, amounted to

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 31st Jan., 1905.

J. M. COURTNEY,
Deputy Minister of Finance.

$8,200,297.22, under 4,206 "Ordinary" and 52,627 "Industrial" policies—an increase of 3,131 policies for insurance of $735,669.55 for the year.

The assets of the company, exclusive of uncalled but subscribed capital, amount to $1,643,183.92, an increase of $180,218.04 for the year. The interest and other payments falling due during the year were in the main satisfactorily met, and no losses in respect of investments were incurred.

The liabilities of the company under existing policies, and in all other respects have been provided for in the most ample manner, the whole amounting to $1,542,693.33. The surplus on policyholders' account, exclusive of uncalled but paid-up capital, is on the company's standard, $100,490.59, and after deducting paid-up capital, there remains a net surplus over all liabilities and capital, of $50,490.59, an increase of $5,955.26 for the year.

JOHN G. RICHTER, Manager and Secretary.	JOHN MCCLARY, President.

SYNOPSIS OF FINANCIAL STATEMENT.

Revenue Account.

Receipts.

Interest	$ 74,228 11

Mortgages, debentures and stocks	$1,458,767 20
All other interest-bearing investments	105,988 06
Outstanding and def. premiums	34,979 00
Interest due and accrued	43,449 66
	$1,643,183 92

Liabilities.

Re-insurance reserve, net	$1,498,079 00
Accumulating profits and special reserve	34,400 00
All other liabilities	10,214 33
Surplus on policyholders' account (including capital paid-up $50,000)	100,490 59
	$1,643,183 92

I hereby certify that I have audited the books and accounts of the London Life Insurance Company, and examined their securities for the year ending December 31st, 1904, and find them correct. The above cash statement and balance sheet exhibit the company's business correctly at the date mentioned.

JAMES MCMILLAN,
London, 1st February, 1905. Auditor.

Actuary's Report.

The valuation of the company's policies has been computed on the same basis as that employed for the previous four years, and assumes for all policies, except those issued in the "Ordinary" branch since 1st January, 1900, an interest rate ½ per cent. more stringent than that required by the Government standard. The basis of reserves in the "Industrial" branch is, so far as can be ascertained, higher than that adopted for such business by any other insurance company on this continent.

In addition to the reserve liability special attention should be directed to the item of accumulating profits in order to fully appreciate the financial position of the company, as presented in the statement. For some years past "with-profit" policies of the company have been issued under distribution of not less than five years, and the usual method would be to ignore the amount of profits accruing on such policies until the distribution periods should be completed. Instead of this, however, all policies are treated as if they were on the annual distribution basis, and the proper proportion of the profits due at the end of the profit periods was computed on each policy, and the total is included in the liabilities. The accumulations under this heading form a very considerable item of liability, which, if treated in the usual manner, would result in a largely increased surplus being shown.

The rates under which the "Ordinary" policies of the company are now issued came into force on 1st January, 1900, and consequently the first profit distributions under these policies are made this year. It is satisfactory to note that these distributions are fully in accordance with the scale of profits issued to our agents five years ago, except that in the case of those policies, where a provincial tax is imposed on the premium income of the company, the tax payable on such policies is deducted from the profits otherwise allotted thereto. The interest earnings of the company having steadily improved since 1900, there is good reason to anticipate that the liberal scale of profits now in force is a conservative estimate, and likely to be maintained for some time to come.

During the past year the policies of this company in force on the 31st Dec., 1903, were valued by the Insurance Department at Ottawa, as by law required. The result of this valuation shows that the company held at that date reserves in excess of what is required by the present Government standard to the amount of $28,613 in the "Ordinary" branch, and $31,646 in the "Industrial" branch, or a total excess reserve of $60,259.

E. E. REID, B.A., A.I.A., Actuary.

The president, Mr. John McClary, in moving the adoption of the report, said:

The report of the directors and accompanying financial statement are, as heretofore, very full, and present the affairs of the company in such manner as to be readily comprehended.

The new business of the year was the largest in the history of the company and the increase in total insurance in force at the close of the year was likewise favorable. The cash income from premiums and interest shows a good increase over the previous year, and payments to policyholders under the various headings also aggregate somewhat more than did the like payments for 1903, though death losses in the "Ordinary" Branch were much more favorable than for the year previous.

Reference to the list of assets of the company will show that the funds of the company are invested in securities of undoubted character; and as the average rate of interest realized was 5.64 per cent. on the mean invested assets of the year, the investments have proven fairly remunerative as well.

The reserve and other liabilities of the company have, as shown by the report of the actuary, been taken account of in the most ample manner. So much so is this the case as regards the reserve liability in particular, that a word of explanation in this connection may be in order. In 1899, the Parliament of Canada passed an Act changing the standard of valuation of life insurance policies, as regards rate of interest to be employed, from 4½ per cent. to 3½ per cent., from and after the 1st January, 1900, in respect of all new business issued thereafter; and in respect of the then existing business, the companies are given until the 1st of January, 1910, to bring the reserve valuations to a 4 per cent. basis, and to 1st of January, 1915, to come to a 3½ per cent. basis, which will thereafter be the rate applicable in like manner as in the case of new business issued since 1900. In order to comply with these requirements in a proper manner, it is necessary to make provision in the meantime for the extra liabilities that will have to be accounted for at the times above stated. It is a source of no little satisfaction to know that the valuation of all old business of this company is already being made on a 4 per cent. basis, and that the company is each year setting aside a further sum towards bringing the valuation to a 3½ per cent. basis at an early date, and hence the reason of the reserve liabilities, on the company's standard, being so much in excess of the Government standard, as is indicated in the report of the actuary.

The surplus of assets over all liabilities and capital, amounting to $50,490.59, being ascertained on the very stringent basis indicated in the actuary's report, is all that the term implies, and not subject to any deductions whatever, as is so often the case in the make-up of financial statements.

I have much pleasure in moving the adoption of the report.

The vice-president, Mr. A. O. Jeffery, K.C., LL.D., D.C.L., in seconding the adoption of the report said:

After the very exhaustive manner in which the president has dealt with the affairs of the company in moving the adoption of the report, no extended remarks in reference thereto would seem to be further called for.

I would, however, point out that notwithstanding the very considerable increase in the new business of the year over any previous year of the company, the ratio of expense to income has not been materially increased, but stands at 34.7 per cent. for both branches, which is practically the same as for the year previous. In order to arrive at the ratio of expense to income of the respective branches, it is necessary to apportion the total interest income between the "Ordinary" and "Industrial" branches. On basis of the respective funds of the two branches, the share of interest apportionable to the "Ordinary" branch is $32,629.98, and to the "Industrial" branch $41,591.13. It is likewise necessary to apportion the miscellaneous expenditures aggregating $48,444.89, which, on the basis of respective income would be $16,169.78 for the "Ordinary" and $32,274.81 for the "Industrial." On this basis the ratio of expense to income of the "Ordinary" branch for the past year was 26.3 per cent., and of the "Industrial" branch 39.2 per cent., which, having regard to the character and value of the business transacted and the exceptionally good interest earnings of the company, is a very good showing.

There is one other point to which I wish to call attention, viz., that the "Ordinary" claims for the past year amounted to only 81 per cent. of the interest received from the investments of that branch, which, considering the age of the company, is very favorable.

In the "Industrial" branch the claims exceeded the interest receipts somewhat, but amounted to a little under 23 per cent. of the "Industrial" premiums received, and to only 19.5 per cent. of the total premium and interest receipts of that branch.

With these remarks, I beg to second the adoption of the report.

The report was adopted unanimously.

A cordial vote of thanks was tendered the agents and other employees of the company for the very satisfactory manner in which they had discharged their several duties during the past year.

The election of directors resulted in the re-election of John McClary, president; A. O. Jeffrey, vice-president; Judge Bell, W. Bowman, W. F. Bullen, Thomas H. Smallman, George C. Gibbons, A. S. Emery, and Thomas W. Baker.

⁂

OTTAWA FIRE INSURANCE CO.

The annual meeting of shareholders of the Ottawa Fire Insurance Company was held at the company's head office on 13th February. The following reports were submitted:

Report.

Your directors have pleasure in submitting the fifth annual report and statement of the company's accounts for the year ended 31st December, 1904.

The revenue account shows a decrease of premium income owing to a change in the underwriting policy of the company.

Losses for the year have been abnormally heavy, amounting in all to $260,246.93. Of this amount the Toronto conflagration is responsible for $75,491.48, and Baltimore and Rochester for $36,499.13, and if you deduct these conflagration losses the ordinary losses for the year were $148,256.32, or $43,203.27 less than the previous year.

The directors found it necessary to call upon the shareholders to the extent of $30 per share, or $150,000 in all, which was promptly paid.

After giving the surplus line fire insurance in the United States a fair trial, your directors decided in the month of November to discontinue the business and to re-insure outstanding risks in that country, which was done before the end of the year.

All adjusted losses have been paid without depleting the investments.

During the last session of the Dominion Parliament a special act was obtained authorizing the company to write off a portion of its capital and for other purposes. This act was approved by the shareholders, and has been put in force, which enabled the directors to provide the full Government reserve, besides showing an unimpaired capital.

All of which is respectfully submitted.

Charles Magee, President.

STATEMENT AT 31st DECEMBER, 1904.

Jas. F. Cunningham, F.C.A., (Can.).

Ottawa, 8th February, 1905.

President's Address.

Gentlemen,—I regret that it has not been possible to present a more attractive report than the one before you, but I presume it is no surprise, as you have been called together several times during the year to advise with the directors and sanction the special legislation.

The directors have to acknowledge the generous and prompt manner in which you as shareholders endorsed and sanctioned their proposals in making such heavy calls as were necessary after the Toronto conflagration.

I am glad to say that the business of the last six months of the year has been quite satisfactory, and shows a fair underwriting profit.

The special Act of Parliament, which is now in force, enabled the directors to write off the conflagration losses of the year and provide for the $63,956.98 which was at the debit of profit and loss account at the end of last year, so that we stand this year with the same amount of paid-up capital as we commenced last year with, but with this great advantage, that it is unimpaired.

You will notice that the assets and investments are in excess of a year ago, and instead of realizing on our securities, we called upon our shareholders to put their hands in their pockets to the extent of $150,000, to meet the extraordinary demands upon the company promptly, so that, gentlemen, you are the only losers.

No policyholder had to wait for his money after his claim had been adjusted. When the extent of the loss was ascertained, you authorized the directors to do what any private individual who was solvent would do, that is, put up enough money to pay the debts, write off the losses, try to benefit by the experience of the past and go on with the business hopefully and feeling assured, as I do, that the course we have pursued was the right one, and, notwithstanding our trying experience, I am a firm believer in the future prosperity of the company.

We have to regret the loss of two of our directors by death during the year, both very suddenly—Mr. Claude McLachlin, who had been a director and active supporter of the company from the first, received the summons when in New York, last March, and Mr. Alexander Lumsden, who was elected to fill one of the vacancies, was also suddenly called away. Mr. Lumsden was of very great assistance by the courageous and forceful manner with which he aided the directors in calling up all the money that was necessary to put the company in even a stronger financial position than it previously occupied.

Gentlemen, on behalf of the board of directors, I wish to thank you for your attendance here to-day, and for the noble and heroic manner in which you and all shareholders came to the company's assistance when called upon.

The board of directors were unanimously re-elected as follows: C. Jackson Booth, Hon. W. C. Edwards, (Senator); Allan Francis, Charles Magee, Denis Murphy, W. S. Odell, C. Berkeley Powell, C. C. Ray, C. Ross and Bennett Rosamond.

Mr. Charles Magee was re-elected president, and Messrs. C. Berkeley Powell and C. Ross were re-elected first and second vice-presidents respectively.

Agents wanted to introduce the Great Industrial Savings Bank Policy.

LONDON MUTUAL FIRE INSURANCE COMPANY OF CANADA.

The annual meeting of the above-named company was held on Monday, February 20th, at the head office, 82-84 King St. East, Toronto, when the following report was submitted:

Report.

Your directors have pleasure in presenting the forty-fifth annual report and balance sheet of the company for the year ending December 31st, 1904.

It will be seen that the assets stand at $755,707.33, an increase of $18,910.78 over the amount shown at the close of the year ending December 31st, 1903.

The re-insurance reserve, amounting to $342,484.76, has been calculated on the basis of the pro rata unearned premium on all policies in force at December 31st, 1904, both on cash and mutual systems.

Your directors are pleased to report that notwithstanding the heavy loss on account of the Toronto conflagration, which happened on April 19th last. the company met all claims promptly, without having to sell a debenture, realize on a mortgage. call on extra capital, or borrow a dollar.

We have thought it well to carry forward the investment surplus account intact, it being the purpose of your board to set aside in the future a substantial sum to provide a special conflagration fund.

There were issued during the year (including renewals), 33,270 policies covering insurance to the amount of $46,684,605, the gross amount at risk on the 31st of December, 1904, being $80,367,962.

We have great pleasure in stating that the office and field staffs have performed their duties in a thoroughly satisfactory and efficient manner.

Three directors, viz.: James Gunn, D. Brown and H. Waddington, now retire, all being eligible for re-election.

Respectfully submitted.

JOHN DRYDEN, President.

H. WADDINGTON, Managing Director.

I have audited the books and accounts, and have verified the securities of the London Mutual Fire Insurance Company of Canada, and hereby certify to the accuracy of the above statements, which correctly set forth the position of the company as on December 31st, 1904.

W. H. CROSS,
Auditor.

Toronto, February 15th, 1905.

At a subsequent meeting of the board of directors, Gideon Grant, Esq., Toronto, was elected to fill the vacancy caused by the retirement of D. Brown, of St. Thomas.

Toronto, February 20th, 1905.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391 per day in number of Claims Paid.
6,561 per day in number of Policies Issued.
$1,426,700.50 per day in New Insurance Written.
$114,060.67 per day in Payments to Policy-holders and addition to Reserve.
$73,326.81 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600,000.00.

CORRESPONDENCE INVITED.

Mercantile Summary.

The White Pass & Yukon Railway Company are about to replace all wooden bridges along their line with steel ones, and are placing orders for the same.

A plebiscite taken in Charlottetown, P.E.I., on the question whether the city should take over the electric light plant resulted in a vote of 651 for and 152 against the proposal.

A despatch from Leamington says that the bonds of the proposed Windsor, Essex & Lake Shore Rapid Railway have been sold en bloc in New York, and that work will proceed as soon as the weather will allow.

The Canadian Club building on the St. Clair Flats, near Detroit, has been totally destroyed by fire, the loss being placed at $10,000, partly covered by insurance. Mr. F. H. Walker, of Detroit, is president of the club, and John S. Hendrie, of Hamilton, vice-president.

The annual meeting of the Western Oil and Coal Company took place in Vancouver last week, and elected officers as follows: President, Dr. McKechnie; vice-president, H. J. Thorne; and secretary, J. B. Ferguson. Directors: Dr. R. E. McKechnie, Messrs. J. E. Miller, H. J. Thorne, R. A. Welsh, John Burns, George E. Macdonald, J. G. Scott, J. B. Ferguson, and E. F. Hutchins, of Winnipeg.

A fire which broke out in McDonald & Wells' hardware store on the 18th inst., at Florence, Ont., destroyed that completely, and spread so that the whole block and parts of two others were destroyed. McDonald & Wells' loss was $10,000, insured for $6,000; W. Drey, dry goods and general merchandise, loss $7,000, insured for $4,500; Leroy Miller, drugs, loss $3,000. At Langton, Ont., E. A. Christmas' general store was completely destroyed at a loss of $6,000, partly insured. Henselwood, Benehickson & Co.'s general store at Glenboro', Man., was burned, loss $15,000, insured for $10,000.

A new million dollar iron company has been formed in Toronto under the name of the Atikokan Iron Co. It intends to mine iron ore, and manufacture pig-iron and other iron products at Port Arthur. This company will be supplemented, it is said, by another called the Canadian Coal & Ore Dock Company, which proposes to construct coal and ore docks at a cost of $500,000, and will have a storage capacity of 200,000 tons of coal and 100,000 tons of ore. The Canadian Northern Railway Co., is interested. The town of Port Arthur is furnishing a site of forty acres. The enterprise involves an investment of one million dollars in cash, $300,000 of which will be devoted to the purchase of large iron deposits on the line of the Canadian Northern, and the balance to the erection of a blast furnace of a hundred tons capacity, coke ovens, and ore roasting furnaces, etc.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

WILLIAM F. BULLEN,
Manager.
London, Ontario, 1905.

Isaie Beaubien, of Quebec, formerly a boot and shoe traveller, who began business as a retailer in the line named about four years ago, has assigned to Geo. Darveau. A lack of proper attention to business is assigned as the cause of his troubles. He owes $3,910.

Mercantile Summary

Mr. R. H. Stewart, of Montreal, who has been engaged until recently at the C.P.R. coal mines at Banff, has been appointed manager of the War Eagle and Centre Star mines at Rossland.

A large lumber company at Chemainus, B.C., is said to have closed contracts with the C.P.R. for the shipment of 30,000,000 feet of lumber to various points in the North-West.

A fire which originated in the premises of J. A. Tufts & Sons, wholesale fancy goods, St. John, N.B., last week, did damage to the extent of about $15,000, mostly insured.

John Gravely, in the dry goods line at Valleyfield, Que., since 1894, and who has been asking his creditors for a settlement of his indebtedness on a 50 per cent. basis, has been obliged to assign. He is said to owe $5,500.

Mr. J. W. Leonard, C.E., has been appointed by the Canadian Pacific Railway, manager of construction of the new line which that company is building from Toronto to Sudbury. The road, which will be about 300 miles in length, will obviate the necessity of the C.P.R. depending on the Grand Trunk for connections at North Bay.

At a meeting of the Province of Quebec District Retail Furniture Dealers' Association, a course of action was discussed in regard to their relations with the wholesalers. It was decided to give a preference and to support those who had agreed to encourage the retailers by selling to them only; also to induce others to agree to the same line of action.

A recent insolvent is Ephrem Favreau, of St. Malo, Que. By trade he is a blacksmith, but a few years ago he began handling flour in a small way, gradually drifting into a general store trade, and disposing of his blacksmithing business. More recently he also went into saw-milling, but having no general commercial experience, his assignment was only a natural sequence.

The Shepard & Morse Lumber Company, Ottawa, have purchased an extensive area on the Bronson Company's limits on the Montreal River. It covers 105 miles, and the price paid, it is understood, was $250,000. The limit, which contains chiefly white pine, has never been cut over to any extent, and it is believed that with careful and judicious cutting, it will last fifty years.

We learn with interest of the establishment of a new trade journal in our far North-West, namely, the Trade Gazette, of Calgary, Alberta. It is, we are told, the only trade journal between Winnipeg and the Pacific coast, a distance of nearly 2,000 miles, and therefore there should be room for it. The new paper appears under good auspices, John J. Young, M.L.A., being its managing-director, and Mr. G. C. Young its editor.

The Vancouver Waterworks Department has awarded the contract for supplying a large quantity of cast-iron pipe to the Robertson-Godson Co., of that place, the amount being $37,309.

A general storekeeper in a moderate way at Montague, P.E.I., since 1887, Patrick Kelly, is reported as having assigned. He is described as negligent of his business and slow pay of late. His main indebtedness is to Charlottetown dealers.

Mercantile Summary.

At the annual meeting of the Western Fair Board, held in London last week, W. J. Reid was elected president, Col. Gartshore retiring.

Ernest D. Vernon, of Truro, N.S., doing business as a furniture dealer in quite a fair way under the style of Vernon & Co., is seeking extension indulgence at the hands of his creditors. He shows an indebtedness of $13,900, with apparent assets of $19,500.

A voluntary assignment has been made by C. E. Frechette, dealing in men's furnishings at Grande Mere, Que. He was formerly a farmer at St. Leon, and put his little all, about $600 of a capital, into business last spring, and the above is the result.

The affairs of the Robert Hunter Co., produce dealers at Ottawa, have been placed in the hands of F. A. Larmonth, for liquidation, and a general meeting of creditors is called for the 27th inst. The company was chartered under Ontario laws in March, 1903, with an authorized capital of $20,000.

The following directors were elected at the annual meeting of shareholders of the Dominion Guarantee Company, February 15th: S. W. Evans, president; Benjamin Tooke, vice-president; J. N. Fortier, William Hanson, D. P. Heaton, H. B. Ames, M.P.; Geo. G. Foster, K.C.; C. W. Hagar, general manager; W. J. Kirby, secretary.

The annual general meeting of shareholders of the Canada Accident Assurance Company was held in Montreal on Wednesday, 15th inst., when the following directors were appointed: R. Wilson-Smith, president; Hon. Alphonse Desjardins, vice-president; J. P. Cleghorn, S. H. Ewing, J. J. Kenny, Hon. S. C. Wood, and T. H. Hudson.

Here are some Montreal small failures: J. G. Constantineau, a saloon-keeper, has assigned, his indebtedness being placed at $7,540.——A demand of assignment has been made upon O. Lussier, dealing in men's furnishings since the spring of 1903. He owes $2,300.——A settlement has been effected by T. C. Grothe, jeweller, whose failure we lately reported. He first offered 25 cents, which was declined, but he has now arranged to pay 35 cents in the dollar in time, with the security of his father. His liabilities ranged close on to $30,000.

According to despatches across the line, building in the principal cities of the Union last month showed a remarkable increase compared with a year ago. In twenty-seven of the leading cities permits were taken out for the construction of 5,187 buildings, involving a total cost of $24,964,651, against 4,317 buildings, involving a total of $13,575,418 for the same month a year ago, an increase of 870 buildings, and $11,389,233, or 83 per cent. Over two-thirds of the cities enumerated show in some instances increases of remarkable magnitude. New York City shows an increase of 299 per cent.; Pittsburg, 204 per cent.

A large quantity of Canadian lumber was destroyed in a fire at the Watson & Todd timber yards, in Liverpool. Much of it had been undergoing the drying process for a long time. The loss is figured at $75,000.

Mercantile Summary.

The Furness line steamer "Damara," bound from Liverpool to Halifax via St. John's, Nfld., struck a ledge at Pleasant Point, off Musquodoboit Harbor, fifty miles east of Halifax, and had to be abandoned by the crew and passengers.

A project is on foot by the Grand River and Western Power Co. to construct a water course and feeder at Dunnville, and a raceway northerly from the Grand River to Jordan, on Lake Ontario, for the purpose of developing electrical and hydraulic energy. It is also proposed to construct lines of wire, poles, tunnels and conduits for the transmission of light, heat and power.

The Central Telephone Company, Limited, held its annual meeting at Hampton, N.B., last week and elected the following directors: T. H. Estabrooks, St. John, president; S. H. White, Sussex, vice-president; J. M. Scovil, St. John; G. W. Fowler, M.P., Sussex; Hon. Wm. Pugsley, St. John; G. W. Ganong, M.P., St. Stephen; H. P. Robinson, Sussex, secretary-treasurer. The company will continue to extend its system. The company now has 156 miles of line in operation.

A despatch from Spokane, Wash., this week stated that the Granby Consolidated Mining, Smelting and Power Company has bought the Monarch, the Tamarack, and the Tamarack fraction mines, at Phœnix, B.C., from the Earl Syndicate of England for $130,000, and the Missing Link fraction, next to the War Eagle mine, from George Rumberger and Mr. Porter, of Phœnix, for $30,000. The mines are low-grade gold-copper-silver properties, similar to the other holdings of the Granby Company.

The Ottawa Electric Company's bill is up before the Private Bills Committee of the House of Commons. This provides for increasing the capital stock and also to permit the company to buy stock of other companies. The Mayor of Ottawa, and other citizens oppose the bill. There are two other electric light companies in Ottawa, the Consumers, a growing concern, and the Metropolitan, and it is feared that the Ottawa Electric Light Company would acquire the Consumers' Company, which had a lower rate in franchise, and raise the price of light in the city.

The output of the Dominion Iron and Steel Company, for 1904, is given out officially as 143,000 tons of steel of all kinds, and 96,600 tons of pig iron. During the year the company mined 325,000 tons of iron ore at Wabana, of which 220,000 were imported to Sydney for use at blast furnaces. The remaining tonnage was shipped to Europe. The company used over 175,000 tons of dolomite, 385,500 tons of coal, during the year. The total production of coke was 170,000 tons, in which greater proportion of coal was used. The company estimates that were it not for the strike, the output would have been doubled. The production of tar amounted to 1,650,153 gallons; of sulphate of ammonia to 3,546,557 pounds, and of sulphuric acid to 2,631 tons.

IN HER PUBLIC LANDS

many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.

Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.

For maps, reports, Mines Act, etc., apply to Hon. E. J. Davis, Commissioner of Crown Lands, or Thos. W. Gibson, Director Bureau of Mines, Toronto.

Factory in
BRANTFORD.

ENVELOPES
made in great
variety.

Mercantile Summary.

The Copeland-Chatterson Co., of Toronto, is to build a factory in Brantford, and that city wants authorization from the Ontario Legislature to issue $25,000 debentures for a loan to assist the former.

Mr. Heaton's book, "The Trust Company Idea and its Development," is to be translated into Japanese by M. Takata, a prominent banker in Tokio, Japan, who has lately returned home from a trip to the United States, and proposes to establish a trust company under very influential auspices in Japan.

The bridge for the Canadian Northern Railway, over the south branch of the Saskatchewan River within fifteen miles of Prince Albert, will consist of nine spans of 150 each, the track being 100 feet above low water. The piers of the bridge are to be built of concrete and the trusses of steel. The structure is to be completed by the end of August.

The North-West Telephone Company is applying to the Dominion Government for power to operate telephones in Ontario, Manitoba, and the North-West. Mr. A. W. Fraser, of Ottawa, has the matter in charge. The capital stock is $500,000. A clause was inserted in the bill which was finally passed preventing amalgamation with other companies.

The Gardiner Biscuit factory at Kingston, Ont., was on the 15th inst., damaged by fire, to the extent of between $8,000 and $10,000, partially insured. On the same day the Doherty Organ factory at Clinton, heavily stocked with organ cases in process of manufacture was gutted. Loss $30,000, covered by insurance. The owners will begin at once rebuilding. Berryfield's implement warehouse, at Milestone, Assa., valued at $10,000, was burned down. Incendiarism is suspected.

All works of taste must bear a price in proportion to the skill, taste, time, expense and risk attending their invention and manufacture. Those things called dear are, when justly estimated, the cheapest: they are attended with much less profit to the artist than those which everybody calls cheap. Beautiful forms and compositions are not made by chance, nor can they ever, in any material, be made at small expense. A composition for cheapness, and not for excellence of workmanship, is the most frequent and certain cause of the rapid decay and entire destruction of arts and manufactures. These words, from John Ruskin, are sent out with the 1905 specimen of their Art Calendar Series by the Toronto Lithographing Co., Limited. And a strikingly handsome calendar it is—representing a knight in full armor, mounted. It is well for Canadian industries to be able to add that the coated paper of which this striking calendar is made was produced by Ritchie & Ramsay, Limited, and the Kinleith Paper Co., and that the ink was made by the Ault & Wiborg Co., Limited. All four have done their parts well.

We are informed that the Cape Breton Electric Company has ordered a 150-horse-power engine from the Robb Engineering Company to increase the capacity of their North Sydney power station.

Due to the alleged existence of a combine among British cement factories, enquiries are coming from England as to the feasibility of shipping Canadian cement to that country. The price mentioned, however, 20s. per ton, say 60 to 70 cents per barrel, is rather low.

The town of Peterborough, Ont., wants incorporation as a city, and incidentally the ratification of eleven money by-laws, including one of $50,000 for building a collegiate institute, $20,000 for waterworks, and other amounts for improving roads, building bridges, an armory, etc.

The number of railway accidents in the United States seems to be increasing. During the year ending with June 30th, 1904, there were 3,367 railway employees killed and 33,711 injured. In the same time 420 passengers were killed and 81,077 injured. The increase in the number of deaths of passengers in train accidents in 1904, compared with 1903, is 64½ per cent. During the year there were over 6,000 train collisions.

⁂

TORONTO MARKETS.

Toronto, February 23rd, 1905.

Chemicals, Drugs, etc.—There is still quite a firm feeling in opium. In quinine no change has so far been made. There is still an upward tendency in camphor. Codliver oil is dull. General trade is fairly good, considering the bad state of the roads in the country districts. Trade in the New York market is somewhat dull. Prospects in Britain according to last reports are about as before.

Flour and Grain.—Quite a change has taken place in the state of the flour market, and it is still on the dull side. Ninety per cent. patents fetch about $4.38 in buyers' bags, middle or east freights. Millfeed is rising in price and is very firm. Oatmeal is easy. Grains keep very much as reported last week. Wheat is selling at a somewhat wide range of prices.

Hides and Skins.—Calfskins are quite firm at 11c., according to grade. Other prices remain very much as before. Tallow is unchanged, and rather dull.

Hardware.—Trade continues quite good for the time of the year, and preparations are being made for the delivery of spring goods. Prospects for a good season's trading seem very satisfactory. In metals there is going on a normally good movement, and prices continue pretty firm. No changes of any moment have occurred during the last few days.

Groceries.—There is no special feature worth making comment on. Sugars continue unchanged at last week's prices, and the market is about as before, with a fairly good enquiry. In teas not much is being done; coffees are better. Dried fruits are in good request.

Live Stock.—Prices in all lines of cattle have been well maintained, owing to the small arrivals lately, due to the state of the country roads. Exporters sold at previous quotations, with a rising tendency. Medium grades were most in evidence. Butchers' cattle had been mostly cleaned out, and the demand was brisk. Picked lots of good quality were in particularly good demand. Trade in stockers and feeders was dull, and few arrivals were in the market. Milch cows are in good demand, at $30 to $60 each. Prices for sheep and lambs advanced, butchers selling at $4 to $5.

Leather.—While prospects are bright for a good trade in leather this spring, business at the moment is on the dull side. Prices keep about steady.

Provisions.—There is almost a famine in butter, and prices are very high. This is due partly to the snow blockade and partly to the period of the year. Prices for cheese are unchanged, but are quite firm. Eggs are still scarce, and prices are high. Poultry is dull, with not much coming in. Not much trade is being done for the present in smoked meats.

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

MONTREAL MARKETS.

Montreal, 22nd Feb., 1905.

Ashes.—Late receipts have been very small, and the market is a very slow one. First pots are quoted at $5.35 to $5.45; seconds, about $4.90. A nominal quotation for pearls is about $7.50 per cental.

Cements and Firebricks.—Absolutely nothing is doing in cements just now, and enquiry for spring import is only expected to set in next month. In firebricks there is a moderate demand for the repairs in manufacturing concerns usually done at this season, and prices are steady at $18 to $23 per M.

Dairy Products.—The great strength in the butter market noted last week has been even further intensified by the dearth of supplies, from 28 to 30c. per lb. being the ordinary quotation for creamery, while it is claimed 32 cents has been realized for choice goods in small packages. It is further reported that two years' old goods of poor quality have been sold at 20 to 21c. The cheese market remains featureless, there being practically no demand, and no reliable quotations are available.

Dry Goods.—There has not been any appreciable increase in the volume of business since a week ago, and travellers' letters from all points speak of the difficulty in reaching many interior points by reason of deep snow. One traveller in Prince Edward Island writes of having to abandon his samples, and tramp fifteen miles over a road untraversable by a team. Remittances are less active, and applications for renewal indulgence rather more frequent. Silk goods are firmer in price, and cables from French manufacturers advise an advance of ten centimes per metre.

Fish.—Enquiry for the Lenten trade (Lent begins on 8th March) is now quite active, and prices are generally firm. Green cod continues quite scarce, and there is a growing demand for herring. We quote: Green cod, large, $7; No. 2, $5.50; Labrador herrings, $5; halves, ditto, $2.75; mackerel, $2 for 20-lb. kits; sea trout, $9.50 per bbl.; boneless cod, 6c. per lb.; boneless fish, 5½c.; fresh herrings, $1 to $1.25 per hundred; finnan haddies, 6 to 6½c. per pound.

Groceries.—The movement in this line is somewhat circumscribed owing to the serious difficulties in country traffic, roads in the interior districts being almost impassable. For the same reason money is coming in rather slowly. The sugar market is rather firmer, there being some reported reaction in raws, and standard granulated is quite steady at $5.65 in barrels, and yellows at $5.15 to $5.45; bags, 5c. less. The present demand at the factory is light, but January was a pretty active month. Cable advices just to hand from Barbadoes report an active and strong market for new molasses, the quotation there being 20c., equal to about 32½c laid down. Dried fruits are dull, but prices are pretty fairly held, stocks being quite low. Canned goods are all very firm. White beans keep on advancing, $1.50 a bushel being asked for prime quality in quantity. A general meeting of the Wholesale Grocers' Association is being held in Toronto this week, but no special changes are looked for as to prices or terms.

Hides.—Some few lambskins are coming to hand, for which dealers are paying 10c. each. Sheepskins are steady at $1.15 to $1.20. For No. 1 beef hides dealers are paying 9½c., and 13 and 11c. per pound for Nos. 1 and 2 calfskins respectively.

Leather.—Deliveries of spring boots and shoes are now fairly under way, and some manufacturers are turning their

attention to fall samples. In leather the movement is a moderate one, with movement is a moderate one, with values of sole and black leathers all steady at last quoted figures. Owing to the constantly advancing cost of goatskins the quotation for dongolas and glazed kid leather are advanced 10 to 15 per cent.

Metals and Hardware.—As in other lines, the movement in metals and general hardware seems to be affected by the late severe weather, and the general demand is not over-active. Probably this is more noticeable in the latter than in the former line. As regards metals, there has not been a noteworthy change since last writing. Galvanized sheets are rather firmer in Britain, but the general local quotation is still $4.15. Canadas are steady at $2.45; tinplates, $3.65 and $3.90 for cokes and charcoals, respectively, of standard brand; block sheets, $2.15 to $2.20 for 28 gauge. Bars are firm at $1.75 to $1.80, and bar steel at $1.90. Tin, copper, lead, etc., are all about steady at last week's figures.

Oils, Paints and Glass.—Linseed oil is at last a little firmer, and 43c. per gal. is now quoted as about the lowest for raw, with 46c. for boiled. Turpentine remains at 77½c. per gal. in bbl. lots. White lead is very firm at $4.50 for No. 1 window glass is firmly held at $3.25 per 100 feet for first break

---

Have You Applied For Your Share of the Seventy Million Dollars

which will be distributed throughout Manitoba and the Territories within the next few months? The general merchants in these provinces will handle almost all of this money. Make application to them for your share through their own and the only trade newspaper which interests them.

Within the past year 160.000 new possible buyers of your goods settled in the West. Will the retail merchant offer them what you have to sell?

Established 1882

THE COMMERCIAL

AGENCIES THROUGHOUT CANADA.

The United States concern which has been carrying on fishing operations in the Lesser Slave Lake are reported to be taking out enormous quantities of fish from these waters.

The Dominion Wire Rope Company, Limited, held their annual meeting in Montreal a few days ago, and elected the following officers:—President, F. W. Fairman; vice-president and managing director, F. H. Hopkins; secretary-treasurer, J. J. Rosevear.

Oliver Furry, the locator of the well-known Britannia copper gold claims on Howe Sound, B.C., has, it is stated, given an option for a half-interest in the Empress group of copper-gold claims in the South Valley, Howe Sound, to Mr. Stephen Raymond, of New York, for $75,000. The Empress group consists of three claims, the Empress, Victoria, and Queen.

Arrangements are being made in Kingston Ont., for the purchase of the lighting plants as previously agreed upon. It borrows $82,000, payable in thirty years, and will pay five per cent. interest on $100,000 bonds for the next twelve years. Its annual payments from 1905 to 1917, will be $9,642; from 1917 to 1935, $10,520, and from 1935 to 1947, $5,780. The plants are yielding a revenue of $32,000 per year, which in the course of a few years is expected to go up to $40,000. The municipalization of the plants will, it is believed, be profitable.

SCOTT & WALMSLEY,
ESTABLISHED 1858.
Managers and Underwriters.

Woodstock will grant a loan of $12,000 to the Eureka Planter Co., of Windsor, who will put up a factory there.

The Mayor of Sandwich, Mr. Ernest Girardot, has been appointed by the Dominion Government as Canadian Commissioner to the World's Fair at Liege, Belgium.

The business at Fernie, of the British Columbia Telephone Company, Vancouver, has been taken over by the Crow's Nest Pass Coal Co., who will operate it as part of their own system.

⁂

HIS VARIED INDUSTRIES.

"He's interested in many industries, I believe?"

"He is, indeed."

"Is he in the shoe business?"

"Yes; he has quite a foothold there."

"How about the glove business?"

"He has recently taken a hand in it."

"And the selling of canes?"

"He carries them."

"And hats?"

"He has them on his mind, too."

"What else?"

"He puts up umbrellas and turns out lamps."—Cleveland Plain Dealer.

⁂

DAILY LOVE STORY.

The typewriter girl was asked by the nice young man to marry him. She did not say, "This is so sudden," neither did she fall on his shirt front.

"This is a serious matter for me, George," she said. "I am earning $12 a week now, and that suffices for all my wants. I like you very much, indeed, but if I marry you I will have to give up my situation. The question is, Will I ever regret having given up my situation?"

George was startled, but he saw that the young lady was taking a common sense view of it, and they had a nice confidential talk over the matter. The wedding is at least a year away.—Detroit Evening News.

⁂

—The agreement for the taking over of a great expanse of timber lands and the erection of a pulp mill in the Exploits Valley, Newfoundland, by the Harmsworths, the great English publishing house, for which negotiations have been going on for the past two years, has now been finally arranged, and the transfer will take place as soon as legislative sanction can be obtained. Very careful investigation is being made by experts as to the best location of the buildings, and the dam, flume and other accessories, so as to avoid danger from spring freshets, which in the locality in question sometimes present grave danger. The company will go under the name of the Anglo-Newfoundland Development Company, of which the president is Mr. Beeton, and the directors are Sir Alfred Harmsworth, Leicester Harmsworth, M.P., and Harold Harmsworth.

Central Life Insurance Co., of Canada.

The Canada Life Statement

shows gains all along the line. One feature of importance is the great strength of the Company's Policy Reserves, greater by nearly $3,000,000 than the present Dominion Government requirement.

A statement of this and other features of interest

Appears on Back Cover.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

Financial Statement

58th Annual Report

ASSETS

Government, Municipal, and other Bonds, Stocks and Debentures	$17,249,744 96
Mortgages on Real Estate	4,506,711 29
Loans on Bonds, Stocks, etc.	368,093 66
Loans on Policies	3,504,421 18
Real Estate owned (including Company's Buildings in Toronto, Hamilton, Montreal, Winnipeg, St. John, N.B., and London, Eng.)	1,762,633 99
Premiums in Transit and deferred (net) and interest accrued	989,898 30
Other Assets	402,996 00
Cash on hand and in Banks	290,099 62
	$29,074,599 00

LIABILITIES

Reserve Fund Company's Standard (Hm 3% and 3½%)	$26,408,650 00
Death Claims in Course of Settlement, and Instalment Fund	237,445 23
Dividends to Policyholders in course of Payment	16,126 80
Reserve for Policies which may be revived	33,670 00
Other Liabilities	2,280 98
Total Surplus on Policyholders' Account, Company's Standard	2,376,425 99
	$29,074,599 00

RECEIPTS

Premium and Annuity Income	$3,093,644 22	
Less Re-Assurance Premiums	50,466 07	
		$ 3,043,178 15
Interest		1,204,851 50
Profit on Sales of Securities, etc.		52,361 63
		$ 4,300,391 28

PAYMENTS

Death Claims (net)	$ 1,221,815 60
Matured Endowments (net)	218,857 00
Dividends paid Policyholders (including Bonus Addition paid with Death Claims and with Matured Endowments)	207,781 12
Surrender Values paid Policyholders	76,500 95
Paid Annuitants	23,597 01
Total paid to Policyholders	**$1,748,551 68**
Commission, Salaries, etc.	681,292 71
All other expenses including Taxes, etc	240,307 55
Stock Dividends	79,819 25
Excess of Receipts over Payments	1,550,420 09
	$ 4,300,391 28

Net Surplus over all Liabilities (Company's Standard)..............$1,376,000

Net Surplus over all Liabilities (Government Standard)..............$4,326,000

GAINS IN 1904

	1904	1903	Increase
Number of applications received	7,221	6,863	358
Amount of Assurances applied for	$ 14,571,153	$13,881,960	$ 689,193
Policies issued	13,043,503	12,635,032	408,471
Policies paid for	11,211,721	10,122,139	1,089,582
Total business in force	101,805,944	95,531,110	6,274,834

The new business paid for in 1904 was greater in amount than that of any previous year in the Company's history.

A full report of the annual meeting will appear in the Company's paper, "Life Echoes."

SPRING MILLINERY OPENINGS.

The wholesale spring millinery openings in both Toronto and Montreal have been favored this year with delightful weather, following closely, however, on scenes of excessive wintriness, and the crowds of milliners present in these cities from all parts of the Dominion have been, it would appear, larger than ever. So far as can be judged from the expressions of opinion heard among the visitors they are fully satisfied with what has been provided for them in the way of headgear for the coming season.

It is seldom that the style of hats exhibited shows such a complete change from the previous season as is the case to-day. This applies to almost every feature—shape, color, size and trimmings. There is a tendency towards flat tops and small round crowns, while the massing of the trimming towards the back gives a sort of tilted appearance to many hats,—not 'tip-tilted' as the poet says, but back-tilted. All sorts of colors are shown, but there is a distinct moving away from black. Greens, particularly bronze and olive, are in particular favor. White, pink, and blue are also the characteristic note in several color designs, but the most distinctive feature of all is the "pastel," or delicate shading off from one color into another. This is to be seen at its best in some of the floral ornaments, which this season are particularly beautiful. Ribbons also partake quite largely of this characteristic, among those particularly noticeable being some in shot moire and metallic effects. Some ribbons we noted with wonder, (almost with emotion), were a blend of pale green toning down to tangerine, while others showed all the tints of an opal.

While other ornaments are not by any means to be neglected, this year is to be above all a flower and foliage season in millinery. Of this there can be no doubt in face of the extraordinary variety of those offered, and the eagerness with which milliners have been buying in those lines. Roses are among the most popular flowers. Clusters of all hues and sizes of roses, as well as set-pieces of small button flowers, a back-ground of glossy green leaves, especially quill-shaped are particularly effective.

Another feature which draws attention is the amount of tulle, which is used in every conceivable way, often combined with crinoline braids. Much of it is in "burnt-onion," which is prominent among the pastel shades this year. It is also to be noted that aigrettes are scarcely so largely shown as they were, perhaps due to the agitation against such ornaments in the United States and elsewhere. Laces are in about normal request, and some very distinguished looking models shown are almost entirely in that material.

⁂

COAL IN NOVA SCOTIA.

The Mines Department of the Nova Scotia Government can never be justly accused of making undue haste in sending out its annual report. In fact it cannot be credited with ordinary diligence in this matter; and when the information does appear, it is scanty and but ill-arranged. The report of the Ontario Bureau of Mines is a creditable production, full of useful, detailed information regarding mining conditions as well as metallurgical processes in use. The Provincial Mineralogist of British Columbia issues annually a most interesting report, well edited and beautifully illustrated. The Government of Nova Scotia draws an enormous revenue from its royalties on minerals, and gives as little as it possibly can in return in the way of assistance to prospecting and developing, or even in the provision of increased facilities for getting the mineral products to market. Considering how highly favored by nature the province has been, the authorities ought not to be niggardly in making public matters of real importance.

From local papers, having no doubt access to official figures, we gather that the total shipment of Nova Scotia coal for 1904 was 4,622,823 tons, a decrease of 27,890 tons from the previous year.

The total out-put of the Dominion Coal Company last year was 3,023,522 tons, a decrease of nearly 100,000 tons as compared with 1903. The Nova Scotia Steel and Coal Company, operating the old Sydney Mines, in Cape Breton, and the Marsh Mine, in Pictou County, shipped a total of 496,751 tons, an increase of 44,768 tons, while the Cumberland Railway and Coal Company's shipments showed a decrease of 1,858 tons.

The shipments of the Acadia Coal Company fell off to 255,133 tons, a decrease of 82,100 tons. This may be accounted for by the developing operations now on hand at this property, which are of an extensive and important character. Two vertical pits are being sunk, which have already reached a depth of over 600 feet. These will make available the thick seams of high grade coal, which have been partially worked from other points. It is expected that coal will be hoisted from these pits before the end of the current year.

The Intercolonial Coal Company, which is a progressive and well-managed enterprise, increased its shipments 10,088 tons, bringing the total for the year up to 242,144 tons.

Cumberland County from its several collieries shipped 567,053 tons. The abolition of the duty upon coal going into the United States does not appear to have benefited these collieries, although their shipping ports must be fully 300 miles nearer the New England markets than those of Pictou and Cape Breton. Fires and strikes have of recent years retarded the expansion of Cumberland County's coal trade. The strikes have been effective, as the average wages of coal-cutters at Springhill for the past year was $2.98 per day, and for the month of December $3.06. Apparently the miners have taken the bit in their teeth, and are having their own way. During the last strike at Springhill, the manager in defence of the company stated that the miners in certain easy places were earning from $5 to $6 per day. This is a confession of his own weakness, or incapacity.

Likewise it is very questionable whether the three years' agreement entered into by the Dominion Coal Company with its employees is creditable to the management, or likely to be satisfactory. Under its operation the company cannot expect to be able to compete in open market, either in New England or Ontario with the cheaply mined coals of the Eastern or Northwestern coal fields of the United States.

The Dominion Coal Company's net earnings were $135,548 less in 1904 than in the year preceding. The large floating debt of the company was reduced by $469,118, and the report states that the balance will be shortly consolidated. The most business-like way would be to reduce the enormous capital to something like the actual cash paid in, and raise the required money from shareholders.

The Port Hood Company on an output of 62,335 tons, showed a loss of $60,062, which is not encouraging. The Inverness Railway & Coal Company tried the experiment of sending coal to Port Arthur and bringing back iron ore to the Nova Scotia furnaces, but evidently the result was unsatisfactory, and the trade will not be attempted again this season.

This question of coal affects Ontario above all other provinces, because it is the only one which is forced to pay the duty on imported coal. To this feature of the coal trade we propose shortly to return.

THE PROPOSED NEW PROVINCES.

The bill to create new provinces in our North-West is now before the House of Commons, and there does not seem to be agreement in the Territories as to the intended boundaries. Nor will Manitoba be satisfied without an extension of her territory, which will give her a port on Hudson Bay. Worth contending for, as these things seem to the dweller in our North-West, there is a matter exceeding them in importance. This is the proposed planting of denominational schools in the provinces to be constituted. It seemed curious, when we remembered the attitude of the Premier and Hon. Mr. Sifton on this question in former years, that they should now favor this retrograde and ill-advised step. But since the news of Mr. Sifton's resignation from the Cabinet, made known on Wednesday, we now see that he cannot stomach the measure. From persons at several points in Assiniboia we learn that any desire which might have existed in favor of separate schools in that territory has about died out in recent years. But the measure now proposed would have the effect of fanning it into life again. The Government cannot afford to disregard the wishes of the people who are to be made citizens of new provinces. And we believe that their wishes are fairly expressed by the territorial premier, Hon. Mr. Haultain, who said a week ago:—

> "The principle involved is one of public rights. We asked to be made a Province, with the powers of a Province. We did not ask to be a Province with a large number of restrictions involved in our constitutional act. This may be described as only sentiment, but I consider it is more than sentiment. And, while Sir Wilfrid Laurier dwelt largely on the conditions in Ontario and Quebec, there is no analogy. Upper and Lower Canada voluntarily agreed to the confederation compact, subject to the special condition about separate schools. There is a vast difference between Upper and Lower Canada going voluntarily into confederation with certain conditions attached, and our being created into a Province with those conditions attached."

The bill now before Parliament bears marks of haste, and is by no means a finished production. If it is the intention of the Cabinet to "try it on," for some political purpose, they should be warned by the protests which have already been expressed. However much their proposals may please those who cling to separate schools and wish to impose them on our new and growing West, these proposals do not satisfy the people most concerned. We have strong hopes that the autonomy measure will not be forced on the House in its present form.

* * *

STATISTICS ABOUT THE WEST.

We find in some recent blue books figures concerning the grain-growing districts of the West of Canada which will interest our readers. For example, by the last report of the Department of Trade and Commerce we learn that the total number of cars of wheat inspected at Winnipeg in 1903 was 38,473, containing 40,396,650 bushels. In 1902, the figures were 51,833 cars and 51,833,000 bushels, and in 1900, 14,886 cars and only 12,355,380 bushels. Of oats, the number of cars was 1,129, containing 1,693,500 bushels in 1903, 2,036 cars with 3,056,000 bushels in 1902, and 448 cars with 537,000 bushels in 1900. The contrast of these figures help to show the preponderance of wheat in our western grain-growing district.

The number of grain elevators in operation in the western grain inspection division of Canada is given as follows; public country elevators 912, ditto warehouses 64, with a capacity for both of 27,214,000 bushels; terminal elevators 6, with a capacity of 13,972,000 bushels. It requires a little thought to grasp these hundreds of depots and millions of contents.

A statement of the number and total capacity in bushels of Canadian and United States vessels carrying grain from Fort William and Port Arthur during the season of navigation last year makes known that there were 38 Canadian with a capacity of 3,260,000, and 16 American, with a capacity of 2,815,000 bushels.

The revenue accruing to the Dominion Government from the inspection of staples for the year ending June 30th, 1904, was as follows: Toronto, $3,111; Montreal, $4,599; Manitoba division, $53,157.

* * *

THE BOND MARKET.

A feature in Canadian finances during the last few months has been the rapid development of the bond market. Perhaps this was partially due to the comparative dullness of that market during the year or two immediately preceding which caused an accumulation of such issues so far as their assimilation by the general public was concerned. Leaving this out of consideration, however, there can be no doubt that the business has lately received quite a fillip, and perhaps this is due in some measure to a recognition of the greater safety of municipal and other bonds, compared with, the more speculative industrial stocks.

In the past, British investors have taken the bulk of Canadian securities of the former description, but latterly Great Britain has been a poor market owing to the effect on money rates of the Boer War and other causes. One result has been that Canadian bonds have received more than ordinary attention from home investors and from those of the United States. A recent estimate of the amount of Canadian municipal bonds sold during 1904 places it at nearly $14,000,000, while corporation bonds sold to the amount of something over $17,000,000, and provincial bonds $4,000,000 odd. Besides this, only the other day came the report from London of the satisfactory taking up by Speyer & Co., of the issue of $14,000,000 of Grand Trunk Pacific. This makes in all about $50,000,000.

Of this sum it is calculated that Canadian investors took $24,000,000, English investors $2,584,000, and United States investors $8,354,000, besides the aforesaid Grand Trunk Pacific bonds still held by Speyer & Co. The third class, namely, United States investments in Canadian securities, is a somewhat new development. People in the United States, incited perhaps by the recent reign of cheap money in their own country have been induced to look more and more abroad, especially to this country in which such a rapid development is taking place. This feature is one which is likely to have more and more effect as time goes on.

More prominent still, however, as we intimated above, is the increasing tendency on the part of home investors to interest themselves in bond issues, and this tendency is likely to have increasing scope during the next few years. In reference to the possible development of the market for Canadian bonds, it is interesting to note what Mr. Buron, of the Manitoba bar, has to say about the possibilities of France. He thinks they are good, but suggests the advisability, in order to put Canadian securities rapidly in a high place in the minds of French investors, of reducing their denomination, say from thousands to hundreds. The thrifty Frenchman who, while he possesses savings, usually has them in small amounts, and is very fond of placing these in securities guaranteed by the Government. The French also like securities which are easily transferable. That is to say, Canadian securities, in order to become favorites on the French market, should be free, in the matter of exchange from person to person from the necessity for formal registration. This plan has already been adopted to some extent in Canada, and is worthy of consideration for adoption on a larger scale.

* * *

TRADE WITH FRANCE.

There is to be another steamship service between France and Canada—we had nearly written "a new steamship service," but would rather not, for whatever is new about it the steamships are not. When one reads the names of the steamers, the Laurentian, (formerly the "Rolling Polly"), the Sardinian, the Pomeranian and the Buenos Ayrean, he recognizes boats of the vintage of the sixties and seventies. They *must* make ten miles an hour, the contract says, and the ships may land at Havre or Cherbourg, which they please.

Three years is the term of the contract, which is, for eighteen round voyages, $100,000; for twenty-four round voyages, $133,333. Montreal or Quebec will be the Canadian port during the season of St. Lawrence navigation, and Halifax or St. John when the season is closed. The ships are to be fitted with cold storage, and "no discrimination will be allowed in freight rates against Canadian merchants and shippers, who are always to have preference."

Subsidizing boats to promote trade with France has been the order of the day at Ottawa for many years, but the trade is slow in coming. For twenty years it remained at an aggregate of two to three millions per annum, mostly imports, and in 1895 was $2,920,000. Since then the total trade has gone up to five, six, and nearly eight millions, that of 1904 having been $7,804,000, of which $6,206,525 was imports into Canada. What these imports were, the Trade and Navigation returns show: $5,142,736 worth being dutiable and $1,146,626 free of duty. Exports amounted in value last year to $1,597,928. We have taken the trouble to compile a table of the principal items of both, and their value:—

Principal Imports.

Woolen goods	$838,287
Silk fabrics	616,631
Fancy goods	166,270
Kid gloves	280,980
Ribbons	192,000
Brandy	487,875
Champagne	216,969
Other wines and spirits	217,359
Fur skins	109,947
Laces	178,247
Fruits and nuts	166,962
Tobacco pipes	111,955
Hides and skins	395,053
Wool	217,335
Cream of tartar	145,060

Principal Exports.

Canned lobsters	$507,084
Pease	144,951
Spruce wood	190,828
Field Implements	298,844
Apples	57,572
Asbestos	53,412
Undressed furs	79,792
Clover seed	20,779
Bicycles	10,743
Coal and other mineral	10,036
Square ash and elm	12,200

Further items of import were brushes, buttons, earthen and china ware, linen goods, cotton fabrics, jewellery, books and photographs, hats and bonnets, glass and glassware, drugs and dyes.

The other merchandise sent to France from Canada consisted of dried apples, canned or preserved fruits, drugs and chemicals, whiskey, wood-pulp, machinery and castings, dressed furs.

We do not know in what particular direction trade is expected to be fostered by this line of slow steamers. It is hardly likely to be in the way of exports, for twenty-four years has been needed to double our exports to France in 1880, which were $812,000. As to aggregate trade, both Belgium and Germany have made greater relative progress in trade with Canada in the last six years than has France. Of course, Germany's trade fell off last year from the $13,000,000 and $14,000,000 of previous years to $9,994,827; but Belgium has done a trade with us, inward and outward, of four, five and six millions a year since 1900. Our exports to her have been double what they were to France, while our purchases from her have averaged $2,425,000 per annum for the last eight years.

* * *

LOSS OF LIFE BY FIRE.

It is astonishing how little heed the average man pays to losses of property by fire in so far as they do not affect himself. Numbers of persons, for example, are impressed by the enormous figures of the fire-waste at large on this continent, but so long as the Fire Fiend does not breathe his hot breath over Smith's dwelling, or Brown's factory, or Jones' office, neither Smith, Brown, nor Jones seems to think that he has any particular concern in the matter. Many a time we have heard persons say, "What devastation fire is making in the States: $150,000,000 worth burned in a year! Thirteen millions in a month! More than three millions a week! It is dreadful." But these staring facts rarely lead the speaker to look over the fire-risk of his own premises—unless he is a manufacturer—or to see whether the fire tank of his village or the steam fire engine of his town are in constant order.

Would it cause people, we wonder, to take any more personal interest in the ravages of fire if we gave a list of deaths caused by fire or a comparison of the fire-loss of life (instead of the fire loss of property) with deaths otherwise caused? Here are some United States census figures which ought to make any one think. In the year 1900 there were more persons burned to death than drowned—more persons burned to death than died from scarlet fever—more persons burned to death than small-pox killed. And these three that we have named are generally considered fruitful causes of death. The comparative list stands thus:—

Persons burned to death	6,772
" drowned	5,387
" died from scarlet fever	6,333
" " " rheumatism	5,067
" " " small-pox	3,484
" " in railway accidents	6,930

This list of death losses by fire, embracing more than five hundred per month, ought to startle a community if the loss by fire of $13,000,000 per month does not appear to disturb. "The Fire Proof Magazine," which gives this total of 6,772 deaths from fire in one year, says that the proportion of life loss averages, during the period, about evenly, a little under 9 per 100,000, but showing an increase from 5.5 in 1890 to that of 8.8 in 1900 per 100,000 of population. The figures for the following states and cities respectively are given: In Illinois, 315; in Chicago, 136, or 43 per cent. of the total. Indiana, 173; Indianapolis, 14 of the total. Michigan, 161; Detroit, 25 of the total. Minnesota, 100; Minneapolis, 14 of the total. St. Louis, 71; New Jersey, 188; New York State, 561; of which the city of New York contributed 342. Ohio, 289; Cleveland, 39; Cincinnati, 20; Pennsylvania, 641; Philadelphia, 142, and Pittsburg, 49; Virginia, 271; Iowa, 91; Wisconsin, 123; of which Milwaukee's quota was 25.

A statistician of humanitarian turn of mind could tell us, from estimates of the relative value of individuals to a community, how much such a holocaust of human life has cost the United States. But this is a low standard by which to measure waste of the ruin of plans and hopes of human skill and effort. The anguish of bereavement; the poverty and suffering caused by bread-winners' loss; the cessation of valuable labor in many fields gracious and benign—these are better standards of loss than dollars and cents when thinking of six or seven thousand persons needlessly burned to death.

* * *

ANCIENT ORDER UNITED WORKMEN.

The February number of "The Canadian Workman," published monthly at Orillia, criticizes some few things in our recent allusion to the inadequacy of the rates charged by the society it represents. In doing so the editor does not do himself justice in descanting sharply upon a thing of so little consequence as an error about the length of time since the Order seceded from the parent body in the States. We said, in passing, that it was about twenty years ago, whereas "about ten years ago" would have been chronologically more exact, for it was actually a little less than that long ago that the Society cut loose from outside help or interference. For want of better argument our critic wishes to make his readers think our whole effort to help him get his rates changed to a safer scale, was as wide of the mark as the "about twenty years," and therefore of no value! How much better for him to have quoted something useful from the article, and overlooked what might well have been let pass as a mere slip of the pen, as indeed it was, and not of any consequence whatever.

That there is to be an abandonment of the rates which the "Workman" has so long and zealously defended, by scissors and pen, is now openly avowed by the editor of that journal. He intimates not only that the rates will be raised at the next session of the Grand Lodge, but that they will go up with a snap. Our reasonable suggestion that the members should have a breathing spell until January, 1906, is treated with scorn. And when the old rags are thrown aside, why then, terrible to relate, the "old line companies" are to get it in the neck, as it were. They will have to look out for big things. Their "crocodile tears," it is declared, will avail them little, for "our representatives [in the Grand Lodge] will do the right thing on the rate question, and then the old-liners may look out for marked prosperity of our Order in every part of Ontario." Brave words, truly. "With a re-adjusted rate our great Order will grow as never before." Perhaps it will. It is a good thing to be hopeful. Sometimes, however, it is found of more account to look at the man who lays off his armor, than to be carried away by the mere vaporings of him who hast not yet put it on, and has not given its merits a trial. Certainly, ye editor of the "Workman" has to admit that his "carefully-devised, well-guarded, economical and beneficial system" has practically broken down. But he is all wrong in seeking to derive comfort from the recent slight increase of rates made by the regular companies. The two things have no relation to each other. The cause of the abandonment of their old rates of assessment by the fraternal societies is the natural increase of death losses as their members grow older. But the old-liners have met with no difficulty of that sort, since they make a provision for this increase in every premium they collect. They continue their old rates for their old members. Since the cheapening of money, however, and consequent low rates of interest now obtainable upon investments, the Insurance Superintendent of Canada and the commissioners of the States now require a higher reserve fund to be maintained upon all new policies than the former 4 per cent. rate of interest would produce. Many companies are now laying aside, for their members, a sum each year that will provide for expected death-claims even if no more than 3 per cent. interest should be earned upon the reserve fund, in the long, unknown future.

Concerning our suggestion that whatever rates are adopted by the Grand Lodge A.O.U.W., they should apply to the attained or present ages of the old members, and not to the ages at which they entered, perhaps twenty years ago, the "Canadian Workman" expresses no opinion. This question is a most vital one.

Suppose the whole Order, or any considerable portion of it, were applying to a regular life company to-morrow, for insurance, man by man. It is well known that no company would dare to take them in without the same careful medical examination as is given in the case of every new applicant, and that many of the older members, on account of unfavorable family history, or personal unfitness, would be declined. And those who did prove successful would have to pay premiums on their present ages, as a matter of course. Therefore, it can be seen at a glance how dangerous a step it would be to take over the old members upon any sort of a new scale such as Hunter's Minimum, which is intended for only healthy lives, and is based upon the ages attained.

But that foolish step appears to be just what the leaders of the A.O.U.W. contemplate taking. In the last "Workman" a correspondent places four different scales in contrast, all of them far and away below sufficient to prevent another early change of rate. Here is a specimen of what they produce per $1,000 if the party lives and pays until 70 years of age from:—

Age at Entry.	24	35	44
By old rates	$397	$412	$390
" Hanes' rates	420	420	421
" Hunter's rates	563	600	627
" Meredith rates	513	605	677
Average of all	$473	$509	$529

It should be very easy to see, from these figures, that the editor of the "Workman" is right in protesting that they are all of them wholly inadequate. He very properly shows that to make such rates produce even $500 at 70 years of age "would require every member to live to be 70 years old." "The fallacy," he points out, "is that no provision is made for the deaths of members who die before paying one-fifth or one-tenth of the sum figured out."

Brave words these, to appear in a fraternal society paper; but they are true to a demonstration. Therefore, the conclusion is irresistible, that to avoid further rate tinkering, something more than double the rates proposed by Mr. W. W. Hanes, of 358 Queen St. West, in this city, will be needed, unless large help is to be had from assessing members very heavily after they reach age 70.

Some idea of what is needed to be in hand, as a reserve fund, at age 70, even when a net single premium is deposited, earning 4 per cent. interest from date of entry until death, may be learned from the following figures, relating to $1,000 payable at death:—

	Single Premiums.
Entering at age 24	$271.50
" " " 35	333.27
" " " 44	418.52
" " " 55	539.31
" " " 65	660.17
" " " 70	718.57

Therefore even if the rates in the "Workman" would pay the mere death calls up to 70 years of age—which they would not do—where is the $718.57 to come from to provide the $1,000 at death for the families of those who have attained that age? Suppose a whole society were to arrive at 70 years of age, and desired the Government to take them over and pay $1,000 at the death of each, that sum of $718.57 is the exact amount the Government must get, in cold cash, with which to provide for each $1,000 to be paid at their death. And of course, something over that sum is needed to provide for the expense of doing the business.

The great difference it would make to some members, whether the age at entry or the present age is used for the new rates, is illustrated by taking a few of the cases among the 40 whose deaths are assessed for in the last issue of the "Workman." Quite a number of them had been 16, 18 and 23, and one 24 years in the Order. By the Hunter rate, a person rated on age 20 would pay $10.80, and if rated upon his present age of 44 would pay $24.12, or more than three times what he has been paying, for the old rate, at age 20, was only $7.20 per year. The Grand Lodge will certainly have some difficult problems to study when it opens up for business in Toronto some two weeks hence, in the matter of treating old members and new ones with any sort of equity in the new arrangement. And this cannot fail to be the case, whether former ages or present ages are adopted as the future foundation on which to build.

* * *

MUNICIPAL TRADING.

The idea of municipal trading and even manufacturing is beginning to take hold of a good many minds in Canada. Not only do such people favor the management of public utilities such as supplying water and light—in many cases proper and desirable—but they propose to do many things under municipal management which cannot be done as well as by private hands. Public ownership may be carried too far, indeed is being carried too far, and the result is waste of effort and loss of public money. It would not be difficult to show how money and time have been lost in Canada by such ill-advised enterprise. But perhaps a reference to other countries may have more weight with men who are captivated by the idea of public ownership without having given the matter serious attention.

Reference has been made from time to time in our English letter to such imprudent enterprises ventured upon by British municipal bodies as municipal fire insurance—of which a flagrant illustration took place in a suburb of London last year, costnig the municipality a pretty penny and rudely knocking the idea out of their heads. And our Australian correspondent has repeatedly shown the absurd lengths to which socialistic ideas are carrying the authorities out there. A correspondent in to-day's issue gives some arguments drawn from English experience of the dangerous length to which the practice of public ownership is being carried. What Mr. Noble tells us of the condition of Preston in Lancashire, and the citations he makes as to the taking of money on deposit from citizens by the Islington borough council and paying more interest for it than the banks can afford to pay, are striking instances of the perilous tendency of such ill-considered proceedings.

* * *

REFORESTATION IN NOVA SCOTIA.

Attorney-General Longley, in reviewing the work of the Crown Lands Department in the Nova Scotia House of Assembly the other day, announced a surplus of $13,000 on the operations of the past year. He recited the benefits which had been derived from the work of the forest rangers in that province, who were appointed last year, and thought it better to preserve carefully the timber wealth we have than to attempt any policy of reforestation. Fire has been very destructive in the forests of Nova Scotia in the past, but it is hoped this danger will be much reduced by the work and care of the rangers. The speaker urged as worthy of consideration the matter of creating natural parks or reservations at the headwaters of the important rivers, under the protection of the rangers, where the natural life of the forest could be preserved. The views of Attorney-General Longley as to the impracticability of reforestation in that province are opposed, we are told, to the views of many who consider there is a very urgent need for such a movement.

* * *

—As an illustration of the impression made by the method of tabulation in the Trade and Navigation returns of Canadian products or manufactures exported, we have a letter from a prominent banker in Peterboro, who thus refers to an entry in the series of articles we have published recently under the heading, "Records of Canadian Exports." "Referring to page 1,126 of the Monetary Times, February 24th, I wonder where the figures are taken from which show the exports from Peterboro for the fiscal year 1904, to be nil. One of my customers, the Geo. Matthew Co., shipped over $1,000,000 of bacon, etc., from this branch alone." If our correspondent had asked this question of the Department of Trade and Commerce he would have been told to look under a lake or river port, say Port Hope, or Kingston, or Montreal, possibly all three—an answer which is not at all likely to satisfy a Peterboro man.

* * *

WEST INDIA TRADE.

The Board of Trade report on the West India trade at Halifax says that the volume of our export trade in fish stuffs last year has been somewhat less than in 1903. In the early part of the year there was no visible falling off, as shipments were drawn principally from stocks held over from 1903, but later on a considerable decline came. Prices were high and pretty steadily maintained, and dealers made a good profit. The same thing may be said of the present season, and it is expected that both fishermen and fish exporters will have a very satisfactory year. High prices have, of course, curtailed consumption to a considerable extent, but there always seems to be a demand. Shipments of other products to the West Indies show a satisfactory progress, particularly flour. Exports of flour from this port have increased very rapidly lately, and the prejudice which formerly existed there against Canadian flour seems to have been overcome.

Regarding imports from the West Indies, the principal items are, of course, sugar and molasses. Importations of the latter show a falling off in 1904, the figures being 12,800 puncheons, 1,100 tierces, and 2,750 barrels. Stocks on hand at the commencement of the year were pretty large. In sugar, however, there was a satisfactory increase, the total quantity landed here being about 48,000 tons, practically all of which was of British production.

* * *

RETIREMENT OF MR. GOOCH.

After a connection of forty years with the North British and Mercantile Insurance Company as their chief agent in Toronto, Mr. R. N. Gooch has, at his own request, been relieved of the responsibilities of that post. He vacates the agency on 1st March current, and is succeeded by Evans & Gooch. The members of this firm are Mr. H. W. Evans, who has been with Mr. Gooch since he was a youth, and who has for some years been his partner, and Mr. F. H. Gooch, who is Mr. R. N. Gooch's son.

It is interesting to learn from the elder Gooch something of the conditions of fire insurance agency when he took hold. Coming to Toronto in 1853, Mr. Gooch had his first insurance training in the office of the Montreal Fire and Marine Company, which did a large business, especially in marine. This company went out of business about 1865, and its business was taken over by the North British and Mercantile, with Mr. Gooch as its agent. Its office was in the Bank of British North America building on Wellington Street.

Chatting with Mr. Gooch, the Monetary Times man asked some questions about the development of the fire insurance business concurrently with the growth of Toronto. That gentleman replied: "Yes; those were days of small things. At that time $15,000 to $18,000 was considered a good year's premiums for a company, but to-day it is many times that. The Royal was a prominent office in those days, under Frank Heward, and Canadian companies were few. I built the office-building that used to stand on this site," he said, "and sold it to the company in 1873. They rebuilt it in 1901, and made the improvements, outside and inside, that you see."

OUR SAINT JOHN LETTER.

A project that looms large—much larger in all probability than it will when actually in working order—is that for the utilization of the water power at Grand Falls. On many different occasions there have been reports that this valuable privilege, probably the best in Canada with the exception of Niagara, was to be utilized, but nothing tangible ever came of the reports. Now a syndicate of United States capitalists, including Barton E. Kingman, of New York, and Frederic Sayles, of Providence, have placed in the hands of the Provincial Government the sum of $20,000 as a guarantee of good faith, and declare their intention to spend between $3,000,000 and $4,000,000 in carrying out their plans. It is said there can be developed between forty and fifty thousand horse-power in the dryest season. Of course, the water will be used to generate electricity, and this, in turn, is to operate a big plant for the manufacture of ferro-manganese from bog ores, which have been found in enormous quantities in several counties in the Province. There is also talk of pulp, paper and saw mills; the transmission of electricity for power and lighting to places for many miles around. There is also talk of operating by electricity from this plant the new International Railway now being built from Campbellton, on the Bay Chaleur, to the international boundary, near Grand Falls. It is expected that some legislation in connection with the new enterprise will be put through at the coming session of the Legislature, and that construction work will be commenced during the present summer. The money held by the Government will be forfeited if the company fails to carry out its obligations, but the country has not yet learned what the terms are.

The snow blockade on the different railroads throughout the Maritime Provinces during the present winter has occasioned great loss to the wholesale merchants. All the smaller places have been cut off from outside connection, and it has been impossible for travellers to reach them, or for merchants to get their goods to them. Many a dealer in the outlying sections has countermanded orders given, and the trade that has been lost will never be regained. The country merchants don't want goods, because it is practically impossible for people living in the country to leave their farms and travel, so blocked are the roads. Even in the city of St. John the snow has occasioned great expense. Many thousands of dollars have been expended by the city corporation and street railway in cleaning snow from the streets, and still there are many sections in which the banks along the roadway are higher than a man's head.

A number of St. John merchants have been done by an American giving the name of Victor Lloyd, who secured advertisements for an illustrated booklet he promised to print and distribute. By means of the proof sheets he managed to collect nearly all the accounts and skipped, leaving his book in the printer's hands, and the printer unpaid. Lloyd and his wife also ran a number of bills for jewellery, wearing apparel, etc. As far as can be learned they made a pretty good sum during their brief stay here.

Messrs. Phillips Bros., boot and shoe dealers, on Main Street, St. John, have decided to remove to the United States, and have sold their business to James N. Russell, who is already carrying on an extensive business on Main Street.

Frank White, who conducts the largest restaurant, confectionery and ice cream business in St. John is preparing to add to his premises by taking in the upper floors of the building adjoining his present stand. This will enable him to about double the capacity of his dining-room.

Mr. Matthew Leggat, of Hamilton, President of the Landed Banking and Loan Company.

Mr. C. W. Cartwright, Treasurer of the Landed Banking and Loan Company.

During the storm on Sunday three big scows broke adrift from Gregory's Pond and went to sea. All were lost. One of these was loaded with coal for the Cushing pulp mill, and it is believed to have sunk.

Messrs. Emerson & Fisher, who have just built a fine big store on Germain Street, have put their business into a joint stock company, with a capital stock of $150,000. One of the firm's trusted employees, F. R. Murray, becomes a partner.

W. H. Brown and A. L. Brown, of Massachusetts; T. W. Barnes and W. J. Brown, Hampton, and Geo. C. Weldon, St. John, are seeking incorporation as the Canada Woodenware Company, with a capital of $24,000. They intend going into business at Hampton, in King's County.

Messrs. D. C. Clinch, R. W. W. Frink, Chas. W. Brannen, Thos. A. Linton, and Hon. H. A. McKeown are asking for incorporation as "The Mowry Safety Nut Company," to purchase, sell and manufacture nuts and bolts. The capital is $250,000, and it is intended to build a factory in St. John. The company will manufacture the nut recently patented by a St. John man, a workman in the Portland rolling mills.

* * *

St. John, N.B., 28th Feb., 1905.

⁂

BRITISH AMERICA ASSURANCE COMPANY.

That fire insurance is a ticklish business, in its ups and downs, the surprises welcome and unwelcome for its management, has been often enough demonstrated. The company whose name heads this paragraph, has had experiences favorand unfavorable in its seventy odd years of existence, and should by this time have "a heart for any fate." Just about a year ago, its directors were congratulating themselves upon a favorable twelvemonth in 1903 and the addition of $128,000 to its reserve. Then came the Baltimore conflagration, which cost them $210,000, followed by the Toronto conflagration, costing $220,000; the payment of which sums quenches the satisfaction which they might otherwise have felt in recording in 1904, as they do, the largest premium income in the history of the company, namely, $2,602,000. The capital stands now at $850,000, and the reserve fund at $1,024,000. Total assets amount to $2,043,000. It is agreeable to learn that the latter eight months of last year yielded a rate of profit that goes far to make up the excessive fire losses of the first four. And the president thinks there is reasonable ground for hope that higher rates and improved conditions—he would naturally have liked to add "and an absence of conflagrations"—will this year place fire insurance on a more satisfactory footing and enure to the benefit of the British America.

⁂

QUEEN CITY FIRE INSURANCE COMPANY.

This company, which has had an active and steady career of thirty odd years, is to-day in a position which shows what results can be achieved by a consistent adherence to principles of sound underwriting. In the face of a disaster such as the conflagration of 1904 in Toronto, in which city a large share of its business was done, the company still shows a good surplus. Its losses by that untoward event were $103,400. But after paying these losses and its usual dividend, the Queen City Company still has $24,400 of reserve, and has $41,900 at the credit of profit and loss account. All that the original stockholders have ever been called upon to pay was the original $10,000 paid stock, all the additions to which having been accumulated out of profits. An evidence of careful underwriting is found in the fact that the company's ordinary losses last year—aside from the great Toronto fire—were only $17,300. The premium income shows a large increase over the previous year.

⁂

MILLERS AND MANUFACTURERS INSURANCE CO.

An increased number of policies in force and an increased aggregate at risk is shown by this company. The increase in premium income is also marked. While the ordinary fire losses were less in 1904 than in 1903, the Toronto conflagration of April last cost the company $70,000. By the payment of these and the necessary expenses an inroad of $50,000 was made upon the assets. This does not appear to have in the least dismayed either directors or policyholders: having had a bad year, they made the most of it. The former were re-elected: Mr. Goldie is president, and Mr. Spink, vice-president.

⁂

DOMINION LIFE ASSURANCE COMPANY.

The resume of its 1904 business, submitted to us by the Dominion Life Assurance Company, does not give all the particulars with which to make comparison with former years. But in what it does give the result is very satisfactory, for it shows an increase of income, of assets, and of surplus. What is still more to the purpose, a better earning power of interest-bearing assets than in the previous year is shown. Nothing is said this year about lessened mortality, nor about the advantage demonstrated of the abstaining policyholders over ordinary people. But this is natural enough, for it could not be expected that every year would show as well as last year in low mortality. This company is carefully managed, conducted at a low expense, pays good profits to its policyholders, and has earned a good dividend for its shareholders.

⁂

AGRICULTURAL SAVINGS AND LOAN COMPANY.

The business of 1904, as exhibited in this company's financial statement, was in all respects very much like that of the preceding year, both in its character and its results. Indeed, it is rather better than 1904, for the net earnings were somewhat greater and a larger sum was added to reserve, which is now built up to $250,000. We observe that the president told the meeting that the earnings were last year the largest in the history of the company. There is a decided reduction in deposits, a change which is very possibly welcomed by the management. The reduction is only in part made up for by slight accretions to currency and sterling debentures. More than ninety-five per cent. of all the company's loans, it appears, are on farm and city property in the Province of Ontario. And the cash value of these mortgages is $2,358,000. The other assets consist of real estate, stocks, bonds and cash. It is plain from the figures given that the directors have some right to feel gratified at the business and position of the company.

⁂

BANKING AND FINANCIAL.

Word comes from Ottawa that Langdon & Sullivan, contractors for the new Canadian mint, have taken out a permit for the erection of a workshop, and intend to proceed with the erection of the building at an early date.

A change in the management of the Union Bank branch at Carberry, Manitoba, is announced for March 1st by the Express, of that town. R. M. Harrison, the manager in question, leaves the employ of the bank rather than go to Quebec, where it was proposed to send him. R. J. Gourley, of Souris, has been appointed to the vacant post, so the Express understands, and Mr. Harrison remains in Carberry to engage in other pursuits.

A recent compilation of the losses by embezzlement in the United States shows that their aggregate was considerably less in 1904 than in 1903. Of the ten classes into which they are subdivided, six show a decrease and four an increase. Insurance companies, banks and federal or state offices are the ones to suffer most, while firms and corporations exhibit the greatest lessening. The following table is compiled by the Fidelity and Casualty Company:

Embezzled from:	Increase.	Decrease.
Banks	$1,184,854	......
Benevolent societies and institutions	......	$ 37,379
Building and loan associations	......	12,635
Court trusts	......	344,633
Federal and State	289,688	......
Firms and corporations	......	1,343,891
Insurance companies	180,290	......
Municipal	......	321,650
Transportation companies	......	108,403
Miscellaneous	269,927	......
Totals	$1,924,759	$2,168,591

That was a hasty awakening and escape of Mr. A. F. Angus, manager of the Bank of Montreal branch at Regina, on Sunday morning last. The building, which was a substantial one, was erected in 1888. It took fire early in the morning, and the manager with his family escaped in their night clothes. The structure was practically destroyed, and the loss is put down at between $40,000 and $50,000, covered by insurance.

The Canadian Bank of Commerce has purchased the south-west corner of Carlton Street and Parliament Street, Toronto, with the two houses thereon, and will erect a branch on the site. The lot is 64 feet by 90 feet. The increasing business of the locality insures the success of a branch bank on this desirable corner.

The Bank of Nova Scotia branch in St. John has, so our correspondent in that city tells us, followed the lead set last year by the Bank of New Brunswick, and fitted up a dining-room, in which the clerks in the office are served free a midday meal. This will probably result in the other bank agencies in St. John adopting the same plan. Reports say that the Bank of New Brunswick has found it possible to serve the clerks with a good three-course dinner for the very modest sum of 13 cents a head per day.

A dispatch from New York says that Mr. Uchida, the Japanese Consul-General, received notice on Tuesday last that a domestic loan of 100,000,000 yen (about $49,000,000) was announced in Tokio. The bonds will bear 6 per cent. interest; are payable in seven years, and the issue price will be 90. For a loan to a nation, these terms are pretty heavy.

The Royal Trust Company, of Montreal, is empowered to act as trustee, guardian, etc., in Ontario. The order-in-council was passed in pursuance of a special Act put through the Legislature of the Province by the old Government two years ago. Under it the company was required to deposit $200,000 as security.

The Premier of New Brunswick, Hon. L. J. Tweedie, says his Government has just received the first coal royalties ever paid into the Provincial treasury. Although the coal seam is not a large one, the quality for steam purposes is superior, and it is expected that by 1906 the output would reach from three to four hundred tons a day. The annual revenue of the Province, Hon. Mr. Tweedie declares, reaches about $800,000, and $300,000 comes from the public lands. This source of revenue, he explained, would increase rather than diminish, as the forests were so well protected and the laws governing the cut so strictly enforced that the supply of timber would never be exhausted. Fire, he admitted, is the most dangerous enemy.

TORONTO INSURANCE INSTITUTE.

An instructive and interesting paper was read at the last meeting of the Insurance Institute of Toronto, 28th February, 1905, on "Advertising," by Mr. J. K. McMaster, advertising manager of the Canada Life Assurance Company. Mr. McMaster's paper is one of a series which is being written on the subjects of the Syllabus of Examinations of the Institute, previous papers of the series being "Building Construction," "Sprinkler Equipment," and "Analysis of Life Assurance Accounts."

Life assurance advertising, as Mr. McMaster pointed out, is becoming one of the regular departments of a well-organized life assurance company. It affords plenty of scope for originality, tact and skill, not only in connection with the matter of an advertisement, but also in connection with the setting up of an advertisement, the literature of a company and its publications. The paper will be read with much interest by young men in our life assurance companies who are debating as to what special department of work they will prepare themselves for; it will be found valuable to the agents in the field, for it contains important suggestions as to how most effectually to place literature with intending applicants; it will prove interesting to the advertising manager of every life assurance company, because it is replete with original suggestions; and it will be helpful to the life insurance manager as indicating how best to develop a literary and advertising department.

LIFE AND ACCIDENT HAPPENINGS.

Numbers of people seem to think that while life insurance is a good thing for other people it is not necessary for them. This is playing with chance, and discounting the future in a way no manly man should do. The Union Mutual puts the matter well when it says:

"The ordinary man is skating on an argument of the thinnest ice when he tries to make himself believe that life insurance, while essential for others, is unnecessary for him. His family will see the folly of such views some day if he never alters his attitude."

Judging from certain recent reports as to the position of plate-glass insurance in Germany, it would seem that the business of this branch is in anything but a flourishing condition. The reason is stated to be the ever-increasing price of glass. As is only to be expected, the rise in the price of glass has compelled most of the companies transacting this business to modify their tariffs accordingly.

On the 26th ult. there was a disastrous fire in New Orleans, La., involving a loss of something between $4,000,000 and $5,000,000. It raged along the water front, and wiped out the vast freight terminal of the Illinois Central, known as the Stuyvesant docks. Nearly a dozen squares of modern wharves, and freight sheds, two great grain elevators, hundreds of loads of cars, and vast quantities of freight, including 20,000 bales of cotton, were destroyed, together with a large number of small residences.

On Sunday last, says the Seaforth News, Rev. M. C. McLennan, paster of the Kippen and Hills Green Presbyterian charges, probably better known to residents of Huron as the Liberal candidate in South Huron in the recent Provincial contest, preached his farewell sermon to these congregations. He has accepted a position in the insurance business at $1,200 a year and expenses, and enters upon his work the 1st prox. at Owen Sound. There is abundant room in life insurance circles for advancement, and if Rev. McLennan can keep up the clip he set in the Provincial campaign it will not be many years before his feet are on the top round.

"Paderewski, the celebrated Polish pianist was once asked whether, in view of his complete mastery of the keys, he found it necessary to practise every day. With a smile he replied that if he left off practising for one day, the next time he played he would notice it; if he left off two days, his manager would notice it, and if he left off three days the public would notice it. Now, it is exactly the same with an agent's work. If he lets one day go by without producing its application, he will notice it himself; if he lets two days go by, his superintendent will begin to notice it, while if he lets three successive days go by, the home office will notice it. The only way to keep in perfect touch and tune is to do the regular drill every day."—Prudential Weekly Record.

ANSWERS TO ENQUIRERS.

H. McL.—Nonsense: that would be equivalent to saying, as the Irish secretary of committee did: "The monthly meetings will be held quarterly, instead of half-yearly, as before." Your association must not stultify itself by any such crab-like order of progress. There are some Ontario members, and certain other would-be members, who would go as far as Montreal if you gave them encouragement.

G. B., Peterboro.—Apply to the Ontario Department of Agriculture. They will have the figures.

Dalesman, Kingston.—The quantity of Portland cement imported into Canada last year (fiscal year ended with June) was 2,379,962 cwts., valued at $965,526. Of this, $178,217 worth came from Great Britain, $154,580 from Belgium, $98,435 from Germany, $22,934 from Japan, and $510,718 from the United States, and $640 worth from France.

ILLUSTRATED LECTURE ON CONFLAGRATIONS

We observe that the officers and members of the Insurance Institute of Toronto invite the general public to an open meeting to be held in St. George's Hall, on Monday, March 13th, at 7.45 p.m. The occasion will be an illustrated lecture by J. B. Laidlaw, Esq., entitled: "Lessons to be Learned from Conflagrations." In addition to a large number of stereopticon slides, a striking series of conflagration views will be shown by cinemetograph. The subject will be of interest and value to all business men and property-holders, as well as those more directly in insurance circles. Ladies will be welcome at this open meeting of the Institute. The occasion is one of unusual interest, and we hope to see a good audience present, for unquestionably we need arousing on the subject of the hazards of conflagration.

TORONTO STOCK TRANSACTIONS.

The volume of trading done on the Toronto Stock Exchange has been increasing lately, and prices have taken a somewhat firmer tone. In detail the transactions in the more important stocks during the week have been as follows: Bank of Montreal, 11 at 255; Toronto, 58 at 237; Commerce, 373 at 145-164⅝; Imperial, 30 at 239; Dominion, 345 at 250-251; Hamilton, 276 at 218¾-220¼; Traders, 291 at 139-140; Ottawa, 60 at 220; Consumers' Gas, 37 at 210; C.P.R., 5,361 at 137-140⅝; (new), 561 at 134-137⅜; Can. Gen. Electric, 465 at 174-175½; Toronto Railway, 30 at 104½-105; Sao Paulo, 2,837 at 116¼-119; Dominion Steel, 3,174 at 19¼-20¼; preferred, 143 at 70-70⅛; bonds, $14,000 at 84-84½; Dominion Coal, 3,984 at 67-67½; preferred, 10 at 116¼; Nova Scotia Steel, 2,517 at 63¾-67.

⁂

TRADE NOTES.

The organization of the Dominion textile trade is now completed. Mr. C. R. Whitehead retires from the board of directors, his place being taken by Mr. A. W. Allen, who represents the western interests, which were in opposition to the merger. Mr. A. B. Mole will act as chairman of the board of managers, which includes Messrs. C. R. and W. T. Whitehead.

The Canners' Association which, as we have before mentioned, is engaged in a fight with the vegetable growers of Niagara district respecting the price of tomatoes, now threatens to shut down three of its canneries near St. Catharines unless the farmers agree to sell their product for 25 cents per bushel as heretofore. The latter claim they can make as much money growing other varieties of vegetables.

One of the largest importers of eggs in Glasgow writes, drawing attention to the fact that many of the packing cases in which eggs are sent from Canada are altogether too frail for the work they have to do. He gives an instance of an importer who could not get them out of the hold without first putting them in cheese tubs. He also draws attention to the fact that Canadian are by no means the only eggs entering the British market, and that if a large trade is to be done, prices must be kept at altogether a more reasonable level. The quality of Russian eggs, for example, has this year been very fine, and some purchasers in the Old Country, usually given to buying Canadians, have worked almost entirely on the Russian. Danish eggs have this year been only slightly higher than they were two or three years ago, in striking contrast with those from this country.

⁂

—The American Lumberman says that the exports of lumber from the United States into Canada last year totalled 183,656,000 feet, almost double what was imported in 1902, and 23,270,000 feet more than in 1903. Only the United Kingdom took more United States lumber than did Canada in 1904, says the Lumberman, and less than 12,000,000 feet more.

⁂

—The council of the Halifax Board of Trade has decided, we are told, to hold weekly meetings hereafter. The board's regulations provide for the appointment of sub-committees, the chairmen of which shall be members of the council. The chairmen of the committees are as follows: Arbitration, A. MacKinlay; Banking, H. A. Flemming; Membership and Rooms, I. C. Stewart; Immigration, J. E. DeWolfe; Transportation, G. S. Campbell; Freight Rates, J. E. DeWolfe; Manufactures, W. J. Clayton; Finance and Insurance, G. E. Faulkner; Tourist, L. J. Mylius; Reception, Alex. Stephen; Mining, A. McNeill; West India and Fisheries, C. H. Mitchell; Hardware, A. M. Bell; Grocery, James Billman; Dry Goods, S. D. Boak; Pilotage and Harbor, H. L. Chipman; Tariff and Customs, O. E. Smith; Flour, Feed and Commission, J. P. Cox; Retail, T. S. Bowser; Press, G. E. Faulkner; Professions, A. M. Bell.

—A new company formed in Halifax is the Shipbuilding and Investment Company. Its object is the furtherance of the iron shipbuilding industry. The company has elected directors as follows: Mr. Hunter, of the firm of Swan & Hunter, shipbuilders at Newcastle, Eng.; George S. Campbell, George Stairs, John Longard, B. F. Pearson, J. A. Johnson. The company has been incorporated. The directors have elected George S. Campbell president; J. A. Johnson, vice-president; G. F. Pearson, secretary-treasurer. An excellent site has been secured by the company on the Dartmouth side of the harbor, with a water frontage of 1,000 feet and a good depth, containing ample land for all purposes.

⁂

—An Associated Press dispatch from New York says that with the recent rise in wages acceded by the Master Builders' Association, bricklayers will now be receiving the highest pay in their history. This will now amount to 70 cents per hour for an eight-hour day, and with double remuneration for overtime. In the busy time bricklayers generally work twelve hours per day, so that, figured out on this basis, their earnings are likely to be in the neighborhood of $11.20 per day, or, say, $67 per week.

⁂

—The movement in favor of good roads in the country districts of Ontario seems to be making satisfactory progress. Victoria county council has just passed a by-law adopting a county system of roads, and will raise $100,000 to commence improvements on the 200 miles of roads to be taken over. The councils of the United Counties of Dundas, Stormont and Glengarry will meet on June 19 to consider the question of adopting a similar system. Essex and Halton counties are also swinging into line with similar purposes in view.

⁂

—M. Adelard Turgeon, Minister of Agriculture for the Province of Quebec, speaking of the manner in which United States capital has built up Shawinigan, Grand Mere and other sections in Quebec, asks the pertinent question: "Why should not English, French, and Belgian capital be attracted hither? All that north shore of the St. Lawrence, hitherto deemed inaccessible and inhospitable, barely covered with stunted firs, is cut," said he, "by streams which might be termed gigantic rivers if they did not fall into the St. Lawrence. On each of these rivers there are hundreds of falls. On the Manicouagan river, at a few leagues only from the sea, there are falls which, in volume and power, far excel what has hitherto been deemed the incomparable cataract of Niagara. All these northern rivers carry between their hitherto unknown banks forces and energies of which it is impossible to specify the magnitude. It is from the north that prosperity will come to us. We are hemmed in to the south between the St. Lawrence and the American boundary line, but to the north an immense empire, with its still virgin resources, beckons to our ambition."

⁂

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, March 2nd, 1905, as compared with those of the previous week:

	March 2.	Feb. 23.
Montreal	$24,550,148	$22,461,033
Toronto	19,452,845	16,973.992

PUBLIC OWNERSHIP.

Editor Monetary Times:

Sir,—You have often dealt with matters of importance to the country at large. I wish now to ask your help in showing where the Public Ownership idea is misleading Canadians as well as others. This policy not only involves the serious risk of many millions of pounds sterling, but affects private enterprise, and even the very Government of a country. Ought not the borrowing of money by corporations and like bodies to be applied on enterprises other than on such necessary works as sewerage to be put down in this instance to the unwholesome desire of those bodies for power? Would it not be well for land and house property to remain a safe investment for those who need it? At the present time are not rates and taxes liable to fluctuate to an unknown extent? The cotton manufacturing town of Preston (England) is an example of this. There the rates are about ten shillings in the pound; so, for a house on which a rental of forty pounds was paid, twenty would go in taxes; and this, from a property owner's point of view, is not the full extent of the evil, for, had it not been for municipal enterprise, rents might have advanced; and further, there are many houses from which no rental at all can be obtained as they remain unoccupied.

The time, no doubt, is still in the memory of some of us when it was considered of vital importance that the Government and local authorities should employ as few men as possible. At the same time it is only fair to mention that the Government carriage of letters was tolerated; but, comparatively speaking, this service does not call for a large body of men. Does it not seem that strikes are inevitable? In this respect men under Government employ cannot be said to have proved an exception. (In the colonies we have Australian Government railway employees as an instance.) Then, again, can we imagine how disastrous the consequences of a strike would be in Canada, or in a country as much developed as that of our neighbors across the line, if all the railways were worked by the Government? Naturally another course would have been open for the Government to pursue, and that to agree to all demands from the men, and from time to time saddle the country with the extra cost. That this state of affairs could and would probably happen should alone convince us that trading is out of the sphere of governing bodies. Should not their very existence imply that they are a disinterested organization that is capable of acting impartially, and making laws for the benefit of the whole community.

Why should not a town, if it has rights to dispose of, sell them in the open market, and if a fair offer is not made in cash, let there be a reserve, to include a liability to pay a percentage of the net profits realized from such undertaking. However, as far as possible, one must hold that corporations and other governing bodies should have no share in the profits, as this would not tend to diminish the laws for the protection of the public. The following statements, which I have copied from the Stock Exchange Gazette (of London) give some idea of the lengths to which this folly has been allowed to run in England:

"Many municipalities are already acting in competition with the banks, but if the scheme which has now been brought forward by the Islington Borough Council is adopted as a model by other corporations the situation will be seriously aggravated. In looking out for a facile and cheap mode of getting money the expedient of inviting deposits from the public, repayable at three months' notice, has been hit upon!" "So far as bankers are concerned, the evil is too patent to require much insistence, seeing that the municipalities do not, if they could, make any secret of their having established themselves as competitors with the banks for deposits. It is largely due to this competition that the banks have been complaining of 'poverty.' They are unable to pay the rates given by the municipalities, and are additionally handicapped by the circumstance that whereas the latter keep no reserves, they (the banks) are constrained to do so." "That it would be extremely injurious goes without saying. It is equally certain that the banks would have every reason not only to protest against so dangerous an invasion of their sphere, but to protest effectively. Their interests are in this matter identical with those of the general public. The money, or, at all events, the bulk of the money, they have on deposit is employed in advances or discounts to trading customers, and, if a large portion of it were to go to municipal bodies, it would be withdrawn from ordinary trade channels, and lead to an all-round enhancement in the price of floating capital." "The banks would thereby be injured in their business, and with them their customers." "In this way industrial, commercial and financial enterprises tend to become more and more shackled and obstructed in proportion to the volume of floating capital thus withdrawn from the banks to be sunk in unremunerative channels."

"At the end of March, 1902, which is the latest date to which official returns on the subject carry us, the outstanding borrowed capital embarked in municipal 'reproductive' undertakings in England and Wales amounted to £100,786,000. The average annual gross income for the four years to that date was £13,041,000; working expenses, £8,228,706, and the net profit £378,281 after repayments of principal, payment of interest and allowance (£193,274) for depreciation. The net profit on this showing is at the rate of, roughly, ⅜ per cent. per annum." "Much of this profit was quite illusory, because insufficient allowance was made for depreciation of machinery, plant, etc., nothing for the taking up and relaying roads, which outlays were charged to 'road improvements,' or repairs, while the salaries of officials and clerks were charged to the town clerk's department, and other outgoings to borough engineers and borough accountants' departments." "In the light of such facts as these the foregoing 'profit' of ⅜ per cent. on the total borrowed capital engaged would probably be converted into an appreciable, and even serious, loss on the application to the accounts of sound principles of bookkeeping." "Again, as regards these so-called 'profits': they cannot be considered as such except in rare instances from the point of view of the ratepayers, because it is never sought to show what is the extent of the reduction in the income from the rates due to the extinction of private enterprises which previously contributed large sums."

Between 1894 and 1902 the total debt of the English municipalities increased from £265,000,000 to £407,000,000, or about 53 per cent., while the Imperial debt rose in the same interval from £669,000,000 to £765,000,000, or about 14 per cent., and local taxation has expanded over 100 per cent. These facts should give pause to public ownership enthusiasts.

Yours faithfully,

T. Noble.

Tomstown, Ont., 24th Feb., 1905.

⁂

BELL TELEPHONE COMPANY.

At the annual meeting of the Bell Telephone Company, held in Montreal a week ago, the report and financial statement were submitted. Forty odd shareholders were present, representing 57,000 shares of stock. Some interesting facts and figures illustrating the remarkable growth of the company during the twenty-five years of its existence were given.

The total receipts for the year amounted to $2,838,000; the expenses, including bond interest, etc., totalled $2,231,000. The net revenue for the year 1904 was $701,000. Of this sum the dividends took $588,000, leaving the sum of $113,000, which was carried to reserve, accident and contingent account. The latter account, with the additions of $479,000 premium on stock, and $50,000 added to it this last year, now amounts to $1,845,000. The 25,000 shares of new stock issued last year were readily taken up at a premium of 25 per cent. Half a million of the proceeds was used in paying off a loan from the banks.

Mr. C. F. Sise, the president, became reminiscent. "Twenty-five years ago," he said, "the company began business in Canada with a capital of $397,000. To-day the capital is just a trifle short of eight millions in stock, and the bond issue $2,000,000. The company has power under its charter to issue up to ten millions. In 1885, the long

distance mileage amounted to 2,000 miles; to-day it is 32,000 miles; ten years ago there were 69,000,000 exchange connections during the twelve months; now there are 228,000,000 during the same period—say 620,000 per day. Ten years ago the subscribers throughout Canada numbered 29,000; to-day there are 66,000 instruments earning rental."

An idea of the extent of the company's operations may be gathered from the statement that the company now operates 475 exchanges and 789 agencies, with 66,160 sets of instruments earning revenue. During the year just past 8,988 new subscribers were gained, and 1,242 miles of wire added to the long distance system, which now comprises 32,211 miles of wire on 7,866 miles of poles.

Eight years ago, said Mr Sise, the company had installed apparatus in Montreal under the delusion that it was large enough for all time; now they had been obliged to abandon this for larger switchboards.

At the present some thirty municipalities in Canada have given the Bell Company exclusive rights. The company now owns, through process of gradual acquisition, a number of valuable buildings throughout Canada, and on May 1st the company will move into its new building in the East End of Montreal.

The board of directors and the officers were all re-elected as follows: C. F. Sise, president; Hon. Robert Mackay, vice-president; E. P. Fish, Robert Archer, Wm. R. Driver, Hugh Paton, Charles Cassils, Thos. Sherwin.

⁂

AN OBNOXIOUS EIGHT-HOUR LAW PROPOSED.

Representatives of the various ore-smelting works in British Columbia went to Victoria some ten days ago to protest against the passage of a bill which has been brought into the Legislature of that Province providing for a maximum eight-hour law in smelters. On February 23rd a mass meeting was held in Trail, presided over by the mayor of the town, to discuss this bill. About 300 persons were present, business men, miners and smelter employees, and a resolution of the following purport was unanimously carried:

"As it was felt that the passage of the bill would add a burden to the mining and smelting of the low grade ores of this district which it would be impossible for them to sustain;

"And whereas, a bill has been introduced in the Provincial Legislature, providing for a maximum eight-hour law in smelters, which bill, if passed, will, in our opinion, have the effect of disturbing the existing pleasant relations between smelter employees here and the smelter management, resulting either in a corresponding reduction in wages, or else in large labor disputes, and the closing of mines and smelters for an indefinite period, resulting in great financial loss to ourselves and the community generally; therefore, be it resolved, that we, the business men of Trail and employees of the Canadian Smelting Works, in mass meeting assembled, do petition the Government to avoid any legislation which may have the effect of bringing on these conditions."

⁂

GUELPH AND ONTARIO INVESTMENT SOCIETY.

This society has maintained the volume of its business in the year 1904, having earned net profit enough to pay its usual eight per cent. dividend, to add $6,000 to reserve, and to carry $6,160 forward. The reserve amounts to $187,000 on a paid capital of $444,000, and the total assets are $1,939,531. The obligations of the society, both in the shape of deposits and debentures, are slightly larger than a twelve-month ago. It has the considerable sum of $110,000 cash on hand and in bank. The report states that the society's business in Ontario and the Northwest continues to prove satisfactory and profitable; also that payments of interest and instalments of principal were well met during the year.

⁂

WINNIPEG INDUSTRIAL EXHIBITION.

The fourteenth annual meeting of the shareholders of the Winnipeg Industrial Exhibition Association took place last week, the chair being occupied, in the absence of the president, Mr. J. T. Gordon, M.P.P., by the mayor of the city. The reports of the various officers were considered very satisfactory. The chairman, in putting the motion for the adoption of the report, said a debt of gratitude was due to the Exhibition Board, who had given their time and talents to make the Dominion fair of 1904 a success. And he used the opportunity to make some important suggestions. In a short time, as the city and the fair grew, it would be unreasonable to expect gentlemen to devote their time to this work as in the past, and the city would have to assume the whole responsibility. The fair would have to be recognized as a civic institution. This, he thought, should be taken up by the city council and the Exhibition Board

at an early date. He strongly favored the idea of Mr. Heubach and others of converting the grounds into a park. He had felt that the only thing to be ashamed of in connection with the Dominion Exhibition last summer was that the grounds were not in the condition in which they should have been. If they had been used as a park the task would have been much easier. The following gentlemen were elected directors: J. T. Gordon, I. M. Ross, G. F. Galt, F. W. Drewry, D. E. Sprague, F. W. Heubach, A. A. Andrews, G. J. Maulson, J. A. Mitchell, William Whyte, G. H. Greig, Joseph Maw, William Brydon, A. L. Johnson, John Arbuthnot, Hugh Sutherland, W. Martin.

* * *

ANOTHER SYDNEY ENTERPRISE.

Sydney, C.B., is to have another large industry, second in importance only to the steel works. Arrangements have been completed, it is said, for the building of a large plant for making cement from slag, one of the by-products of the Dominion Iron and Steel Company. The plant is to cost about a quarter of a million dollars, and will be the only one of the kind in Canada. The site has been selected close to the steel works. The company, called the Sydney Cement Company, is capitalized at $500,000, and the capital is largely English. Its capacity will probably be 500 barrels a day, and a cooperage with a capacity of 50,000 barrels a year is also proposed to be built. The plant is to be of steel, and will probably be finished in July. The city council of Sydney has granted the company a bonus of $10,000, exemption from taxes for twenty years, and low water rates, providing the company manufacture not less than 25,000 barrels of cement a year. Construction work has been begun, the contract having been awarded to C. J. Curtis, of New York.

* * *

—The council of the Institute of Actuaries of Great Britain have arranged for the delivery of a series of six lectures on "The Theory of the Construction of Tables of Mortality, and all similar Statistical Tables in use by the Actuary." Mr. G. F. Hardy, F.I.A., is the lecturer. The first lecture was delivered on the 20th of February. They are to continue throughout the month of March.

Meetings

LANDED BANKING AND LOAN COMPANY.

The twenty-eighth annual meeting of the shareholders of the Landed Banking and Loan Company was held in the company's office, in Hamilton, on Wednesday, 15th February, at noon, the following shareholders being present: Matthew Leggat, Hon. Thomas Bain, Charles Mills, S. F. Lazier, K.C.; Thomas Leeming, E. B. O'Reilly, M.D.; Alex. Main, A. H. Moore, Gordon A. Gates, C. S. Scott, A. Woolverton, M.D.; J. Orr Callaghan, W. H. Ballard, W. H. Wardrope, and W. F. Findlay, F.C.A.

The president, Matthew Leggat, occupied the chair, and the treasurer, C. W. Cartwright, acted as secretary.

The secretary read the motion convening the meeting; also the minutes of the meeting held the previous year, which were confirmed.

Report.

The directors submit to the shareholders the twenty-eighth annual report of the company's affairs, together with the profit and loss account and balance sheet for the year ended 31st December, 1904, as duly certified by the auditors appointed by the shareholders.

The net profits for the year, after deducting all charges amount to	$70,574 56
Added to which is the balance carried forward from last year	1,210 87
	$71,785 43

Which amount has been appropriated as follows, viz.:

Two half-yearly dividends at the rate of six per cent. per annum amounting with the Government and income tax to	$43,220 00
Added to the reserve fund	25,000 00
Carried forward to next year	3,565 43
	$71,785 43

The customary examination of the company's securities was made by a committee of your directors and due provision made for every known loss or probable shrinkage.

Mortgage repayments have been well met, borrowers not only paying interest, but in many cases making partial payments of principal in advance of their obligation, to which the directors give reasonable encouragement.

The company's funds have been actively employed and at somewhat better rates of interest.

With the addition of $25,000, the reserve fund stands at $240,000, over thirty-four per cent. of the paid-up capital.

The directors record with deep regret the death of Lt.-Col. Henry McLaren, one of the first directors of the company.

The assets show an increase of $101,610.31, and now amount to $2,380,812.05.

The directors again acknowledge the efficient services rendered to the company by their agents in Scotland, Messrs. MacAndrew, Wright & Murray.

The officers of the company have performed their several duties to the satisfaction of the directors.

All of which is respectfully submitted.

MATTHEW LEGGAT, President.

Hamilton, 31st January, 1905.

We hereby certify that we have examined the books, accounts and vouchers of The Landed Banking and Loan Company for the year ended 31st December, 1904, and have found the same correct, and the foregoing statements are in conformity therewith.

We have also examined the securities and find them in perfect order and correctly set forth in the above statement, and in the securities book.

W. F. FINDLAY, F.C.A.,
WM. MARSHALL,
Hamilton, 31st January, 1905. Auditors.

The adoption of the report was moved by Matthew Leggat, seconded by the Hon. Thomas Bain, and was carried unanimously.

On motion, the following were re-elected directors for the ensuing year: Samuel Barker, M.P.; Hon. Thomas Bain, M. Leggat, Charles Mills, C. S. Scott, and John Waldie.

W. F. Findlay, F.C.A., and William Marshall were re-appointed auditors for the ensuing year.

The usual vote of thanks to the auditors and directors having been passed, the meeting adjourned.

At a subsequent meeting of the directors, Matthew Leggat was re-elected president and John Waldie, vice-president.

⁂

AGRICULTURAL SAVINGS AND LOAN COMPANY.

The thirty-third annual general meeting of this company was held in London, Ont., on Thursday, 16th February, 1905, at 2 p.m.

Balance of profit and loss account	1,125 69	
		$ 900,231 69
		$2,447,613 51

C. P. BUTLER, Manager.

The president moved the adoption of the report, and stated the earnings had been the largest in the history of the company, and that the reserve fund was now one-quarter of a million dollars. Over 95 per cent. of all its loans were on farm and city property in Ontario, over which the board personally gave great care and attention. Depositors and debentures had therefore a security which was undoubted.

The retiring directors were re-elected, and at a subsequent meeting, Mr. W. J. Reid was elected president, and Mr. Thomas McCormick, vice-president.

GUELPH AND ONTARIO INVESTMENT AND SAVINGS SOCIETY.

This society held its annual meeting in Guelph on the 15th February, when the twenty-ninth annual report was presented. The balance sheet and profit and loss account will be found below:

The names of the directors are as under: A. B. Petrie, president; Robert Melvin, vice-president; David Stirton, Geo. D. Forbes, H. Howitt, M.D.; John M. Bond, Charles E. Howitt.

FINANCIAL STATEMENT FOR THE YEAR ENDING 31st DECEMBER, 1904.

Profit and Loss.

Dr.

		$ 654,920 29

J. E. McElderry, Secretary.

Auditors' Certificate.

We have audited the books and vouchers of the Guelph and Ontario Investment and Savings Society monthly during 1904 and found them correct. We have also examined the mortgages, and calculated the value and earnings of same, checked the savings department balances, proved the bank balances, and certify that the foregoing balance sheet is a correct statement of the society's affairs to the 31st December, 1904.

J. W. Kilgour,
J. M. Scully, F.C.A.,
Auditors.

Guelph, January 23rd, 1905.

⁂

QUEEN CITY FIRE INSURANCE COMPANY.

Established 1871.

Report of the directors to the thirty-fourth ordinary general meeting, held at the offices of the company, Queen City Chambers, Church Street, Toronto, on Tuesday, 28th day of February, 1905.

Report.

The directors have much pleasure in submitting to the shareholders the revenue account and profit and loss account for the past year, and the balance sheet, showing liabilities and assets on 31st December, 1904.

The number of policies in force at the end of the year was

6,122, covering at risk, after deducting the re-insurance, the sum of $5,179,410.

The premium account shows a very substantial increase over the preceding year.

The usual dividend has been declared and paid.

In accordance with the Act of Incorporation all the directors retire and are eligible for re-election.

THOS. WALMSLEY,	HUGH SCOTT,
Vice-President and Secretary.	President.

REVENUE ACCOUNT FOR YEAR ENDING 31st DEC., 1904.

Dr.

Debtors and creditors balance	4,400 25
	$166,417 01

We hereby certify that we have audited the books and examined the vouchers and securities of the company for the year ending December 31st, 1904, and find the same correct, carefully kept, and properly set forth in the above statements.

HENRY W. EDDIS, F.C.A.,
J. ERNEST HOUNSOM,
Toronto, February 16th, 1905. Auditors.

The report was adopted, and the following board viz.: Hon. Justice Maclennan, J. D. Chipman, J. G. Scott, K.C.; Thomas Walmsley and Hugh Scott, were unanimously elected, and at a subsequent meeting thereof, Hugh Scott was re-elected president, and Thos. Walmsley, vice-president.

MILLERS AND MANUFACTURERS INSURANCE COMPANY.

STOCK AND MUTUAL.
ESTABLISHED 1885.

The general annual meeting was held at the company's offices, 32 Church Street, Toronto, on Friday, February 24th, 1905. The president, Mr. James Goldie, occupied the chair; and Mr. Thomas Walmsley acted as secretary.

Report.

Your directors beg to submit the twentieth general annual statement of the business of the company, comprising revenue account for the past year, and the balance sheet showing the liabilities and assets on 31st December, 1904.

The total number of policies in force at the end of the year was 879, covering at risk, after deducting re-insurance, the sum of $2,331,246.

When we take into consideration the abnormal fire waste of the past year, including the Toronto conflagration, the statements now before you should be considered satisfactory.

The retiring directors this year are: A. Watts, Wm. Bell, and R. Northcote.

All of which is respectfully submitted.

HUGH SCOTT,	JAMES GOLDIE,
Managing Director and Secretary.	President.

CORRESPONDENCE INVITED.

Mercantile Summary.

A syndicate in St. John's, Nfld., headed by Reynolds & Co., is negotiating for the purchase of the North Sydney, C.B., marine ship property, and will operate it on an up-to-date scale.

The Richelieu and Ontario Navigation Co. is offering to sell to the city of Montreal the steamer "Cultivateur," which plies between it and St. Helen's Island, together with the wharves and sheds used by it on both sides. The price asked is $40,000.

The Ontario and Minnesota Power Co., Limited, Toronto, capital stock $3,000,000, is incorporated under Dominion laws for the purpose of acquiring water powers for the production of electricity. Ed. W. Backus, of Minneapolis, is a provisional director.

An offer of compromise at the rate of 50 cents on the dollar is made by D. R. McDonald, who began general storekeeping at Westville, N.S., in the fall of 1902. His liabilities are stated at $6,800, a portion being due to G. W. Munro, who has been generally looked upon as a partner.

A news item from Sault Ste. Marie, dated 27th February, said that the first stamp mill product of the Shakespeare gold mine, to the value of between three and four thousand dollars, was shipped from Webbwood on that day. The indications point to the property being a good paying proposition.

Brockville, Ont., council will submit a by-law to the people to raise debentures for $30,000 to be used as a loan for the purpose of inducing the Brockville Carriage Company to rebuild their works in the town. They were almost destroyed by fire recently. The company must show a yearly payroll of $60,000. At the same time a by-law will be voted on for an appropriation to buy a site for the D. H. Burrel & Co., who purpose erecting a factory for the manufacture of dairy supplies.

From London is announced the death of M. H. Fitzpatrick, of New Glasgow. He had been in London for some time endeavoring to float the bonds of the Nova Scotia Eastern Railway Company. Mr. Fitzpatrick was one of the most prominent contractors in the Eastern Provinces of Canada, had large contracts on the C.P.R., and not long ago completed the Midland Railway. He was also at one time president and chief owner of the Eureka Woollen Mills, at Eureka, in Pictou Co, N.S. He represented Pictou County in the House of Assembly from 1897 to 1901. The deceased gentleman was one of the leading citizens of Nova Scotia.

Twenty thousand dollars is the sum of obligations of Edwin G. Vroom, in the furniture line for nearly thirty years at St. Stephen, N.B., and of late the only partner in the firm of Vroom Bros. He is reported in embarrassed shape as the result of an unprofitable venture in a wood-working factory and losses through accommodation. He proposes to pay creditors 33 1-3 per cent., and if successful in this direction will endeavor to form a joint stock company to take over the business.

Mercantile Summary.

The liabilities of A. Dufresne & Co., carriage-makers at St. Dominique de Bagot, Que., lately reported in difficulties, and now assigned, are said to reach $7.000.

The Amherst Boot and Shoe Company, of Amherst, N.S., produced $695.000 worth of goods last year, and paid its shareholders seven per cent. This industry was established in 1867.

The assignment is noted of H. N. Lavoie, general dealer at Bic, Que. He began business in 1898, with some assistance from his father, having been previously a store clerk. In 1901 he became embarrassed, and then arranged to pay 40 cents on the dollar.

News comes of the death in England of Sir Robert Jardine. He was one of Britain's great China merchants, with an enormous trade at Hong Kong and Canton, and for many years was a prominent figure on the English turf, winning honors both at horse racing and coursing.

The net earnings of the Halifax Tramway Company last year were $137,523.24, equal to 10⅛ per cent. on the present outstanding capital stock. The dividend is only five. Operating expenses decreased 10 per cent. during the year, but there is a lot of paving and double-tracking to do.

—The annual general meeting of the Paton Manufacturing Company, of Sherbrooke, was held in Montreal last week. The statements presented were considered satisfactory. The following directors were elected: Lord Strathcona and Mount Royal, G.C.M.G., Messrs. D. Forbes Angus, Robert Brodie, Jonathan Hodgson, George Hyde, George M. Loy, Robert Reford; John Turnbull, president; Hon. Robert Mackay, vice-president.

A project is on foot for erecting another big hotel in Montreal, on St. Catherine Street and Dominion Square. It is stated that an option has been secured for the entire block, the time to expire the 1st of May next. The projectors intend to ask the city authorities to allow them twenty feet off the square and accept in exchange twenty feet on the street side, thus giving a width to St. Catherine Street in front of the proposed hotel of about 86 feet.

Forty cents in the dollar is being offered by Joseph Roy, of Beauharnois, Que., doing a general store business in his wife's name, under the style of Joseph Roy & Co. Mr. Roy has had a somewhat eventful business career. Originally he was in the dry goods trade in Montreal, where he failed in 1890, with liabilities of $33.000, which he compromised, but shortly afterwards assigned, and his estate was wound up. He then went farming for a time, but in 1897 opened up in Montreal in the grocery line. He did not apparently meet with much success in this venture, and in 1899 sold out and again went farming, eventually starting his present store business in 1904.

Mercantile Summary.

A. Trudel, in the men's furnishings, Montreal, is offering his creditors 25 cents on the dollar, and J. A. Perron, tailor, Chicoutimi, Que., lately failed, is reported as having arranged a settlement at 30 cents.

The Saskatchewan Bridge Co. wants authority to build and use a bridge for railway and other purposes across the Saskatchewan River from near Strathcona to near Edmonton, with complementary powers.

After an illness of three months, Mr. J. F. Wilson, senior partner in the firm of Wilson, Paterson & Co., importers and general merchants, passed away on Friday last, at the age of sixty-three. He had been actively in business in Montreal for forty years.

The Grand River and Western Power Co. will apply to the Dominion Parliament for authority to raft and drive logs and lumber down the St. John, and to construct dams across that river near Winding Ledges, N.B., to connect with dams from the opposite shore in Maine, and to dig canals, build piers, etc., also to generate electric power and operate mills and factories.

W. R. McInnes & Co. is the name of a new firm of stock and bond brokers which has opened up in the Metropole Building, Halifax, taking the offices formerly occupied by E. F. Smith, of disastrous memory, who failed in the same business, owing between three and four hundred thousand dollars. W. R. MacInnes, the partner, was for a number of years in the Furness-Withy steamship office here before going into the present business.

The Salmon River and Northern Railway Company will apply to the Quebec Legislature for power to construct and operate a railway from Grenville to Monte Bello, thence north along the Salmon River to a point near Lake Papineau, thence northwesterly along the Petite Rouge and North Nation rivers to a point on the Lievre River where it is to be crossed by the Grand Trunk Pacific, with rights also to construct and operate telegraph and telephone lines, and to develop and distribute water and electric power.

The retail dry goods firm of Morrell & Sutherland, in St. John, N.B., reported a fortnight ago as being embarrassed, have now assigned. The liabilities are stated at $17,000, with apparent assets of about $18,000.—T. W. Flett, a sawmiller of Nelson, opposite Newcastle, N.B., is seeking a settlement at the rate of 15 cents on the dollar. He is said to owe $7,000, a considerable proportion being in the shape of a mortgage.—Mrs. H. G. Veness, in the millinery line at Fredericton, N.B., is insolvent and owes about $1,700.—McEwan and Partridge, of St. Peter's, N.B., in partnership in the general store line since the fall of 1902, are making an offer to their creditors of 40 cents on liabilities of some $10,000. They have been reported slow for some time past.

Mercantile Summary.

The Regina gold mine, Lake of the Woods, is to be re-opened after a long cessation of operations. A considerable quantity of new machinery has been purchased already.

A fire early Tuesday morning in Hobberlin Brothers' tailoring establishment in Toronto did damage to stock to the extent of nearly $30,000, covered by insurance. Some slight damage was done to the adjoining New Carlton Hotel.

The Donnelly Wrecking Company of Kingston have contracted with the town of North Bay to put 1,300 feet of submerged sewer pipe into Lake Nipissing, and to lay 330 feet of intake pipe for the new waterworks system into Trout Lake three miles from the town.

The James Williamson Warehousing Company, Limited, Montreal, capital, $50,000, has received a Dominion charter and will acquire the business now carried on by James Williamson as warehouseman and forwarder. J. B. Fraser, of Westmount, and T. Ferguson How, of Montreal, are interested.

A prominent business man of Montreal died a few days ago in the person of Mr. R. C. Jamieson. He was born at Glengarry, Ont., in 1836, and afterwards moved to Montreal, where he founded the well-known firm of R. C. Jamieson & Co., with which he had been connected ever since.

Hamilton & Ayers Co., Ltd., Montreal, has been granted power by the Dominion Government to lend money, guarantee bonds, debentures, etc., and otherwise assist the Chatham Pulp & Paper Co., Limited, the Lachute Shuttle Co., Ltd., and others calculated to enhance the value of the company's rights.

The McDonald block at North Sydney, C.B., was on the 17th inst. totally destroyed by fire at a loss of over $10,000, only partially covered by insurance.

De L. Macdonald's flour mill at Rigaud, Que., which was destroyed by fire last August has been rebuilt, equipped with up-to-date machinery, and is now once more in operation.

Kingston, Ont., street railway has passed into the hands of the bondholders, who hold a mortgage amounting to about $200,000. The bondholders appointed a trustee in the person of Dr. R. V. Rogers, K.C., and he will assume control for the present until matters are wound up. Hugh C. Nickle, present superintendent, will be general manager of the road.

Representatives of the city of Hamilton waited upon the Dominion Government the other day with a plea for a further grant for harbor improvements; and the Hamilton Board of Works has awarded the contract for supplying cement to an Ithaca Company. The price is $1.55½ per barrel of 350 lbs., as against $1.65¾ last year. About 15,000 barrels will be used.

LITERARY NOTES.

The Canadian Forestry Association recently decided to publish a monthly journal devoted to the interests of the association and to the general advancement of forestry. This, it is expected, will do much to enlist public sympathy and support for the movement. Hardly any question can be of greater consequence to the future of this country than a proper conservation of its forest resources. A leading European authority recently, speaking of the whole world, said that at present the consumption of wood is greater than the normal production of the accessible forests, and there is in this production a deficit which is for the moment supplied by the destruction of the forests. Canada's interest, therefore, in the subject should be very keen. The first number of the "Canadian Forestry Journal" is now at hand, and should be of great service in carrying out the objects of the Association. Among the features may be mentioned the following: A sketch of the history of the Association by the Editor; "Canada as a Field for Intelligent Forestry," by E. Stewart, Dominion Superintendent of Forestry; "Forest Influences," Professor J. B. Reynolds. Ontario Agricultural College; "A Glance at Forest Conditions in New Brunswick," G. U. Hay, D.Sc., St. John; "The Forest Resources of the Labrador Peninsula," A. H. D. Ross, M.A., Yale Forest School. The journal is in magazine form, contains 50 pages, and has several good illustrations.

We have received a copy of the new edition of Bryce's Standard Interest Tables, published by Wm. Bryce, Toronto. Business men all acknowledge the saving of time effected by the use of carefully compiled interest tables, but so many of the books of this character having been made at a time when high rates of interest usually prevailed, the publishers, therefore, have acted on the belief that what is wanted is a book containing, in addition to the usual tables, calculations at the rate of one-half per cent. and upwards. These are figured on amounts from $1 to $10,000. The book contains 132 pages, and is sold at $1, or at 75 cents in half-cloth.

Messrs. Graham, Morton & Co., Leeds, Eng., have sent us a handsomely gotten up and illustrated reprint from an article in the London Times describing the machinery erected at various places by this up-to-date engineering firm. It is an apt treatise on the economic handling of material in bulk.

A BUILDING WITHOUT ANY WOOD.

Two Baltimore architects have drawn plans for a building entirely without wood. It will be six storeys, and will have a frontage of 41.5 feet. The entire structure is to be of re-enforced concrete and steel. Even the doors, trims, window sashes and door jambs are to be of metal. The windows will be glazed with wire glass. The frame for the show windows will be of steel, into which the plate glass will be fitted. The side walls, columns and rear walls, as well as the supporting columns of the front walls, will be of concrete. The floors will all have a top-dressing of cement one and a half inches thick. The stairs will be of concrete, with slate treads and wrought-iron ba'ustrades. The elevator shaft will be of concrete, as will also the enclosure around the stairway and the elevator hall. The cellar and roof are to be of cement. In order to eliminate all wood, even the flag-staffs on top will be of steel.—Engineering and Mining Journal.

⁂

A GREAT PIPE LINE.

A great oil pipe-line, starting from Red Fork, will pursue its course across Kansas to Kansas City across Missouri, under the Mississippi river, and across Illinois to Whiting, near Chicago; across Indiana to Cygnet, Ohio, where it will receive a fresh impulse from the largest oil-pumping station in the world; across Ohio and the northwestern corner of Pennsylvania to Olean, N.Y., the junction point of the different pipe lines, and then across New York and northern New Jersey to the refineries of the Standard Oil Company, at Bayonne, N.J., and Newtown Creek, New York City, reaching the latter by a line laid under the Hudson river, Central Park, and the East River. The line, taking in its whole course, is undoubtedly the longest pipe-line in the world.—Engineering and Mining Journal

⁂

SASKATOON BOARD OF TRADE.

The annual meeting of the Saskatoon (Saskatchewan) Board of Trade was held some days ago. The following officers were elected for the current year: President, J. H. C. Willoughby; vice-president, J. R. Wilson; secretary, George Alexander; treasurer, A. E. Young; council, R. H. Currie, F. R. Oliver, J. F. Cairns, W. A. Sutherland, W. J. Bell, T. Copland and A. J. Sparling.

⁂

RAISING THE WIND.

The following story was told by William H. Evans, of the Canada Paint Company, Montreal, to N. H. Stevens, of the Canada Flour Mills Company, Chatham, who were fellow-passengers from the Old Country on a C.P.R. steamship.

Said Mr. Evans: "One sultry day last summer the schooner "Betsy Jane," of Port Rowan, loaded with coal for Chatham, lay in Lake St. Clair becalmed. No Canadian tugs were to be seen. The captain, in despair, ordered the mate to take a punt and row to the nearest telegraph office and wire to the Department at Ottawa as follows:

"'Betsy Jane' becalmed. No Canadian tug in sight. May I employ a Yankee steamer?"

"Back came the answer, brief but to the point: 'No. Use one of Manson Campbell's fanning mills!'"—Chatham News.

⁂

—An extraordinary suite of furniture has just been made in London. Constructed throughout of solid silver, it is destined for the eastern palace of an Indian prince. A massive four-posted bedstead, which has absorbed a ton of silver; 12 dining-room chairs, 4 tables, 2 divans, a lady's dressing table, and a cabinet made up the suite, which took nearly a year to make. Weighing altogether over four tons, its value is estimated at $75,000.

Development is going on at the new oil fields in Alberta, situate near Waterton Lake, in the eastern foothills of the Rocky Mountains. One company's well has a production now of about 300 barrels of oil per day.

Mercantile Summary

A whaling factory is being erected on Lockhart Channel, Barclay Sound, B.C., for the extraction of whale oil, whalebone, etc., and the manufacture of fertilizer.

Efforts are being made by the Levis County Electric Railway Company to raise enough money to continue the running of the road in a proper manner. The sum required is $35,000, of which $10,000 is already promised.

The Commercial Cable Company is preparing to construct another cable across the Atlantic on account of the increase in its business. The contracts, it is stated, will probably be awarded to English companies, their liabilities for rapid laying of a good quality cable being so much better than any other.

The Laborers' Co-operative Gold, Silver, and Copper Mining Company, Limited, who own mining properties near Golden, B.C., held their annual meeting in Chicago, a week or two ago, and elected directors as follows: D. B. Bisbee, Gust. L. Young, Aug. Nelson, C. E. Nylin, N.P. Strandberg, A. E. Martin, O. D. Hoar, Geo. P. Wells, M. Dainard, L. A. Levin, John Holm, Prof. C. O. Larson, A. A. Holmgren, Ed. G. Janse and Chas. E. Sweiberg, elected (secretary). The work accomplished during the past year was deemed satisfactory and development work is to be carried on energetically.

The city of S. Thomas, Ont., has at length arrived at an agreement with the St. Thomas Street Railway, and the Southwestern Traction Company, whereby the traction company's cars will use the street railway lines in St. Thomas en route from London to Port Stanley and return. The Southwestern Traction Company is to have a fifty-year franchise to run over its connecting terminals with the city street car lines. A twenty-five year agreement for the use of the city lines on the basis of a scale of payments, divided into terms of five years each. It is hoped to have cars running to Port Stanley by July 1st, and to St. Thomas some time before that date.

Quebec lost on the 26th ult. one of its most prominent cittizens in the person of Zephirin Paquet, who died at the age of eighty-six. He was the founder of the great departmental dry goods store in that city bearing his name. It dates from 1850. The deceased had been ailing for the last six years, and the business has been carried on during the last four years, since the death of the Hon. J. Arthur Paquet, under the management of Mr. G. A. Vandry. The business which Z. Paquet started, and of which furs was a very large department, has had a wonderful growth. He built up the retail department, while the wholesale and manufacturing branches have been largely the creation of his son, the late Hon. J. Arthur. The factory and stores will continue, we understand, to be carried on as at present.

The customs collections on imports at Montreal for February show an increase of $14,222 over the corresponding period of last year. The figures are: February, 1904, $865,749.65; February, 1905, $879,971.89.

For the first time in the history of the United States, says the New York Commercial, the gross earnings of the railroads of the country during the current year are expected to exceed $2,000,000,000. The amount earned in 1903 was $1,908,000,000. Since 1903 there has been no compilation of the earnings of all the railroads, but it is believed that the earnings during 1904 did not exceed the figures for 1903 by more than $50,000,000. The year 1890 was the first year in which the earnings of the railroads exceeded the $1,000,000,000 mark.

The improvement which, through the addition of the Angus shops in Montreal and otherwise, have been made in the capacity of the Canadian Pacific Railway to meet the requirements of the Canadian public, may be seen by perusing a list of the company's present equipment in the way of cars and locomotives. It now has in service 1,020 locomotives, 1,977 passenger cars, and 32,530 freight cars, besides 26 dining and 110 sleeping cars. During the year 1,500 freight cars were put into service, seventy-three additional passenger cars of the most approved pattern were placed in service last year, and that 50 more are on order. During the year mentioned five new dining cars were delivered and seven new sleeping cars. Seventeen new sleeping cars are building.

The Naisbitt Co., Ltd., Toronto, manufacturers of stock food, was incorporated May 31st, 1904, succeeding to the business formerly carried on by Mrs. Susan A. Naisbitt, J. W. Milburn, and J. A. Brain, under the style of the Naisbitt Co. (not incorporated). The authorized capital stock of the present concern is $40,000; of this it is claimed $26,300 has been paid up, and of that amount the sum of $22,000 paid-up stock was allowed to Mrs. Naisbitt, Brain, and Milburn for their business. A meeting of creditors, shareholders, and contributaries of the company was held on Friday, the 24th ult., at the office of the trustee, E. R. C. Clarkson, in this city, when an inspector was appointed to sell the assets. Definite corroboration as to the amount of cash invested in the business is not obtainable. According to the statements of members of the company their paid-up capital is represented largely by value placed upon good-will, and what could be realized for that is questionable.

The largest coal carrying fleet that has yet sailed out of Sydney harbor is to be employed by the Dominion Coal Company next season in the St Lawrence river trade. The fleet will comprise ten chartered boats, besides the company's own steamers Coban, Louisburg, Cape Breton, Bonavista and Cacouna. They will also have the steamer Turpin chartered for the coast trade alone. The James Ross, called after the president of the company, is a new steamer now in course of construction at Middlesboro, England. She is being built specially for coal trade, and will have a capacity of 7,000 tons.

It is stated that there is this year a strong probability of the coal, iron, and also brick fields in the neighborhood of New Westminster, B.C., being developed on an extensive scale. The principal property, which is likely to be the site of a thriving industry at an early date, is a large area of fire and brick clay lying close to Burnaby Lake, on the Brunette river, and owned by a number of local men. They are at present making arrangements with outside capital to have a large brick and tile works erected and placed in operation. Another property likely to be developed soon, which was well known in former days, is the Golden Ears copper and gold mine at Pitt Lake. It is understood that a proposition is now on foot to reopen the mine, which has been tied up for some time past. The smelting facilities for treating the ore are now much better than at the time it was previously operated. Considerable development work will also be carried out this summer on claims in the vicinity of Pitt Lake.

* * *

TORONTO MARKETS.

Toronto, March 2nd, 1905.

Chemicals, Drugs, etc.—A fairly good trade is reported for drugs, by the local markets. Prices are not appreciably changed from last week, and there is no specially new feature. Quinine is steady, while opium is a little firmer. The New York market is reported quiet. Reports from the chemical centres of Great Britain say that the improvement in the export trade keeps up, but that the home trade is dull, orders being only for small requirements.

Dry Goods.—The fact that this week the millinery openings are going on and the weather is good, have caused a heavy influx of visitors into the city, and wholesalers report an exceedingly busy time. It is too soon almost to tell what amount of business for the spring is indicated, but the promise is distinctly good. Dress goods are in particularly good demand, and so in fact is everything of a seasonable character. There is no particular change in buyers' attitude towards the staple lines, prices in which keep quite steady.

Flour and Grain.—The trading in flour is quiet for the moment, though prices seem to have an upward tendency. Ninety per cent. patents are quoted at $4.30 to $4.40 in buyers' bags, eastern or western freights. Not much trade is going in bran and shorts, though prices continue firm, with a rising tendency. Wheat is rather lower and business is dull. Oats are not coming in in large quantities, but it is believed there are considerable supplies waiting for a better market. Buckwheat is scarce and wanted. Other grains are about as before.

Groceries.—While there is a fair movement in sugars, there is nothing new in the situation, and prices remain unaltered. General business is fairly brisk. In fact it has been distinctly better since the improvement in the country roads. Dried fruits are meeting with a normal demand considering the period of the year. Teas are quiet, and coffees average. Canned goods are about as before, with a strong undertone.

Hardware.—Preparations are already being made for the opening of navigation, and the orders coming to hand are quite numerous and satisfactory. This applies to all lines of ordinary shelf hardware in demand during the early spring, while the enquiries for farm implements are also quite good. In metals, the movement is fair and the building trades promise to be active this season, unless strikes intervene which, at the present moment, would appear to be improbable.

Live Stock.—The offerings at the cattle market this week were larger, but there was a steady tone, and they were cleared out without difficulty. The British market for exporters is better, but not enough so to encourage any advance in prices. Steady values prevailed for butchers' cattle. Hogs sold at an increase. Sheep and lambs were in light supply, and the tone was very steady.

Provisions.—Dairy tubs and creameries are still scarce, and rolls are in good demand. Not much cheese in the market and prices are steady. Eggs are a little easier. Potatoes are firm here, though there has been a decline just across the border. Smoked meats are a little firmer in sympathy with the advance in hogs.

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

Wool.—Old-clip prices are still nominal, hardly any business going on. For new-clip it is still too early to make definite quotations.

* * *

MONTREAL MARKETS.

Montreal, 1st March, 1905.

Ashes.—Last week there were some quite fair shipments to Britain, considering the recent small extent of trade, and there are at the moment only about a dozen barrels of pots in store. Quotations are pretty steady for No. 1 pots at $5.40 to $5.45; seconds, $4.90 to $5. In pearls there have been no recent transactions, and prices are more or less nominal at about $7.50 per cental.

Dairy Products.—The situation as regards the great scarcity of butter is unrelieved, it being impossible to meet the local demand, while enquiry for stocks is reported from many outside points. Fine creamery realizes 30c. at the factory, and dairy rolls bring 25c., but little of the latter is now reaching dealers here. In cheese there has been practically nothing doing for some weeks, neither buyers nor sellers being apparently disposed to concede a point, and under the circumstances nothing in the shape of a definite quotation is at all possible. The shipments of cheese via Portland and St. John last week amounted to 9,325 boxes, and of butter to 1,017 packages.

Dry Goods.—The millinery openings this week have been well attended and brisk as regards numbers, but the volume of actual buying is not considered as large as some years, and the usual number of general dry goods buyers have not been noticed among the dry goods warehouses. Orders from travellers are coming in rather better than a week ago, but in a good many sections considerable difficulty is still experienced in getting from place to place. General collections can hardly be called more than fair. With regard to values there is nothing new.

Groceries.—The movement in this line for the past two or three weeks has been comparatively restricted, attributable no doubt to the bad state of the country roads because of snow; and general remittances are on the slow side for the same reason. As regards prices there is little new. Sugars are steady at $5.65 for standard granulated at the factory in barrels, with yellows ranging from $5.15 to $5.45; refiners report the demand from jobbers as quite moderate at the moment. Molasses quotations continue to rule high at the island, and importers are asking 33½c. for new molasses in quantity to reach here in May and June. Jobbers are quoting 33c. from stock in puncheons, and 35½c. in barrels. Teas continue to move sluggishly, and rule easy in price. Canned goods rule very firm, $1.30 stiff being asked for tomatoes, and $1.20 for corn.

Hides.—Receipts from the country are much affected by the bad roads, and the volume of business has been quite light for the past week or two. Prices of beef hides are steadily maintained, though the grub is much in evidence, and dealers are still buying on the basis of 9½c. per lb. for No. 1. For lambskins 10c. is the figure, and $1.15 to $1.20 each for sheepskins. No. 1 calf brings 13c. per lb., and No. 2 11 cents.

Oils, Paints, etc.—Orders are reported as coming in very fairly, and some moderate volume of shipping is now being done, but the great volume of goods sold will be held until the inauguration of spring freight rates on April 1st. Stocks of window glass are getting in narrow compass, and there is

THE
DOMINION LIFE ASSURANCE CO.

SIXTEENTH ANNUAL MEETING.

The Sixteenth Annual Meeting of this progressive Company was held at the Head Office, Waterloo, Ont., on Friday, February 10th.

Shareholders were present representing 3,750 out of the total number of 4,000 shares.

Mr. P. H. Sims, Vice-President, occupied the chair, and moved, seconded by Hon. Senator McMullen, the adoption of the Directors' Report, which exhibited the following figures :—

	1903.	1904.	Increase Per cent.
Applications received	552	668	21
Amount issued	$816,648 00	$916,295 00	12
Net gain	332,759 00	422,538 00	27
Net Income	198,034 81	218,398 52	10
Gross expenditure	78,877 16	92,665 00	17
Assets	847,546 00	953,564 00	12½
Liabilities	685,309 00	770,502 00	12
Surplus over all liabilities	62,237 00	83,061 00	33
Ratio of assets to all liabilities	107.9 p.c.	109 5 p.c.	
Rate of interest earned	5.40 p.c.	5.70 p.c.	

The usual dividend at the rate of eight per cent. on the paid-up capital of the Company was declared.

The report was discussed by Senator McMullen and other Directors, and by several of the Shareholders present, including Mr. H. P. Moore, of Acton; Mr. Alex. McCall, of Simcoe; Mr. George Moore, of Waterloo, and others, all of whom expressed themselves as greatly pleased with the splendid position of the company, vieing as it does with the very strongest of the older companies, and at the same time yielding a satisfactory dividend to its Shareholders, while its profits actually earned and paid to its policyholders are probably unsurpassed in Canada at the present time. The Directors, the Management, the medical men and the agents all received hearty votes of thanks, which were cordially responded to.

After the adoption of the Reports a ballot was cast for the election of Directors, resulting in the unanimous re-election of the old Board as follows:—Thos. Hilliard, Hon. James McMullen, David Bean, Walter Wells, Thos. Trow, W. Vandusen, Hon. S. Merner, Dr. Parke, P. H. Sims, S. B. Bricker, Geo. D. Forbes, Thos. Gowdy and F. Colquhoun.

A suitable resolution of condolence with the family of the late President, Mr. Chr. Kumpf, was passed, after a number of the Directors had expressed their sincere appreciation of his services to the company and their regret at his loss.

After the close of the Shareholders' meeting, the Directors met and organized the new Board by electing Thos. Hilliard, President and Managing Director; P. H. Sims, S. B. Bricker and Hon. Jas. McMullen, Vice-Presidents. The members of the Board residing in Waterloo, with the Vice-Presidents, constitute the Executive Committee.
